Introduction and document purpose

Pagero provides a Smart Business Network that connects buyers and sellers for automated, compliant, and secure exchange of orders, invoices, payment instructions and other business documents. With an open network and a wide range of value-added apps, Pagero helps businesses streamline their order-to-cash and purchase-to-pay processes while unlocking the full potential of accurate and reliable business data. All of this, regardless of location, industry, size or systems.

At Pagero, we believe that technology supports sustainability. That's why we are committed to helping businesses become 100% paperless, supporting resource efficiency, transparency and business continuity.

The main purpose of this country compliance report is to provide the reader with an in-depth analysis of the focus country's laws, regulations, and process with regards to e-invoicing and other trade documents. The analysis considers topics such as business requirements before switching to electronic invoices, e-document creation, e-document distribution, integrity and authenticity, and, finally, e-archiving.

This document guides how Pagero solutions support customers in the focus country to meet local regulations and serves as a supplement to Pagero General E-invoicing Process Description.

Term	Explanation
ADSIB	Agency for the Development of the Information Society in Bolivia (ADSIB), in accordance with Law N°164 General of Telecommunications, Information and Communication Technologies, is the Public Certification Entity related to digital certificates.
Authorization Codes	Alphanumeric data provided by the VAT Taxpayer's Computerized Invoicing System and/or by the Tax Administration authorizing the issuance of Tax Documents according to established parameters. All authorization codes and meanings can be found here .
CAFC	Contingency Invoice Authorization Code. Generated by the Tax Administration for the printing and subsequent issuance of contingency invoices. It is obtained when requesting the printing of manual contingency invoices. The local name is " <i>Código Autorización Facturas Contingencia</i> "
Computerized Invoicing System	It is the software or computer program in charge of registering the processes of authorization, issuance and electronic transmission of Digital Tax Documents to the Tax Administration Database, complying with the technical specifications established in the Technical Annex. The local name is " <i>Sistema Informático de Facturación</i> "
Computerized Online Invoicing Modality	The issuance of electronic tax documents is generated through an invoicing system provided by a supplier (which has certified credentials), or through a desktop invoicing system developed by the SIN and sent through a certified system. The local name is " <i>Modalidad Computarizada en Línea</i> "
CUF	Unique Invoicing Code. Code generated automatically at the time of the issuance of the Invoice from the Computerized Invoicing System, in the modalities of Online Electronic Invoicing, Computerized Online Invoicing and Online Web Portal, individualizing each Invoice as established in the Technical Annex. The local name is " <i>Código Único de Facturación</i> "
CUFD	Unique Daily Invoicing Code. Alphanumeric data generated by the Tax Administration with the information of the Invoicing System, which allows issuing documents during 24 hours. To obtain it, a token is used to validate the taxpayer's authenticity. The local name is " <i>Código Único de Facturación Diaria</i> "
CUIS	Unique System Initiation Code. Alphanumeric data generated by the Tax Administration that identifies the relationship between the Invoicing

	System, credentials, taxpayer, branch and optionally the point of sale. It is valid for 365 calendar days. To obtain it, a token is used to validate the taxpayer's authenticity. The local name is "<i>Código Único de Inicio de Sistemas</i>"
Electronic invoice	An Electronic Invoice is a digital document of a fiscal nature, issued through a Computerized Invoicing System authorized by the Tax Administration, its existence is digital and must be registered and validated in the database of the National Tax Service. The local name is "<i>Factura Electrónica</i>"
Electronic Tax Document	Information of a Tax Document generated and sent in XML format by the VAT Taxpayer, with digital signature or fingerprint through computerized systems or authorized electronic means. The local name is "<i>Documento Fiscal Digital</i>"
National Taxpayer's Registry	It is a mandatory registry for all Bolivian Individuals/Legal entities domiciled in the country, that carry out taxable activities and are subject to any of the taxes established in Law No. 843. The local name is "<i>El Padrón Nacional de Contribuyentes Biométrico Digital</i>"
NIT	Tax identification number. It is the tax number that identifies natural and legal persons in Bolivia. The NIT is composed of 10 numbers. The local name is "<i>Número de Identificación Tributaria</i>"
Online Electronic Invoicing Modality	This modality consists of issuing electronic tax documents with digital signature through a certified invoicing system. The electronic invoice will be created based on an XML format, which may have its graphic representation in PDF, and must be sent, in real time, to the SIN for validation. The local name is "<i>Modalidad Facturación Electrónica en Línea</i>"
QR Code	As a security measure in the printing of graphic representations of digital invoices, a QR code or quick response code must be included, which allows to Access to a link in the tax portal and to validate an Invoice or Credit/Debit Note that is registered in the database of the Tax Administration.
Reconciliation Note	Document used to make adjustments in the tax credit and tax debit of VAT Taxpayers for transactions invoiced in previous periods not exceeding twelve (12) months, for electricity, telecommunications, water and hydrocarbon services. The local name is "<i>Nota de Conciliación</i>"

2. General overview

This section provides an initial introduction into the local e-invoicing environment within Bolivia, including the types of local e-invoice regulations, go-to governmental and industry bodies, and whether multiple invoicing regimes, that is, varying regulatory requirements, exist for example by industry, business size, or other defining factors.

Item	Commentary
Authorities and other agencies relevant for e-invoicing	National Tax Service – Servicio de Impuestos Nacionales (SIN)
Main applicable legislation in respect of e-invoice issuance, exchange, reception and retention	• Resolución Normativa de Directorio (RND) No. 102200000020 • RND No. 102200000014 • RND No. 102200000013: Sanctions for issuing invoices in different modalities than supposed to. • RND No. 102200000010: Third group of taxpayers to issue e-invoices and modalities. • RND No. 102100000021 • RND No. 102100000019: Second group of taxpayers to issue invoices and modalities. • RND No. 102100000017 • RND No. 102100000013 • RND No. 102100000012 • RND No. 102100000011 – e-invoicing technical annex • RND No. 101900000003 • RND No. 101800000026 – Online computerized system technical annex • Código Tributario Boliviano Ley No. 2492: Del 2 de agosto de 2003

3. E-Invoice status

When considering sending or receiving e-invoices two basic questions should be considered: is invoice equal to paper invoice from the legal perspective; and if there are any situations where e-Invoicing is mandatory for reception or transmission.

Item	Commentary
E-invoice status	• In development
Varying invoicing regimes¹	• Online E-Invoicing Modality • Computerized Online Modality • Web-Portal Modality
e-Invoicing model	• Post-Clearance (Soft-Clearance)
e-Invoice definition²	• An Electronic Invoice is a digital document of a fiscal nature, issued through a Computerized Invoicing System authorized by the Tax Administration, its existence is digital and must be registered and validated in the database of the National Tax Service.
Scope of taxpayers the e-document mandate applies to	• Suppliers and buyers notified by the normative resolutions issued by SIN
Mandatory AoR (document response) process	• No
Implementation / roll-out plan	Currently, electronic invoicing is being implemented in stages, the obligated parties are notified by Normative Resolution: • First group of taxpayers started 1 December 2021. • Second group of taxpayers started 1 August 2022. • Third group of taxpayers started 1 April 2023. • Fourth group of taxpayers will start on 1 February 2024. • Fifth group will start on 1 March 2024 • Sixth group will start on 1 April 2024

¹ Taxpayers are required to be in the corresponding modality which can be consulted through the tax authority webpage.

² Differing definitions may exist between different levels of government, or differing legislation, i.e. accounting law and IT law

4. Before switching to e-invoices

4.1. IT³ registration

There is no registration threshold for IVA (VAT) in Bolivia. In other words, all businesses are automatically IVA liable. A registered taxable person is a business entity or individual that performs the following actions:

- Sells movable goods
- Sells movable goods on behalf of others
- Renders any kind of service
- Makes definitive imports
- Engages in the operational or financial leasing of movable or fixed goods

Scope of the tax:

- Sales of movable goods placed in the country by taxable persons
- All services rendered in the country
- Import of goods
- Leasing activities in Bolivia

Non-established businesses: A “non-established business” is a business that does not have a fixed establishment in Bolivia. A non-established business must register as a taxable person if it makes “habitual” supplies of goods or services in Bolivia. Under the applicable regulation, “habitual” must be determined by weighing the nature, amount or frequency of the sales of movable goods and services

4.2. Process to switch to e-invoicing

Even though many countries encourage or even mandate e-Invoicing, there may be specific requirements on the Trading parties – typically the Supplier – before starting an e-Invoicing program. This section provides a brief overview of such requirements.

³ For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

Item	Commentary
Actions towards authorities, required in order to enable electronic processing instead of conventional processing	• If the e-issuance will be with an own system or a service provider (like Pagero): • To be registered in the National Register of Taxpayers and belong to the General Regime. • To be duly established with Tax Domicile in the country. • Have updated information in the National Register of Taxpayers • Not to be in the Tax Risk Registry with active control marks. • Complete the plan test asked by SIN • Authorization of the Computerized Invoicing System, issued by the Tax Administration.
Actions between the trading partners, e.g. customer acceptance, agreement, etc.	• An agreement between parties is strongly recommended, however, by law, the invoice has to be sent to a buyer as he dictates (if a graphic representation is asked, the supplier must guarantee it)
Transition period from the moment of starting e-invoicing during which, e.g. parallel invoicing may be allowed	• No

4.3. Outsourcing invoice issuance function

Many companies decide to outsource the issuance process of e-invoicing to third parties who have the necessary infrastructure and knowledge of implementing and executing e-Invoicing. This may be driven by a technical limitation or local regulatory requirements. However, before doing so, it is highly recommended that a supplier investigates whether such outsourcing is permissible and whether any requirements must be fulfilled.

Item	Commentary
Whether outsourcing of invoice issuance (creation) is allowed or not	• Allowed
Whether statement of outsourced issuance is required on the invoice	• Not explicitly required
Whether outsourcing agreement is required between the taxpayer and the third-party is performing actions on its behalf	• Not required (still, Pagero strongly recommends it)
Content and formality requirements to the Outsourcing agreement between the taxpayer and the third-party	• N.a.

Whether any notifications to or derogations from authorities are required in the specific jurisdiction for outsourced issuance	• Required • The taxpayer must notify to SIAT the system that is being used (own or Service Provider)
Whether, and which, requirements exist to the outsourced party to be able to act on behalf of the taxpayer	• Yes, service providers must comply with the following requirements: ○ To be registered in the National Register of Taxpayers and belong to the General Regime. ○ To be duly established with Tax Domicile in the country. ○ Have updated information in the National Register of Taxpayers ○ Not to be in the Tax Risk Registry with active control marks. ○ Complete the certification plan test asked by SIN ○ Authorization of the Computerized Invoicing System, issued by the Tax Administration. • Besides the previous requirements, the Service Provider must register the taxpayer for using his Invoicing System, which can be done through the web portal. • The taxpayer will need to confirm this "association" from the previous step, which can be done through the web portal.

4.4. Outsourcing invoice receipt function

Due to the unique nature of the AP process, it may be required for the buyer (invoice receiver) to have an explicit agreement, or other permissions to be put in place for Service Providers to conduct invoice receiving functions on behalf of them.

Bolivia has no explicit requirements on the outsourcing of the function of receiving invoices (

5. Document processing

5.1. Format and other technical requirements

Globally, a multitude of e-Invoicing formats and infrastructures exist. Local regulators often offer or mandate the use of certain formats, standards, or platforms for the transmission or delivery of invoices or other tax-related documents. Pagero has the technical depth and experience to support country-specific technical requirements globally.

Item	B2G/B2B
Mandated document format(s) for exchange with mandated Gov platform(s) and/or between the trading parties	• XML Local (see here latest version UTF-8)
Other document format(s) commonly used for exchange between trading parties	• Graphic representation (Pdf or paper)
Mandated platform(s) required to have connection with for e-document processing	• SIAT ("<i>Sistema Integrado de Administración Tributaria</i>")
Other platform(s) relevant for e-document processing	• N.a

Schematron(s), XSD schema or other official mechanisms ensuring document content	XSD and XML formats can be found here
Routing ID's / codes or other identifiers used in the jurisdiction for counter-party identification and document exchange	NIT (Tax number identification)
Other technical aspects	Technical Annex Algorithm of calculation Module 11 Generation of SHA-256 Algorithm Base 16 QR code CUF Generation GZIP Algorithm

5.2. Communication with SIN

Regulations in Bolivia foresee the following options on how e-documents can be communicated with the mandatory infrastructure(s):

Communication options	Commentary
Automated	- Web Services - EDI - MPLS connection
Manual	Web Portal
Other options	N.a.

5.3. Issuance and clearance process

This section describes the document issuance and clearance process from the supplier perspective.

5.3.1. Domestic documents

This section describes the process for documents created to be transmitted within the given country

- 1) **The supplier** – Before starting to issue invoices, the issuer's computerized invoicing system must have a valid CUIS and request the CUFD from the SIN, a process that will allow the taxpayer's computerized system to issue electronic invoices for a maximum period of 24 hours.
 - a. To authenticate with the tax authority, it will be necessary to obtain a delegated token.
 - b. Additionally, the synchronization of catalogs must be performed on a daily basis.
 - c. Before sending the e-document to SIN, the supplier must generate the document in the local XML format in accordance with the mandatory content requirements and apply digital signature on it, if applicable
 - d. The digital signature will be required only for the online electronic e-invoicing modality.
 - e. The XML document must be compressed in Gzip format, to then obtain a HASH (SHA 256) of such file, which must be sent in the "hashFile" tag. This hash is also known as digital fingerprint.
 - f. The individual sending of the XML to the SIN will be done at the moment of the transaction using the web service "Invoice Reception" (Sp. *"Recepción de Factura"*), while for the massive emission, batches can be sent until the ninth (9th) day of the month following the emission period and the web service "Mass Invoice Reception" (Sp. *"Recepción Masiva Factura"*) will be used.
 - g. The mass issuance of invoices will be done in batches of a maximum of 2000 invoices, and these may be sent to the SIN on a daily, weekly or monthly basis.
 - h. Both online e-invoicing and computerized online modalities allow the mass issuance of invoices in batches.
- 2) **SIN** – Once the digital tax document is submitted to SIN, the government infrastructure will perform the validation procedures and respond as follows:
 - a. If the validation is correct and it is an individual online process, it will return a receipt code to the supplier.
 - b. If the validation is correct and it is a process by contingency package or mass issuance, it will return a receipt code to the supplier.
 - c. If the validation has errors, it returns a list of error codes and messages for the sender to correct and resend.
- 3) **The supplier** – once the receipt code is received, the supplier is authorized to distribute the digital tax document to the buyer.
 - a. It will be necessary to attach the XML file together with a graphical representation.
 - b. If requested by the buyer, it will be necessary to deliver a printed graphic representation, except in the case of sales through mobile points (Point of sales).
- 4) **The buyer** – The buyer must validate that the information contained in the invoice corresponds to the data of the transaction made. In case of discrepancies, the

buyer must request the cancellation of the respective invoice and request the issuance of a new one with the correct data. The graphic representations may be verified by means of the QR code they contain.

5.3.2. Cross-Border

This section describes the requirements for cross border outbound documents such as sales invoices

The export of goods and services must be registered by means of the electronic document called Export Commercial Invoice (Sp. *"Factura Comercial de Exportación"*). Exports are VAT exempt in Bolivia.

5.4. Reception and validation process

This section describes the document reception, validation and acceptance processes from the buyer perspective.

5.4.1. Domestic documents

This section describes the process for documents received for purchases or transactions within the given country

It is the buyer's responsibility to validate with the tax entity if the electronic tax document received from the supplier is valid or not. The different ways available to validate these documents are:

- Web Service – *"Verification status of electronic invoice"* – Sp. *"Verificacion Estado de Factura Electronica"*
- Web Portal
- Consult QR code

5.4.2. Cross-Border

This section describes the requirements for cross border inbound documents such as purchase invoices

5.5. AoR (response) process

Electronic invoicing in Bolivia does not include a response process of acceptance or rejection of the electronic invoice by the receiver.

5.6. SIN validations

Some tax regimes require businesses to send tax documents to a predetermined hub either before, shortly after issuing invoices. Generally, a hub that requires this will send a reply to the issuer. This reply can be expressed as a clearance/ approval response, rejection, semi approved, etc.

Once the supplier has sent the invoice to SIN to obtain the corresponding authorization, SIAT (tax entity platform) will return one of the following elements after having made the corresponding validations to the supplier

- **Receipt code:** A receipt code will be received from the tax entity when the file is received and the format complies with the standards imposed by the SIN.
- Otherwise it will return a warning or error that will require the taxpayer's attention.

In no case will the receipt code mean that the digital tax document has been approved by the SIN. The receipt code will only allow the taxpayer to distribute the document to the buyer.

The SIN receives the invoice verifying that the parameters sent are valid, analyzes if the file received is correct, if the e-signature is valid (not applicable to the computerized online modality) and validates the XML against the XSD.

- **Approved:** registers the invoice or credit/debit note and returns receipt code, status 908 (validated)
- **Rejected:** The SIN returns communication with error codes 904 (observed), along with the list of errors or warnings

5.7. Invoice presentation / copy

Some regimes require a visual presentation of the invoice file to be transmitted along with the structured invoice file. This section describes if there is any regulation concerning visual or image-based presentations of invoices as a copy for the original or vice versa.

The graphic representation of the tax document can be printed as many times as required.

A differentiation is made between the printing of the online graphic representation and offline, with the following legend:

- "This document is the Graphic Representation of a Digital Fiscal Document issued in an online invoicing modality" – Sp. *"Este documento es la Representación Gráfica de un Documento Fiscal Digital emitido en una modalidad de facturación en línea"*
- "This document is the Graphic Representation of a Digital Fiscal Document issued offline, verify your submission with your supplier or on the website www.impuestos.gob.bo" – Sp. *"Este documento es la Representación Gráfica de un Documento Fiscal Digital emitido fuera de línea, verifique su envío con su proveedor o en la página web www.impuestos.gob.bo"*.

Go to section 5.11 to know more about the issuance of offline documents.

5.8. Distribution between taxpayers

This section explains how and if trading parties can send invoices between each other. In some cases, hubs also distribute the tax document to the buyer.

The distribution of the digital tax document must be done at least via email, always maintaining the appropriate levels of security and privacy. The document must be sent in XML format together with a graphic representation to the buyer.

When requested by the buyer, the issuing taxpayer must deliver a printed graphic representation of the invoice online, with the exception of invoices issued online by points of sale.

5.9. Rectification process

This section will express the process that needs to be taken when there is an error in an invoice, how it is to be handled, and corrected by both buyer, seller, and if a notification needs to be delivered to the tax authority.

Corrections or adjustments, whether total or partial, are made by means of a Credit Note or Debit Note, always referring to the original invoice and displaying the total or partial amount to be returned.

Those credit-debit notes referencing an electronic tax document 18 months old, will not be admitted by the tax administration.

The Reconciliation Note is used to make adjustments in the tax credit and debit of taxpayers, for transactions invoiced in previous periods not older than twelve (12) months, for electricity, telecommunications, potable water and hydrocarbon services.

When a tax document has been registered as valid in the database of the tax administration, its status may be changed to "Cancelled" up to the ninth (9th) day of the month following its issuance, exclusively when the registered transaction has not been carried out and recording the reason for the cancellation. The cancellation can be done through the taxpayers web portal.

The issuer must report the cancellation to the buyer by mail or other electronic means that guarantee the privacy of the buyer's information.

5.10. Coexistence of paper and electronic invoices

Item	Commentary
Whether parallel invoicing (issuance and exchange of the same document in several formats, e.g. electronically and on paper) is allowed and/or whether there are any regulations surrounding it	Not allowed

Whether the jurisdiction allows for document (e.g. invoice) dematerialization, i.e. destruction of the original paper invoice, for processing and/or archiving	• No information available
Whether any conditions apply, and which, to the dematerialisation	• No information available
Whether the jurisdiction allows for document (e.g. invoice) materialization, i.e. destruction of the original electronic document, for processing and/or archiving	• No information available
Whether any conditions apply, and which, to the materialisation	• No information available

5.11. Contingency invoicing

This refers to the process for e-invoicing if any mandatory infrastructure is inaccessible. If temporary measures are available, or allowed, to facilitate invoicing during the downtime.

The types of significant events that may generate a contingency are:

- a) Internet Service cut-off
- b) Inaccessibility to the Tax Administration's Web Service.
- c) Access to areas without Internet due to deployment of points of sale.
- d) Sale in places without Internet.
- e) Computer virus or software failure.
- f) Change of system infrastructure or hardware failure.
- g) Power outage.

In the significant events a), b), c) and d), the authorized invoicing computerized system must continue issuing electronic tax documents and store them in batches of maximum five hundred (500) invoices per each. After the recovery of the contingency event, the invoicing computerized system must register the recovery through the Web Service enabled for such effect and proceed to send the batches using the web service "Invoice Package Reception" (Sp. *"Recepción Paquete Factura"*). The deadline to send such contingency batches is **forty-eight (48) hours after the event**, except for cases c) and d) where the deadline to send these batches are **until the ninth (9th) day of the following month**.

In cases a) and b), the CUFD will extend its validity up to seventy-two (72) hours. In cases c) and d), such validity may be extended up to fifteen (15) days.

In significant events e) and f), the taxpayer shall have two options

- 1) Issue contingency e-invoices using the web portal, or
- 2) Issue contingency invoices through an authorized printing company.

If the taxpayer chooses option 1), the taxpayer must request the authorization through the tax administration's web portal. In case of choosing option 2), the taxpayer must send

an authorization request to the SIAT. If the request is accepted, the taxpayer will receive a PIN and a CAFC. The taxpayer must go in person to the authorized printing company and give the corresponding PIN (the taxpayer receives the PIN by email once the authorization request is accepted) together with the CAFC. The CAFC will be present in each contingency invoice. Once the contingency event is overcome, the taxpayer must transcribe those documents issued by the printing company using the web service "Invoice Package Reception" **within seventy two (72) hours**.

In case of a significant event as in point g), the taxpayer shall issue contingency invoices by means of printing and shall follow the same step explained above for point 2). The deadline to transcribe these invoices once the contingency is overcome **will be seventy-two (72) hours**.

6. Document content requirements

6.1. Document types

Item	Commentary
Documents mandatory for issuance by supplier	• See appendix 1
Documents mandatory for issuance by buyer	• N.a

Item	Commentary
Self-billing allowed	• No
Simplified invoice allowed	• Yes

6.2. Document numbering

This section outlines the requirements to the sequential numbering of invoices and, where applicable, other documents.

6.2.1. Document numbering by the taxpayer

The invoice number is mandatory and is assigned to the invoice. For online invoicing modalities, the Fiscal Document number is not mandatory to be correlative, being at the taxpayer's discretion, which must be assigned by head office, branches and points of sale.

Unique Invoicing Code - CUF: It allows identifying the invoice as unique, it must be generated automatically by the taxpayer's computerized invoicing system incorporating data of the issuer, branch, type of document, type of invoicing, etc. You can see more details of its generation in the following [link](#).

6.3. Indirect tax (IT)⁴ rates

This section illustrates the applied IT⁵ rates and provides a non-exhaustive list with examples of goods and/or services that fall within specific IT rates. IT rates that differ between different administrative units are clearly outlined.

Indirect tax rates		
13%	Standard	Sale of goods and services, commissions, fees, rental of goods, imports, swaps, financial leasing, brokerage, banking operations, construction contracts, among others.
0%	Zero	Sale of nationally produced books, international land cargo transportation, official publications issued by state institutions.
	Exempt	Goods imported by diplomats, coinsurance, free zones, sale of real estate, transfer of portfolio, export of goods, sale of tourist services.

6.4. Mandatory IT invoice content

The section below illustrates the minimum legal requirements related to the content of invoices issued according primarily to the indirect tax regulations of Bolivia. Please note that other additional content requirements might apply in addition, i.a. of technical character.

General	
Required to mention the word "invoice"	• Yes
Required that the invoice is issued in the language of the country who is entitled to impose the invoice requirements:	• Information not specified
Sequential numbering	• Yes, see section 6.2 above
Required to mention copy or duplicate in case a copy is issued	• No
Reference in case of outsourced issuance	• No

Supplier data	
Full legal name of the supplier	• Yes
Allowed to abbreviate or shorten the legal name of the supplier	• No, only in the equivalent document, ETKT tickets, Airline tickets.
Full address of the supplier in country of establishment	• Yes, address of the Head Office or branch registered in the National Taxpayers' Register.

⁴ For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

⁵ Local name is IVA

Allowed to mention the PO box address instead of the legal address of the supplier	• No
IT identification number/sales tax number from the supplier in the country where the supply takes place for IT purposes	• Yes, the NIT (tax invoice number)
IT identification number of the supplier in the country of establishment	• Passport or foreign ID if buyer is abroad.
Information (i.e. name, address, IT number) of the fiscal representative of the supplier (if appointed)	• No information available.
Legal form of the supplier	• Not required.
Trade register number of the supplier	• Yes, NIT.
Company Registry data of the supplier (e.g. court registration, address of chamber of commerce)	• Not required
Place of legal seat of the supplier (Headquarters)	• Not required
Other supplier data	• Supplier's telephone number

Customer data	
Full legal name of the customer	• Yes
Allowed to abbreviate or shorten the legal name of the customer	• Not specified
Address of the customer in country of establishment	• Yes, only for exports and activities of basic services.
Bill-to address when it is different from the registered address of the customer	• Not required
Allowed to address the invoice to a Post Office Box address instead of the legal address of the customer	• No information available
IT identification number in the country where the supply takes place for IT purposes in case of domestic supplies (if available)	• Yes
IT identification number of the customer in the country of dispatch for invoices issued for exempt export supplies	• No information available
IT identification number of the customer in another Member than the Member State of dispatch for intra-Community supplies	• No information available
Information (i.e. name, address, IT identification number) of the fiscal representative (if customer has appointed a fiscal representative)	• No information available

Other customer data	- Country, only for export invoices. - Code of the client ("<i>Código del cliente</i>")
----------------------------	--

Transaction data	
Date of issue	Yes
Date of supply (chargeable event)	No information available
Date of prepayment	No information available
Description of the goods/services	Yes
Quantity of the goods supplied or the extent of the services supplied	Yes
Purchase order number	No information available
Shipped from location (for the supply of goods)	No information available
Shipped to location (for the supply of goods)	Yes, only for export of goods
Status of the goods (e.g. in bond, in free circulation)	Yes, only for export of goods
Incoterms	Yes, only for export of goods
Other information on the supplied goods/services required (except in case of intra-Community supply of new means of transport)	No

Financial data	
Taxable base per item (unit price excl. IT)	Yes
Total taxable base per IT rate or exemption	Not required
IT rate applied	Yes
Total IT amount calculated per rate	Yes
Total IT amount payable	Yes
Discounts/rebates if not included in the unit price	Yes
Total gross amount (including IT)	Yes
Mandatory to mention the total IT amount due in the national currency	No
Which other amounts (i.e. none, only the total IT amount) must be mentioned in the national currency of your country	- Amount to be paid with a Gift Card - Additional discount per item
Exchange rate (if the invoice is not issued in the local currency)	Yes, the official exchange rate of sale in local currency corresponding to the date of the transaction must be recorded.

Which exchange rate must be applied in order of priority	• It will be necessary to apply the exchange rate corresponding to the day of the transaction. • The exchange rate must be the one from the Central Bank of Bolivia.
Terms of payment	• It will be necessary to specify if the payment was done by Gift Card
IBAN and BIC number of supplier	• No information available

Specific references for invoices	
Invoice reference in case of IT exemption or reverse charge	• No information currently available
List the required references in case of exemption or reverse charge	• No information currently available
Allowed to refer to the appropriate provision in Directive 2006/112/EC for: - "reverse charge" for supplies subject to a reverse charge mechanism; - "supply is taxable in the country of the recipient" for B2B supplies of services; - "exempt intra-Community supply - article 138 VAT Directive"; - "Exempt export - article 146 VAT Directive"; - "simplification for triangular sales - article 141 VAT Directive - " Transfer of own goods- article 17 VAT Directive"?	• Not applicable in LATAM
Required to specifically mention 'margin scheme - travel agencies', 'margin scheme - second hands goods', if applicable	• No information currently available
Reference required if the transaction takes place outside the EU as a result of the Use and enjoyment provisions	• No information currently available
Specific other reference required, e.g. in case of barter transaction, prepayments, etc. (not self-billing or special margin schemes)	• No information currently available

Specific references required in case invoicing is outsourced	• Not required
Reference to 'cash accounting scheme' in B2B sales in case the IT is due by the supplier upon receipt of the payment/IT is deductible by the customer upon payment	• No information currently available
Other specific requirements/references to be mentioned on an invoice	• The following references are required to be present in the invoices: ○ SIN reference: <i>"Esta factura contribuye al desarrollo del país, el uso ilícito será sancionado penalmente de acuerdo a Ley"</i> ○ Graphic representation reference for document issued online: <i>"Este documento es la Representación Gráfica de un Documento Fiscal Digital emitido en una modalidad de facturación en línea"</i> ○ Graphic representation for e-documents issued offline: <i>"Este documento es la Representación Gráfica de un Documento Fiscal Digital emitido fuera de línea, verifique su envío con su proveedor o en la página web www.impuestos.gob.bo"</i> (Go to section 5.11 to know more about documents issued offline) ○ Consumer reference as established per law N° 453

6.5. Simplified invoice

The Supplier is not always obliged to issue a complete invoice. In certain scenarios, they may be able to issue a so-called simplified invoice.

Simplified invoicing	
Possible to issue simplified invoices for certain supplies	• Yes
Maximum amount for simplified invoices	Thousand bolivians (BS/1.000)
Other supplies for which a simplified invoice can be issued	• No
Simplified invoices limited to certain type of supplies	• No, limited only to the value.

Simplified invoices not allowed for certain transactions	• No
Minimum content requirements on a simplified invoice	• Same requirements as standard invoices, except for the buyer's identification. However, it will be required to put some kind of value that can identify the buyer (i.e., such as a telephone number)
Invoices subject to the national invoice requirements (not self-bills)	• No
(other) Invoices subject to the national invoice requirements (not self-bills)	• No

Pagero Online does not support the creation of simplified invoices as they typically do not correspond to the business requirements of Buyers.

6.6. Rectification document

In Bolivia, credit notes and debit notes must be issued as rectification documents. A credit/debit note should include at least the following information:

Specific references for rectification documents	
Must the word "credit note" be mentioned	• Yes
Reference to original invoice required on a credit note	• Invoice number • CUF • Invoice issuance date • Details, concept or description of original transaction • Total amount in local currency
Clear indication required that the amount mentioned on the credit note is crediting earlier amount (e.g. minus sign '-')	• No • From the credit note must result that a credit is invoiced, e.g. the reference 'credit note' must be mentioned on the document
Reason for credit required	• No, but recommended

Sequential numbering	
Separate sequential credit note numbering required	• No • The taxpayer is free to define the numbering
Allowed to issue one credit note to correct different invoices	• No information currently available

Pagero Online creates corrective invoices according to the content requirements of the Complete invoice.

6.7. Optional content

This section outlines briefly whether and how the trading parties can provide additional content in the technical e-document format mandated or otherwise prescribed in the specific jurisdiction.

The Taxpayer will be able to incorporate in the Invoice, the fields that are necessary according to its economic activity and its commercial needs, if they fulfill the requirements established in the RND No. 102100000011, the complementary data will not be part of the XML of the Digital Fiscal Document.

7. Integrity and Authenticity

Ensuring the integrity of the content, as well as the authenticity of the origin (I&A) of an invoice, is an obligation for both the Supplier and the Recipient.

The purpose of this section is to further clarify the local I&A requirements on B2B invoices, as well as outline whether different requirements apply to B2G invoices. The review is done both from the Supplier's and the Recipient's perspective, as varying rules may apply.

Item	Supplier	Recipient
Whether it is mandatory to ensure I&A in the jurisdiction	• Yes	• Yes
Which methods for ensuing I&A are provisioned for	• Own or delegated Token • CIUS • CUFD • E-signature only for online electronic invoicing modality • Digital fingerprint (Sp. "<i>Huella digital</i>")	• Validation of the electronic tax document
Which requirements apply for I&A methods if ensured by a third-party (outsourcing)	• Same as above	• Same as above

7.1. e-Signature

Even where e-signature is not an explicit requirement, Pagero recommends that our customers apply it as, globally, it is the most widely accepted legal means of ensuring I&A for business transactions.

In practical terms, this results in the same evidential position for eDocuments as for paper documents. This unique feature of e-signature provides an exceptional level of legal certainty.

Item	Commentary
e-Signature technical requirements	• Advance
Automated e-signing	• Allowed
Time-stamping of e-signature	• No

7.2. e-Signature validation

The Recipient of an invoice is often required by law or practice to validate the e-signature on the received invoice. Even for countries where the validation-upon-receipt is not expressly regulated, this is recommended by Pagero for both trading partners to be able to guarantee I&A.

Item	Commentary
Validation upon receipt	• Yes
Time-stamping of validation data	• No

8. Document retention

This section describes archiving requirements regarding the invoicing process and documents handled by Pagero. Please note, additional archiving requirements may apply to your specific documents.

Item	Commentary
Components to be stored (e.g. tax invoice, source documents, audit trail, I&A proof)	• The digital tax documents as reported to the tax entity. • Any other supporting documents related to the transaction should also be stored.
Requirements to present stored documents in a specific audit format	• No explicit requirements
Legibility, i.e. the ability to read stored e-documents by an untrained eye	• Yes, Required
Legibility requirements	• No explicit requirements
Retention period for invoices not related to immovable property⁶	• 10 years
Start point of retention period calculation for invoices not related to immovable property	• From the date the document was issued
Retention period for e- invoices related to immovable property	• N.a.
Start point of retention period calculation for invoices related to immovable property	• N.a.
Retention period for other than regular invoices or invoices related to immovable property (if existing):	• N.a.
Start point of retention period calculation for other than regular invoices or invoices related to immovable property:	• N.a.

⁶ Pagero stores all documents for 90 days due to data privacy and security regulations, after which the data is automatically deleted, unless Archive has been selected. Pagero provides long term archiving (for the legally required term, plus one year)

Outsourced archiving	• Allowed
Archiving abroad⁷ and conditions, if any (e.g. notification, derogation, online access, mutual tax assistance treaty)	• No information currently available
Other requirements in relation to electronic document retention	• N.a.

⁷ In certain situations or jurisdictions deviating requirements – typically regarding archiving abroad – may apply to invoices and related documents, e.g. concerning matters of defence and national security. Therefore, Pagero encourages customers to inquire for and receive an explicit written statement from the local tax authority stating that the archiving of such documents outside of the taxpayer's country is permitted. Pagero in a capacity of a third-party may not apply for derogations or clarifications of this nature on behalf of a taxpayer.

9. Other transactional documents

Along with invoices, countries may have regulations relating to other trading documents. The purpose of this section is to provide a selective (not exhaustive) overview of the regulation of other transaction-related documents of importance.

Document	Commentary
Purchase order	No explicit requirements
Rectification document	Yes, see section 6.6 above
Payment instruction	No explicit requirements
SAF-T (or alike) reporting	Yes, see section 10.1
Transportation documents	- Within the Tax Documents, the Zero Rate Invoice for International Cargo Transportation was created - In Bolivia, in order to document the physical movement of goods, there is a transport consignment note, which is regulated by the National Customs and is generated through the Single Customs Modernization System (SUMA).
Other	N.a.

10. Other requirements

This section highlights certain aspects of the local regulations and infrastructure that differ from Pagero's General invoice processing and our standard country compliance investigation.

10.1. Indirect tax reports

Generally, taxpayers in Bolivia must report daily transactions in the corresponding RCV - Purchase and Sales Register (Sp. "*Registro de compras y ventas*").

Those taxpayers who use the online or computerized online invoicing modality, will not need to register the digital tax documents in the corresponding RCV, **since the filling will be automatic.**

The information to be recorded must allow the identification of taxed, non-taxed, exempt, released, taxed at zero rate operations, as well as the tax to which it is subject (i.e. ICE, IEHD, IPJ).

The RCV must be submitted to the National Tax Service even in those periods where no transactions are recorded. The deadline for recording transactions is **the ninth (9th) day of the month following the period reported.**

10.2. Governmental incentives

Law 1391 published in August 2021, explains some of the incentives for taxpayers to start using electronic invoicing on a daily basis. The incentives include some exemptions or 0% in some specific items specified by the tax administration.

10.3. Penalties for not complying

Article 67 of [normative resolution 102100000011](#) expresses the formal duties of taxpayers regarding electronic invoicing. In case any of the formal duties expressed in article 67 are not complied with, the penalties provided in article 162 of the Bolivian Tax Code will be applied. Fines will be between fifty (50) "*Unidades de Formento de la Vivienda*" (UFV) and five thousand (5,000) UFV.

11. Country-specific processing⁸

This section outlines how the Pagero General eInvoicing process has been adapted to the local requirements to ensure compliant local processing.

[if we use services of another provider or a partner, insert name and URL here]

11.1. Document issuance (AR) with Pagero

- 1) Supplier provides data in supplier preferred format to PAGERO.
- 2) PAGERO performs i.a. content validation, enrichment, conversion, applies signature if required, etc.
- 3) PAGERO sends the e-document to SIAT in the mandated format.
- 4) PAGERO receives a receipt code from SIAT if the document is received.
- 5) PAGERO distributes the e-document to the RSP/buyer in buyer's preferred format.

⁸ SSP and RSP stand for *Sending Service Provider* and *Receiving Service Provider* consecutively.

- 6) PAGERO receives a clearance notification from SIAT (approved/rejected) regarding the e-document.
- 7) The RSP gives the e-document to the Buyer
- 8-9) The Buyer/RSP validates the e-document with the Tax Authority with QR code, or other means available
- 10) PAGERO archives all relevant documents on behalf of the supplier.

11.2. Document reception (AP) with Pagero

- 1) The supplier sends the e-document to his SSP.
- 2) The SSP sends the e-document in the mandatory format to SIAT.
- 3) The SSP receives a receipt code from SIAT if the document is received.
- 4) The SSP/Supplier sends the e-document to PAGERO
- 5) PAGERO performs i.a. data validation, data enrichment, etc.
- 6) The SSP/Supplier receives the clearance notification from SIAT (approved/rejected).
- 7) PAGERO validates with SIAT the received e-document from the SSP/supplier.
- 8) PAGERO proceeds to give the validated e-document to the buyer
- 9) PAGERO archives all relevant documents on buyer's behalf.

12. Closing statements

12.1. Confidentiality

This General invoice processing description of Pagero Online, our Country Compliance Reports, and other documents provided by Pagero are of confidential nature and are only intended for and may only be used by Pagero's Customers, their employees or other authorized recipients for the purpose or purposes specified and agreed to between the parties. Descriptions, reports, and documentation may not – neither in full nor in parts – be copied or otherwise distributed to third parties without Pagero's prior written consent.

12.2. Disclaimer

In order to establish a relationship based on trust and transparency with our Customers, Pagero provides its General e-Invoice and eArchiving processing descriptions of Pagero Online as well as Pagero's Country Compliance Reports. These documents are intended to enable our Customers and their tax advisors to assess how Pagero has interpreted the relevant legislation and implemented it in our processes in order to support our Customers to fulfil their legal obligations.

We would like to remind our Customers that, according to tax and accounting regulations, the outsourcing of any process to third parties (such as issuance, compiling, processing, receipt, or archiving of e-Invoices), will not lead to a shift of liability, the liability will remain with the Customer. Accordingly, the taxable person always remains responsible towards the local authorities for ensuring their e-Invoice compliance, and for fulfilling accounting and reporting requirements. We want to emphasise this, in the light of that there can be potentially conflicting regulations on regional, national, or international levels.

Pagero endeavours to only include and provide accurate and up to date information. However, Pagero makes no guarantees as to the accuracy of any statement, information or advice provided by Pagero, whether in writing or verbally. The Customer must make an informed decision about whether to adhere to and follow such recommendations or not. The final decision and responsibility regarding tax, accounting, and reporting issues rest with the Customer.

Appendix 1

Name of all the electronic tax documents available in Bolivia.

Code	Description
1	Invoice of Purchase and Sale – Sp. <i>"Factura de Compra y Venta"</i> .
