Introduction and document purpose

Pagero Group builds the world's largest, open business network – so you can reach any business, anywhere in the world. No matter how many borders your operations may cross or how many systems you are connected to, we take care of the technical and regulatory requirements across your entire order-to-cash, purchase-to-pay and freight processes. We give you data accuracy and security, transparency and real-time visibility – through a single connection.

At Pagero Group, we believe that technology supports sustainability. That's why we are committed to helping businesses become 100% paperless, supporting resource efficiency, transparency and business continuity.

The main purpose of this country compliance report is to provide the reader with an in-depth analysis of the focus country's laws, regulations, and process with regards to e-invoicing and other trade documents. The analysis considers topics such as business requirements before switching to electronic invoices, e-document creation, e-document distribution, integrity and authenticity, and, finally, e-archiving.

This document guides how Pagero solutions support customers in the focus country to meet local regulations and serves as a supplement to Pagero General E-invoicing Process Description.

1. Terminology

This section outlines general and country-specific terminology for New Zealand, which will be used throughout the whole document.

Term	Explanation
A-NZ PEPPOL BIS 3.0	The A-NZ Invoice Specification represents the BIS Billing 3.0 Australian and New Zealand Extension for e-invoicing
GST	Goods and services tax (GST)
Interoperability as a CTC	Trading parties exchange e-invoices in a predefined format and a predefined method, either directly with each other, or typically, via service providers that may require certain accreditations
IRD	The IRD number keeps track of the tax a entity pay and helps make sure it pay the right amount or get the right entitlements.
MBIE	The Ministry of Business, Innovation and Employment
NZBN	The NZBN is a unique identifier for New Zealand businesses. The New Zealand Business Number (NZBN) is a globally unique identifier, available to every NZ business.
Peppol	The Peppol Network is a logical network enabling a secure and reliable exchange of Peppol Dataset Types between End Users via Peppol Service Providers.
Peppol Authority	The Ministry of Business, Innovation and Employment (MBIE) has the role of Peppol Authority, which means that MBIE is responsible for the registration of companies that wish to become an Access Point (AP) or a Service Metadata Publisher (SMP).
Post Audit	The post-audit tax regime allows trading partners to exchange e-documents as well as other transactional documents directly with each other, without any real-time or immediate controls performed by the tax office. Even though e-documents are allowed, there are no provisions as to what format, infrastructure, or how they should be created, issued, or distributed. The main requirements on the taxpayers are to ensure document content, integrity, and authenticity, as well as appropriate archiving. The term post-audit stems from the fact that Tax audits can be performed months or years after the transactions originally took place

2. General overview

This section provides an initial introduction into the local eInvoicing environment within New Zealand, including the types of local e-invoice regulations, go-to governmental and industry bodies, and whether multiple invoicing regimes, that is, varying regulatory requirements, exist for example by industry, business size, or other defining factors.

Item	Commentary
Authorities and other agencies relevant for e-invoicing	• Inland Revenue • Ministry of Business, Innovation and Employment • Australia and New Zealand Electronic Invoicing Board (ANZEIB)
Main applicable legislation in respect of e-invoice issuance, exchange, reception and retention	• Goods and Services Tax Act 1985 • Contract and Commercial Law Act 2017

3. E-Invoice status

When considering sending or receiving e-invoices two basic questions should be considered: is invoice equal to paper invoice from the legal perspective; and if there are any situations where e-Invoicing is mandatory for reception or transmission.

Item	Commentary
E-invoice status	• Allowed
Varying invoicing regimes[1]	• B2B: Optional, under development • B2G: Peppol
e-Invoicing model	• B2B: Post Audit • B2G: Peppol
e-Invoice definition[2]	• E-Invoicing is the digital exchange of invoice information directly between buyers' and suppliers' financial systems, even if these systems are different. The transfer of invoice information is made possible by using enabled software or an access point provider who use common international standards (Peppol), allowing different systems to 'speak' to each other.
Scope of taxpayers the e-document mandate applies to	• No explicit requirements for issuing • As of 31 March 2022. All Central Government agencies (B2G) to be able to receive e-invoices • B2B: Buyer´s consent required for receiving
Mandatory AoR (document response) process	• No explicit requirements

Implementation / roll-out plan	• In June 2021 Central Government agencies (B2G) were set e-Invoicing implementation and e-invoice volume targets:
	  ◦ All Central Government agencies to be e-Invoicing 'receive' capable by 31 March 2022.
	  ◦ As of July 2026, 90% of business to Central Government invoices are e-invoices.

[1] It is possible that a business is required to send e-invoice in some scenarios, and send voluntarily in others
[2] Differing definitions may exist between different levels of government, or differing legislation, i.e. accounting law and IT law

4. Before switching to e-invoices

4.1. IT[3] registration

The following thresholds apply to the requirement to be registered for a IT number in New Zealand:

- Any person that is carrying on a taxable activity and whose current or projected annual turnover is NZD 60,000 or more.
- Non-resident suppliers of low-value goods (goods which individually have a value of NZD 1,000 or less) or remote services, of more than NZD 60,000 in a 12-month period to consumers are also required to register for GST at 15%.
- Non-residents who do not make taxable supplies in New Zealand can register for GST, provided they meet certain criteria, allowing them to claim a refund for their input GST costs.

Please note that the thresholds stated above are not an exhaustive list of circumstances requiring local IT registration.

New Zealand IT number (NZBN) format: 123-456-789

A New Zealand Business Number (NZBN) is a globally unique identifier, available to all New Zealand businesses. Registered companies have been allocated NZBNs and are automatically included on the NZBN register. In addition, businesses can connect their NZBN number to organisation parts that are identifiers linked to the NZBN. Organisation parts allow parts of your business to be uniquely identified using information that's specific to them rather than your legal entity. Like the NZBN, Organisation Parts are unique 13-digit Global Location Numbers (GLNs) supplied by GS1 New Zealand. All businesses can have 2 free Organisation Parts, and it is possible to purchase more if needed.

[3] For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

Organisation parts will make it easier for businesses to connect and interact with other businesses and government agencies.

IRD number

Except from the NBZN number, companies and employers also need a IRD (Inland Revenue Department) number. The IRD number identifies a business for all its tax related events and is unique for every business and is given to pay the correct work taxes.

The IRD number is needed if:

- Having a company, partnership, estate, charity, trust, club, society, superannuation scheme or Māori authority
- You are an offshore and non-resident company, partnership, club, society, trust, charity, estate, superannuation scheme
- Selling goods and services
- Buying, selling, or transferring property in New Zealand

For sole traders, the GST number is the same as their IRD. For partnerships and companies, the GST number is the same as the partnership or company IRD number.

4.2. Process to switch to e-Invoicing

Even though many countries encourage or even mandate e-Invoicing, there may be specific requirements on the Trading parties – typically the Supplier – before starting an e-Invoicing program. This section provides a brief overview of such requirements.

Item	Commentary
Actions towards authorities, required in order to enable electronic processing instead of conventional processing	• No explicit requirements except from using enabled software or an access point provider who use common international standards (Peppol)
Actions between the trading partners, e.g. customer acceptance, agreement, etc.	• Buyer´s consent required
Transition period from the moment of starting e-invoicing during which, e.g. parallel invoicing may be allowed	• Not permitted

4.3. Outsourcing invoice issuance function

Many companies decide to outsource the issuance process of e-invoicing to third parties who have the necessary infrastructure and knowledge of implementing and executing e-Invoicing. This may be driven by a technical limitation or local regulatory requirements.

However, before doing so, it is highly recommended that a supplier investigates whether such outsourcing is permissible and whether any requirements must be fulfilled.

Item	Commentary
Whether outsourcing of invoice issuance (creation) is allowed or not	• Allowed
Whether statement of outsourced issuance is required on the invoice	• Not explicitly required
Whether outsourcing agreement is required between the taxpayer and the third-party is performing actions on its behalf	• Not explicitly required (However Pagero strongly recommends)
Content and formality requirements to the Outsourcing agreement between the taxpayer and the third-party	• Required
Whether any notifications to or derogations from authorities are required in the specific jurisdiction for outsourced issuance	• Not explicitly required
Whether, and which, requirements exist to the outsourced party to be able to act on behalf of the taxpayer	• Not specified by law. Invoices must be issued by supplier or supplier's agent, unless approval for buyer created tax invoice is granted by Inland Revenue.

4.4. Outsourcing invoice receipt function

Due to the unique nature of the AP process, it may be required for the buyer (invoice receiver) to have an explicit agreement, or other permissions to be put in place for Service Providers to conduct invoice receiving functions on behalf of them.

New Zealand has no explicit requirements on the outsourcing of the function of receiving invoices (similar to the function to issue invoices as outlined above).

5. Document processing

5.1. Format and other technical requirements

Globally, a multitude of e-Invoicing formats and infrastructures exist. Local regulators often offer or mandate the use of certain formats, standards, or platforms for the transmission or delivery of invoices or other tax-related documents. Pagero has the technical depth and experience to support country-specific technical requirements globally.

Item	B2G	B2B
Mandated document format(s) for exchange with mandated Gov platform(s) and/or between the trading parties	• N.a	• N.a
Other document format(s) commonly used for exchange between trading parties	• A-NZ Peppol BIS 3.0	• UBL 2.1, PDF, Word
Mandated platform(s) required to have connection with for e-document processing	• N.a.	• N.a.
Other platform(s) relevant for e-document processing	• Peppol Network	• Peppol Network
Schematron(s), XSD schema or other official mechanisms ensuring document content	• AUNZ-UBL-validation.sch • AUNZ-PEPPOL-validation.sch • AUNZ-PEPPOL-SB-validation.sch	• N.a.
Routing ID's / codes or other identifiers used in the jurisdiction for counter-party	• Peppol New Zealand NZBN prefix: 0048 • NZ business can be found here	• N.a.

identification and document exchange		
Other technical aspects	• N.a.	• N.a.

5.2. Communication with Peppol

Regulations in New Zealand foresee the following options on how e-documents can be communicated with the mandatory infrastructure(s):

Communication options	Commentary
Automated	• Optional to be done via service provider. • The supplier can submit invoices via an e-invoicing network where access point providers connect businesses or connect with the e-invoicing platform via a Peppol service provider for B2G e-invoicing
Manual	• Suppliers can use services of Peppol service providers to manually generate an e-invoice to be transmitted via Peppol to private and public businesses registered in Peppol
Other options	• N.a.

5.3. Issuance and clearance process

This section describes the document issuance and clearance process from the supplier perspective.

Invoices must be issued by supplier or supplier's agent, unless approval for buyer created tax invoice is granted by Inland Revenue.

5.3.1. Domestic documents

This section describes the process for documents created to be transmitted within the given country

B2B invoicing: There are no explicit mandated technical process requirements on e-invoices issuance in New Zealand.

(1) Documents can be exchanged with your suppliers and customers in various formats and via various exchange mechanisms, due to business-related preferences
(2) The key requirements are to ensure the New Zealand-specific document content, document integrity and authenticity, as well as archiving requirements are fulfilled

B2G invoicing can be done through Peppol:

(1) The supplier provides data in supplier preferred format to the sending service provider (SSP)
(2) SSP/supplier sends the final e-document to the receiving service provider (RSP) in Peppol BIS 3.0 A-NZ extension format through the Peppol network
(3) RSP sends the received e-document to the contracting authority
(4-6) Return communication from the buyer to the supplier, i.a. receipt acknowledgment, document approval, or rejection, which is optional in New Zealand.

5.3.2. Cross-Border

This section describes the requirements for Cross-Border outbound documents such as sales invoices

Cross border outbound documents are not explicitly regulated. However, for B2G, with the trans-Tasman electronic invoicing agreement, New Zealand uses the Peppol BIS 3.0 A-NZ extension format and the Peppol eDelivery Network – particularly for Cross-Border transactions with Australia, but no official mandate is yet published in New Zealand.

5.4. Reception and validation process

This section describes the document reception, validation and acceptance processes from the buyer perspective.

5.4.1. Domestic documents

This section describes the process for documents received for purchases or transactions within the given country

The same process of document issuance applies to receiving e-documents. i.e., use of the Peppol network, and Peppol service provider.

5.4.2. Cross-Border

This section describes the requirements for Cross-Border inbound documents such as purchase invoices

As of October 2018, the Australian and New Zealand governments took a decision to work together on the development of the e-invoicing model. The government representatives signed the Trans-Tasman Electronic Invoicing Arrangement, to create and maintain a common Australia and New Zealand e-invoicing approach to improve productivity and reduce the costs of doing business for both government and industry through an interoperable, single, digital economic market. New Zealand implemented Peppol in 2019 which enables the Cross-Border exchange of e-invoices within the Peppol network. The A-NZ Invoice Specification presents the BIS Billing 3.0 Australian and New Zealand Extension for e-invoicing.

5.5. AoR (response) process

In New Zealand, there is no explicit requirement for the buyer to submit a business response (approve or reject) upon receival of the invoice.

5.6. HUB Validations

Some tax regimes require businesses to send tax documents to a predetermined hub before, shortly after issuing invoices. Generally, a hub that requires this will send a reply to the issuer. This reply can be expressed as a clearance/ approval response, rejection, semi approved, etc.

In New Zealand, there is no mandatory infrastructure conducting validations. Providers who wish to deliver e-invoicing services must be recognized as trusted. To meet the criteria providers are required to offer certain validations within their solutions, including the verification of NZBN numbers to ensure they are active and valid for use in the e-invoicing environment. These numbers are local identification numbers that are supposed to raise the credibility of the party to the transaction.

5.7. Invoice presentation / copy

Some regimes require a visual presentation of the invoice file to be transmitted along with the structured invoice file. This section describes if there is any regulation concerning visual or image-based presentations of invoices as a copy for the original or vice versa.

It is required to mention the word” copy only” in case a copy is issued.

Issuing a PDF Presentation (a human-readable duplicate) when Tax invoices are issued in machine-readable format files can be confusing. To ensure the correct management of original documents, in addition to technical controls, Pagero Online adds “Copy Tax Invoice” on PDF Presentations where Tax invoices have been issued as machine-readable format files.

5.8. Distribution between taxpayers

This section explains how and if trading parties can send invoices between each other. In some cases, hubs also distribute the tax document to the buyer.

5.9. Rectification process

This section will express the process that needs to be taken when there is an error in an invoice, how it is to be handled, and corrected by both buyer, seller, and if a notification needs to be delivered to the tax authority.

Rectification process	
What are the options to correct an invoice if an incorrect IT rate, exemption or reverse charge is applied on the invoice	• Credit and / or Debit notes
What are the options to correct an invoice if the customer returns the goods	• Credit note
What are the options to correct an invoice if the customer paid too much	• Credit note
What are the options to correct an invoice if the supplier agrees to a discount after the invoice was issued to the customer	• Credit note
What are the options to correct an invoice if the invoice misses data such as name, address, IT number, invoice reference, etc.	• Technically, original invoice is invalid (not a valid tax invoice) and should be reissued. However, in practice a corrective invoice may be issued although not provided for in the legislation.
Other scenarios with different correction option	• Debit notes where appropriate
Party entitled to issue a credit note if the invoice was issued by the supplier (i.e. no self-billing)	• Supplier
Allowed to draft a 'waiting' document/interim document' in the absence of a purchase invoice and report IT as due and deductible on the basis of this document	• No

5.10. Coexistence of paper and electronic invoices

Item	Commentary
Whether parallel invoicing (issuance and exchange of the same document in several formats, e.g. electronically and on paper) is allowed and/or whether there are any regulations surrounding it	• Not allowed
Whether the jurisdiction allows for document (e.g. invoice) dematerialization, i.e. destruction of the original paper invoice, for processing and/or archiving	• Allowed
Whether any conditions apply, and which, to the dematerialisation	• Approval is required to store records outside NZ
Whether the jurisdiction allows for document (e.g. invoice) materialization, i.e. destruction of the original electronic document, for processing and/or archiving	• Not allowed

Whether any conditions apply, and which, to the materialisation	• A legal requirement under the Inland Revenue Acts to retain an invoice that is generated in electronic form and is provided to another person in paper or other non-electronic form (for example, an invoice generated electronically and printed for sending to a customer) may be met by retaining the record in its electronic form.

5.11. Contingency invoicing

This refers to the process for e-invoicing if any mandatory infrastructure is inaccessible. If temporary measures are available, or allowed, to facilitate invoicing during the downtime.

No specific prescriptions for New Zealand

6. Document content requirements

6.1. Document types

Item	Commentary
Documents mandatory for issuance by supplier	• Complete Invoice • Credit and/or debit notes • Simplified Invoices
Documents mandatory for issuance by buyer	• No mandated documents

Item	Commentary
Self-billing allowed	• Yes. Requires Inland Revenue approval up front
Simplified invoice allowed	• Yes

6.2. Document numbering

This section outlines the requirements to the sequential numbering of invoices and, where applicable, other documents.

6.2.1. Document numbering by the taxpayer

Item	Commentary
A sequential number, based on one or more series, which uniquely identifies the invoice	• No, but recommended
Different series of sequential numbers allowed (e.g. a separate sequential numbering for intercompany billings, credit notes, etc.)	• Allowed
Allowed to start a new sequential numbering every year	• Yes

Worldwide numbering on legal entity level allowed provided that gaps can be explained	• Yes
Required that the numbers follow the date of issuance (i.e. is it true that an invoice with number 2 cannot have an invoice date older than the invoice with number 1)	• Yes

6.2.2. Additional document numbering

This section should outline any additional numbering, e.g. provided in addition by the tax authority or that must be generated by the taxpayer based on specific specifications.

6.3. Indirect tax (IT)[4] rates

This section illustrates the applied IT[5] rates and provides a non-exhaustive list with examples of goods and/or services that fall within specific IT rates. IT rates that differ between different administrative units are clearly outlined.

Indirect tax rates		
15%	**Standard**	All other taxable goods and services.
9%	**Reduced**	Supplies of accommodation and other domestic goods and services in a rest home where nursing care and other services are provided, Supplies of long-term accommodation in a hotel or motel
0%	**Zero**	Sale of a business as a going concern, Exported goods (proposals have been made to zero-rate goods and services supplied in relation to ships and aircraft that are exported under their own power), Exported goods and services, Services performed outside New Zealand, First sales of refined precious metals for investment purposes, Supplies of financial services to businesses that make taxable supplies of more than 75% of total supplies where the supplier has elected to do so, Certain transactions involving emissions units, Exported second-hand goods if the recipient gives the supplier an undertaking in writing that the goods will not be reimported into New Zealand, Certain supplies of which land is a component by GST-registered vendors to registered persons, Supplies of remote services made by non-resident suppliers to GST-registered New Zealand customers, where the supplier chooses to zero-rate
	Exempt	Financial services (although some qualify for the zero rate), Sales of donated goods by non-profit organizations, Certain real estate transactions, Supply of precious metals

[4] For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.
[5] Local name NZ GST/IRD Number

6.4. Mandatory IT invoice content

The section below illustrates the minimum legal requirements related to the content of invoices issued according primarily to the indirect tax regulations of New Zealand. Please note that other additional content requirements might apply in addition, i.a. of technical character.

General	
Required to mention the word "invoice"	• Yes. Must include 'tax invoice' clearly on first page. From 1 April 2023, this is no longer a requirement. See section 10.6
Required that the invoice is issued in the language of the country who is entitled to impose the invoice requirements:	• Yes. Must be in English or Te Reo
Sequential numbering	• Yes
Required to mention copy or duplicate in case a copy is issued	• Yes
Reference in case of outsourced issuance	• No

Supplier data	
Full legal name of the supplier	• Yes
Allowed to abbreviate or shorten the legal name of the supplier	• Yes. Can include name trading as rather than full legal name
Full address of the supplier in country of establishment	• Yes
Allowed to mention the PO box address instead of the legal address of the supplier	• Yes
IT identification number/sales tax number from the supplier in the country where the supply takes place for IT purposes	• Yes, if a registration is available in the country of supply. Tax invoice must include supplier GST registration details, if no details then not a valid tax invoice.
IT identification number of the supplier in the country of establishment	• Yes. If NZ GST registration number; should not include registration details in other jurisdictions.
Information (i.e. name, address, IT number) of the fiscal representative of the supplier (if appointed)	• No. No concept of fiscal representative in NZ. Can have agent issue tax invoices on behalf of supplier (option to issue tax invoices in the agent's registration details or as undisclosed agent).
Legal form of the supplier	• No
Trade register number of the supplier	• No
Company Registry data of the supplier (e.g. court registration, address of chamber of commerce)	• No

Place of legal seat of the supplier (Headquarters)	• No
Other supplier data	• N/A

Customer data	
Full legal name of the customer	• Yes
Allowed to abbreviate or shorten the legal name of the customer	• Yes. Note: Does not need to be full legal name, as long as it is clear who the invoice is issued to. For supplies NZD 1,000 or under, customer name not required
Address of the customer in country of establishment	• Yes. • For supplies NZD 1,000 or under, customer address not required
Bill-to address when it is different from the registered address of the customer	• No, but recommended
Allowed to address the invoice to a Post Office Box address instead of the legal address of the customer	• Yes
IT identification number in the country where the supply takes place for IT purposes in case of domestic supplies (if available)	• Yes. Supplies made that are subject to NZ GST, should have supplier's NZ GST registration details.
IT identification number of the customer in the country of dispatch for invoices issued for exempt export supplies	• No
IT identification number of the customer in another Member than the Member State of dispatch for intra-Community supplies	• No
Information (i.e. name, address, IT identification number) of the fiscal representative (if customer has appointed a fiscal representative)	• No
Other customer data	• N/A

Transaction data	
Date of issue	• Yes
Date of supply (chargeable event)	• No, but recommended
Date of prepayment	• No. Not a requirement, but pre-payment may trigger time of supply on entire supply subject to certain rules.
Description of the goods/services	• Yes
Quantity of the goods supplied or the extent of the services supplied	• Yes

Purchase order number	• No
Shipped from location (for the supply of goods)	• No
Shipped to location (for the supply of goods)	• No, but recommended • Especially in case of cross-border transactions
Status of the goods (e.g. in bond, in free circulation)	• No, but recommended
Incoterms	• No, but recommended
Other information on the supplied goods/services required (except in case of intra-Community supply of new means of transport)	• No information is currently available

Financial data	
Taxable base per item (unit price excl. IT)	• Yes
Total taxable base per IT rate or exemption	• Yes
IT rate applied	• Yes
Total IT amount calculated per rate	• Yes. Note: No requirement to show GST amount if the entire transaction is subject to NZ GST at 15%. Can simply include gross amount and a statement "includes tax"
Total IT amount payable	• Yes. Note: No requirement to show GST amount if the entire transaction is subject to NZ GST at 15%. Can simply include gross amount and a statement "includes tax"
Discounts/rebates if not included in the unit price	• No, but recommended
Total gross amount (including IT)	• Yes
Mandatory to mention the total IT amount due in the national currency	• Yes. If charged in Non-NZD, then must show the currency conversion used
Which other amounts (i.e. none, only the total IT amount) must be mentioned in the national currency of your country	• None
Exchange rate (if the invoice is not issued in the local currency)	• Yes. GST amount must be shown in NZD
Which exchange rate must be applied in order of priority	• No priority, Spot rate on date of invoice issue may be used
Terms of payment	• No, but recommended
IBAN and BIC number of supplier	• No, but recommended

Specific references for invoices	
Invoice reference in case of IT exemption or reverse charge	• No
List the required references in case of exemption or reverse charge	• No explicit requirement
Allowed to refer to the appropriate provision in Directive 2006/112/EC for: - "reverse charge" for supplies subject to a reverse charge mechanism; - " supply is taxable in the country of the recipient" for B2B supplies of services; - "exempt intra-Community supply - article 138 VAT Directive"; - "Exempt export - article 146 VAT Directive"; - "simplification for triangular sales - article 141 VAT Directive - " Transfer of own goods- article 17 VAT Directive"?	• N.a.
Required to specifically mention 'margin scheme - travel agencies', 'margin scheme - second hands goods', if applicable	• No
Reference required if the transaction takes place outside the EU as a result of the Use and enjoyment provisions	• No
Specific other reference required, e.g. in case of barter transaction, prepayments, etc. (not self-billing or special margin schemes)	• No
Specific references required in case invoicing is outsourced	• There is no specific wording necessary
Reference to 'cash accounting scheme' in B2B sales in case the IT is due by the supplier upon receipt of the payment/IT is deductible by the customer upon payment	• No
Other specific requirements/references to be mentioned on an invoice	• No

6.5. Simplified invoice

The Supplier is not always obliged to issue a complete invoice. In certain scenarios, they may be able to issue a so-called simplified invoice.

Simplified invoicing	
Possible to issue simplified invoices for certain supplies	• Yes

Maximum amount for simplified invoices	• NZD 1,000 • If the sale is worth NZD 50 or less including GST, you can issue a receipt instead
Simplified invoices limited to certain type of supplies	• No
Simplified invoices not allowed for certain transactions	• No
Minimum content requirements on a simplified invoice	• The words 'tax invoice' in a prominent place the name (or trade name) and GST number of the seller the date of issue a description of the goods or services. the total amount payable a statement that the total amount payable includes GST
Invoices subject to the national invoice requirements (not self-bills)	• Supplier must issue invoices for all taxable supplies made by supplier to which NZ GST is applicable, and a request is made by a GST registered customer o Invoices issued by an established supplier that are taxable in New Zealand, o Invoices issued by an established supplier that are taxable in another country but where VAT is due by the supplier, o Invoices issued by a non-established supplier on which VAT is due by the supplier, o Other
(other) Invoices subject to the national invoice requirements (not self-bills)	• No

Pagero Online does not support the creation of simplified invoices as they typically do not correspond to the business requirements of Buyers.

6.6. Rectification document

In New Zealand, credit note must be issued as rectification documents. A credit note should include at least the following information:

Specific references for rectification documents	
Must the word "credit note" be mentioned	• Yes
Reference to original invoice required on a credit note	• Invoice number. Must make reference to original invoice, with approval may issue a single credit note for multiple invoices
Clear indication required that the amount mentioned on the credit note is crediting earlier amount (e.g. minus sign '-')	• Yes. A credit or debit note must show: • the words 'credit note' or 'debit note' in a prominent place

	• the name (or trade name) and GST number of the seller • the name and address of the buyer • the date it was issued • a brief explanation of why it was issued • the words 'copy only' if it's a duplicate credit or debit note • the information in list A or list B **List A** • price of goods or services shown on the original tax invoice (including GST) • correct price of goods or services (including GST) • difference between the two prices • GST on the difference. **List B** • were the original price included GST, show the differences between the original and the correct prices • Statement that the difference includes GST
Reason for credit required	• Yes

Sequential numbering	
Separate sequential credit note numbering required	• No
Allowed to issue one credit note to correct different invoices	• Yes. Technically requires approval. Often done in practice

Pagero Online creates corrective invoices according to the content requirements of the Complete invoice.

6.7. Optional content

This section outlines briefly whether and how the trading parties can provide additional content in the technical e-document format mandated or otherwise prescribed in the specific jurisdiction.

No further requirements.

7. Integrity and Authenticity

Ensuring the integrity of the content, as well as the authenticity of the origin (I&A) of an invoice, is an obligation for both the Supplier and the Recipient.

The purpose of this section is to further clarify the local I&A requirements on B2B invoices, as well as outline whether different requirements apply to B2G invoices. The review is done both from the Supplier's and the Recipient's perspective, as varying rules may apply.

Item	Supplier	Recipient
Whether it is mandatory to ensure I&A in the jurisdiction	• Yes	• Yes
Which methods for ensuring I&A are provisioned for	• Required. Any method accepted. The Contract and Commercial Act contains a presumption of reliability for Advanced Electronic Signatures	• Required. Any method accepted. The Contract and Commercial Act contains a presumption of reliability for Advanced Electronic Signatures
Which requirements apply for I&A methods if ensured by a third-party (outsourcing)	• No explicit requirements	• No explicit requirements

7.1. e-Signature

Even where e-signature is not an explicit requirement, Pagero recommends that our customers apply it as, globally, it is the most widely accepted legal means of ensuring I&A for business transactions.

In practical terms, this results in the same evidential position for eDocuments as for paper documents. This unique feature of e-signature provides an exceptional level of legal certainty.

Item	Commentary
e-Signature technical requirements	• No explicit requirements
Automated e-signing	• No explicit requirements
Time-stamping of e-signature	• No explicit requirements

7.2. e-Signature validation

The Recipient of an invoice is often required by law or practice to validate the e-signature on the received invoice. Even for countries where the validation-upon-receipt is not expressly regulated, this is recommended by Pagero for both trading partners to be able to guarantee I&A.

Item	Commentary
Validation upon receipt	• No explicit requirements
Time-stamping of validation data	• No explicit requirements

8. Document retention

This section describes archiving requirements regarding the eInvoicing process and documents handled by Pagero. Please note, additional archiving requirements may apply to your specific documents.

Item	Commentary
Components to be stored (e.g. tax invoice, source documents, audit trail, I&A proof)	• Original invoice with signature including certificate or other evidence of integrity and authenticity as appropriate
Requirements to present stored documents in a specific audit format	• No requirements for capabilities to transform to audit format
Legibility, i.e. the ability to read stored e-documents by an untrained eye	• Required.
Legibility requirements	• If the original e-invoice is in machine-readable format, the taxable person must offer means to provide human-readability
Retention period for invoices not related to immovable property[6]	• 7 years
Start point of retention period calculation for invoices not related to immovable property	• End of the GST period in which the supply occurred
Retention period for e- invoices related to immovable property	• All records must be kept for a period of 7 years
Start point of retention period calculation for invoices related to immovable property	• End of the GST period in which the supply occurred
Retention period for other than regular invoices or invoices related to immovable property (if existing):	• N.a.

[6] Pagero stores all documents for 90 days due to data privacy and security regulations, after which the data is automatically deleted, unless Archive has been selected. Pagero provides long term archiving (for the legally required term, plus one year)

Start point of retention period calculation for other than regular invoices or invoices related to immovable property:	• N.a
Outsourced archiving	• Allowed
Archiving abroad[7] and conditions, if any (e.g. notification, derogation, online access, mutual tax assistance treaty	• Yes. Approval is required to store records outside NZ
Other requirements in relation to electronic document retention	• Storage abroad is subject to prior notification to the New Zealand tax authorities, who must be granted access upon request

[7] In certain situations or jurisdictions deviating requirements – typically regarding archiving abroad – may apply to invoices and related documents, e.g. concerning matters of defence and national security. Therefore, Pagero encourages customers to inquire for and receive an explicit written statement from the local tax authority stating that the archiving of such documents outside of the taxpayer's country is permitted. Pagero in a capacity of a third-party may not apply for derogations or clarifications of this nature on behalf of a taxpayer.

9. Other transactional documents

Along with invoices, countries may have regulations relating to other trading documents. The purpose of this section is to provide a selective (not exhaustive) overview of the regulation of other transaction-related documents of importance.

Document	Commentary
Purchase order	• No explicit requirements
Rectification document	• Yes, see section 6.6 above
Payment instruction	• No explicit requirements
SAF-T (or alike) reporting	• No explicit requirements
Transportation documents	• No explicit requirements

10. Other requirements

This section highlights certain aspects of the local regulations and infrastructure that differ from Pagero's General invoice processing and our standard country compliance investigation.

10.1. Public procurement

Procurement rules must be followed if the procurement is worth more than NZD 100,000 (or NZD 9 million for new construction works) and it is from:

- A government department
- New Zealand Police
- The New Zealand Defence Force
- Most Crown entities

All other government agencies are encouraged to follow the Rules. Exemptions can be made in accordance with rules:

- Rule 11: Non-procurement activities
- Rule 12: Opt-out procurements
- Rule 14: Exemption from open advertising
- Rule 48: Contract award notice

10.2. Indirect tax reports

GST Return

- Entities report GST in a GST return, the easiest way to do so being online submission.

Periodic returns

GST returns are generally submitted monthly. A taxable person whose taxable turnover exceeds NZD 24 million in a 12-month period must submit GST returns monthly. Other taxable persons may opt to submit GST returns monthly if they wish to receive regular repayments of GST or if they find it easier to account for GST on a monthly basis. A taxable person whose annual taxable turnover does not exceed NZD 500,000 may submit GST returns on a six-monthly basis. A non-established business who only makes supplies of remote services and/or low-value goods in New Zealand (and whose taxable supplies exceed the registration threshold of NZD 60,000) must submit GST returns on a quarterly basis. GST return periods generally end on the last day of the month. However, taxable persons may request different periods to align with their accounting records.

Periodic payments

GST payments can be made in several ways, including the use of internet banking, debit or credit card, setting up direct debit payments in myIR or money transfer from overseas. Making payments electronically is the recommended approach by the IRD, as it is the most accurate and reliable method. The following references must be included when making an electronic payment to the IRD:

- The taxable person's IRD number
- An account type (e.g., GST)
- The tax period the payment relates to (ddmmyyyy)

Electronic filing

Electronic filing is allowed in New Zealand but not mandatory. There are however proposals to introduce a requirement for electronic filing of GST returns for taxable persons with turnover above a certain threshold. The threshold has not yet been determined and will be set by Order in Council following appropriate consultation. Retention of electronic records is subject to special requirements.

10.3. Shared tax invoices

A shared tax invoice is a single invoice for goods and / or services from multiple suppliers. Two or more suppliers may issue a single invoice to the same customer if:

- they have statutory obligations which make it practical to use a single invoice, and / or

- they are part of the same group of companies.

A shared tax invoice must contain the same information as a tax invoice from a single supplier for supplies exceeding NZD 1,000. As the invoice is from multiple parties, only the principal supplier's name and GST registration number needs to be displayed. This principal supplier is:

- The supplier responsible for issuing the invoice, or
- The representative member of a group of companies

10.4. Tax invoices issued by agents

Sometimes an agent purchases or sells goods and services on behalf of someone else (the principal). The principal is still the purchaser or seller, not the agent.

If both the principal and agent are GST-registered persons, the agent may issue a tax invoice (or debit or credit note) on behalf of the principal. The tax invoice need only be issued in the name of the agent and there is no need for the agent to put the principal's name on the tax invoice. The principal can't issue a tax invoice for that same supply as well.

If the agent receives the supply, it is treated as though it's made to the principal and not the agent. However, an agent can ask the supplier for a tax invoice as though the supply had been made to the agent.

Agents must keep a record of the name, address and GST number of the principal in any transaction.

Employee as an agent

An employee can act as an agent for their employer. They may incur expenses on their employer's behalf as part of the taxable activity. The employer can reimburse the employee and claim the GST credit. The tax invoice must show the name and address of the employee acting as agent for the employer.

If the employer pays the employee an allowance to reimburse them for expenses, the employer can't claim any GST credit for the allowance.

10.5. Trans-Tasman eInvoicing

Australia and New Zealand governments have committed to progressing a standardised, trans-Tasman eInvoicing arrangement. This has resulted amongst other things in the countries jointly adopting the Pan-European Public Procurement On-Line (Peppol) interoperability framework for trans-Tasman eInvoicing[8].

Additional development between the governments of Australia and New Zealand is the creation of the Australia and New Zealand Electronic Invoicing Board (ANZEIB). ANZEIB is a joint advisory committee with the goal "to help drive an estimated A$30 billion in savings over 10 years in Australia and New Zealand" and represent the collective interests of the two governments in regards to eInvoicing.

10.6. New GST invoicing rules

New Zealand is set to modernize their GST invoicing rules. The new ruleset for GST invoicing was enacted in March 2022 with a delayed implementation. Most of the changes will not come into effect until 1 April 2023. The Inland Revenue Authority (IRD) issued additional clarifications on 12 September 2022 on the new changes and what this means in practice.

The new framework brings about changes to the information requirements in invoices. The changes are designed to support e-invoicing and the country's adoption of the Peppol framework.

The new GST changes introduce new terminology as well as a more flexible ruleset. For instance, taxpayers no longer need to keep a single document, such as a tax invoice or credit note, with all the required information. Instead, a combination of your transaction records, accounting systems and contractual documents can be used to supply the information needed for the GST return. Another change is that taxpayers no longer need to include the words 'tax invoice' in a prominent place to make it valid.

Old Term	**New Term**
Tax invoice	Taxable Supply Information
Debit note/credit note	Supply correction information
Buyer-created tax invoice	Buyer-created taxable supply information

[8] The Governments of Australia and New Zealand were previously working on a joint trans-Tasman eInvoicing Interoperability Framework based around the "four corner model". As of 22 February 2019, with the adoption of Peppol by the governments, this project has been suspended.

The table below outlines the details of Tax Invoice versus the Taxable Supply Information (TSI).

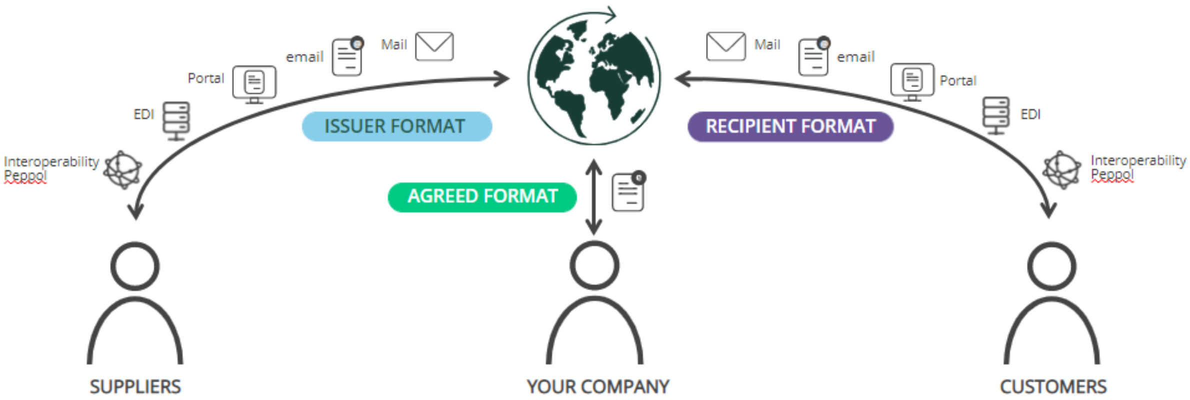
Requirement	**Tax Invoice < $1,000**	**Tax Invoice > $1,000**	**TSI < $200**	**TSI > $200 & $1,000**	**TSI > $1,000**
Required to mention the word “tax invoice”	✓	✓			
Name and registration number of supplier	✓	✓	✓	✓	✓
Name and address of recipient		✓			✓ (name)
Date of issuance for the invoice	✓	✓			
Description of the goods and services supplied	✓	✓	✓	✓	✓
Quantity or volume of the goods and services supplied		✓			
Amount of consideration* for the supply (consideration can be any: payment, act or holding back from using a legal right - for example, forgiving debt instead of enforcing its payment)	✓	✓	✓	✓	✓
Statement that consideration includes GST or amount of GST charged	✓	✓		✓	✓
One or more of: physical address, phone number, email, trading name, NZBN, website of recipient					✓
Adress of physical location of recipient (if available)					✓
Date of supply* (Expected to be changed in the next bill to just “Date”.)			✓	✓	✓

11. Country-specific processing

This section outlines how the Pagero General eInvoicing process has been adapted to the local requirements to ensure compliant local processing.

11.1. Document issuance (AR) with Pagero

B2B e-document exchange with Pagero (AR and AP):



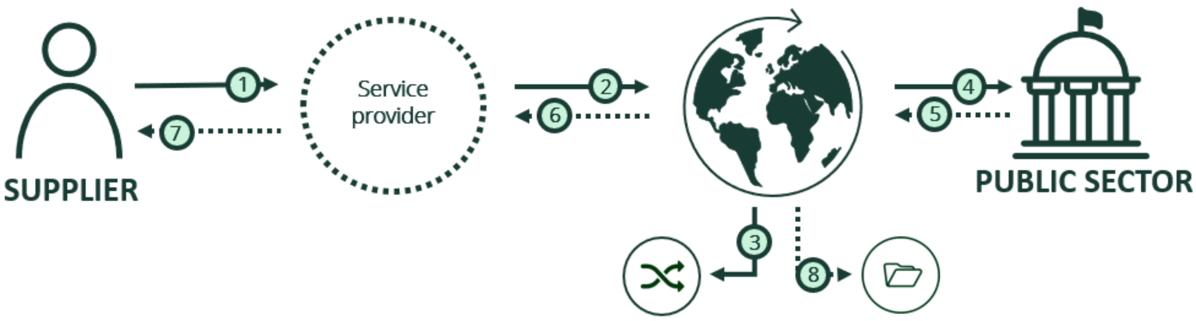
(1) Supplier provides data in supplier preferred format to PAGERO
(2) PAGERO performs data content validation, enrichment and conversion, document format conversion, applies e-signatures, etc.
(3) PAGERO sends the final e-document in a legally predefined format and according to a legally predefined exchange protocol
(4) RSP/buyer sends the received e-document to the buyer in buyer format
(5-7) Return communication from the buyer to the supplier, i.a. receipt acknowledgement, document approval or rejection, which could be optional or mandatory
(8) PAGERO archives all relevant document on behalf of the supplier.

B2G e-document issuance (AR) with Pagero:

(1) Supplier provides data in supplier preferred format to PAGERO
(2) PAGERO performs i.a., content validation, content enrichment and conversion, document format conversion, etc.
(3) Depending on agreement, Pagero returns the finalized e-invoice to the supplier
(4) PAGERO sends the final e-document to the receiving service provider (RSP) (Peppol) / buyer in a legally predefined format and according to a legally predefined exchange protocol. Note: additional documents or PDF presentations can be embedded in the structure file and sent to the recipient
(5) RSP/buyer sends the received e-document to the buyer in buyer format
(6) -8) Return communication from the buyer to the supplier, i.a. receipt acknowledgement, document approval or rejection, which could be optional or mandatory
(9) PAGERO archives all relevant document on behalf of the supplier

11.2. Document reception (AP) with Pagero

B2G e-document reception (AP) with Pagero:



(1) Supplier provides data to the sending service provider (SSP)

(2) SSP/supplier sends the final e-document to PAGERO in a legally predefined format and according to a legally predefined exchange protocol
(3) PAGERO performs i.a., content validation, content enrichment and conversion, format conversion, applies e-signature validations, etc.
(4) PAGERO sends the received e-document to the buyer in buyer format
(5) -7) Return communication from the buyer to the supplier, i.a. receipt acknowledgement, document approval or rejection, which could be optional or mandatory
8) PAGERO archives all relevant document on behalf of the buyer

12. Closing statements

12.1. Confidentiality

This General invoice processing description of Pagero Online, our Country Compliance Reports, and other documents provided by Pagero are of confidential nature and are only intended for and may only be used by Pagero's Customers, their employees or other authorized recipients for the purpose or purposes specified and agreed to between the parties. Descriptions, reports, and documentation may not – neither in full nor in parts – be copied or otherwise distributed to third parties without Pagero's prior written consent.

12.2. Disclaimer

In order to establish a relationship based on trust and transparency with our Customers, Pagero provides its General e-Invoice and eArchiving processing descriptions of Pagero Online as well as Pagero's Country Compliance Reports. These documents are intended to enable our Customers and their tax advisors to assess how Pagero has interpreted the relevant legislation and implemented it in our processes in order to support our Customers to fulfil their legal obligations.

We would like to remind our Customers that, according to tax and accounting regulations, the outsourcing of any process to third parties (such as issuance, compiling, processing, receipt, or archiving of e-Invoices), will not lead to a shift of liability, the liability will remain with the Customer. Accordingly, the taxable person always remains responsible towards the local authorities for ensuring their e-Invoice compliance, and for fulfilling accounting and reporting requirements. We want to emphasise this, in the light of that there can be potentially conflicting regulations on regional, national, or international levels.

Pagero endeavours to only include and provide accurate and up to date information. However, Pagero makes no guarantees as to the accuracy of any statement, information or advice provided by Pagero, whether in writing or verbally. The Customer must make an informed decision about whether to adhere to and follow such recommendations or not. The final decision and responsibility regarding tax, accounting, and reporting issues rest with the Customer.

Revision history

Date	What has changed
10 October 2018	• Document created
18 October 2018	• Added Trans-Tasman framework
26 October 2021	• Section 11: Amended the flow charts • Amended information and Peppol for B2G
13 September 2022	• Document updated
14 November 2022	• Added section 10.6 in regard to new GST ruleset
