Introduction and document purpose

Pagero Group builds the world's largest, open business network – so you can reach any business, anywhere in the world. No matter how many borders your operations may cross or how many systems you are connected to, we take care of the technical and regulatory requirements across your entire order-to-cash, purchase-to-pay and freight processes. We give you data accuracy and security, transparency and real-time visibility – through a single connection.

At Pagero Group, we believe that technology supports sustainability. That's why we are committed to helping businesses become 100% paperless, supporting resource efficiency, transparency and business continuity.

The main purpose of this country compliance report is to provide the reader with an in-depth analysis of the focus country's laws, regulations, and process with regards to e-invoicing and other trade documents. The analysis considers topics such as business requirements before switching to electronic invoices, e-document creation, e-document distribution, integrity and authenticity, and, finally, e-archiving.

This document guides how Pagero solutions support customers in the focus country to meet local regulations and serves as a supplement to Pagero General E-invoicing Process Description.

1. Terminology

This section outlines general and country-specific terminology for Norway, which will be used throughout the whole document.

Term	Explanation
DFO	Business response from the buyer to the supplier regarding the received document, which can be positive (acceptance) or negative (rejection), and must be issued after the validation of the received document with MH
Digdir	Where traders are required to send their tax documents, such as invoices, to a predetermined, often, state-owned infrastructure. The infrastructure conducts mandatory checks before the documents are to be considered issued, however, the infrastructure generally offers no exchange to the receiving party
ELMA	Is the name of the application response from the clearing infrastructure notifying the issuer whether the e-document has been approved, or rejected. The term is used by Pagero unless there is any country-specific term for this type of responses
Interoperability as a CTC	Is the process performed by the buyer or its service provider when receiving invoices and having them confirmed/validated by the country-specific mandatory infrastructure to ensure that the buyer processes a legally valid fiscal document
Peppol	Trading parties exchange e-invoices in a predefined format and a predefined method, either directly with each other, or typically, via service providers that may require certain accreditations
Post Audit	Where trading parties are required to transmit eDocuments to a predetermine infrastructure normally owned or maintained by the state. The infrastructure acts as an exchange engine, conducting mandatory checks, before delivering the invoice to the target receiver. The transmission path may be regulated, and additional requirements on the format, I&A (such as eSignature) may be necessary

Parallel invoicing	The supplier must report a subset of the e-document in a predefined format to the tax agency, in a predefined way shortly, after issuance and distribution to the buyer. There is no concept as clearance or validation. Rejections from the tax office may happen, but they are due to technical reasons.

2. General overview

This section provides an initial introduction into the local eInvoicing environment within [Norway], including the types of local e-invoice regulations, go-to governmental and industry bodies, and whether multiple invoicing regimes, that is, varying regulatory requirements, exist for example by industry, business size, or other defining factors.

Item	Commentary
Authorities and other agencies relevant for e-invoicing	• Digdir- Agency for Public Management and eGovernment • Ministry of Government Administration and Modernization • DFØ The Directorate for Public Administration and Financial Management; and Peppol Authority for Norway • Anskaffelser.no The main page for public procurement.
Main applicable legislation in respect of e-invoice issuance, exchange, reception and retention	• Digitisation circular H-09/16 (Digitaliseringsrundskrivet) • Reference directory for IT standards in the public sector (Referansekatalogen for IT-standarder i offentlig sector) • The Bookkeeping Act • The Norwegian VAT Act • Bookkeeping standard NBS 4 regarding electronic invoicing • Regulation on electronic invoicing in public procurement (FOR-2019-04-01-444) • Digitization circular H-5/19 (Digitaliseringsrundskrivet)

3. E-Invoice status

When considering sending or receiving e-invoices two basic questions should be considered: is invoice equal to paper invoice from the legal perspective; and if there are any situations where e-Invoicing is mandatory for reception or transmission.

Item	Commentary
E-invoice status	• Allowed
Varying invoicing regimes[1]	• B2B: Optional (widely used) • B2G: Mandatory (Peppol)
e-Invoicing model	• B2B: Post Audit • B2G: Peppol
e-Invoice definition[2]	• Electronic invoice means payment claims that have been designed, sent and received electronically from the invoice issuer to the invoice recipient, and which can be processed automatically in the invoice recipient's financial system.
Scope of taxpayers the e-document mandate applies to	Mandatory for issuing: • B2G: Suppliers to all contracting authorities Mandatory for receiving and processing • B2G: All contracting authorities
Mandatory AoR (document response) process	• No explicit requirements
Implementation / roll-out plan	• As of 1 April 2019: • It became mandatory for all other Norwegian public authorities to be able to receive and process e-invoices, and • It became mandatory for suppliers of all public authorities to submit e-invoices

[1] It is possible that a business is required to send e-invoice in some scenarios, and send voluntarily in others
[2] Differing definitions may exist between different levels of government, or differing legislation, i.e. accounting law and IT law

4. Before switching to e-invoices

4.1. IT[3] registration

The following thresholds (without VAT) apply to the requirement to be registered for a IT number in Norway:

- All taxpayers- NOK 50,000 (EUR 5,000)
- Charitable and nonprofit organizations NOK 140,000 (EUR14,000)
- Established: NOK 50,000 (EUR 5,000)
- Non-established: NOK 50,000 (EUR 5,000)
- Distance selling: NOK 50,000 (EUR 5,000)
- Electronically supplied services – VOEC scheme: NOK 50,000 (EUR 5,000)

Please note that the thresholds stated above are not an exhaustive list of circumstances requiring local IT registration since Businesses that do not reach the above thresholds may elect for voluntary VAT registration.

Registration procedures:

The taxable person must complete the Coordinated Register Notification, which is a common form for registration in the Central Coordinating Register of Norway and the VAT register. Every enterprise registered in the Central Coordinating Register will be given a unique nine-digit organization number. This number is used as a means of identification for the entities by most official registers containing business-related information, such as the Register of Employers, the VAT register, etc. The taxable person, his accountant, auditor, or advisor are entitled to apply for registration. It is preferable to register the business online.

Tax representatives:

[3] For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

If a non-established business is required to register for VAT in Norway, it must appoint a resident tax representative, unless it maintains a place of business or a registered office in Norway. Effective from 1 April 2017, the requirement to have a local representative is being abolished for Norwegian-registered foreign enterprises (NUF) domiciled in a European Economic Area (EEA) country that has an assistance agreement with Norway for the collection of VAT. This applies to enterprises domiciled in Austria, Belgium, Bulgaria, Czech Republic, Croatia, Cyprus, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Iceland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom, Faroe Islands, and Greenland.

Norway IT number format: 9 digits [123 456 789] + MVA

The letters 'MVA' (VAT) after the organization number if you are registered in the VAT register

4.2. Process to switch to e-Invoicing

Even though many countries encourage or even mandate e-Invoicing, there may be specific requirements on the Trading parties – typically the Supplier – before starting an e-Invoicing program. This section provides a brief overview of such requirements.

Item	Commentary
Actions towards authorities, required in order to enable electronic processing instead of conventional processing	• No explicit requirements
Actions between the trading partners, e.g. customer acceptance, agreement, etc.	• Buyer's consent required
Transition period from the moment of starting e-invoicing during which, e.g. parallel invoicing may be allowed	• None

4.3. Outsourcing invoice issuance function

Many companies decide to outsource the issuance process of e-invoicing to third parties who have the necessary infrastructure and knowledge of implementing and executing e-Invoicing. This may be driven by a technical limitation or local regulatory requirements. However, before doing so, it is highly recommended that a supplier investigates whether such outsourcing is permissible and whether any requirements must be fulfilled.

Item	Commentary
Whether outsourcing of invoice issuance (creation) is allowed or not	• Allowed

Whether statement of outsourced issuance i required on the invoice	• Not explicitly required
Whether outsourcing agreement is required between the taxpayer and the third-party is performing actions on its behalf	• Required
Content and formality requirements to the Outsourcing agreement between the taxpayer and the third-party	• If an e-invoice is converted by a third-party, a written agreement between the supplier/customer and the third-party is required. • The agreement shall state that the e-invoice shall be properly safeguarded against wrongful amendment, deletion, or loss. Either the agreement or a separate process description which describes the conversion process. • The third-party must have test results available, demonstrating the process.
Whether any notifications to or derogations from authorities are required in the specific jurisdiction for outsourced issuance	• Not explicitly required
Whether, and which, requirements exist to the outsourced party to be able to act on behalf of the taxpayer	• No explicit requirements

4.4. Outsourcing invoice receipt function

Due to the unique nature of the AP process, it may be required for the buyer (invoice receiver) to have an explicit agreement, or other permissions to be put in place for Service Providers to conduct invoice receiving functions on behalf of them.

Norway has no explicit requirements on the outsourcing of the function of receiving invoices (similar to the function to issue invoices as outlined above).

5. Document processing

5.1. Format and other technical requirements

Globally, a multitude of e-Invoicing formats and infrastructures exist. Local regulators often offer or mandate the use of certain formats, standards, or platforms for the transmission or delivery of invoices or other tax-related documents. Pagero has the technical depth and experience to support country-specific technical requirements globally.

Item	B2G	B2B
Mandated document format(s) for exchange with mandated Gov platform(s) and/or between the trading parties	• Peppol BIS 3.0/ EHF[4] v 3.0	• N.a
Other document format(s) commonly used for exchange between trading parties	• Other approved standards that conform with EU standards for e-Invoicing (EN 16931)	• Peppol BIS 3.0 • E2B • PDF
Mandated platform(s) required to have connection with for e-document processing	• Peppol Network	• N.a
Other platform(s) relevant for e-document processing	• N.a	• Peppol Network
Schematron(s), XSD schema or other official mechanisms ensuring document content	• Peppol BIS 3.0 schema	• N.a

[4] Elektronisk handelsformat- Electronic Commerce Format, EHF is compatible with the PEPPOL BIS format for the messages that this format covers. By adapting to the EHF standard, communicate with other European countries that follow the BIS standard will be possible.

Routing ID's / codes or other identifiers used in the jurisdiction for counter-party	• Peppol Norway prefix: 0192	• N.a
identification and document exchange	• N.a	• N.a
Other technical aspects	• N.a	• N.a

5.2. Communication with Peppol

Regulations in Norway foresee the following options on how e-documents can be communicated with the mandatory infrastructure(s):

Communication options	Commentary
Automated	• Can be done via Service providers. • It is required for the supplier to submit invoices via an e-invoicing platform or connect with the e-invoicing platform via a Peppol service provider for mandatory B2G e-invoicing
Manual	• The public authorities do not provide a manual option for suppliers to submit Peppol invoices. Suppliers can, however, use services of Peppol service providers to manually generate an e-invoice to be transmitted via Peppol
Other options	• N.a

5.3. Issuance and clearance process

This section describes the document issuance and clearance process from the supplier perspective.

5.3.1. Domestic documents

This section describes the process for documents created to be transmitted within the given country

B2B e-invoicing

There are no explicit technical process requirements on e-invoices issuance in Norway, such as exchange with a predefined infrastructure. B2B e-invoicing follows the post-audit model. Key freature of this model is as the following:

- Documents are exchanged with your suppliers and customers in various formats and via various exchange mechanisms, due to legal requirements and other business-related preferences

- The key requirements are to ensure the country-specific document content, document integrity and authenticity, as well as archiving requirements
- Neither document format nor exchange mechanism are regulated

B2G e-Invoicing

For issuing e-invoices, suppliers need the following:

- Use of the Peppol network,
- ELMA registration
- Access point.

According to the guidelines published by the DFO, suppliers can issue valid e-invoices in Norway in two ways:

- Using an internal ERP or accounting systems.
- Using an approved invoicing portal provider.

DFO publishes a list of different financial systems / ERP suppliers that can send and/or receive Electronic Trading Format (EHF). See the full list here.

If a supplier is unsure about the format validation of the document, he/she can validate the document format through a VEFA validator. This is a service provided by the Anskaffelser.dev portal. here

- Using an approved invoicing portal provider. See the full list here.

Please note that Pagero is an approved service provider in Norway and can be seen in the list provided by DFO. This means that via Pagero businesses in Norway can send and receive invoices, catalogs, orders, order confirmations, and packing slips in both EHF and BIS formats.

To be able to confirm the identity of the recipient, e-document senders can look up in ELMA the address register for Norwegian EHF and PEPPOL BIS receivers. ELMA contains information about Norwegian public and private entities that can receive EHF and PEPPOL BIS documents electronically. If you do not find a recipient in this search, it may be that the recipient is in a different register than ELMA. Search for a recipient can be found in another register that uses the same network. (Search only supports organization number).

The Norwegian Digitalisation Agency (Digdir) is the Peppol Authority in Norway. Digdir authorizes Norwegian-registered Access Points and operates the ELMA registry (a Peppol Service Metadata Publisher), containing the identities and receiving capabilities of all Norwegian public entities and economic operators that communicate using the Peppol eDelivery Network.

The below graph shows the B2G issuance process of e-documents in Norway where all public authorities can receive e-invoices through the Peppol Network. The Service providers are Peppol accredited service providers.

5.3.2. Cross-Border

This section describes the requirements for cross-border outbound documents such as sales invoices

Cross border outbound documents are not explicitly regulated in Norway. Norway is heavily dependent on both the Peppol BIS 3.0 standard and the Peppol eDelivery Network particularly for cross-border transactions.

5.4. Reception and validation process

This section describes the document reception, validation and acceptance processes from the buyer perspective.

<insert details on step-by-step process, no flowchart>

5.4.1. Domestic documents

This section describes the process for documents received for purchases or transactions within the given country

The same process of document issuance applies to receiving e-documents. i.e., use of the Peppol network, ELMA registration, a Peppol service provider.

Further, Norway has no explicit requirement for the buyers to provide confirmation or notification that the e-invoice has been received.

5.4.2. Cross-Border

This section describes the requirements for cross-border inbound documents such as purchase invoices

B2G: Foreign suppliers rarely have a relationship with the term EHF (Electronic Commerce Format). The reason for this is that EHF is a Norwegian adaptation of a common European invoice format.

Foreign suppliers most often use PEPPOL BIS to send electronic invoices. Some foreign player portals want a country code in front of the organization number. Norway's country code is: 0192: orgnr

Example: 0192: 999999999

B2B: Cross-border inbound documents are not explicitly regulated in Norway.

5.5. AoR (response) process

No explicit requirements.

5.6. [HUB] validations

Some tax regimes require businesses to send tax documents to a predetermined hub either before, shortly after issuing invoices. Generally, a hub that requires this will send a reply to the issuer. This reply can be expressed as a clearance/ approval response, rejection, semi approved, etc.

No explicit requirements.

5.7. Invoice presentation / copy

Some regimes require a visual presentation of the invoice file to be transmitted along with the structured invoice file. This section describes if there is any regulation concerning visual or image-based presentations of invoices as a copy for the original or vice versa.

It is required to mention copy or duplicate in case a copy is issued.

Issuing a PDF Presentation (a human-readable duplicate) when Tax invoices are issued in machine-readable format files can be confusing. To ensure the correct management of original documents, in addition to technical controls, Pagero Online adds “Copy Tax Invoice” on PDF Presentations where Tax invoices have been issued as machine-readable format files

5.8. Distribution between taxpayers

This section explains how and if trading parties can send invoices between each other. In some cases, hubs also distribute the tax document to the buyer.

Item	Commentary
Push communication	No explicit requirements
Pull communication	No explicit requirements
E-mail distribution	See document issuance section 5.1
Webportal[5]	See document issuance section 5.1
Scanning inbound invoices	No explicit requirements
Scanning outbound invoicing	No explicit requirements

[5] Note, however, that prior to using and external portal, like Pagero’s Webportal, Suppliers are required to already have an invoice / invoice data in their internal accounting software. Portals are not designed for the purpose of replacing internal accounting but are a mechanism to make invoices available for the Buyer. Recommended only for businesses issuing fewer than 100 invoices annually.

5.9. Rectification process

This section will express the process that needs to be taken when there is an error in an invoice, how it is to be handled, and corrected by both buyer, seller, and if a notification needs to be delivered to the tax authority.

Rectification process	
What are the options to correct an invoice if an incorrect IT rate, exemption or reverse charge is applied on the invoice	• Credit note • As a starting point such a correction must be made by issuing a credit note fully reversing the original sales document. However, incorrect billing can also be corrected in the following ways: • To issue a credit note solely for the part of the transaction that is incorrect. • To issue a supplementary invoice. • To issue a new sales document and a credit note (fully reversing the original sales document), or • Make a correction in a later sales document, with a clear indication of what is corrected.
What are the options to correct an invoice if the customer returns the goods	• Credit note
What are the options to correct an invoice if the customer paid too much	• Credit note
What are the options to correct an invoice if the supplier agrees to a discount after the invoice was issued to the customer	• Credit note
What are the options to correct an invoice if the invoice misses data such as name, address, IT number, invoice reference, etc.	• Credit note
Other scenarios with different correction option	• No
Party entitled to issue a credit note if the invoice was issued by the supplier (i.e. no self-billing)	• Supplier
Allowed to draft a 'waiting' document/interim document' in the absence of a purchase invoice and report IT as due and deductible on the basis of this document	• No

5.10. Coexistence of paper and electronic invoices

Item	Commentary

Whether parallel invoicing (issuance and exchange of the same document in several formats, e.g. electronically and on paper) is allowed and/or whether there are any regulations surrounding it	• There are no specific requirements, however, is recommended to be avoided.
Whether the jurisdiction allows for document (e.g. invoice) dematerialization, i.e. destruction of the original paper invoice, for processing and/or archiving	• It is possible to convert a paper-based invoice into an electronic invoice during the storage period.
Whether any conditions apply, and which, to the dematerialisation	• The scanned invoice shall be retained in accordance with the general regulations for electronic storage of bookkeeping material, and the original paper invoice shall be stored until a back-up copy of the electronic accounting materials has been prepared.
Whether the jurisdiction allows for document (e.g. invoice) materialization, i.e. destruction of the original electronic document, for processing and/or archiving	• It is possible to convert a electronic based invoice into a paper invoice during the storage period.
Whether any conditions apply, and which, to the materialisation	• the original electronic invoice shall not be destroyed until being materialized with all contents as was incorporated in the original electronic version.

5.11. Contingency invoicing

This refers to the process for e-invoicing if any mandatory infrastructure is inaccessible. If temporary measures are available, or allowed, to facilitate invoicing during the downtime.

There are no specific prescriptions in this respect in Norway the Peppol AP's follow standard Peppol Uptime and Response SLA.

6. Document content requirements

6.1. Document types

Item	Commentary
Documents mandatory for issuance by supplier	• Complete invoice • Credit / debit note
Documents mandatory for issuance by buyer	• No

Item	Commentary
Self-billing allowed	• Yes
Simplified invoice allowed	• Yes

6.2. Document numbering

This section outlines the requirements to the sequential numbering of invoices and, where applicable, other documents.

6.2.1. Document numbering by the taxpayer

Item	Commentary
A sequential number, based on one or more series, which uniquely identifies the invoice	• Yes. A separate, sequential, number series is required. If several independent companies use a common invoicing system that does not produce consecutive number series for each individual company, the sales document will not appear as numbered in a controllable sequence for the individual company.
Different series of sequential numbers allowed (e.g. a separate sequential numbering for intercompany billings, credit notes, etc.)	• No. A separate invoice series shall be established, both for ordinary invoices and credit notes.

Allowed to start a new sequential numbering every year	• No. As a starting point no. However, if the number of invoices is of a certain extent and evenly distributed, one can have a system where one start on a new invoice series every year.
Worldwide numbering on legal entity level allowed provided that gaps can be explained	• Yes, but not recommended. • If the company operates with consecutive numbers for their total supply in Norway and abroad, additional numbers exclusively for Norway must be inserted. It is further permitted to have several invoice number series for the business in Norway, if there is a valid reason for establishing more than one (different departments, locations, business units etc.)
Required that the numbers follow the date of issuance (i.e. is it true that an invoice with number 2 cannot have an invoice date older than the invoice with number 1)	• Yes. As a starting point yes, as the invoice number is not allowed to be inserted manually. Invoices must contain consecutive, automatically generated, numbers.

6.2.2. Additional document numbering

This section should outline any additional numbering, e.g. provided in addition by the tax authority or that must be generated by the taxpayer based on specific specifications.

6.3. Indirect tax (IT)[6] rates

This section illustrates the applied IT[7] rates and provides a non-exhaustive list with examples of goods and/or services that fall within specific IT rates. IT rates that differ between different administrative units are clearly outlined.

Indirect tax rates		
25%	**Standard**	All other taxable goods and services.
15%	**Reduced**	Foodstuffs and beverages (excluding alcohol and tobacco, and supplies in restaurants)
12%	**Reduced**	Domestic passenger transportation services (excluding the leasing of vehicles as such), Public broadcasting, Access to cinemas, Hotel accommodation, Museums, Amusement parks and adventure centres, Galleries, Bigger sport events
11,11%	**Reduced**	For wild marine resources

[6] For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.
[7] Local name Local name "*Merverdiavgift*"- MVA

	Exception	Exports, supplies to foreign ships, and aircraft and ships involved in foreign trade, Books and newspapers (includes e-newspapers and e-journals), Transfer of a business as a going concern, International transportation services (goods and passengers)
	Exception	health services (e.g. doctors, dentists, psychologists, chiropractors, physiotherapists, dental technicians and ambulance services), social services (e.g. minding of children in private or municipal pre-schools, care services in nursing homes and home help services), teaching services (including school teaching, leisure-oriented teaching and driving instruction), cultural services (including theatrical, operatic, ballet, circus and dance performances with live music), services in the form of artistic performances of intellectual property and the mediation of such services, guide services, financial services (e.g. insurance, financing services, payment assignments, valid payment means, financial instruments and securities fund management), lottery services, ceremonial services in connection with funeral and burial services, provision of public authority services (e.g. registration procedures and issuing of passports and driving licences), sale and letting of real property and rights to real property.

6.4. Mandatory IT invoice content

The section below illustrates the minimum legal requirements related to the content of invoices issued according primarily to the indirect tax regulations of Norway. Please note that other additional content requirements might apply in addition, i.a. of technical character.

General	
Required to mention the word "invoice"	• Yes
Required that the invoice is issued in the language of the country who is entitled to impose the invoice requirements:	• No, Invoice languages: Norwegian, Swedish, Danish or English.
Sequential numbering	• Yes, see section 6.2 above
Required to mention copy or duplicate in case a copy is issued	• Yes
Reference in case of outsourced issuance	• No

Supplier data	
Full legal name of the supplier	• Yes
Allowed to abbreviate or shorten the legal name of the supplier	• Yes, provided the full legal name is mentioned as well

Full address of the supplier in country of establishment	• Yes
Allowed to mention the PO box address instead of the legal address of the supplier	• Yes
IT identification number/sales tax number from the supplier in the country where the supply takes place for IT purposes	• Yes, if a registration is available in the country of supply
IT identification number of the supplier in the country of establishment	• Yes
Information (i.e. name, address, IT number) of the fiscal representative of the supplier (if appointed)	• Yes
Legal form of the supplier	• Yes
Trade register number of the supplier	• No
Company Registry data of the supplier (e.g. court registration, address of chamber of commerce)	• No
Place of legal seat of the supplier (Headquarters)	• No
Other supplier data	• No

Customer data	
Full legal name of the customer	• Yes
Allowed to abbreviate or shorten the legal name of the customer	• Yes, provided the full legal name is mentioned as well
Address of thereditustomer in country of establishment	• Yes. Full company name and registered address (in the Register of Legal Entities) or full company name and Norwegian organization number
Bill-to address when it is different from the registered address of the customer	• No
Allowed to address the invoice to a Post Office Box address instead of the legal address of the customer	• No, identification of the buyer: Full company name and registered address (in the Register of Legal Entities) or full company name and Norwegian organization number
IT identification number in the country where the supply takes place for IT purposes in case of domestic supplies (if available)	• No, see above
IT identification number of the customer in the country of dispatch for invoices issued for exempt export supplies	• No

IT identification number of the customer in another Member than the Member State of dispatch for intra-Community supplies	• No
Information (i.e. name, address, IT identification number) of the fiscal representative (if customer has appointed a fiscal representative)	• No
Other customer data	• No

Transaction data	
Date of issue	• Yes
Date of supply (chargeable event)	• Yes • Time and place of delivery of service
Date of prepayment	• No
Description of the goods/services	• Yes
Quantity of the goods supplied or the extent of the services supplied	• Yes
Purchase order number	• No
Shipped from location (for the supply of goods)	• No, but recommended • However, the place of the delivery needs to be stated on the invoice.
Shipped to location (for the supply of goods)	• No, but recommended • The time and place of the delivery should be mentioned. Exceptions when the place of delivery is not relevant to be able to assess the transaction.
Status of the goods (e.g. in bond, in free circulation)	• No, but recommended • Especially in case of cross-border transactions
Incoterms	• No, but recommended • Especially in case of cross-border transactions
Other information on the supplied goods/services required (except in case of intra-Community supply of new means of transport)	• A description sufficient enough to identify the goods or services supplied, and to determine the applicable VAT rate.

Financial data	
Taxable base per item (unit price excl. IT)	• Yes
Total taxable base per IT rate or exemption	• Yes
IT rate applied	• Yes
Total IT amount calculated per rate	• Yes
Total IT amount payable	• Yes

Discounts/rebates if not included in the unit price	• Yes
Total gross amount (including IT)	• Yes
Mandatory to mention the total IT amount due in the national currency	• Yes
Which other amounts (i.e. none, only the total IT amount) must be mentioned in the national currency of your country	• None, only the VAT amount needs to be stated in NOK. However, recommended to include the net amount in NOK as well.
Exchange rate (if the invoice is not issued in the local currency)	• If an invoice is issued in a foreign currency, the VAT must be stated in Norwegian kroner (NOK), using the official exchange rate for the date of the invoice. No other exchange rate may be used for VAT purposes. Other amounts shown on the invoice may be stated in other currencies.
Which exchange rate must be applied in order of priority	• For conversion to NOK, an official daily exchange rate should be used (recommended to use the daily official rates according to Norges Bank)
Terms of payment	• Yes
IBAN and BIC number of supplier	• No.

Specific references for invoices	
Invoice reference in case of IT exemption or reverse charge	• Yes
List the required references in case of exemption or reverse charge	• In case of reverse charge, the document must be marked “Reverse tax liability- VAT not calculated” (no. “Omvendt avgiftsplikt – Merverdiavgift ikke beregnet”)
Allowed to refer to the appropriate provision in Directive 2006/112/EC for: - "reverse charge" for supplies subject to a reverse charge mechanism; - " supply is taxable in the country of the recipient" for B2B supplies of services; - "exempt intra-Community supply - article 138 VAT Directive"; - "Exempt export - article 146 VAT Directive"; - "simplification for triangular sales - article 141 VAT Directive -	• No

" Transfer of own goods- article 17 VAT Directive"?	
Required to specifically mention 'margin scheme - travel agencies', 'margin scheme - second hands goods', if applicable	• No margin scheme applicable
Reference required if the transaction takes place outside the EU as a result of the Use and enjoyment provisions	• No
Specific other reference required, e.g. in case of barter transaction, prepayments, etc. (not self-billing or special margin schemes)	• The date of prepayment (if different from the invoice date). Please note that prepayment with VAT is only accepted for certain types of supply. Financial pre-payments outside the permitted supplies shall normally be requested by way of a request for payment and not through a formal sales invoice.
Specific references required in case invoicing is outsourced	• No
Reference to 'cash accounting scheme' in B2B sales in case the IT is due by the supplier upon receipt of the payment/IT is deductible by the customer upon payment	• No cash accounting scheme applicable
Other specific requirements/references to be mentioned on an invoice	• No

6.5. Simplified invoice

The Supplier is not always obliged to issue a complete invoice. In certain scenarios, they may be able to issue a so-called simplified invoice.

Simplified invoicing	
Possible to issue simplified invoices for certain supplies	• No, but there is a simplified VAT scheme (VOEC scheme) that allows foreign suppliers of electronic services to Norwegian consumers (B2C), to document transactions without the requirement of specifying the buyer's data.
Maximum amount for simplified invoices	• N.a
Other supplies for which a simplified invoice can be issued	• No
Simplified invoices limited to certain type of supplies	• No

Simplified invoices not allowed for certain transactions	• No
Minimum content requirements on a simplified invoice	• N.a
Invoices subject to the national invoice requirements (not self-bills)	• N.a
(other) Invoices subject to the national invoice requirements (not self-bills)	• No

Pagero Online does not support the creation of simplified invoices as they typically do not correspond to the business requirements of Buyers.

6.6. Rectification document

In Norway a credit note must be issued as rectification documents. A Credit should include at least the following information:

Specific references for rectification documents	
Must the word "credit note" be mentioned	• Yes
Reference to original invoice required on a credit note	• Invoice number
Clear indication required that the amount mentioned on the credit note is crediting earlier amount (e.g. minus sign '-')	• No • From the credit note must result that a credit is invoiced, e.g. the reference 'credit note' must be mentioned on the document
Reason for credit required	• No, but recommended

Sequential numbering	
Separate sequential credit note numbering required	• No • A separate invoice series for the Norwegian business shall be established, both for ordinary invoices and credit notes.

Allowed to issue one credit note to correct different invoices	• Yes • Reference to the respective invoices (invoice number)

Pagero Online creates corrective invoices according to the content requirements of the Complete invoice.

6.7. Optional content

This section outlines briefly whether and how the trading parties can provide additional content in the technical e-document format mandated or otherwise prescribed in the specific jurisdiction.

7. Integrity and Authenticity

Ensuring the integrity of the content, as well as the authenticity of the origin (I&A) of an invoice, is an obligation for both the Supplier and the Recipient.

The purpose of this section is to further clarify the local I&A requirements on B2B invoices, as well as outline whether different requirements apply to B2G invoices. The review is done both from the Supplier's and the Recipient's perspective, as varying rules may apply.

Item	Supplier	Recipient
Whether it is mandatory to ensure I&A in the jurisdiction	• Yes	• Yes
Which methods for ensuring I&A are provisioned for	• Any means Business Controls, EDI, e-signature	• Any means Business Controls, EDI or e-signature Validation accepted
Which requirements apply for I&A methods if ensured by a third-party (outsourcing)	• Outsourcing is allowed • Authorization can be explicit or tacit • An explicit agreement is strongly recommended • Requirements • Issuance "in name and on behalf" of the supplier • Explicit agreement (no content requirements) recommended	• An explicit agreement is strongly recommended

7.1. e-Signature

Even where e-signature is not an explicit requirement, Pagero recommends that our customers apply it as, globally, it is the most widely accepted legal means of ensuring I&A for business transactions.

In practical terms, this results in the same evidential position for eDocuments as for paper documents. This unique feature of e-signature provides an exceptional level of legal certainty.

Item	Commentary
e-Signature technical requirements	• QES • AES • Advanced electronic seal
Automated e-signing	• No explicit requirements
Time-stamping of e-signature	• No explicit requirements

7.2. e-Signature validation

The Recipient of an invoice is often required by law or practice to validate the e-signature on the received invoice. Even for countries where the validation-upon-receipt is not expressly regulated, this is recommended by Pagero for both trading partners to be able to guarantee I&A.

Item	Commentary
Validation upon receipt	• No explicit requirements
Time-stamping of validation data	• No explicit requirements

8. Document retention

This section describes archiving requirements regarding the eInvoicing process and documents handled by Pagero. Please note, additional archiving requirements may apply to your specific documents.

Item	Commentary
Components to be stored (e.g. tax invoice, source documents, audit trail, I&A proof)	• Original invoice with signature including certificate or other evidence of integrity and authenticity as appropriate • Any such evidence must be stored in electronic form
Requirements to present stored documents in a specific audit format	• No requirements for capabilities to transform to audit format
Legibility, i.e. the ability to read stored e-documents by an untrained eye	• Required
Legibility requirements	• If the original invoice is in a machine-readable format, the taxable person must offer means to provide human-readability
Retention period for invoices not related to immovable property[8]	• 5 years
Start point of retention period calculation for invoices not related to immovable property	• From the end of the fiscal year
Retention period for e- invoices related to immovable property	• 10 years
Start point of retention period calculation for invoices related to immovable property	• From end of the fiscal year
Retention period for other than regular invoices or invoices related to immovable property (if existing):	• 10 years for all documentation related to customs, customs declarations and supporting documents, as well as project accounts, documentation related to

[8] Pagero stores all documents for 90 days due to data privacy and security regulations, after which the data is automatically deleted, unless Archive has been selected. Pagero provides long term archiving (for the legally required term, plus one year)

	transfer pricing, banking and finance company's customer- and supplier specifications etc. • All primary bookkeeping materials (e.g. bookkeeping specifications, VAT returns, tax returns, annual accounts etc.) are required to retain for a minimum period of 5 years. All secondary bookkeeping materials (typically agreements related to bonuses, leasing etc.) shall be kept electronically for at least 3,5 years before converted to other carriers.
Start point of retention period calculation for other than regular invoices or invoices related to immovable property:	• From end of the fiscal year
Outsourced archiving	• Allowed
Archiving abroad[9] and conditions, if any (e.g. notification, derogation, online access, mutual tax assistance treaty	• Permitted in Nordic countries if invoices are printable/ accessible from Norway and tax authorities are notified • Derogation for storage in other foreign EEA countries may be obtained under certain conditions.
Other requirements in relation to electronic document retention	• An original e-invoice must have a backup copy stored separately from the original • The backup copy must be tested at least once per year • The backup process and operations description must be stored

[9] In certain situations or jurisdictions deviating requirements – typically regarding archiving abroad – may apply to invoices and related documents, e.g. concerning matters of defence and national security. Therefore, Pagero encourages customers to inquire for and receive an explicit written statement from the local tax authority stating that the archiving of such documents outside of the taxpayer's country is permitted. Pagero in a capacity of a third-party may not apply for derogations or clarifications of this nature on behalf of a taxpayer.

9. Other transactional documents

Along with invoices, countries may have regulations relating to other trading documents. The purpose of this section is to provide a selective (not exhaustive) overview of the regulation of other transaction-related documents of importance.

Document	Commentary
Purchase order	• No explicit requirements
Rectification document	• Yes, see section 6.7 above
Payment instruction	• No explicit requirements
SAF-T (or alike) reporting	• Yes, see section 10.2 below
Transportation documents	• No explicit requirements
Other	• No

10. Other requirements

This section highlights certain aspects of the local regulations and infrastructure that differ from Pagero’s General invoice processing and our standard country compliance investigation.

10.1. Penalties

N/A - however it will not be possible to successfully transmit invoices to the recipient

10.2. E-reporting

As of 1 January 2020, mandatory SAF-T reporting was introduced for businesses. It is only required on an on-demand basis by the tax authorities, typically immediately before a tax audit.

Location of taxpayers in scope

All taxpayers, including non-resident, that are subject to the Norwegian Bookkeeping Act and maintain their bookkeeping electronically should disclose accounting data in an standard format upon request by the tax authorities

Registration threshold

Reporting is mandatory for all businesses with a turnover higher than NOK 5 million, or more than 600 accounting documents per year. If turnover is lower than NOK 5 million (approximately EUR 480,000), a business can only be exempt if they keep manual/paper-based accounts.

Summary of the types of data to be reported

The following information shall be included in the SAF-T file:

- The company's chart of accounts with mapping to a standardized chart of accounts (including opening and closing balance for the request period)

- The company's customers lists (including opening and closing balance for the request period)

- The company's supplier lists (including opening and closing balance for the request period)

- The company's VAT codes with mapping to standardized VAT codes

- The company's analysis dimensions (such as profit centers, cost centers, projects) - All postings in the general ledger.

- AR and AP subledgers if separate from general ledger.

Submission process Electronic upload of data to the tax authorities portal (Altinn).

E-Reporting file format XML

Submission frequency

Upon Request. Typically taxpayers are given approximately 10 business days to provide file once requested by tax authorities.

Implementation date 1st January 2020. Expansion for certain financial businesses from 1st Jan 2024.

Penalties

Failing to comply with the SAF-T requirement in Norway once requested by the authorities is regarded as a breach of the Bookkeeping Act and Regulations and may result in an order to comply with the Bookkeeping Regulations in form of a letter to each board member within an implicit deadline. The tax authorities has stated that the deadline should normally be 2 months but it can vary between 4 weeks to 1 year depending on complexity. Failing to comply within said deadline will most likely result in a daily fine until compliance is achieved. As a starting point, the daily fines will amount to NOK 1 243 (2023 rates) per day. In special/extraordinary cases the tax authorities may however set the daily fine higher or lower, yet limited to NOK 12 430 (2023 rates) per day. There is also a fine limitation set to a total of 1 MNOK, i.e.

10.3. Additional clarifications related to domestic use

Based on work done in PEPPOL BIS Billing 3.0, DigDir has included Norwegian rules in PEPPOL BIS Billing 3.0 and does not see a need to implement a different CIUS targeting the Norwegian market. Implementation of EHF Billing 3.0 is therefore done by implementing PEPPOL BIS Billing 3.0 without extensions or extra rules.

Additionally, since EHF Billing 3.0 is a rebranding of PEPPOL BIS Billing 3.0 all issues, bugs or comments to the specification must be reported at the OpenPEPPOL Service Desk as "Request for Change (RFC)".

10.4. Indirect tax reports

From 1 January 2020, mandatory SAF-T reporting was introduced in Norway. The reporting affects all companies subject to accounting in Norway that has more than 600 transactions or a turnover of more than 5 milion NOK per year. However, companies that provide electronic services are not covered.

Standard Audit File for Tax (SAF-T) is an electronic XML-based reporting for tax, VAT, and accounting in Norway. According to the reporting requirement that enters into force on 1 January 2020, the SAF-T file must only be submitted at the request of the Norwegian tax authority and the information will be used by the authority to carry out checks and tax audits. In the long run, the goal is for other reporting obligations, such as tax returns, to be completely replaced by SAF-T reporting.

The SAF-T file should contain the following parts:

- All accounting items (general ledger, customers, suppliers, and VAT)
- Accounts receivable (e.g. account balance, master data)
- Accounts payable (e.g. account balance, master data)

It should be noted that the companies concerned are also obliged to apply Norwegian standardized VAT codes and a standardized chart of accounts in the SAF-T file.

From 1 January 2022, taxpayers must submit VAT returns in a new format. Even if most enterprises must submit the VAT return in the new format now, taxpayers could still be required to submit VAT returns through Altinn (old system).

The new VAT return system will be also using new codes which can be viewed here. Taxpayers can also consult in the Norwegian Tax Administration webpage which VAT return system to use (if old or new system), just by filling a quick form in the section that says "*Find out where to submit your VAT return*".

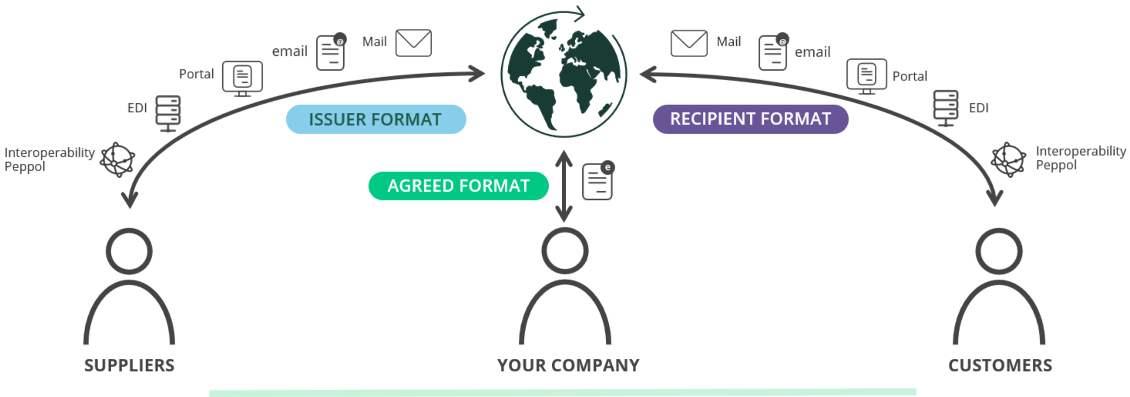
11. Country-specific processing

This section outlines how the Pagero General eInvoicing process has been adapted to the local requirements to ensure compliant local processing.

[if we use services of another provider or a partner, insert name and URL here]

11.1. Document issuance (AR) with Pagero

B2B e-document exchange with Pagero:



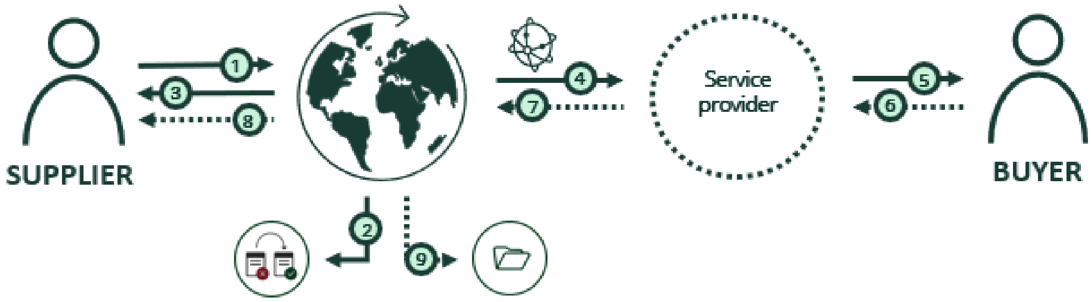
(1) PAGERO ensures that documents can be exchanged with your company and your suppliers and customers, from your company perspective in a single format to ensure 100% digital AR and AP processing, while on the other hand in the preferred format and exchange mechanism with your trading partners

(2) PAGERO ensures the country-specific document content, document integrity and authenticity, as well as archiving requirements

(3) PAGERO supports unlimited number of document formats and multiple exchange mechanisms

(4) PAGERO supports such exchange channels as: Interoperability, Peppol, EDI, portal, e-mail, capturing / scanning, etc.

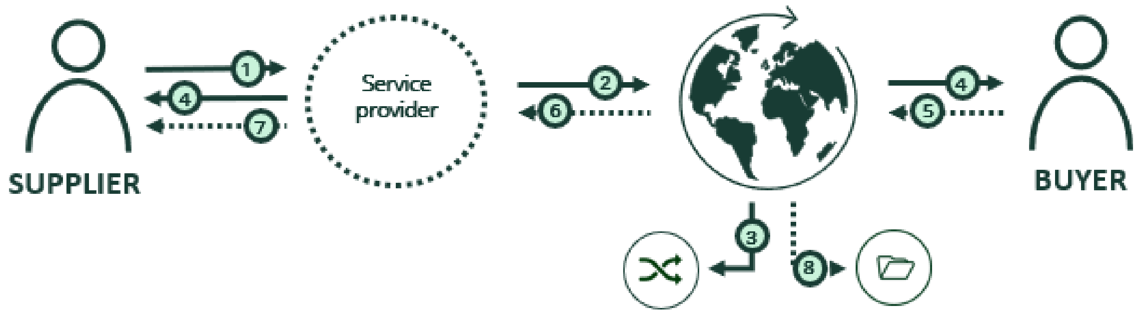
B2G e-document issuance (AR) with Pagero:



1) Supplier provides data in supplier preferred format to PAGERO
2) PAGERO performs i.a.
    1) content validation,
    2) content enrichment and conversion,
    3) document format conversion,
    4) applies e-signatures, etc.
3) PAGERO returns the finalized e-invoice to the supplier
4) PAGERO sends the final e-document to the receiving service provider (RSP) / buyer in via Peppol
5) RSP/buyer sends the received e-document to the buyer in buyer format
6) -8) Return communication from the buyer to the supplier, i.a. receipt acknowledgement, document approval or rejection, which could be optional or mandatory

9) PAGERO archives all relevant document on behalf of the supplier

11.2. Document reception (AP) with Pagero



1) Supplier provides data in supplier preferred format to the sending service provider (SSP)
2) SSP/supplier sends the final e-document to PAGERO in a legally predefined format and according to a legally predefined exchange protocol
3) PAGERO performs i.a.
    1) content validation,
    2) content enrichment and conversion,
    3) format conversion,
    4) applies e-signature validations, etc.
4) PAGERO sends the received e-document to the buyer in buyer format
5) -7) Return communication from the buyer to the supplier, i.a. receipt acknowledgement, document approval or rejection, which could be optional or mandatory

8) PAGERO archives all relevant document on behalf of the buyer

12. Closing statements

12.1. Confidentiality

This General invoice processing description of Pagero Online, our Country Compliance Reports, and other documents provided by Pagero are of confidential nature and are only intended for and may only be used by Pagero's Customers, their employees or other authorized recipients for the purpose or purposes specified and agreed to between the parties. Descriptions, reports, and documentation may not – neither in full nor in parts – be copied or otherwise distributed to third parties without Pagero's prior written consent.

12.2. Disclaimer

In order to establish a relationship based on trust and transparency with our Customers, Pagero provides its General e-Invoice and eArchiving processing descriptions of Pagero Online as well as Pagero's Country Compliance Reports. These documents are intended to enable our Customers and their tax advisors to assess how Pagero has interpreted the relevant legislation and implemented it in our processes in order to support our Customers to fulfil their legal obligations.

We would like to remind our Customers that, according to tax and accounting regulations, the outsourcing of any process to third parties (such as issuance, compiling, processing, receipt, or archiving of e-Invoices), will not lead to a shift of liability, the liability will remain with the Customer. Accordingly, the taxable person always remains responsible towards the local authorities for ensuring their e-Invoice compliance, and for fulfilling accounting and reporting requirements. We want to emphasise this, in the light of that there can be potentially conflicting regulations on regional, national, or international levels.

Pagero endeavours to only include and provide accurate and up to date information. However, Pagero makes no guarantees as to the accuracy of any statement, information or advice provided by Pagero, whether in writing or verbally. The Customer must make an informed decision about whether to adhere to and follow such recommendations or not. The final decision and responsibility regarding tax, accounting, and reporting issues rest with the Customer.
