| Revision history.....                                       | 43 |

## Introduction and document purpose

Pagero Group builds the world's largest, open business network – so you can reach any business, anywhere in the world. No matter how many borders your operations may cross or how many systems you are connected to, we take care of the technical and regulatory requirements across your entire order-to-cash, purchase-to-pay and freight processes. We give you data accuracy and security, transparency and real-time visibility – through a single connection.

At Pagero Group, we believe that technology supports sustainability. That's why we are committed to helping businesses become 100% paperless, supporting resource efficiency, transparency and business continuity.

The main purpose of this country compliance report is to provide the reader with an in-depth analysis of the focus country's laws, regulations, and process with regards to e-invoicing and other trade documents. The analysis considers topics such as business requirements before switching to electronic invoices, e-document creation, e-document distribution, integrity and authenticity, and, finally, e-archiving.

This document guides how Pagero solutions support customers in the focus country to meet local regulations and serves as a supplement to Pagero General E-invoicing Process Description.

# 1. Terminology

This section outlines general and country-specific terminology for Netherlands, which will be used throughout the whole document.

| Term                           | Explanation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>B2B</b>                     | Business-to-Business is a transaction or business conducted between one business and another, such as a wholesaler and retailer                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>B2G</b>                     | Business-to-Government refers to the business relationship a company selling products, services or information to governments or government agencies                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Peppol Network</b>          | The Peppol Network is a logical network enabling secure and reliable exchange of Peppol Dataset Types between End Users via Peppol Service Providers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>Peppol Authority</b>        | An authority, responsible for the registration of the companies that wish to become a Peppol Access Point (AP) or Service Metadata Publisher (SMP).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Centralized e-invoicing</b> | Where trading parties are required to transmit eDocuments to a predetermine infrastructure normally owned or maintained by the state. The infrastructure acts as an exchange engine, conducting mandatory checks, before delivering the invoice to the target receiver. The transmission path may be regulated, and additional requirements on the format, I&A (such as eSignature) may be necessary                                                                                                                                                                                                                                                      |
| <b>Post Audit</b>              | The post-audit tax regime allows trading partners to exchange e-documents as well as other transactional documents directly with each other, without any real-time or immediate controls performed by the tax office. Even though e-documents are allowed, there are no provisions as to what format, infrastructure, or how they should be created, issued, or distributed. The main requirements on the taxpayers are to ensure document content, integrity, and authenticity, as well as appropriate archiving. The term post-audit stems from the fact that Tax audits can be performed months or years after the transactions originally took place. |

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>UBL-OHNL</b>        | This format is based on the international standard UBL (or Universal Business Language) and is used for invoices relating to goods and services, <i>but not temporary staff</i> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>SI-UBL</b>          | This format is a subset of the larger UBL specification, containing almost 200 elements.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>SETU (HR – XML)</b> | SETU is an XML standard and an extension of the NL CIUS. This standard is specifically designed for <i>the hiring of temporary staff (and services)</i> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>NLCIUS</b>          | The NLCIUS is a subset of the European Standard EN 16931 for use in The Netherlands.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Peppol BIS 3.0</b>  | is a Core Invoice Usage Specification (CIUS) of EN 16931, following the guidance given in chapter 7 of <a href="#">EN 16931</a> . Any instance documents compliant with this specification will be compliant with the European Standard (EN 16931). According to <a href="#">CEF</a> , the Dutch government plans to align the national standard to the European standard “by setting up the NLCIUS on the PEPPOL BIS and having it implemented in the first half of 2021 at the latest”. This standard, Peppol BIS, should replace the UBL-OHNL and SI-UBL standards.                                                                                                                                                                                                          |
| <b>Digipoort</b>       | Digipoort is the center/ governmental Hub for exchanging e-invoices and other e-documents with the government. Digipoort works as an electronic post office. Digipoort receives the message; checks the message for several requirements; confirms receipt of the message, if desired on behalf of the organization.                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>KVK</b>             | When you register with the Netherlands Chamber of Commerce (Kamer van Koophandel, KVK) - Dutch Business Register number                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>OIN</b>             | <ul style="list-style-type: none"> <li>The Organization Identification Number (OIN) is a unique number that Logius can assign to organizations in order to identify, authenticate and/or authorize themselves in digital messaging within and with the government. The OIN is for organizations that exchange messages with the government. These can be public and private organizations. The condition is that they are registered in the trade register. In addition, a number of organizations that are not included in the trade register can also apply for an OIN. These are special organizations with a public task, advisory boards and international organizations with legal personality.</li> </ul> <p>A list of OIN numbers can be found <a href="#">here</a></p> |
| <b>BTW</b>             | <ul style="list-style-type: none"> <li>The BTW-nummer is the VAT, or turnover tax number. You need it for filing your VAT return and paying VAT in the Netherlands. You receive a VAT number when you register your business with the Netherlands Chamber of Commerce (KVK) - that is, if the Dutch Tax Administration deems you to be an entrepreneur for VAT purposes. They take this decision based on the information you provide when you register at the KVK. If your business is based abroad, but has to pay VAT in the Netherlands, you need to register with the Dutch Tax Administration. To look up a VAT number, or to read more about VAT numbers, read the article <a href="#">Using and checking VAT numbers</a>.</li> </ul>                                    |

## 2. General overview

This section provides an initial introduction into the local e-invoicing environment within Netherlands including the types of local e-invoice regulations, go-to governmental and industry bodies, and whether multiple invoicing regimes, that is, varying regulatory requirements, exist for example by industry, business size, or other defining factors.

| Item                                                                                                   | Commentary                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

<sup>1</sup> Logius is the digital government service, part of the Ministry of the Interior and Kingdom Relations. They have their own [products and services](#) for digital government. In addition, they manage [standards](#) that all government organizations use in their digital services.

- [Law of 23 June 2021](#) on sales tax, administrative, invoicing, and other obligations in the field of turnover tax.

### 3. E-Invoice status

When considering sending or receiving e-invoices two basic questions should be considered: is invoice equal to paper invoice from the legal perspective; and if there are any situations where e-Invoicing is mandatory for reception or transmission.

<sup>2</sup> It is possible that a business is required to send e-invoice in some scenarios, and send voluntarily in others

<sup>3</sup> Differing definitions may exist between different levels of government, or differing legislation, i.e. accounting law and IT law

<sup>4</sup> "Local authorities can require you as a supplier to invoice electronically. For example, municipalities, provinces, and water boards and also all other organizations that have to tender. Such as educational institutions and museums. All of which a legally obliged to be able to receive and process e-invoices"

**Implementation / roll-out plan**

- Implemented as follows:
  - Since 1 January 2017, Suppliers to Dutch central government are required to issue e-invoices;
- Since 18 April 2019 All contracting authorities are required to be able to receive and process e-invoices (in accordance with the [EU Directive 2014/55/EU](#))

## 4. Before switching to e-invoices

### 4.1. IT<sup>5</sup> registration

The following thresholds apply to the requirement to be registered for a IT number in Netherlands:

Established: None

Non-established: None

Distance selling: EUR100,000

Intra-Community acquisitions: EUR10,000

Electronically supplied services: EUR 10,000

No VAT registration threshold exists in the Netherlands. A taxable person that begins an activity must notify the VAT authorities of its liability to register.

After the registration of the business with the Chamber of Commerce (KVK), [the Dutch Tax and Customs Administration \(Belastingdienst\)](#) will assess and notify the business owners if they are applicable to register for VAT purposes. That is normally the case if the business operates a company, self-employed professional, or freelancer.

According to the Dutch Tax and Customs Administration, [the criteria](#) for being an entrepreneur for VAT purposes are as follow:

- Do you practice a profession or run a business independently?
- Do you have regular income?
- Do you have income and a job?
- Are you trying to earn money from an entitlement or assets, like savings, investments or a house or holiday let?

---

<sup>5</sup> For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

If you are considered an entrepreneur for VAT purposes. You will receive 2 VAT numbers: a VAT identification number (btw-id) and a VAT tax number (omzetbelastingnummer). You must indicate your VAT identification number (btw-id) on all of your invoices.

Exemption from paying VAT: The Dutch VAT rules do not contain a provision for exemption from registration, however businesses whose global turnover does not exceed EUR 25,000 per year can apply for a special scheme (Small Business Scheme). This special measure was going to expired on 31 December 2022. However, Netherlands requested an authorization to continue with this measure until **31 December 2024**.

**From 1 January 2025**, Member States are to transpose [Council Directive \(EU\) 2020/285](#). Meaning that Member States will be allowed to exempt from VAT the supply of goods and services made by taxable persons whose annual turnover in a given Member State does not exceed a threshold of EUR 85 000 or the equivalent in national currency.

Under this scheme, these small and medium enterprises (SMEs) will have to register for VAT, but they will not have to issue invoices (although still allowed) or file VAT returns. This means that they also cannot deduct any input tax.

Netherlands IT number format: NL1 2 3 4 5 6 7 8 9 B 01

4.2. Process to switch to e-Invoicing

Even though many countries encourage or even mandate e-Invoicing, there may be specific requirements on the Trading parties – typically the Supplier – before starting an e-Invoicing program. This section provides a brief overview of such requirements.

| Item                                                                                                              | Commentary                                                                                                 |
|-------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|
| Actions towards authorities, required in order to enable electronic processing instead of conventional processing | <ul style="list-style-type: none"><li>• Not required</li></ul>                                             |
| Actions between the trading partners, e.g. customer acceptance, agreement, etc.                                   | <ul style="list-style-type: none"><li>• Buyer’s consent is required, Tacit consent is sufficient</li></ul> |
| Transition period from the moment of starting e-invoicing during which, e.g. parallel invoicing may be allowed    | <ul style="list-style-type: none"><li>• No explicit requirements</li></ul>                                 |

4.3. Outsourcing invoice issuance function

Many companies decide to outsource the issuance process of e-invoicing to third parties who have the necessary infrastructure and knowledge of implementing and executing e-Invoicing. This may be driven by a technical limitation or local regulatory requirements. However, before doing so, it is highly recommended that a supplier investigates whether such outsourcing is permissible and whether any requirements must be fulfilled.

#### 4.4. Outsourcing invoice receipt function

Due to the unique nature of the AP process, it may be required for the buyer (invoice receiver) to have an explicit agreement, or other permissions to be put in place for Service Providers to conduct invoice receiving functions on behalf of them.

The Netherlands has no explicit requirements on the outsourcing of the function of receiving invoices (similar to the function to issue invoices as outlined above).

## 5. Document processing

### 5.1. Format and other technical requirements

Globally, a multitude of e-Invoicing formats and infrastructures exist. Local regulators often offer or mandate the use of certain formats, standards, or platforms for the transmission or delivery of invoices or other tax-related documents. Pagero has the technical depth and experience to support country-specific technical requirements globally.

## 5.2. Communication with Peppol/Digiport

Regulations in Netherlands foresee the following options on how e-documents can be communicated with the mandatory infrastructure(s):

| Communication options | Commentary                                                                                                                                                                                                                                                                                                                                                        |

| <b>Manual</b>         | <ul style="list-style-type: none"> <li>• Suppliers to governments entities can connect to the <a href="#">Logius e-invoice portal</a> to send e-invoices manually (usually small volumes of invoices)</li> <li>• Suppliers can use services of <a href="#">Peppol service providers</a> to manually generate an e-invoice to be transmitted via Peppol</li> </ul> |
| <b>Other options</b>  | <ul style="list-style-type: none"> <li>• No explicit requirements for push or pull communication</li> <li>• Scanning of inbound invoices is allowed</li> <li>• Printing of outbound invoicing is allowed</li> </ul>                                                                                                                                               |

## 5.3. Issuance and clearance process

This section describes the document issuance and clearance process from the supplier perspective.

### 5.3.1. Domestic documents

This section describes the process for documents created to be transmitted within the given country

**B2B invoicing:**

There are no explicit technical process requirements on e-invoices issuance in the Netherlands, such as exchange with a predefined infrastructure, as B2B e-invoicing follows the post-audit model.

(1) Documents can be exchanged with your suppliers and customers in various formats and via various exchange mechanisms.

(2) The key requirements are to ensure the country-specific document content, document integrity and authenticity, as well as archiving requirements

(3) Neither document format nor exchange mechanism are regulated.

**B2G invoicing:**

A list of OIN numbers can be found [here](#). In addition to [the Peppol identifier lookup tool](#)

Central government suppliers must send electronic invoices for new purchase agreements. The national government has drawn up this rule together with the business community. Additionally, Electronic ordering at the central government level will change in the coming years see more in [section 10.2](#).

According to the [guidelines](#) set by the Ministry of the Interior and Kingdom (BZK), suppliers to Central governments entities have the following options for e-invoice submission:

- **Via a central government e-invoice portal.** You must [register via the DigilInkoop e-invoice portal](#): For manual entries and a small volume of invoices.
- **The use of Digipoort:** Suppliers who have IT capabilities and infrastructure can connect directly to Digipoort. This option enables sending large volumes of invoices in a fully automated mechanism. Digipoort receives the message; checks the message for several requirements; confirms receipt of the message, if desired on behalf of the organization. This can also be done via an [intermediary](#)
- **The use of Peppol:** Most administration software that Dutch companies use is suitable for sending e-invoices via the Peppol network. The access point/ service provider of the national government will convert the supplier's invoice format into the required e-invoice government format.

**Local public authorities' suppliers can send, voluntarily<sup>6</sup>, e-invoices:**

- Via the secure Peppol network. *Check on the site of the Dutch Peppol Authority [how you can use Peppol](#).*
- Via email with XML attachment. This is the e-invoice, suppliers accounting software creates it. (Or use of an intermediary service provider)

---

<sup>6</sup> Mandatory if it is stated in the purchase conditions of your contract, you are obliged to send an e-invoice, otherwise its voluntary

- Send manually via an online portal of an ICT service provider

### 5.3.2. Cross-Border

This section describes the requirements for cross-border outbound documents such as sales invoices.

There are no explicit requirements for Cross-Border sales invoices.

While its use is not mandatory in the Netherlands, some private entities are leveraging Peppol for both domestic and international e-invoicing.

## 5.4. Reception and validation process

This section describes the document reception, validation and acceptance processes from the buyer perspective.

### **B2B**

There are no explicit requirements on the B2B reception, validation, or AoR processes. On the B2B side, the Netherlands follows the post-audit model, which has been outlined above under section [5.3.1](#).

### **B2G**

Similar to the B2B side, in the Netherlands, there is no explicit requirement for the public authorities to validate received documents nor are they required to offer AoR messages to suppliers. However, technical validation still takes place. See more about validation in [section 5.5](#)

### 5.4.1. Domestic documents

This section describes the process for documents received for purchases or transactions within the given country

**B2B invoicing:** No explicit requirements on the receiving of e-documents. Similar to the issuance process. Please see the flow chart [section 5.3.1](#) above.

**B2G invoicing:** The central public entities receive e-documents through the options specified in the issuance process i.e central public entities receive e-documents via Peppol, Digipoort, and the Logius invoice portal. Please refer to [section 5.3.1](#) above. The following [list](#) shows the government entities to **which suppliers are obliged** to send e-invoices.

Furthermore, the Netherlands has no explicit requirement for the central public entity buyers to provide confirmation or notification that the e-invoice has been received. However, Digipoort can send on behalf of the organization confirmation receipt of the message received if this is desired. Additionally, the Peppol invoice response is being investigated for Peppol related invoice submissions.

The remaining public entities are [legally obliged](#) to be able to receive and process e-invoices. Additionally, all contracting authorities are advised to indicate to their suppliers that they are ready to receive e-invoices that meet the EU standard and how they would like to receive them.

## 5.4.2. Cross-Border

This section describes the requirements for cross-border inbound documents such as purchase invoices

There are no explicit requirements for Cross-Border purchase invoices. Some foreign suppliers leverage the Dutch Central government's Peppol connection to submit invoices. Even though this is not mandated by law.

## 5.5. AoR (response) process

No explicit requirements.

## 5.6. Peppol/Digiport validations

Some tax regimes require businesses to send tax documents to a predetermined hub either before, shortly after issuing invoices. Generally, a hub that requires this will send a reply to the issuer. This reply can be expressed as a clearance/ approval response, rejection, semi approved, etc.

For e-documents submitted via Peppol: Validations must be performed by the sending Peppol Service Provider (e.g Pagero), before distributing documents to the intended receiver's Peppol Service Provider.

For e-documents submitted via Digipoort: Digipoort validates messages by checking whether they meet the standard and specifications. This ensures that received messages can be processed immediately by the recipient's systems. Different standards apply to different types of messages, such as UBL for e-invoices or XBRL for financial reports. The sender's software must be able to deliver messages in the correct format.

## 5.7. Invoice presentation / copy

Some regimes require a visual presentation of the invoice file to be transmitted along with the structured invoice file. This section describes if there is any regulation concerning visual or image-based presentations of invoices as a copy for the original or vice versa.

There are no explicit requirements to distinguish duplicate invoices from originals, but if applied the following wording is recommended to be used: "kopie van het origineel", or "copy" in English.

Issuing a PDF Presentation (a human-readable duplicate) when Tax invoices are issued in machine-readable format files can be confusing. To ensure the correct management of original documents, in addition to technical controls, Pagero Online adds "Copy Tax

Invoice” on PDF Presentations where Tax invoices have been issued as machine-readable format files.

## 5.8. Distribution between taxpayers

This section explains how and if trading parties can send invoices between each other. In some cases, hubs also distribute the tax document to the buyer.

| Item                               | Commentary               |

| <b>Scanning outbound invoicing</b> | No explicit requirements |

## 5.9. Rectification process

This section will express the process that needs to be taken when there is an error in an invoice, how it is to be handled, and corrected by both buyer, seller, and if a notification needs to be delivered to the tax authority.

| Rectification process                                                                                                                  |                                                                  |
|----------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------|
| <b>What are the options to correct an invoice if an incorrect IT rate, exemption or reverse charge is applied on the invoice</b>       | <ul style="list-style-type: none"> <li>• Credit note.</li> </ul> |
| <b>What are the options to correct an invoice if the customer returns the goods</b>                                                    | <ul style="list-style-type: none"> <li>• Credit note</li> </ul>  |
| <b>What are the options to correct an invoice if the customer paid too much</b>                                                        | <ul style="list-style-type: none"> <li>• Credit note</li> </ul>  |
| <b>What are the options to correct an invoice if the supplier agrees to a discount after the invoice was issued to the customer</b>    | <ul style="list-style-type: none"> <li>• Credit note</li> </ul>  |
| <b>What are the options to correct an invoice if the invoice misses data such as name, address, IT number, invoice reference, etc.</b> | <ul style="list-style-type: none"> <li>• Credit note.</li> </ul> |
| <b>Other scenarios with different correction option</b>                                                                                | <ul style="list-style-type: none"> <li>• N.a</li> </ul>          |

<sup>7</sup> Note, however, that prior to using an external portal, like Pagero's Webportal, Suppliers are required to already have an invoice / invoice data in their internal accounting software. Portals are not designed for the purpose of replacing internal accounting but are a mechanism to make invoices available for the Buyer. Recommended only for businesses issuing fewer than 100 invoices annually.

|                                                                                                                                                                       |                                                              |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|
| <b>Party entitled to issue a credit note if the invoice was issued by the supplier (i.e. no self-billing)</b>                                                         | <ul style="list-style-type: none"> <li>• Supplier</li> </ul> |
| <b>Allowed to draft a 'waiting' document/interim document' in the absence of a purchase invoice and report IT as due and deductible on the basis of this document</b> | <ul style="list-style-type: none"> <li>• No</li> </ul>       |

## 5.10. Coexistence of paper and electronic invoices

| Item                                                                                                                                                                                                   | Commentary                                                                                       |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| <b>Whether parallel invoicing (issuance and exchange of the same document in several formats, e.g. electronically and on paper) is allowed and/or whether there are any regulations surrounding it</b> | No explicit requirements                                                                         |
| <b>Whether the jurisdiction allows for document (e.g. invoice) dematerialization, i.e. destruction of the original paper invoice, for processing and/or archiving</b>                                  | Allowed                                                                                          |
| <b>Whether any conditions apply, and which, to the dematerialisation</b>                                                                                                                               | Allowed provided the authenticity of the provider and the integrity of the content is guaranteed |
| <b>Whether the jurisdiction allows for document (e.g. invoice) materialization, i.e. destruction of the original electronic document, for processing and/or archiving</b>                              | Allowed                                                                                          |
| <b>Whether any conditions apply, and which, to the materialisation</b>                                                                                                                                 | No specific conditions but authenticity, integrity, and legibility must be guaranteed.           |

## 5.11. Contingency invoicing

This refers to the process for e-invoicing if any mandatory infrastructure is inaccessible. If temporary measures are available, or allowed, to facilitate invoicing during the downtime.

Logius ensures the availability, correct operation, continuity, and security of Digipoort. This is stated in the Connection Conditions and the Service Level Agreement.

Malfunctions and maintenance up-to-date status can be accessed [here](#)

Also, users of the governmental platforms can sign up to receive maintenance and malfunction information by [email or app](#)

In case users are using Peppol network, their Peppol Service Provider follows the standard Peppol Uptime and Response SLA (Service Level Agreement)

## 6. Document content requirements

### 6.1. Document types

| Item                                                | Commentary                                                                               |
|-----------------------------------------------------|------------------------------------------------------------------------------------------|
| <b>Documents mandatory for issuance by supplier</b> | <ul style="list-style-type: none"><li>• Complete invoice</li><li>• Credit note</li></ul> |
| <b>Documents mandatory for issuance by buyer</b>    | <ul style="list-style-type: none"><li>• None</li></ul>                                   |

| Item                              | Commentary                                                                                                                                                                                                                                                                  |
|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Self-billing allowed</b>       | <ul style="list-style-type: none"><li>• Yes, both parties involved must agree to self-billing (there is no prescribed confirmation for this, but it is recommended to do this in writing).</li><li>• Buyer must state on the invoice "invoice issued by customer"</li></ul> |
| <b>Simplified invoice allowed</b> | <ul style="list-style-type: none"><li>• Yes</li></ul>                                                                                                                                                                                                                       |

### 6.2. Document numbering

This section outlines the requirements to the sequential numbering of invoices and, where applicable, other documents.

#### 6.2.1. Document numbering by the taxpayer

| Item                                                                                                                                       | Commentary                                                                                            |
|--------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| <b>A sequential number, based on one or more series, which uniquely identifies the invoice</b>                                             | <ul style="list-style-type: none"><li>• Yes</li></ul>                                                 |
| <b>Different series of sequential numbers allowed (e.g. a separate sequential numbering for intercompany billings, credit notes, etc.)</b> | <ul style="list-style-type: none"><li>• Yes, not specifically mentioned in law or guidance.</li></ul> |

|                                                                                                                                                                               |                                                                                                        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| <b>Allowed to start a new sequential numbering every year</b>                                                                                                                 | <ul style="list-style-type: none"> <li>• Yes, not specifically mentioned in law or guidance</li> </ul> |
| <b>Worldwide numbering on legal entity level allowed provided that gaps can be explained</b>                                                                                  | <ul style="list-style-type: none"> <li>• Yes</li> </ul>                                                |
| <b>Required that the numbers follow the date of issuance (i.e. is it true that an invoice with number 2 cannot have an invoice date older than the invoice with number 1)</b> | <ul style="list-style-type: none"> <li>• No, no explicit requirements.</li> </ul>                      |

### 6.2.2. Additional document numbering

This section should outline any additional numbering, e.g. provided in addition by the tax authority or that must be generated by the taxpayer based on specific specifications.

## 6.3. Indirect tax (IT)<sup>8</sup> rates

This section illustrates the applied IT<sup>9</sup> rates and provides a non-exhaustive list with examples of goods and/or services that fall within specific IT rates. IT rates that differ between different administrative units are clearly outlined.

| Indirect tax rates |                 |                                                                                                                                                                                                                                          |
|--------------------|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>21%</b>         | <b>Standard</b> | All other taxable goods and services.                                                                                                                                                                                                    |
| <b>9%</b>          | <b>Reduced</b>  | Examples: Foodstuffs (as goods and as services), Books (hard copy as well as electronic publications), Paintings and other "cultural goods", Entrance to museums, concerts, and similar events, Passenger transport, Hotel accommodation |
| <b>0%</b>          | <b>Zero</b>     | Examples: Exports of goods, intra-Community supplies of goods, Supplies to ships and aircraft used for international transportation                                                                                                      |
| <b>Exempt</b>      |                 | Examples: Supply of immovable property, Medical services, Financial Services, Insurance Services, Betting and gaming, Educational services                                                                                               |

## 6.4. Mandatory IT invoice content

The section below illustrates the minimum legal requirements related to the content of invoices issued according primarily to the indirect tax regulations of The Netherlands. Please note that other additional content requirements might apply in addition, i.a. of technical character.

| General                                       |                                                                         |
|-----------------------------------------------|-------------------------------------------------------------------------|
| <b>Required to mention the word "invoice"</b> | <ul style="list-style-type: none"> <li>• No, but recommended</li> </ul> |

<sup>8</sup> For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

<sup>9</sup> Local name [Belasting over de toegevoegde waarde (BTW)]

|                                                                                                                               |                                                                         |
|-------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------|
| <b>Required that the invoice is issued in the language of the country who is entitled to impose the invoice requirements:</b> | <ul style="list-style-type: none"> <li>• No</li> </ul>                  |
| <b>Sequential numbering</b>                                                                                                   | <ul style="list-style-type: none"> <li>• Yes</li> </ul>                 |
| <b>Required to mention copy or duplicate in case a copy is issued</b>                                                         | <ul style="list-style-type: none"> <li>• No, but recommended</li> </ul> |
| <b>Reference in case of outsourced issuance</b>                                                                               | <ul style="list-style-type: none"> <li>• No</li> </ul>                  |

| <b>Supplier data</b>                                                                                                           |                                                                                                                                                                                                                                                                                                             |
|--------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Full legal name of the supplier</b>                                                                                         | <ul style="list-style-type: none"> <li>• Yes</li> </ul>                                                                                                                                                                                                                                                     |
| <b>Allowed to abbreviate or shorten the legal name of the supplier</b>                                                         | <ul style="list-style-type: none"> <li>• Yes, if listed in the trade register.</li> <li>• The use of the trade name is permitted, provided that this trade name, in combination with the address and place of residence, is registered as such in the trade register of the Chamber of Commerce.</li> </ul> |
| <b>Full address of the supplier in country of establishment</b>                                                                | <ul style="list-style-type: none"> <li>• Yes</li> </ul>                                                                                                                                                                                                                                                     |

**Other specific requirements/references to be mentioned on an invoice**

- Chamber of Commerce registration number [KVK number](#) (mandatory based on Trade Register Act)

## 6.5. Simplified invoice

The Supplier is not always obliged to issue a complete invoice. In certain scenarios, they may be able to issue a so-called simplified invoice.

| Simplified invoicing                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                       |

| <b>(other) Invoices subject to the national invoice requirements (not self-bills)</b> | <ul style="list-style-type: none"> <li>• No</li> </ul>                                                                                                                                                                                                                                                                                                                                                |

Pagero Online does not support the creation of simplified invoices as they typically do not correspond to the business requirements of Buyers.

## 6.6. Rectification document

In the Netherlands, a credit/debit note must be issued as rectification documents. A, a credit/debit should include at least the following information:

| Specific references for rectification documents                                                                                 |                           |
|---------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| <b>Must the word "credit note" be mentioned</b>                                                                                 | • No, but recommended     |
| <b>Reference to original invoice required on a credit note</b>                                                                  | • Yes, the Invoice number |
| <b>Clear indication required that the amount mentioned on the credit note is crediting earlier amount (e.g. minus sign '-')</b> | • No                      |
| <b>Reason for credit required</b>                                                                                               | • No, but recommended     |

| Sequential numbering                                                  |                                  |
|-----------------------------------------------------------------------|----------------------------------|
| <b>Separate sequential credit note numbering required</b>             | • No                             |
| <b>Allowed to issue one credit note to correct different invoices</b> | • Yes, no explicit requirements. |

Pagero Online creates corrective invoices according to the content requirements of the Complete invoice.

## 6.7. Optional content

This section outlines briefly whether and how the trading parties can provide additional content in the technical e-document format mandated or otherwise prescribed in the specific jurisdiction.

No additional requirements.

## 7. Integrity and Authenticity

Ensuring the integrity of the content, as well as the authenticity of the origin (I&A) of an invoice, is an obligation for both the Supplier and the Recipient.

The purpose of this section is to further clarify the local I&A requirements on B2B invoices, as well as outline whether different requirements apply to B2G invoices. The review is done both from the Supplier's and the Recipient's perspective, as varying rules may apply.

| Item                                                                                          | Supplier                                                                                        | Recipient                                                                                                             |
|-----------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| <b>Whether it is mandatory to ensure I&amp;A in the jurisdiction</b>                          | <ul style="list-style-type: none"><li>• Yes</li></ul>                                           | <ul style="list-style-type: none"><li>• Yes</li></ul>                                                                 |
| <b>Which methods for ensuing I&amp;A are provisioned for</b>                                  | <ul style="list-style-type: none"><li>• Any means Business Controls, EDI, e-signature</li></ul> | <ul style="list-style-type: none"><li>• Any means Business Controls, EDI or e-signature Validation accepted</li></ul> |
| <b>Which requirements apply for I&amp;A methods if ensured by a third-party (outsourcing)</b> | <ul style="list-style-type: none"><li>• No explicit requirements</li></ul>                      | <ul style="list-style-type: none"><li>• No explicit requirements</li></ul>                                            |

### 7.1. e-Signature

Even where e-signature is not an explicit requirement, Pagero recommends that our customers apply it as, globally, it is the most widely accepted legal means of ensuring I&A for business transactions.

In practical terms, this results in the same evidential position for eDocuments as for paper documents. This unique feature of e-signature provides an exceptional level of legal certainty.

| Item                                      | Commentary                                                                                             |

| <b>Time-stamping of e-signature</b> | <ul style="list-style-type: none"> <li>• No explicit requirements</li> </ul> |

## 7.2. e-Signature validation

The Recipient of an invoice is often required by law or practice to validate the e-signature on the received invoice. Even for countries where the validation-upon-receipt is not expressly regulated, this is recommended by Pagero for both trading partners to be able to guarantee I&A.

| <b>Item</b>                             | <b>Commentary</b>                                                            |

| <b>Time-stamping of validation data</b> | <ul style="list-style-type: none"> <li>• No explicit requirements</li> </ul> |

## 8. Document retention

This section describes archiving requirements regarding the invoicing process and documents handled by Pagero. Please note, additional archiving requirements may apply to your specific documents.

| Item                                                                                                             | Commentary                                                                                                                                                                  |
|------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Components to be stored (e.g. tax invoice, source documents, audit trail, I&amp;A proof)</b>                  | <ul style="list-style-type: none"><li>• Original invoice with signature including certificate or other evidence of integrity and authenticity as appropriate</li></ul>      |
| <b>Requirements to present stored documents in a specific audit format</b>                                       | <ul style="list-style-type: none"><li>• No requirements for capabilities to transform to audit format</li></ul>                                                             |
| <b>Legibility, i.e. the ability to read stored e-documents by an untrained eye</b>                               | <ul style="list-style-type: none"><li>• Required</li></ul>                                                                                                                  |
| <b>Legibility requirements</b>                                                                                   | <ul style="list-style-type: none"><li>• If the original invoice is in a machine-readable format, the taxable person must offer means to provide human-readability</li></ul> |
| <b>Retention period for invoices not related to immovable property<sup>10</sup></b>                              | <ul style="list-style-type: none"><li>• 7 years</li></ul>                                                                                                                   |
| <b>Start point of retention period calculation for invoices not related to immovable property</b>                | <ul style="list-style-type: none"><li>• Starting on 1 January following the date of the invoice</li></ul>                                                                   |
| <b>Retention period for e- invoices related to immovable property</b>                                            | <ul style="list-style-type: none"><li>• 10 years</li></ul>                                                                                                                  |
| <b>Start point of retention period calculation for invoices related to immovable property</b>                    | <ul style="list-style-type: none"><li>• Following the year in which the property is taken into use.</li></ul>                                                               |
| <b>Retention period for other than regular invoices or invoices related to immovable property (if existing):</b> | <ul style="list-style-type: none"><li>• No</li></ul>                                                                                                                        |

<sup>10</sup> Pagero stores all documents for 90 days due to data privacy and security regulations, after which the data is automatically deleted, unless Archive has been selected. Pagero provides long term archiving (for the legally required term, plus one year)

|                                                                                                                                          |                                                                                                                                                                                |
|------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Start point of retention period calculation for other than regular invoices or invoices related to immovable property:</b>            | <ul style="list-style-type: none"> <li>Starting on 1 January following the year the services were provided.</li> </ul>                                                         |
| <b>Outsourced archiving</b>                                                                                                              | <ul style="list-style-type: none"> <li>Allowed</li> </ul>                                                                                                                      |
| <b>Archiving abroad<sup>11</sup> and conditions, if any (e.g. notification, derogation, online access, mutual tax assistance treaty)</b> | <ul style="list-style-type: none"> <li>Yes, everywhere but all records should be made available to the tax authorities upon request within a reasonable time frame.</li> </ul> |
| <b>Other requirements in relation to electronic document retention</b>                                                                   | <ul style="list-style-type: none"> <li>N.a</li> </ul>                                                                                                                          |

<sup>11</sup> In certain situations or jurisdictions deviating requirements – typically regarding archiving abroad – may apply to invoices and related documents, e.g. concerning matters of defence and national security. Therefore, Pagero encourages customers to inquire for and receive an explicit written statement from the local tax authority stating that the archiving of such documents outside of the taxpayer's country is permitted. Pagero in a capacity of a third-party may not apply for derogations or clarifications of this nature on behalf of a taxpayer.

## 9. Other transactional documents

Along with invoices, countries may have regulations relating to other trading documents. The purpose of this section is to provide a selective (not exhaustive) overview of the regulation of other transaction-related documents of importance.

| Document                   | Commentary                                                                                   |
|----------------------------|----------------------------------------------------------------------------------------------|
| Purchase order             | <ul style="list-style-type: none"><li>• No explicit requirements</li></ul>                   |
| Rectification document     | <ul style="list-style-type: none"><li>• Yes, see <a href="#">section 6.7</a> above</li></ul> |
| Payment instruction        | <ul style="list-style-type: none"><li>• No explicit requirements</li></ul>                   |
| SAF-T (or alike) reporting | <ul style="list-style-type: none"><li>• No</li></ul>                                         |
| Transportation documents   | <ul style="list-style-type: none"><li>• No explicit requirements</li></ul>                   |
| Other                      | <ul style="list-style-type: none"><li>• No</li></ul>                                         |

## 10. Other requirements

This section highlights certain aspects of the local regulations and infrastructure that differ from Pagero's General invoice processing and our standard country compliance investigation.

### 10.1. Penalties

In case of non-compliance, invoices could be rejected/not paid. In addition, Dutch legislation provides the authorities with the right to impose a fine for the non-compliance of the Procurement law in the Netherlands. The Dutch Procurement law stipulates that a penalty up to 15% of the consideration could be imposed. Please note this measure is only meant to have a deterrent effect and to stimulate companies to implement B2G e-invoicing.

### 10.2. E-reporting

SAF-T reporting is in place in the Netherlands on a voluntary basis. The Netherlands have their own e-audit file standard, 'XML Auditfile Financieel'.

#### **Scope**

Established and non-established

**Registration threshold** N/A

#### **Summary of the types of data to be reported**

- Ledger accounts
- Ledger transactions
- Debtors and Creditors master data

#### **Submission process**

Upon request, however other ways of submission are usually also considered by the Dutch tax authorities.

**E-Reporting file format** XML, however other formats are usually also considered by the Dutch tax authorities.

## 10.3. Public procurement

Differences between NLCUIS and Peppol BIS 3 explained:

Even though both NLCUIS and Peppol BIS 3 specifications define additional restrictions on EN-16931 and are a [core invoice usage specification \(CIUS\)](#) of the European norm for electronic invoices EN-16931, yet there are differences between these two standards. To understand the differences between NLCUIS and Peppol BIS 3 It is important to recognize that business document specifications have two distinct levels according to the [EN 16931](#).

### 1. The semantic model (the core elements of a document):

This describes the data model itself, which elements are mandatory, which elements are optional, what the elements mean, which values they can have, and how they correlate

### 2. The syntax binding to a particular representation format:

This describes how to represent the semantic data model in any specific format, for instance, UBL, or UN/CEFACT. Most rules that are defined in the semantic model will have a direct equivalent in the syntax binding, but this is not always the case. The syntax binding may contain several additional elements based on the requirements themselves, it may use multiple format elements to describe a single semantic element, or it may use one element to represent multiple semantic elements.

Accordingly, **NLCIUS** only defines the semantic model itself. The syntax binding to UBL is called **SI-UBL2.0**, while **PEPPOL BIS v3** is both a semantic model and a syntax binding.

This results in some differences in the business rules meaning that some elements of the document can be mandatory in PEPPOL BIS v3, but optional in SI-UBL 2.0. The full list of differences can be seen in this [report](#).

## 10.4. Indirect tax reports

All entrepreneurs in the Netherlands must submit tax returns [digitally](#) for one or more taxation types. The Tax and Customs Administration will determine the type after you have registered your company with the Chamber of Commerce.

The Tax and Customs Administration will notify you how often you must file a VAT return: monthly, quarterly or yearly. The most common frequency is quarterly. If you want to file your returns on a monthly or yearly basis, it is possible in certain conditions. Send a letter to the Tax and Customs Administration to arrange this.

## 10.3 The E-ordering in Peppol

[A public consultation](#) has been launched from 26 April 2021 to 31 May 2021 regarding incorporating a national standard to the Peppol BIS order standard.

On 26 April 2021, the Ministry of the Interior and Kingdom Relations (BZK) announced a public consultation regarding the addition of a national standard for exchanging electronic orders via Peppol. Peppol BIS Order 3 is used by the buyer to send an order to the supplier and get back an order response from them. The specification includes both order and order response messages. Respondents to the consultation can express their opinion on the following questions:

- Country-specific requirements that should be added to the Peppol BIS Order;
- Potential problems in case no country-specific requirements are added to the Peppol BIS 3 order;
- The ability of the Peppol BIS 3 order message to support the e-ordering process;
- Possible missing fields in the Peppol BIS 3 order message.

Initially, the National Peppol Authority (NPA) had concluded in consultation with the NPA service provider community, which Pagero is a part, that there was no need for country-specific requirements to be added in the Peppol BIS 3 order standard.

To date, Pagero has not heard any further developments on the above initiative. This section will be updated as soon as we receive further details from the NPA in this regard.

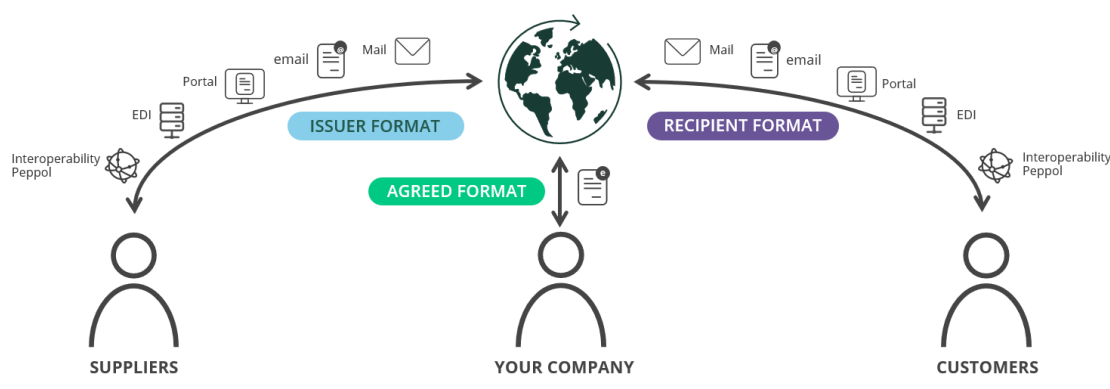

## 11. Country-specific processing

This section outlines how the Pagero General eInvoicing process has been adapted to the local requirements to ensure compliant local processing.

[if we use services of another provider or a partner, insert name and URL here]

### 11.1. Document issuance (AR) with Pagero

#### **B2B: Document issuance invoice with Pagero:**

(1) PAGERO ensures that documents can be exchanged with your company and your suppliers and customers, from your company perspective in a single format to ensure 100% digital AR and AP processing, while on the other hand in the preferred format and exchange mechanism with your trading partners

(2) PAGERO ensures the country-specific document content, document integrity and authenticity, as well as archiving requirements

(3) PAGERO supports unlimited number of document formats and multiple exchange mechanisms

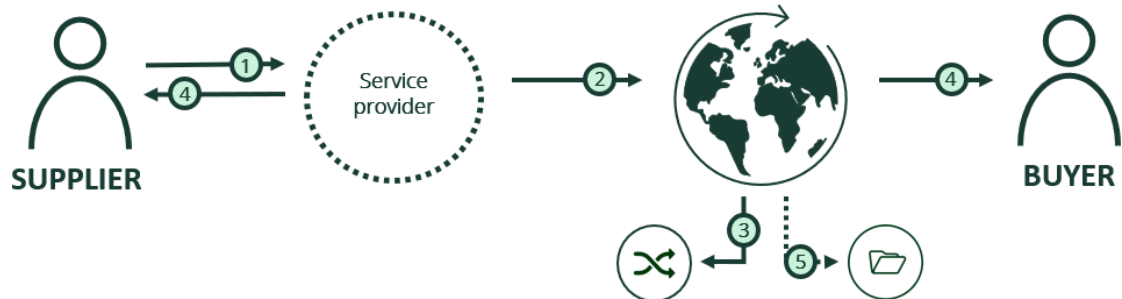

(4) PAGERO supports such exchange channels as: Interoperability, Peppol, EDI, portal, e-mail, capturing / scanning, etc.

**B2G: Document issuance (AR) with Pagero:**

- 1) Supplier provides data in supplier preferred format to PAGERO
- 2) PAGERO performs i.a.
  - 1) content validation,
  - 2) content enrichment and conversion,
  - 3) document format conversion,
  - 4) applies e-signatures if needed, etc.
- 3) PAGERO returns the finalized e-document to the supplier
- 4) PAGERO sends the final e-document to the receiving service provider (RSP) / buyer in a legally predefined format and according to a legally predefined exchange protocol
- 5) PAGERO sends the e-document for sub-central buyer/SP or to RINIS ( service provider for the central gov)
- 6) PAGERO archives all relevant document on behalf of the supplier if requested

## 11.2. Document reception (AP) with Pagero

### B2B document reception with Pagero:

(1) Supplier provides data to the sending service provider (SSP)

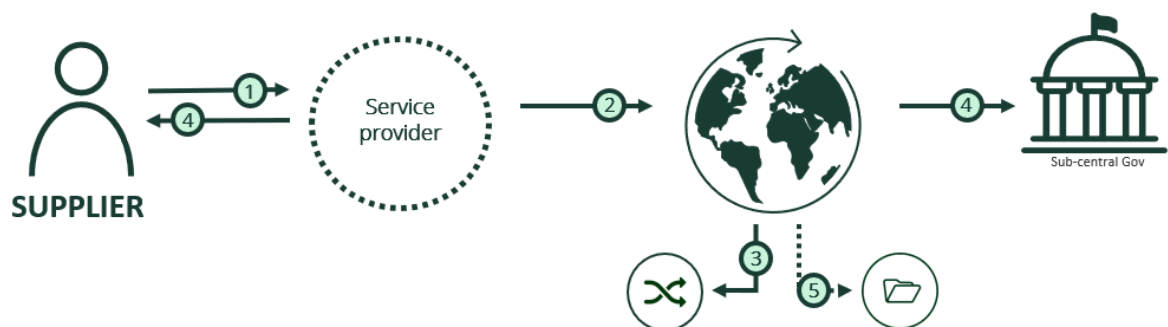

(2) SSP/supplier sends the final e-document to PAGERO in a legally predefined format and according to a legally predefined exchange protocol / mechanism.

(3) PAGERO performs data content validation, enrichment and conversion, document format conversion, applies e-signature validations (where eSignature is attached), etc.

(4) PAGERO sends the received e-document to the buyer in buyer format, as well as source format and creates a PDF presentation of the received document.

(5) PAGERO archives all relevant document on behalf of the buyer

### B2G document reception with Pagero:

(1) Supplier provides data to the sending service provider (SSP)

(2) SSP/supplier sends the final e-document to PAGERO in a legally predefined format and according to a legally predefined exchange protocol, for example Peppol

(3) PAGERO performs data content validation, enrichment and conversion, document format conversion, applies e-signature validations, etc.

(4) PAGERO sends the received e-document via Peppol to the sub-central entity in the mandatory format

(5) PAGERO archives all relevant document on behalf of the buying sub-central entity.

\*In the Netherlands, all central (federal) government entities have 1 central contract for their own access point/service provider.

In addition, however, while central government entities have a contracted access point, sub-central entities (municipalities, provinces, utility authorities, etc.) are free to choose their own access point.

## 12. Closing statements

### 12.1. Confidentiality

This General invoice processing description of Pagero Online, our Country Compliance Reports, and other documents provided by Pagero are of confidential nature and are only intended for and may only be used by Pagero's Customers, their employees or other authorized recipients for the purpose or purposes specified and agreed to between the parties. Descriptions, reports, and documentation may not – neither in full nor in parts – be copied or otherwise distributed to third parties without Pagero's prior written consent.

### 12.2. Disclaimer

In order to establish a relationship based on trust and transparency with our Customers, Pagero provides its General e-Invoice and eArchiving processing descriptions of Pagero Online as well as Pagero's Country Compliance Reports. These documents are intended to enable our Customers and their tax advisors to assess how Pagero has interpreted the relevant legislation and implemented it in our processes in order to support our Customers to fulfil their legal obligations.

We would like to remind our Customers that, according to tax and accounting regulations, the outsourcing of any process to third parties (such as issuance, compiling, processing, receipt, or archiving of e-Invoices), will not lead to a shift of liability, the liability will remain with the Customer. Accordingly, the taxable person always remains responsible towards the local authorities for ensuring their e-Invoice compliance, and for fulfilling accounting and reporting requirements. We want to emphasise this, in the light of that there can be potentially conflicting regulations on regional, national, or international levels.

Pagero endeavours to only include and provide accurate and up to date information. However, Pagero makes no guarantees as to the accuracy of any statement, information or advice provided by Pagero, whether in writing or verbally. The Customer must make an informed decision about whether to adhere to and follow such recommendations or not. The final decision and responsibility regarding tax, accounting, and reporting issues rest with the Customer.
