Introduction and document purpose

Pagero Group builds the world's largest, open business network – so you can reach any business, anywhere in the world. No matter how many borders your operations may cross or how many systems you are connected to, we take care of the technical and regulatory requirements across your entire order-to-cash, purchase-to-pay and freight processes. We give you data accuracy and security, transparency and real-time visibility – through a single connection.

At Pagero Group, we believe that technology supports sustainability. That's why we are committed to helping businesses become 100% paperless, supporting resource efficiency, transparency and business continuity.

The main purpose of this country compliance report is to provide the reader with an in-depth analysis of the focus country's laws, regulations, and process with regards to e-invoicing and other trade documents. The analysis considers topics such as business requirements before switching to electronic invoices, e-document creation, e-document distribution, integrity and authenticity, and, finally, e-archiving.

This document guides how Pagero solutions support customers in the focus country to meet local regulations and serves as a supplement to Pagero General E-invoicing Process Description.

1. Terminology

This section outlines general and country-specific terminology for Singapore, which will be used throughout the whole document.

Term	Explanation
AGD	Accountant-General's Department
CorpPass	CorpPass is a corporate digital identity for businesses and other entities (such as non-profit organizations and associations) to transact with Government agencies online
Post audit	The post-audit model allows trading partners to exchange e-documents as well as other transactional fiscal documents (including but not limited to invoices, further called "e-documents") directly with each other, without any real-time or immediate controls performed by the tax office. Even though e-documents are allowed, there are no prescriptions as to in what format, infrastructure, or how they should be issued or distributed. The tax audits are performed afterward.
IRAS	Inland Revenue Authority of Singapore
IMDA	Infocomm Media Development Authority (Singapore's Peppol Authority)
InvoiceNow	Nationwide E-invoicing Network. The network is an extension of the International PEPPOL.
NTP	The Networked Trade Platform (NTP). The Networked Trade Platform (NTP) is Singapore's national trade information management platform that provides a common digital platform for trade and logistics to connect businesses, logistics companies and government systems for exchange of customs and logistics data.
SingPass	SingPass, which stands for Singapore Personal Access, is an authentication system for citizens to transact online with the Government
UEN	Unique Entity Number (UEN). It is a standard identification number for entities to interact with government agencies. They will interact with

	government agencies using their NRIC or ID numbers or SingPass if they are Singapore IC holders
Vendors@Gov	Vendors@Gov is a secured one-stop portal managed by Accountant-General's Department (AGD) for Government vendors to submit electronic invoices (e-invoices) when transacting with the Government & Statutory Boards

2. General overview

This section provides an initial introduction into the local eInvoicing environment within Singapore, including the types of local e-invoice regulations, go-to governmental and industry bodies, and whether multiple invoicing regimes, that is, varying regulatory requirements, exist for example by industry, business size, or other defining factors.

Item	Commentary
Authorities and other agencies relevant for e-invoicing	• Inland Revenue Authority of Singapore • Infocomm Media Development Authority • Accountant-General's Department
Main applicable legislation in respect of e-invoice issuance, exchange, reception and retention	• GST Act • Evidence Act • Evidence (Computer Output) Regulations

3. E-Invoice status

When considering sending or receiving e-invoices two basic questions should be considered: is invoice equal to paper invoice from the legal perspective; and if there are any situations where e-Invoicing is mandatory for reception or transmission.

Item	Commentary
E-invoice status	• Allowed
Varying invoicing regimes[1]	• B2B invoice is not regulated which can be issued in an agreed format (i.e., paper, or electronic). • B2G invoice must be uploaded to the portal or be issued in InvoiceNow.
e-Invoicing model	• B2B Post audit • B2G Centralized (Peppol)
e-Invoice definition[2]	• Electronic invoicing or E-invoicing is the automated creation, exchange, and processing of B2B/B2G payment requests between suppliers and buyers using a structure digital format

Scope of taxpayers the e-document mandate applies to	• B2B: no explicit requirements
	• B2G:
	  ○ Insurance: Issue e-invoices through InvoiceNow (Peppol) will be the default e-invoice submission channel for all SG government vendors within the next few years
	  ○ Receipt: Mandatory

Mandatory AoR (document response) process	• B2G: the receiving party i.e. public entities
Implementation / roll-out plan	• B2G Peppol: January 20th, 2020

[1] It is possible that a business is required to send e-invoice in some scenarios, and send voluntarily in others
[2] Differing definitions may exist between different levels of government, or differing legislation, i.e. accounting law and IT law

4. Before switching to e-invoices

4.1. IT[3] registration

The following thresholds apply to the requirement to be registered for a IT number in Singapore:

- Register for GST if your taxable turnover for 12 months period at the end of each calendar quarter exceeds SGD 1.000.000.

  Example:
    - 1 Jul 17 – 30 Jun 18 Turnover: $950,000 Do not need to register
    - 1 Oct 17 – 30 Sep 18 Turnover: $1,050,000 Registration required
- If zero-rated supplies make up more than 90% of your total taxable supplies and being registered will lead to you claiming GST refunds, you may choose to apply for exemption from GST registration

Please note that the threshold stated above is not an exhaustive list of circumstances requiring local GST registration.

GST number: e.g. A12341234B

UEN/NRIC: e.g. 123412345A

Please note that in some cases, the GST registration number is the same number as the UEN. Though the numbers may be the same, the GST registration number is still separate from the UEN.

4.2. Process to switch to e-Invoicing

Even though many countries encourage or even mandate e-Invoicing, there may be specific requirements on the Trading parties – typically the Supplier – before starting an e-Invoicing program. This section provides a brief overview of such requirements.

[3] For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

Item	Commentary
Actions towards authorities, required in order to enable electronic processing instead of conventional processing	• No explicit requirements
Actions between the trading partners, e.g. customer acceptance, agreement, etc.	• Buyer's consent is required, it can be tacit or by payment the e-invoice • No consent is required for B2G e-invoicing
Transition period from the moment of starting e-invoicing during which, e.g. parallel invoicing may be allowed	• No explicit regulations

4.3. Outsourcing invoice issuance function

Many companies decide to outsource the issuance process of e-invoicing to third parties who have the necessary infrastructure and knowledge of implementing and executing e-Invoicing. This may be driven by a technical limitation or local regulatory requirements. However, before doing so, it is highly recommended that a supplier investigates whether such outsourcing is permissible and whether any requirements must be fulfilled.

Item	Commentary
Whether outsourcing of invoice issuance (creation) is allowed or not	• Allowed
Whether statement of outsourced issuance is required on the invoice	• No explicit requirements
Whether outsourcing agreement is required between the taxpayer and the third-party is performing actions on its behalf	• No explicit requirements
Content and formality requirements to the Outsourcing agreement between the taxpayer and the third-party	• No explicit requirements
Whether any notifications to or derogations from authorities are required in the specific jurisdiction for outsourced issuance	• No explicit requirements
Whether, and which, requirements exist to the outsourced party to be able to act on behalf of the taxpayer	• No explicit requirements

4.4. Outsourcing invoice receipt function

Due to the unique nature of the AP process, it may be required for the buyer (invoice receiver) to have an explicit agreement, or other permissions to be put in place for Service Providers to conduct invoice receiving functions on behalf of them.

Singapore has no explicit requirements on the outsourcing of the function of receiving invoices (similar to the function to issue invoices as outlined above).

5. Document processing

5.1. Format and other technical requirements

Globally, a multitude of e-Invoicing formats and infrastructures exist. Local regulators often offer or mandate the use of certain formats, standards, or platforms for the transmission or delivery of invoices or other tax-related documents. Pagero has the technical depth and experience to support country-specific technical requirements globally.

Item	B2G	B2B
Mandated document format(s) for exchange with mandated Gov platform(s) and/or between the trading parties	• SG Peppol BIS Billing 3.0 Invoice • SG Peppol BIS Billing 3.0 CreditNote • SG Peppol BIS Invoice Response 3 (same as Peppol BIS Invoice Response 3) • SG Peppol BIS Order Only 3 • SG Peppol BIS Ordering 3 • SG Peppol BIS Order Agreement 3	• N.a
Other document format(s) commonly used for exchange between trading parties	• N.a	• Various unstructured formats, e.g. PDF
Mandated platform(s) required to have connection with for e-document processing	• Vendors@Gov	• N.a
Other platform(s) relevant for e-document processing	• N.a	• N.a

Schematron(s), XSD schema or other official mechanisms ensuring document content	• Peppol SG XSD	• N.a
Routing ID's / codes or other identifiers used in the jurisdiction for counter-party identification and document exchange	• Peppol ISO codes 0195:SGUEN[4] • When submitting e-invoices to Singapore Government Agencies via the Peppol network, use the Endpoint ID of the AGD: **0195:SGUENT08GA0028A** o AGD is the central recipient for all e-invoices submitted to Singapore government agencies. AGD will subsequently send the e-invoices to the respective Singapore government agencies for processing.	
Comminication Profile	• AS4	• N.a
Other technical aspects	• N.a	

5.2. Communication with InvoiceNow infrastructure

Regulations in Singapore foresee the following options on how e-documents can be communicated with the mandatory infrastructure(s):

Communication options	B2G
Automated	• Peppol
Manual	• Allowed
Other options	• N.a

5.3. Issuance and clearance process

This section describes the document issuance and clearance process from the supplier perspective.

5.3.1. Domestic documents

This section describes the process for documents created to be transmitted within the given country

For B2B transactions, invoice creation or issuance is not explicitly regulated. Meaning suppliers are allowed to freely choose which format to create invoices and which channels to transmit them.

For B2G invoicing, it is up to the Supplier to choose one of the available methods of transmission to the mandatory Vendors@Gov platform. They may choose to manually key in the invoice data or make use of Vendors@Gov's Peppol connection and transmit them electronically in the SG Peppol BIS 3.0 format.

[4] SG:UEN - Unique Entity Number (UEN)

5.3.2. Cross-Border

This section describes the requirements for cross-border outbound documents such as sales invoices

Export documents issuance is not explicitly regulated.

5.4. Reception and validation process

This section describes the document reception, validation and acceptance processes from the buyer perspective.

5.4.1. Domestic documents

This section describes the process for documents received for purchases or transactions within the given country

There is no explicit requirement for buyers to validate received invoices for B2B invoices. Please check section 5.6 for B2G invoices.

5.4.2. Cross-Border

This section describes the requirements for cross-border inbound documents such as purchase invoices

There is no explicit requirement for buyers to validate received invoices

5.5. AoR (response) process

There is no explicit acceptance process for B2B invoices.

However, the government sees the importance of supporting digital Invoice Response as an important feature to support as part of these is available in Vendors@Gov.

IMDA recommends including the minimum capabilities for Invoice Response below:

Invoice Response Status Description	Outbound	Inbound
Message acknowledgement	Mandatory	Mandatory
In Process	Recommended	Mandatory
Under Query	N.a	Mandatory
Rejected	Mandatory	Mandatory
Accepted	Mandatory	Mandatory
Conditionally Accepted	N.a	Mandatory
Partially Paid	N.a	Mandatory
Fully Paid	Recommended	Mandatory

5.6. B2G invoice validations

Some tax regimes require businesses to send tax documents to a predetermined hub either before, shortly after issuing invoices. Generally, a hub that requires this will send a reply to the issuer. This reply can be expressed as a clearance/ approval response, rejection, semi approved, etc.

Process flow of B2G e-Invoices from InvoiceNow

1. **InvoiceNow**
    - Invoices are sent from issuers Access Point through the Peppol network to AGD's Access Point
2. **SESAMi (AGD's Access Point)**
    - SESAMi will perform validation checks to ensure invoices comply with the technical requirements (e.g., no missing fields, no special characters, etc.)
    - Invoices that fail these checks will be rejected and cannot be viewed on Vendors@Gov.
    - Rejection notification[5] will be sent to the vendors' email address. The notification to the vendor would be triggered within 2 working days.
    - A new invoice should be submitted, if necessary.
3. **Vendors@Gov**
    - Invoices that pass validation checks with AGD's Access Point will be loaded to Vendors@Gov within 1 working day
        - E-invoices can be edited/deleted at Vendors@Gov on the same day of submission before 7pm.
        - Once the e-invoice status[6] changes to "Processing", "Certified", "Approved", "Paid" or "Rejected", it cannot be edited/deleted.
    - Vendors@Gov will perform validation checks to ensure invoices comply with the business requirements (e.g., vendor record is approved on Vendors@Gov, invoices not backdated more than 7 days, etc.)
    - Invoices that fail these checks will be rejected but can still be viewed on Vendors@Gov.
    - Rejection notification will be sent to the vendors' email address. The notification to the vendor would be triggered within 2 working days.
    - Rejected invoice can be edited and resubmitted on Vendors@Gov or new invoice can be submitted via InvoiceNow, if necessary.
        - Note that if you resubmit an amended invoice through the network, you cannot use the same Invoice Number and Invoice Date for the resubmission as the invoice will be treated as a duplicate and be rejected.

---

[5] Rejection notification will be sent to the email address registered in the vendor record. If the vendor is not registered on Vendors@Gov, the notification will be sent to the email address indicated in his/her InvoiceNow invoice, if provided.
[6] Vendors may monitor the e-invoice status at Vendors@Gov

- E-invoices can be viewed at Vendors@Gov for 180 days from the date of the e-invoice.

4. **Client Agency**
   - Invoices that pass validation checks on Vendors@Gov will be sent to the relevant government agencies for processing
   - Invoices may be rejected by agencies, depending on each agency's requirements
   - Rejection notification will be sent to the vendors' email address. The notification to the vendor would be triggered within 2 working days
   - Rejected invoice can be edited and resubmitted on Vendors@Gov or new invoice can be submitted via InvoiceNow, if necessary.

5.7. Invoice presentation / copy

Some regimes require a visual presentation of the invoice file to be transmitted along with the structured invoice file. This section describes if there is any regulation concerning visual or image-based presentations of invoices as a copy for the original or vice versa.

Issuing a PDF Presentation (a human-readable duplicate) when Tax invoices are issued in machine-readable format files can be confusing. To ensure the correct management of original documents, in addition to technical controls, Pagero Online adds "Copy Tax Invoice" on PDF Presentations where Tax invoices have been issued as machine-readable format files.

There are no specific requirements in this respect in Singapore, but in practice, if you need to issue a hardcopy duplicate invoice, it should indicate certified true copy. The process established in Pagero Online should be in line with such practice.

5.8. Distribution between taxpayers

This section explains how and if trading parties can send invoices between each other. In some cases, hubs also distribute the tax document to the buyer.

Buyers and suppliers are free to choose a distribution method that suits them. There is no requirement to be able to produce any particular invoice format for transmission as long as the created invoice follows the content requirements stated by law.

Item	Commentary
Push communication	• Allowed
Pull communication	• Allowed
E-mail distribution	• Allowed

Webportal[7]	• Allowed
Scanning inbound invoices	• No explicit requirements
Scanning outbound invoicing	• No explicit requirements

5.9. Rectification process

This section will express the process that needs to be taken when there is an error in an invoice, how it is to be handled, and corrected by both buyer, seller, and if a notification needs to be delivered to the tax authority.

If your e-invoice has been rejected, you will receive an email notification to the email address registered in your vendor record. No payment will be made for rejected e-invoices. You may resubmit an amended invoice through the InvoiceNow. Please do not use the same Invoice Number and Invoice Date for the resubmission as the invoice will be treated as a duplicate and be rejected. Alternatively, you may edit and resubmit the rejected e-invoice at Vendors@Gov. To find out how to do so, please refer to this guide.

5.10. Coexistence of paper and electronic invoices

Item	Commentary
Whether parallel invoicing (issuance and exchange of the same document in several formats, e.g. electronically and on paper) is allowed and/or whether there are any regulations surrounding it	• Supplier may not issue tax invoices in paper form to customers to whom it already issued electronic tax invoices. If it needs to issue tax invoices in paper form, it must take the necessary measures to prevent double claiming of input tax by its customers (e.g. invalidate either the paper form or electronic form of the tax invoices issued)
Whether the jurisdiction allows for document (e.g. invoice) dematerialization, i.e. destruction of the original paper invoice, for processing and/or archiving	• Allowed with disposal of the paper version
Whether any conditions apply, and which, to the dematerialisation	• Allowed provided the authenticiy of the provider and the integrity of the content is guaranteed
Whether the jurisdiction allows for document (e.g. invoice) materialization, i.e. destruction of the original electronic document, for processing and/or archiving	• Allowed, invoices can be printed directly via the Vendors@Gov web portal
Whether any conditions apply, and which, to the materialisation	• A trading party must print and keep a hard copy of the electronic tax invoices if it does

[7] Note, however, that prior to using and external portal, like Pagero's Webportal, Suppliers are required to already have an invoice / invoice data in their internal accounting software. Portals are not designed for the purpose of replacing internal accounting but are a mechanism to make invoices available for the Buyer. Recommended only for businesses issuing fewer than 100 invoices annually.

	not intend to store the tax invoices in electronic media

5.11. Contingency invoicing

This refers to the process for e-invoicing if any mandatory infrastructure is inaccessible. If temporary measures are available, or allowed, to facilitate invoicing during the downtime.

Contingency invoicing not explicitly regulated. The AGD’s Access point support “customercare@sesami.com” should be contacted in the case that invoices are not being received by the vendors@gov platform and no rejection or notification is being delivered.

6. Document content requirements

6.1. Document types

Item	Commentary
Documents mandatory for issuance by supplier	• Invoices • Credit note
Documents mandatory for issuance by buyer	• For Singapore's public administration, e-invoices

Item	Commentary
Self-billing allowed	• Yes
Simplified invoice allowed	• Yes • Total amount of the invoice < SGD 1.000,00 (including GST)

6.2. Document numbering

This section outlines the requirements to the sequential numbering of invoices and, where applicable, other documents.

6.2.1. Document numbering by the taxpayer

Item	Commentary
A sequential number, based on one or more series, which uniquely identifies the invoice	• Yes • Invoice number must not include 'special characters', 'spaces' and should not exceed 27 characters when you are creating an e-invoice.
Different series of sequential numbers allowed (e.g. a separate sequential numbering for intercompany billings, credit notes, etc.)	• Yes
Allowed to start a new sequential numbering every year	• Yes

Worldwide numbering on legal entity level allowed provided that gaps can be explained	• Yes
Required that the numbers follow the date of issuance (i.e. is it true that an invoice with number 2 cannot have an invoice date older than the invoice with number 1)	• No, but recommended

6.2.2. Additional document numbering

This section should outline any additional numbering, e.g. provided in addition by the tax authority or that must be generated by the taxpayer based on specific specifications.

There is no additional document numbering in Singapore.

6.3. Indirect tax (IT)[8] rates

This section illustrates the applied IT[9] rates and provides a non-exhaustive list with examples of goods and/or services that fall within specific IT rates. IT rates that differ between different administrative units are clearly outlined.

Indirect tax rates		
8%	**Standard**	All other taxable goods and services - increase to 9% from 1 January 2024[10]
0%	**Zero**	Export of goods, international services
Exempt		Financial services, residential accommodation, supply of digital payment tokens (from 1 January 2020)

6.4. Mandatory IT invoice content

The section below illustrates the minimum legal requirements related to the content of invoices issued according primarily to the indirect tax regulations of Singapore. Please note that other additional content requirements might apply in addition, i.a. of technical character.

General	
Required to mention the word "invoice"	• Yes • Need to indicate "Tax Invoice"
Required that the invoice is issued in the language of the country who is entitled to impose the invoice requirements:	• Yes • Invoices must be issued in English
Sequential numbering	• Yes

[8] For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.
[9] Local name Goods and Services Tax (GST)
[10] Singapore Budget 2022

	• B2G: Maximum 30 characters. It cannot contain space. A limited set of acceptable characters.
Required to mention copy or duplicate in case a copy is issued	• Not required but recommended to mention certified true copy.
Reference in case of outsourced issuance	• Not explicitly required

Supplier data	
Full legal name of the supplier	• Yes
Allowed to abbreviate or shorten the legal name of the supplier	• Yes, provided the full legal name is mentioned as well. • Only for certain terms like Pte, Ltd, Pty, Inc, etc.
Full address of the supplier in country of establishment	• Yes
Allowed to mention the PO box address instead of the legal address of the supplier	• Yes
IT identification number/sales tax number from the supplier in the country where the supply takes place for IT purposes	• No
IT identification number of the supplier in the country of establishment	• Yes • B2G: based on the vendor record created at Vendors@Gov. Vendor status must be "Approved". If you have multiple Vendor IDs, they must be tagged to your CorpPass Entity ID.
Information (i.e., name, address, IT number) of the fiscal representative of the supplier (if appointed)	• No
Legal form of the supplier	• No
Trade register number of the supplier	• Yes
Company Registry data of the supplier (e.g., court registration, address of chamber of commerce)	• No
Place of legal seat of the supplier (Headquarters)	• No
Other supplier data	• B2G: Email Address. If you do not have a registered vendor record, your e-invoice will be rejected, and a notification will be sent to this email.

Customer data	
Full legal name of the customer	• Yes

	• B2G: Name of the liaison officer, maximum 20 characters.
Allowed to abbreviate or shorten the legal name of the customer	• Yes, provided the full legal name is mentioned as well. • Only for certain terms like Pte, Ltd, Pty, Inc, etc.
Address of the customer in country of establishment	• Yes
Bill-to address when it is different from the registered address of the customer	• No, but recommended
Allowed to address the invoice to a Post Office Box address instead of the legal address of the customer	• Yes
IT identification number in the country where the supply takes place for IT purposes in case of domestic supplies (if available)	• No
IT identification number of the customer in the country of dispatch for invoices issued for exempt export supplies	• No
IT identification number of the customer in another Member than the Member State of dispatch for intra-Community supplies	• No
Information (i.e. name, address, IT identification number) of the fiscal representative (if customer has appointed a fiscal representative)	• No
Other customer data	• B2G only. The Business Unit, which is a maximum 5-character code, must be based on this list

Transaction data	
Date of issue	• Yes • B2G: Cannot be backdated by more than 7 calendar days or forward dated.
Date of supply (chargeable event)	• No
Date of prepayment	• No
Description of the goods/services	• Yes. For each line of goods and services • B2G: Maximum 254 characters.
Quantity of the goods supplied or the extent of the services supplied	• Yes. For each line of goods and services • B2G: up to 4 decimal points accepted
Purchase order number	• No, but recommended • B2G: To find out whether you need to bill against an Invoicing Instruction/Purchase Order, please

	• enquire with your client agency.
Shipped from location (for the supply of goods)	• No
Shipped to location (for the supply of goods)	• No
Status of the goods (e.g., in bond, in free circulation)	• No
Incoterms	• No, but recommended • Especially in case of cross-border transactions
Other information on the supplied goods/services required (except in case of intra-Community supply of new means of transport)	• N.a

Financial data	
Taxable base per item (unit price excl. IT)	• Yes • B2G: up to 5 decimal points accepted
Total taxable base per IT rate or exemption	• Yes • Required if tax invoice contains various categories of supplies (e.g. standard-rated, zero-rated, exempt, etc.)
IT rate applied	• Yes • For each description of goods and services supplied
Total IT amount calculated per rate	• Yes
Total IT amount payable	• Yes • B2G: If the e-invoice contains GST Amount, the GST registration of your vendor record created at Vendors@Gov should be "Yes".
Discounts/rebates if not included in the unit price	• Yes
Total gross amount (including IT)	• Yes • B2G: Gross amount should be equal to the sum of the invoice line amounts. Prepaid amount and the payable rounding amount is not acceptable.
Mandatory to mention the total IT amount due in the national currency	• Yes • B2B ○ The total amounts payable excluding GST, the total GST, and the total amount payable including the total GST must be in SGD. If in foreign currency, it must be converted by the supplier into SGD using the selling rate of

	exchange prevailing in Singapore at the time of supply. ◦ The IRAS has issued an e-tax guide "Exchange Rates for GST Purposes" which lists the sources of exchange rates acceptable by the Comptroller of GST and the conditions to satisfy before the supplier could adopt these exchange rates for its GST reporting purposes. • B2G ◦ List of acceptable currencies (p.20)
Which other amounts (i.e. none, only the total IT amount) must be mentioned in the national currency of your country	• Total amount excluding GST, GST amount, and total amount including GST
Exchange rate (if the invoice is not issued in the local currency)	• No
Which exchange rate must be applied in order of priority	• The total amounts payable excluding GST, the total GST, and the total amount payable including the total GST if in foreign currency, must be converted by the supplier into Singapore currency using the selling rate of exchange prevailing in Singapore at the time of supply . The IRAS has issued an e-tax guide "Exchange Rates for GST Purposes" which lists the sources of exchange rates acceptable by the Comptroller of GST and the conditions to satisfy before the supplier could adopt these exchange rates for its GST reporting purposes.
Terms of payment	• Yes for B2G • Your e-invoice payment will be made to the bank account that is registered in your vendor record. To receive payments, it is mandatory to update your bank details at the Vendors@Gov portal. • Based on the agreed payment terms with your client agency. Refer to this list of acceptable payment terms
IBAN and BIC number of supplier	• No

Specific references for invoices	
Invoice reference in case of IT exemption or reverse charge	• Yes

List the required references in case of exemption or reverse charge	• It is the buyer's responsibility to determine whether the imported services are subject to reverse charge and to account for GST if applicable. From the seller's perspective, there is no invoicing requirement to indicate whether the transaction will be subject to reverse charge or not.
Allowed to refer to the appropriate provision in Directive 2006/112/EC for: - "reverse charge" for supplies subject to a reverse charge mechanism; - " supply is taxable in the country of the recipient" for B2B supplies of services; - "exempt intra-Community supply - article 138 VAT Directive"; - "Exempt export - article 146 VAT Directive"; - "simplification for triangular sales - article 141 VAT Directive - " Transfer of own goods- article 17 VAT Directive"?	• N.a
Required to specifically mention 'margin scheme - travel agencies', 'margin scheme - second hands goods', if applicable	• No
Reference required if the transaction takes place outside the EU as a result of the Use and enjoyment provisions	• No
Specific other reference required, e.g. in case of barter transaction, prepayments, etc. (not self-billing or special margin schemes)	• None
Specific references required in case invoicing is outsourced	• No
Reference to 'cash accounting scheme' in B2B sales in case the IT is due by the supplier upon receipt of the payment/IT is deductible by the customer upon payment	• No
Other specific requirements/references to be mentioned on an invoice	**<u>For B2G invoices only</u>:** • **Invoicing Instruction ID/Purchase Order ID (Optional)** To find out whether you need to bill against an Invoicing Instruction (II)/Purchase Order (PO), please enquire with your client agency. If

	there is no II/PO, please omit this field in the invoice. • **Invoice Line Number** For e-invoices billed against Invoicing Instruction (II) / Purchase Order (PO), the Line Number of the II/PO should be captured in the e-invoice and sent using the OrderLineReference field. Maximum 5 characters. • **Invoice Description** For e-invoices billed against Invoicing Instruction (II) / Purchase Order (PO), the Invoice Line Description should match the line description of the II/PO. Maximum 254 characters. • **Unit Price for Invoice Line** and **Quantity for Invoice Line** For e-invoices billed against Invoicing Instruction / Purchase Order and are billing for services, the Unit Price and Quantity should swop. This means Unit Price would be 1 and Quantity would be the value of the Unit Price. • **Invoice Line Amount (Excludes GST)** Sum of Invoice Line Amounts must be equal to Invoice Total Amount. All Invoice Line Amounts must be of the same currency. • **Invoice Line GST Treatment** For customer accounting, all invoice lines must have the same treatment. Invoices for items subject to customer accounting should be separately submitted from invoices for standard-rated and zero-rated items. For details on customer accounting, you may refer to the IRAS e-Tax Guide on "GST: Customer Accounting for Prescribed Goods".

6.5. Simplified invoice

The Supplier is not always obliged to issue a complete invoice. In certain scenarios, they may be able to issue a so-called simplified invoice.

Simplified invoicing	
Possible to issue simplified invoices for certain supplies	• Yes
Maximum amount for simplified invoices	• SGD 1.000,00 (including GST)

[11] Source: IMDA (Infocomm Media Development Authority, Singapore Peppol Authority)

Other supplies for which a simplified invoice can be issued	• No
Simplified invoices limited to certain type of supplies	• No
Simplified invoices not allowed for certain transactions	• No
Minimum content requirements on a simplified invoice	• Your name, address, and GST registration number • Date of issue of invoice • An identifying number (e. g. invoice number) • Description of the goods or services supplied • Total amount payable including GST • A statement like "price payable includes GST"
Invoices subject to the national invoice requirements (not self-bills)	• Invoices issued by an established supplier that are taxable in the country
(other) Invoices subject to the national invoice requirements (not self-bills)	• Receipts

Pagero Online does not support the creation of simplified invoices as they typically do not correspond to the business requirements of Buyers.

6.6. Rectification document

In Singapore, corrective invoices must be issued as rectification documents. A corrective invoice should include at least the following information:

Specific references for rectification documents	
Must the word "credit note" be mentioned	• No, but recommended

Reference to original invoice required on a credit note	• Invoice number and date
	• The corrective invoice must refer to the initial invoice explicitly (i.e., number and date of the invoice, except in specific cases)
	• B2G: Mandatory to indicate e-invoice which credit note is meant to offset.
	  o Maximum 30 characters. It cannot contain space.
	  o A limited set of acceptable characters.

Clear indication required that the amount mentioned on the credit note is crediting earlier amount (e.g., minus sign '-')	• No, but recommended
Reason for credit required	• Yes

Sequential numbering	
Separate sequential credit note numbering required	• No • In Singapore invoices and credit notes can use same or separate sequential numbering. Worldwide numbering is also allowed
Allowed to issue one credit note to correct different invoices	• Yes

A corrective invoice should include at least the following information:

- An identifying number (e.g., credit note number)
- Date of issue of the credit note
- Business name, address, and GST registration number
- Customer's name and address
- The identifying number and date of issue of the original tax invoice
- A description enough to identify the goods or services for which credit is given
- Reason for the credit given e.g., "returned goods"
- Quantity and amount credited for each item
- The total amount credited, excluding GST
- Rate of GST and amount of GST credited
- The total amount credited, including GST

Pagero Online creates corrective invoices according to the content requirements of the Complete invoice.

6.7. Optional content

This section outlines briefly whether and how the trading parties can provide additional content in the technical e-document format mandated or otherwise prescribed in the specific jurisdiction.

No explicit requirements in Singapore.

7. Integrity and Authenticity

Ensuring the integrity of the content, as well as the authenticity of the origin (I&A) of an invoice, is an obligation for both the Supplier and the Recipient.

The purpose of this section is to further clarify the local I&A requirements on B2B invoices, as well as outline whether different requirements apply to B2G invoices. The review is done both from the Supplier's and the Recipient's perspective, as varying rules may apply.

Item	Supplier	Recipient
Whether it is mandatory to ensure I&A in the jurisdiction	• Required	• Required
Which methods for ensuing I&A are provisioned for	• Any means Business Controls, EDI, e-signature	• Any means Business Controls, EDI or e-signature Validation accepted
Which requirements apply for I&A methods if ensured by a third-party (outsourcing)	• No explicit requirements	• No explicit requirements

7.1. e-Signature

Even where e-signature is not an explicit requirement, Pagero recommends that our customers apply it as, globally, it is the most widely accepted legal means of ensuring I&A for business transactions.

In practical terms, this results in the same evidential position for eDocuments as for paper documents. This unique feature of e-signature provides an exceptional level of legal certainty.

Item	Commentary
e-Signature technical requirements	• Allowed, not mandatory • Not possible via Peppol
Automated e-signing	• No explicit requirements
Timestamping of e-signature	• No explicit requirements

7.2. e-Signature validation

The Recipient of an invoice is often required by law or practice to validate the e-signature on the received invoice. Even for countries where the validation-upon-receipt is not expressly regulated, this is recommended by Pagero for both trading partners to be able to guarantee I&A.

Item	Commentary
Validation upon receipt	• No explicit requirements
Timestamping of validation data	• Date and time of the transaction must be retained. A timestamp can facilitate evidence of such.

8. Document retention

This section describes archiving requirements regarding the eInvoicing process and documents handled by Pagero. Please note, additional archiving requirements may apply to your specific documents.

Item	Commentary
Components to be stored (e.g. tax invoice, source documents, audit trail, I&A proof)	• Original invoice with signature including certificate or other evidence of integrity and authenticity as appropriate
Requirements to present stored documents in a specific audit format	• No requirements for capabilities to transform to audit format
Legibility, i.e. the ability to read stored e-documents by an untrained eye	• Required
Legibility requirements	• If the original invoice is in machine-readable format, the taxable person must ensure that the electronic tax invoices are stored and made available in human readable format for verification and record keeping purpose.
Retention period for invoices not related to immovable property[12]	• 5 years • 7 years for invoices relating to accounting period prior to 1 January 2007
Start point of retention period calculation for invoices not related to immovable property	• From the relevant Year of Assessment[13]
Retention period for e- invoices related to immovable property	• 5 years
Start point of retention period calculation for invoices related to immovable property	• From the relevant Year of Assessment

[12] Pagero stores all documents for 90 days due to data privacy and security regulations, after which the data is automatically deleted, unless Archive has been selected. Pagero provides long term archiving (for the legally required term, plus one year)

[13] The tax year in which taxpayers' income tax is calculated and charged.

Retention period for other than regular invoices or invoices related to immovable property (if existing):	• No
Start point of retention period calculation for other than regular invoices or invoices related to immovable property:	• N.a
Outsourced archiving	• Allowed
Archiving abroad[14] and conditions, if any (e.g. notification, derogation, online access, mutual tax assistance treaty	• Allowed
Other requirements in relation to electronic document retention	• N.a

[14] In certain situations or jurisdictions deviating requirements – typically regarding archiving abroad – may apply to invoices and related documents, e.g. concerning matters of defence and national security. Therefore, Pagero encourages customers to inquire for and receive an explicit written statement from the local tax authority stating that the archiving of such documents outside of the taxpayer's country is permitted. Pagero in a capacity of a third-party may not apply for derogations or clarifications of this nature on behalf of a taxpayer.

9. Other transactional documents

Along with invoices, countries may have regulations relating to other trading documents. The purpose of this section is to provide a selective (not exhaustive) overview of the regulation of other transaction-related documents of importance.

Document	Commentary
Purchase order	• B2G, see section 10.2 below
Rectification document	• Yes, see section 6.6 above
Payment instruction	• No explicit requirements
SAF-T (or alike) reporting	• No explicit requirements
Transportation documents	• No explicit requirements
Other	• B2G Invoice Response, see section 5.5

10. Other requirements

This section highlights certain aspects of the local regulations and infrastructure that differ from Pagero's General invoice processing and our standard country compliance investigation.

10.1. E-reporting

An IRAS Audit File (IAF) is a data file containing standardised accounting information required for audit purposes Companies can make use of the accounting software registered with IRAS to generate the IAF for submission to the tax authorities

Scope Established only

Registration threshold

All registered business need to perform filings on period basis. GST - Quarterly / Monthly (if under certain schemes)

Summary of the types of data to be reported

According to Inland Revenue Authority of Singapore (IRAS), companies in Singapore should maintain a listing of sales and purchases to support the figures that are reported in Goods and Services Tax (GST) returns. During an audit, the listing is provided in the form of an IRAS Audit File (IAF). Submission process Email

E-Reporting file format XML

Submission frequency Upon request

Implementation date TBD

Penalties

There are no specific penalties on e-reporting, but there are general rules on record keeping, where failure to comply, with record keeping requirements for Income Tax and GST purposes, it may constitute an offence under Section 67 of the Income Tax Act (read with Section 94 of the Income Tax Act) and/or under Section 46(6) of the GST Act, which could result in:

- IRAS exercising its best judgement to estimate revenue earned;
- Expense claims, capital allowances or GST input tax claims being disallowed; and/or
- Penalties being imposed. Under the Income Tax Act, a maximum fine of $1,000 may be imposed (in default of payment, a jail term of up to six months may be imposed). Under the GST Act, a maximum fine of $5,000 and/or a jail term of up to six months may be imposed. In the case of a subsequent conviction, offenders may be fined a maximum of $10,000 and/or jailed for a maximum of three years.

10.2. Public procurement (invoices)

InvoiceNow

To submit e-invoices to Singapore government agencies via InvoiceNow, vendors would have to comply with the following requirements:

1) Have a Corppass account at Corppass portal (corppass.gov.sg)
2) Have an "Approved" vendor record at Vendors@Gov (vendors.gov.sg)
3) Ensure that e-invoices are submitted based on the requirements (section 6.4)

Vendor@Gov (Registration guide)

To be able to use Vendor@Gov to submit e-invoices, one must first register. Registration differs depending on type on entity:

1. Accounting and Corporate Regulatory Authority ACRA/ Unique Entity Number UEN Registered Entities, Sole Proprietors or Societies
   - are required to register for CorpPass, (a multi-point identification tool that can be used on several government websites), to access Vendors@Gov
2. Individuals with SingPass (a multi-point identification tool that can be used on several government websites)
   - Can login using their SingPass details
3. Non UEN Registered Entities or Foreign Individuals without SingPass
   - Companies are required to register with an UEN issuance agency to obtain a Unique Entity Number (UEN) to transact with the Government.
   - After obtaining a UEN, your company/ organisation may register with CorpPass and setup Vendors@Gov e-service at CorpPass to access Vendors@Gov portal

Once registration is complete, one is required to gain vendor record approval from the Account Generals Department (AGD) before being able to send e-invoices via the Vendors@Gov web portal.

If taxpayers have submitted an e-invoice via InvoiceNow, there is no need to submit the e-invoice again via Vendors@Gov. The Singapore government announced in February 2023 that would implement InvoiceNow as the default e-invoice submission channel for all government vendors within the next few years. InvoiceNow will eventually replace the Vendors@Gov portal for registered businesses.

10.3. Public procurement (orders)

Singapore will gradually introduce various documents to the Peppol network to meet the country's requirements and assist the businesses with the digitisation of the procurement processes.

Ability to receive and store e-PO's and convert them to e-Invoices while ensuring that the below field elements are supported.

Ingestion of Purchase Order Requirements:

Data Element	Peppol E-invoice Field
Buyer Reference	• cbc:Buyer Reference
Customer contact person	• cac:AccountingCustomerParty\cac:Party\cac:Contact\cbc:Name
Vendor ID	• cac:AccountingSupplierParty\cac:Party\cac:PartyIdentification\cbc:ID
Suppliers Email Address	• cac:AccountingSupplierParty\cac:Party\ cac:Contact\cbc: ElectronicMail
Payment Term	• cac:PaymentTerms\cbc:Note
Purchase Order ID	• cac:OrderReference\cbc:ID
Invoice Description	• cbc:Note
Purchase Order Line Reference	• cac:OrderLineReference\cbc:LineID
Supplier's Legal Company Name	• cac:AccountingSupplierParty\cac:Party\cac:PartyLegalEntity\cbc:RegistrationName

10.4. Indirect tax reports

There are no transactional reporting requirements in Singapore.
Taxpayers are required to file their GST returns and pay any tax due by the due dates. The GST e-filing process can be done via the government portal. Refunds are generally made within 3 months after the date on which the GST authorities receive the GST return. If a

taxpayer submits monthly returns, the refund is generally made within 1 month from the date of receipt of the GST returns.
From 3 January 2022, it is mandatory electronic tax refunds (via GIRO or PayNow) for GST taxable persons.

10.5. Peppol

The Singapore Government and OpenPEPPOL has of the 21st of May 2018 signed an agreement on establishing a PEPPOL Authority in Singapore

As Singapore's PEPPOL Authority, IMDA will set national rules and specifications that meet Singapore's domestic requirements, as well as appoint and certify service metadata publishers and Access Point (AP) providers. IMDA will also ensure conformance to the PEPPOL technical and service standards.

Singapore aims to use the PEPPOL eDelivery Network and the PEPPOL Business Interoperability Specifications (PEPPOL BIS) both to support business with the Government, and to enable interoperability between Singaporean businesses, their European trading partners and beyond. The priority is to enable electronic invoicing but implementing PEPPOL support also for other parts of the procurement process will be considered.

10.6. The Networked Trade Platform (NTP)

The Networked Trade Platform (NTP) is a one-stop trade and logistics ecosystem which supports digitalisation efforts and connects players across the trade value chain – in Singapore and abroad. It aims to provide the foundation for Singapore to be a leading trade, supply chain and trade financing hub.

The NTP is a:

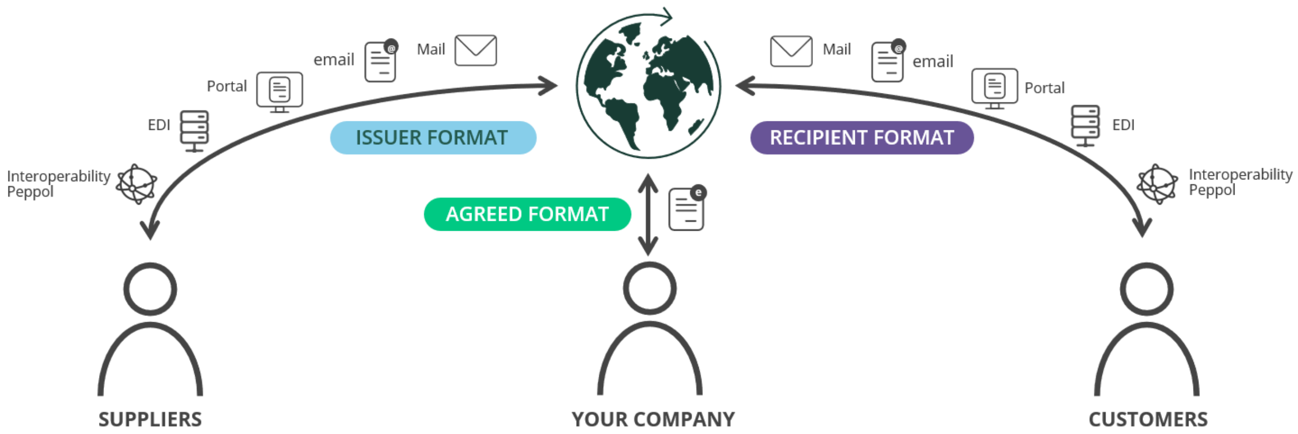
- One-stop trade information management system linked to other platforms
- Next-generation platform offering a wide range of trade-related services
- Open innovation platform allowing development of insights & new services with

11. Country-specific processing

This section outlines how the Pagero General eInvoicing process has been adapted to the local requirements to ensure compliant local processing.

11.1. Document issuance (AR) with Pagero

B2B



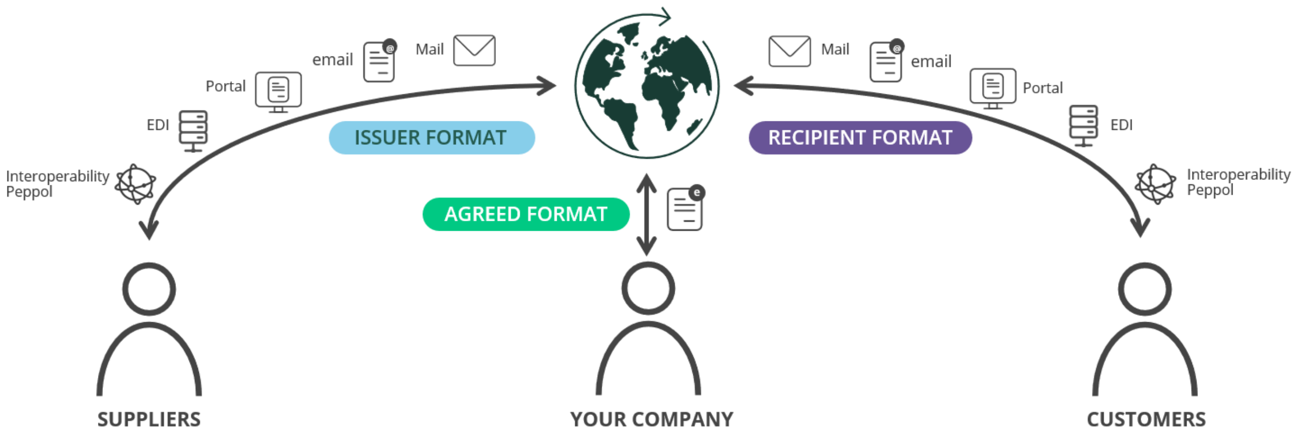
(1) PAGERO ensures that documents can be exchanged with your company and your suppliers and customers, from your company perspective in a single format to ensure 100% digital AR and AP processing, while on the other hand in the preferred format and exchange mechanism with your trading partners
(2) PAGERO ensures the customer-specific document content, document integrity and authenticity, as well as archiving requirements
(3) PAGERO supports unlimited number of document formats and multiple exchange mechanisms
(4) PAGERO supports such exchange channels as: Interoperability, Peppol, EDI, portal, e-mail, data capturing / scanning, etc.

B2G

(1) Supplier provides data in supplier preferred format to PAGERO
(2) PAGERO performs, i.a. , content validation, content enrichment and conversion, document format conversion, etc
(3) PAGERO returns the finalized e-invoice to the supplier
(4) PAGERO sends the final e-document to AGD's access point SESAMi in Peppol BIS format
(5) Sesami validates technical requirements and sends the invoice to Vendors@Gov
5.1) Rejection notification will be sent to the vendors' email address. Invoice will not be scene in the suppliers Vendors@gov account
(6) Vendors@Gov validate the business requirements and distributes the invoice to the relevant government agency
6.1) Rejection notification will be sent to the vendors' email addresses. Invoice can be seen, edited in the suppliers Vendors@gov account
(7) Return communication from the buyer to the supplier if a rejection
(8) PAGERO archives all relevant documents on behalf of the supplier

11.2. Document reception (AP) with Pagero

B2B



(1) PAGERO ensures that documents can be exchanged with your company and your suppliers and customers, from your company perspective in a single format to ensure 100% digital AR and AP processing, while on the other hand in the preferred format and exchange mechanism with your trading partners

(2) PAGERO ensures the customer-specific document content, document integrity and authenticity, as well as archiving requirements
(3) PAGERO supports unlimited number of document formats and multiple exchange mechanisms
(4) PAGERO supports such exchange channels as: Interoperability, Peppol, EDI, portal, e-mail, data capturing / scanning, etc.

12. Closing statements

12.1. Confidentiality

This General invoice processing description of Pagero Online, our Country Compliance Reports, and other documents provided by Pagero are of confidential nature and are only intended for and may only be used by Pagero's Customers, their employees or other authorized recipients for the purpose or purposes specified and agreed to between the parties. Descriptions, reports, and documentation may not – neither in full nor in parts – be copied or otherwise distributed to third parties without Pagero's prior written consent.

12.2. Disclaimer

In order to establish a relationship based on trust and transparency with our Customers, Pagero provides its General e-Invoice and eArchiving processing descriptions of Pagero Online as well as Pagero's Country Compliance Reports. These documents are intended to enable our Customers and their tax advisors to assess how Pagero has interpreted the relevant legislation and implemented it in our processes in order to support our Customers to fulfil their legal obligations.

We would like to remind our Customers that, according to tax and accounting regulations, the outsourcing of any process to third parties (such as issuance, compiling, processing, receipt, or archiving of e-Invoices), will not lead to a shift of liability, the liability will remain with the Customer. Accordingly, the taxable person always remains responsible towards the local authorities for ensuring their e-Invoice compliance, and for fulfilling accounting and reporting requirements. We want to emphasise this, in the light of that there can be potentially conflicting regulations on regional, national, or international levels.

Pagero endeavours to only include and provide accurate and up to date information. However, Pagero makes no guarantees as to the accuracy of any statement, information or advice provided by Pagero, whether in writing or verbally. The Customer must make an informed decision about whether to adhere to and follow such recommendations or not. The final decision and responsibility regarding tax, accounting, and reporting issues rest with the Customer.

Revision history

Date	What has changed
21 June 2018	Document created
15 June 2020	Periodic update
8 September 2021	Updated B2G invoice content Added Section 5.6 B2G invoice validation and Appendix 2 B2G invoice example
