Introduction and document purpose

Pagero Group builds the world's largest, open business network – so you can reach any business, anywhere in the world. No matter how many borders your operations may cross or how many systems you are connected to, we take care of the technical and regulatory requirements across your entire order-to-cash, purchase-to-pay and freight processes. We give you data accuracy and security, transparency and real-time visibility – through a single connection.

At Pagero Group, we believe that technology supports sustainability. That's why we are committed to helping businesses become 100% paperless, supporting resource efficiency, transparency and business continuity.

The main purpose of this country compliance report is to provide the reader with an in-depth analysis of the focus country's laws, regulations, and process with regards to e-invoicing and other trade documents. The analysis considers topics such as business requirements before switching to electronic invoices, e-document creation, e-document distribution, integrity and authenticity, and, finally, e-archiving.

This document guides how Pagero solutions support customers in the focus country to meet local regulations and serves as a supplement to Pagero General E-invoicing Process Description.

The information provided by Deloitte which is part of this material was solely prepared as general information. It was prepared to meet with specific requirements and was not prepared for any other purposes or objectives. Changes in conditions over time may affect the contents of the material and its content. We do not express any opinion or conclusion in this material.

1. Terminology

This section outlines general and country-specific terminology for Türkiye which will be used throughout the whole document.

Term	Explanation
AoR	Acknowledgment of reception, which can be positive (acceptance) or negative (rejection) is the mandatory notification that the buyer must issue to the supplier upon receipt of the commercial e-Fatura
Basic Invoicing Process	The Basic Invoicing Process (<i>Temelfatura</i>) does not require buyer AoR: • For e-Fatura invoices, the trading parties have to agree on which process (Basic or Commercial) will apply to their relationship. However, it is important to note that in practice, basic invoicing process is mostly used for utility services and for other transactions, commercial invoicing process is preferred by trading parties • e-Arşiv invoices and SGK invoices can only be issued under the Basic Invoicing Process. This is not applicable to Export and Tax-free invoices, which follow a different process.
Commercial Invoicing Process	The commercial invoicing process (<i>Ticarifatura</i>) requires buyer's AoR: For e-Fatura invoices, the trading parties have to agree on which process (Basic or Commercial) will apply to their relationship. However, it is important to note that in practice, basic invoicing process is mostly used for utility services and for other transactions, the commercial invoicing process is preferred by trading parties This process is not applicable to e-Arşiv, SGK invoices, Export and Tax-free invoices
Centralised e-invoicing	Is an e-invoicing model where the central platform is exchanging invoices between the trading parties, and no exchange by the supplier is required/done. In Türkiye, centralised e-invoicing model applies to e-Fatura invoices, SGK invoices and export invoices.

Custom Integration	(<i>Özel Entegrasyon</i>) Custom integration, or special integration is a method of integration with a private integrator who has passed accreditation with GIB. Taxpayers can use the services of the private integrator to send and receive e-documents.
Despatch Advice	Is a document that is issued, sent and stored in structured electronic format, and serves the purpose of monitoring the movement of goods during the entire supply chain process. Despatch Advice can only be used between registered Despatch Advice users and they must be issued before the transportation of the goods occurs. It is sometimes referred to as e-Waybill.
Direct Integration	GIB allows taxable persons to integrate their systems to the e-Fatura platform, provided passing certification procedures.
EETN	Is the universal Unique Identifier (UUID) assigned to a document by GIB is a 128-bit number used to identify the invoice numbers. This ID is unique for every and each invoice. Users can produce their own invoice number.
e-Fatura platform	The platform where taxpayers exchanging e-Fatura and SGK invoices must be registered (see as well e-Arşiv Portal and GIB Portal)
e-Arşiv platform	The platform where taxpayers exchanging e-Arsiv invoices must be registered (see as well e-Fatura Portal and GIB Portal)
GIB	Directorate of Revenue Administration of the Ministry of Finance (<i>T.C. Gelir İdaresi Başkanlığı</i>)
GIB Portal	GIB Portal is the central e-invoicing platform of the GIB . GIB Portal includes several other portals such as e-Fatura Portal, e-Fatura Cancellation Portal and e-Arşiv Portal etc.
GTB	The Ministry of Trade (<i>T.C. Gümrük ve Ticaret Bakanlığı</i>)
Invoice types	• E-Arşiv invoice – (e-archive invoice) An invoice that is issued in UBL-TR, however, delivered to the recipient in buyer's preferred format (can be electronic or paper). For this reason, e-Arşiv invoices allow suppliers to send invoices to recipients that are not electronically enabled. e-Arşiv invoices can only be issued under the Basic Invoicing Process. • E-Fatura invoice – (e-invoice) An invoice that is issued, transmitted to the recipient and stored electronically in UBL-TR format e-Fatura invoices can be issued using either the Basic or Commercial Invoicing Processes. • SGK invoice – An invoice that is issued towards governmental healthcare institutions, pharmacies, optics and medical institutes. SGK invoices can only be issued under the Basic Invoicing Process. • Export invoice – Refers to the document issued to a foreign buyer by the supplier specifying the type, quantity, price and total amount of the goods sold for the export outside of the

	customs territory of Türkiye or to the free zones in accordance with the applicable export and customs legislation • Tax-free invoice – The tax-free invoice is issued by Turkish taxable person to non-Turkish residents following the procedures for returns of tax
KDV	Value added tax or VAT (<i>Katma Değer Vergisi</i>)
Private Integrator	(<i>Özel entegratör</i>) Is a company that has passed accreditation by the GIB, which allows such company (an accredited agent) to perform certain actions on behalf of the GIB, e.g. invoice clearance
Real-time invoice reporting	The model where supplier must report a subset of the e-document in a predefined format to the tax agency, in a predefined way shortly, after issuance and distribution to the buyer. There is no concept as clearance or validation. Rejections from the tax office may happen, but they are of technical character. In Türkiye, real-time invoice reporting model applies to e-Arşiv invoices.
SGK	Social Security Institution (<i>Sosyal Güvenlik Kurumu</i>)
TCKN	Turkish Identification Number (<i>Türkiye Cumhuriyeti Kimlik Numarası</i> or abbreviated as <i>T.C. Kimlik No.</i>) is a unique personal identification number that is assigned to every citizen of Türkiye
TRY	Turkish Lira
UBL-TR	UBL-TR is a structured invoice format based on UBL 2.0, containing Turkish country-specific extensions
VKN	Tax Identification Number (<i>Vergi Kimlik Numarası</i>), which is used for VAT and other tax purposes
ÖEBS	Auditing of Private Integrators' Information System Processes (<i>Özel entegratör kuruluşları bilgi sistem süreçleri denetimi</i>)

2. General overview

This section provides an initial introduction into the local eInvoicing environment within Türkiye including the types of local e-invoice regulations, go-to governmental and industry bodies, and whether multiple invoicing regimes, that is, varying regulatory requirements, exist for example by industry, business size, or other defining factors.

Item	Commentary
Authorities and other agencies relevant for e-invoicing	• GİB or Gelir İdaresi Başkanlığı (Directorate of Revenue Administration of the Ministry of Finance) • GTB or T.C. Gümrük ve Ticaret Bakanlığı (Ministry of Trade)
Main applicable legislation in respect of e-invoice issuance, exchange, reception and retention	• Tax Procedure Law No. 213 • General Communiqué No. 509 on Tax Procedure Law • Private Consumption Tax Law No. 4760 • General Communiqué No. 511 on Tax Procedure Law • General Communiqué No. 1 on eLedger Link 1 Link 2 Link 3

3. E-Invoice status

When considering sending or receiving e-invoices two basic questions should be considered: is invoice equal to paper invoice from the legal perspective; and if there are any situations where e-invoicing is mandatory for reception or transmission.

Item	Commentary
E-invoice status	• Use of the e-Invoicing is mandatory for taxpayers in certain sectors, when selling certain goods or when exceeding certain minimum annual revenue
Varying invoicing regimes¹	• Türkiye has multiple e-invoicing regimes: - e-Fatura for B2B, export and tax-free transactions, with varying subprocesses - SGK e-Fatura for B2G healthcare • e-Arşiv for B2B and B2C
e-Invoicing model	• Centralised invoicing model for e-Fatura invoices, including SGK and Export invoices, and • Real-time invoice reporting for e-Arşiv invoices • For a non-post-audit country, the outlined further in this report may deviate from Pagero's general e-invoice processing description document
e-Invoice definition²	• A valid e-invoice is an invoice that fulfils the invoice content requirements, which has been issued and received in UBL-TR (applicable version) with a valid e-signature and cleared by GIB
Scope of taxpayers the e-document mandate applies to	Issuers affected by the mandate e-Fatura invoice ○ Taxpayers with annual gross revenue > TRY 5 million (250 thousand EUR) in the FY (financial year) 2018, 2019 and 2020; ○ Taxpayers with annual gross revenue > TRY 4 million (200 thousand EUR) in FY 2021; ○ Taxpayers with annual gross revenue > TRY 3 million (150 thousand EUR) in FY 2022 and

¹ It is possible that a business is required to send e-invoice in some scenarios, and send voluntarily in others

² Differing definitions may exist between different levels of government, or differing legislation, i.e. accounting law and IT law

subsequent years. The last date of transition has been determined as 1 July 2022;

- Taxpayers in the e-commerce, real estate and motor vehicle sectors with annual gross revenue > TRY 1 million (50 thousand EUR) in FY 2020 and 2021, and TRY 500 000 (25 thousand EUR) in FY 2022 and all subsequent years;
- Taxpayers providing accommodation services as a form of investment and/or operation licensed by the Ministry of Culture and Tourism and Municipalities.
- Energy Market Regulatory Authority (EPDK) Licensed Companies – Special Consumption Tax List (ÖTV) I
- Taxpayers licensed by the Turkish Energy Market Regulatory Authority (EMRA) engaged in activities of the goods in the list numbered “I” to the Private Consumption Tax Law No. 4760;
- Taxpayers who manufacture, construct and import the goods in the list numbered “III” to the Private Consumption Tax Law No. 4760;
- Fruit – Vegetable Merchants and Commission Merchants.
- Firms that trade in luggage
- Taxpayers determined by the Presidency to have a low level of tax compliance. Taxpayer have a three months transition period after receiving a written notification, regardless of turnover.

e-Arşiv invoice

- Taxpayers who are users of e-invoice application
- Companies with a turnover of 3 million TRY (150 thousand EUR) as of 1 July 2022.
- Businesses whose total amount of invoices issued to non-taxpayers on the same day exceeds 5 thousand TRY (250 EUR)
- Businesses whose total amount of invoices issued to taxpayers on the same day exceeds 2 thousand TRY, including tax (100 EUR)
- Internet advertising services and those who sell goods / services over the Internet

SGK invoice

- Suppliers to governmental hospitals, pharmacy, optics and medical institutes are obliged to issue SGK e-Fatura invoices as e-Fatura invoices since 01/10/2017

	Export invoice ○ For taxpayers who are already registered e-Fatura users or who have the obligation to issue e-Fatura, export invoices must be issued and sent as e-Fatura as of 1/7/2017 ○ For physical goods import, export invoices must be issued as e-Fatura invoices Tax-free invoice ○ For taxpayers who are already registered e-Fatura users or who have the obligation to issue e-Fatura, tax-free invoices must be issued and sent as e-Fatura as of 1/7/2017 ○ Taxpayers who do not meet the requirements to be registered in the e-Fatura platform will continue to issue export or tax-free invoices as printed or as an e-Arşiv invoice. Despatch Advice (e-Waybill) ○ Taxpayers engage in fruit and vegetable trade as brokers or merchants ○ e-Fatura taxpayers with a gross sales turnover of 25 million TL and above; ○ Companies with an Energy Market Regulatory Authority (EPDK) license (including dealers); ○ Motor vehicles (production, import, dealers); ○ Mining license owners and producers of mine based on their contracts with these people; ○ Sugar, iron and steel manufacturers; ○ Users registered in the fertilizer tracking system; ○ Taxpayers who are found to be risky or at low levels of tax compliance by the GIB must complete their transition to the Despatch Advice application within three months after being notified Buyers affected by the mandate ○ Taxpayers issuing e-Fatura invoices are obliged to receive such invoices ○ Taxpayers not issuing e-Fatura invoices are not obliged to receive such invoice type, but instead e-Arşiv invoices
Mandatory AoR (document response) process	• For e-Fatura invoices under the basic invoicing process, sending AoR notification is not envisaged • For e-Fatura invoices under commercial invoicing process, the receiver is obliged to issue AoR notification, else the invoice becomes automatically accepted

	• For SGK, e-Arşiv, Export and Tax-free invoices, AoR process is not envisaged
Implementation / roll-out plan	• See the timelines above

4. Before switching to e-invoices

4.1. IT⁶ registration

In Türkiye VAT is locally known as KDV (*Katma Değer Vergisi*). It is in general mandatory to register in Türkiye if taxable supplies are made. Foreign companies making taxable supplies in Türkiye typically are required to register for local VAT in the following situations:

- 1) Where goods are delivered within Türkiye ;
- 2) Where goods are imported into Türkiye ;
- 3) Export of goods from Türkiye ;
- 4) Supply of services where the place of supply is Türkiye .

Non-resident traders are obliged to form a permanent establishment in order to register for VAT. This can be done in several forms, e.g. a joint stock company, a limited liability company or a branch. There are various requirements and obligations to set up a permanent establishment in Türkiye, depending on the type of establishment.

In Türkiye , Tax identification number, called **VKN**, is used as VAT number.

VAT number format: 1234567890

4.2. Process to switch to e-Invoicing

Even though many countries encourage or even mandate e-Invoicing, there may be specific requirements on the Trading parties – typically the Supplier – before starting an e-Invoicing program. This section provides a brief overview of such requirements.

Item	Commentary
Actions towards authorities, required in order to enable electronic processing instead of conventional processing	• <u>Registration with the e-Fatura platform within GIB is required for both transacting parties:</u> ○ e-Fatura invoice

⁶ For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

	- Registration with the e-Fatura platform within GIB is required only for the supplier: - SGK invoice - Export invoice - Tax-free invoice - e-Arşiv invoice⁷: For e-Arşiv invoices, registration with the e-Arşiv platform within GIB is also required for the supplier Certification process - In case of direct integration with GIB, the taxpayer must pass the certification process - In case of integration with a private integrator (accredited by GIB), the certification process for the taxpayer is not required
Actions between the trading partners, e.g. customer acceptance, agreement, etc.	Even though not explicitly regulated, the trading parties should agree on which type of invoicing process (<i>Basic or Commercial</i>) will apply to exchanged e-Fatura invoices
Transition period from the moment of starting e-invoicing during which, e.g. parallel invoicing may be allowed	None mandated

4.3. Outsourcing invoice issuance function

Many companies decide to outsource the issuance process of e-invoicing to third parties who have the necessary infrastructure and knowledge of implementing and executing e-Invoicing. This may be driven by a technical limitation or local regulatory requirements. However, before doing so, it is highly recommended that a supplier investigates whether such outsourcing is permissible and whether any requirements must be fulfilled.

Item	Commentary
Whether outsourcing of invoice issuance (creation) is allowed or not	- Outsourcing is allowed only via an accredited Private Integrator - Outsourcing is of a legal character and an accredited private integrator can act "in the name and on behalf" of the taxpayer. Third-party certificate can be used.
Whether statement of outsourced issuance is required on the invoice	No explicit requirements

⁷ Usage of e-Fatura is a prerequisite for this and registration is done via service providers.

Whether outsourcing agreement is required between the taxpayer and the third-party is performing actions on its behalf	Required
Content and formality requirements to the Outsourcing agreement between the taxpayer and the third-party	No explicit requirements
Whether any notifications to or derogations from authorities are required in the specific jurisdiction for outsourced issuance	No explicit requirements
Whether, and which, requirements exist to the outsourced party to be able to act on behalf of the taxpayer	- Outsourced party - the Private Integrator - must obtain an accreditation for each platform (e-Fatura platform and / or e-Arşiv platform) from the GIB⁸ - Hence, separate accreditations are required for e-Fatura and e-Arşiv - In accordance with the Private integrator guide, Private Integrators must be audited and have obtained an ÖEBSD Opinion & Report in order to be entitled to apply for the accreditation⁹. The Private Integrators which have been accredited prior to the publication of the Guide must get audited and receive the ÖEBSD Report by 31.12.2020 - Private integrator may only be a registered corporation in Türkiye and have its servers located in Türkiye - Private Integrators are obliged to validate signatures for outgoing documents (and optionally for incoming)

4.4. Outsourcing invoice receipt function

Due to the unique nature of the AP process, it may be required for the buyer (invoice receiver) to have an explicit agreement, or other permissions to be put in place for Service Providers to conduct invoice receiving functions on behalf of them.

In Türkiye, there are no explicit regulations on outsourcing of the function to receive e-Arşiv invoices. However, outsourcing of the function to receive e-Fatura invoices requires doing so only via Private Integrator, in a fashion similar to e-Fatura issuance.

⁸ An accredited Private Integrator is one who has fulfilled the requirements set by the GIB. The requirements include different ISO/ITIL certificates. For more information on the GIB certification requirements visit the page: <https://ebelge.gib.gov.tr/html/Listofaccreditedprivateintegrators>: <https://ebelge.gib.gov.tr/e-FaturaOzelEntegratorlerListesi.html>

⁹ See e-Belge Özel Entegratörleri Bilgi Sistemleri Denetimi Klavuzu, Kasım 2019 https://ebelge.gib.gov.tr/dosyalar/kilavuzlar/e-BELGE_OZEL_ENTEGRATORLERI_BILGI_SISTEMLERI_DENETIMI_KILAVUZU.pdf

5. Document processing

5.1. Format and other technical requirements

Globally, a multitude of e-Invoicing formats and infrastructures exist. Local regulators often offer or mandate the use of certain formats, standards, or platforms for the transmission or delivery of invoices or other tax-related documents. Pagero has the technical depth and experience to support country-specific technical requirements globally.

Item	Commentary
Mandated document format(s) for exchange with mandated Gov platform(s) and/or between the trading parties	UBL-TR specified by GIB, currently version 1.2.1
Other document format(s) commonly used for exchange between trading parties	n.a.
Mandated platform(s) required to have connection with for e-document processing	GIB Portal GTB Portal (for export invoices)

Other platform(s) relevant for e-document processing	No
Schematron(s), XSD schema or other official mechanisms ensuring document content	UBL-TR Schematron
Routing ID's / codes or other identifiers used in the jurisdiction for counter-party identification and document exchange	- GIB lists all registered users for e-Fatura and e-Arşiv. It is possible to search users by title, TCKN (Turkish identification number) or VKN (Tax ID number). - It is required for the supplier prior to the issuance of e-Fatura to check if the recipient is registered in the e-Fatura user list: - If the recipient is found in the e-Fatura user list, the supplier will issue and distribute an e-Fatura invoice. - If the recipient is not found in the e-Fatura user list, the supplier must distribute to buyer an Arşiv invoice. - e-Fatura user list can be accessed through this link: https://ebelge.gib.gov.tr/efaturakayitlikullaniciilar.html - e-Arşiv user list can be accessed through this link: https://ebelge.gib.gov.tr/earsivkayitlikullaniciilar.html
Other technical aspects	No

5.2. Communication with GIB

Regulations in Türkiye foresee the following options on how e-documents can be communicated with the mandatory infrastructure(s):

Communication options	Commentary
Web portal	GIB Portal allows users to send and receive invoices manually. It is not integrated into any taxpayer system. Invoice data must be generated in users accounting system and must be issued & signed in the portal.
Direct Integration	GIB allows users to integrate their systems to the e-Fatura platform. Direct integration has its rules defined by GIB. The systems must be up and running 24*7 and 99% uptime, GIB pings the system frequently. Direct integration is largely undesired by taxpayers due to high costs and relatively difficult IT audit requirements involved.

Integration with a Private Integrator

- An authorized private integrator acts as a bridge between the e-invoice user and GIB. This entails integrating e-Invoice user's accounting system and GIB, signing the invoices and transmitting the messages. E-invoice user doesn't have any responsibility to integrate to GIB system, the user only integrates to private integrator via web services. The business flows are the same with the direct integration method.

5.3. Issuance and clearance process

This section describes the document issuance and clearance process from the supplier perspective.

5.3.1. Domestic documents

This section describes the process for documents created to be transmitted within the given country

e-Fatura Invoices

- 1) **The supplier** must generate an electronic invoice in UBL-TR following GIB requirements containing the relevant tax information of the commercial transaction, which must be marked which invoicing process (basic or commercial) will be used and digitally signed/sealed to ensure integrity and authenticity.
- 2) **The supplier** must send the e-Fatura invoice to GIB for clearance.
- 3) **GIB** – Once the e-Fatura invoice has been submitted to GIB, the infrastructure is entitled to perform validation and clearance procedures.
 - a. GIB will return to the sender a receipt acknowledgment that may be followed by the technical acceptance/reject notification
 - b. Only positive (accept) notification ensures that the submitted invoice has gained fiscal validity
 - c. If negative (reject) notification has been received, the supplier issues a new invoice
 - d. The supplier does not have any obligation to distribute an e-Fatura invoice to the buyer. The exchange will be handled by GIB.
- 4) **GIB**, or if there is a private integrator, will distribute the invoice to its recipient via the GIB infrastructure.
- 5) If the trading parties have established the **basic invoicing process** between each other, there is no further actions from the supplier's side, once approval notification received from GIB
- 6) If the trading parties have established the **commercial invoicing process** between each other, the supplier should fetch buyer's AoR notification: accept, reject or return, either directly from GIB or via Private integrator.

- a. If no AoR is available after 8 days, then the invoice is considered tacitly accepted by the buyer,
- b. Confirmation of receipt by the buyer is not required.

SGK Invoice

SGK invoices can only be issued under the e-Fatura Basic Invoicing Process. Hence, for SGK invoices, the process is the same as an e-Fatura which has been issued within the basic invoicing process.

- 1) **The supplier** must generate an electronic invoice in UBL-TR following GIB requirements containing the relevant tax information of the commercial transaction, which must be digitally signed/sealed to ensure integrity and authenticity.
- 2) **The supplier** must send the SGK e-Fatura invoice to GIB for clearance.
 - o SGK invoices must include SGK's information below as the recipient information:
 Sosyal Güvenlik Kurumu Başkanlığı
 Çankaya Vergi Dairesi
 Vergi No: 7750409379
 Adres: Çankaya – Ankara
- 3) If the recipient is not SGK, there is a separate Routing ID catalog provided from the GIB to identify the recipients. **GIB**, or if there is a Private Integrator, will distribute the invoice to its recipient via the GIB infrastructure.
- 4) Since SGK invoices can only be issued under the **Basic Invoicing Process**, there is no further actions from the supplier's side, once approval notification is received from GIB.

e-Arşiv Invoices

Even though e-Arşiv invoices must be issued in the UBL-TR, they can be distributed to the buyer in any format, depending on buyer's preference.

- 1) **The supplier** must generate an electronic invoice in UBL-TR following GIB requirements containing the relevant tax information of the commercial transaction, which must be digitally signed/sealed to ensure integrity and authenticity.
 - a. **GIB** - e-Arşiv invoices do not need to be authorized by the GIB in the issuance process.
 - b. e-Arşiv invoices do not have to be submitted to GIB in real-time, but instead, suppliers must report daily to the GIB detailed information about the e-Arşiv invoices that are issued and canceled. This reporting requirement includes the e-Arşiv invoices that are canceled after having been reported to GIB but before having been distributed to the buyer.
- 2) **The supplier** is responsible for making the e-Arşiv invoice available to the buyer in paper form or in electronic form, depending on the recipient's receiving process.

- a. If the e-Arşiv invoice is distributed in the paper format, the invoice must be printed out and include time-stamp and wet signature.
 - b. If the e-Arşiv invoice is distributed in an electronic format, both the signed XML and the graphic representation of the invoice must be sent to the buyer.
- 3) Buyer's response is not possible. However, e-Arşiv invoices can be rejected by the buyer within eight days from receipt, in an analog way, by communicating this to the supplier through registered e-mail, notary or other alternative means. See [section 5.9](#)
- 4) **The supplier** will report on a daily basis to GIB detailed information about the invoices issued and cancelled using the e-Arşiv platform.
- 5) **The supplier** must archive the e-Arşiv invoice in XML format, irrespective of the distribution format.

Despatch Advice

- 1) **The supplier** must issue the Despatch Advice through GIB Portal prior to the dispatch of goods. The Despatch Advice must include a QR code for traceability.¹⁰
- 2) Once **GIB** approves, the vehicle can leave the warehouse. GIB aims the approval to be received within one minute from the issuance. However, it is not required to wait for the buyer's response in order to dispatch the goods.
- 3) **The supplier** must have either a human-readable version of the Despatch Advice in the vehicle during the actual shipment of the goods or must be able to display it electronically. However, it is not mandatory for the printout to include wet signature or a stamp.
- 4) **The buyer** can send a response stating how much of the goods are received/accepted to the issuer. In case of rejection, the rejected amount of the goods and the reason for rejecting must be stated. In partial acceptance, a separate Despatch Advice should be issued for returning the unaccepted goods to the seller.
- 5) **It is not mandatory** to send the paper printout of Despatch Advice to the buyer.

5.3.2. Cross-Border

This section describes the requirements for cross-border outbound documents such as sales invoices

Export Invoices

Turkish VAT does not apply to the export of goods. However, since 01.07.2017, it is mandatory for corporates that are already e-Fatura users to clear their export invoices with GTB (Ministry of Trade).

¹⁰ The content of the QR code has yet to be determined by the GIB. Therefore, this requirement will only apply once the GIB publishes the necessary content information for the QR code.

Only invoices for goods exported abroad with Customs Declaration Form (CDF) should be issued as Export e-Fatura invoice. Invoices that do not appear in the CDF attachment should be issued as hard copy as before or if the sender is an e-Arşiv taxpayer, should be issued as e-Arşiv invoice.

- 1) **The supplier** must generate an electronic invoice in UBL-TR following GIB requirements containing the relevant tax information of the commercial transaction, which must be digitally signed/sealed to ensure integrity and authenticity.
 - a) The receiver details must be set to:
 - VKN (Tax identification number): 1460415308
urn:mail:ihracatpk@gtb.gov.tr
Gümrük ve Ticaret Bakanlığı Gümrükler Genel Müdürlüğü - Bilgi İşlem Dairesi Başkanlığı
 - For e-Arşiv this is not the case. For exports outside e-Fatura, which may be e-commerce or micro-exports, the receiver tax number for foreigners would be a fixed 2222222222 8.
- 2) **The supplier** must send the e-Fatura invoice to GIB for clearance.
- 3) **GIB**, after receiving the invoice, will forward it to the Ministry of Trade (GTB), who will return an application response with a reference number if the invoice is accepted as a valid document related to an export shipment.
 - b) If accepted by GTB, the invoice will be visible on the customs systems, where the invoice will be used as a clearance report for the goods. GTB will generate a 23-digit reference number. The supplier must declare this reference number in the customs declaration (the sections "document reference number" and "document date").
 - c) If rejected by GTB, the e-invoice will be invalid and a correct new one must be issued by the supplier, matching the goods.
- 4) **The customs** will review the goods in accordance with the invoice when the goods arrive at the customs and will send out an application response with an acceptance or rejection of the arriving goods.

Tax-free Invoices

Since 01.07.2017, taxpayers who are already registered e-Fatura users or who are required to issue e-Fatura, must issue their tax-free invoices as e-Fatura. Taxpayers who do not meet the requirements to be registered in the e-Fatura platform will continue to issue export or tax-free invoices as printed or as an e-Arşiv invoice.

The purpose of the tax-free invoice is to return the VAT for the purchases made by people who are not residents of Türkiye. During the clearance of goods through Customs, the VAT collected is returned upon submission of the invoice or document. In this way, it is aimed to make the souvenirs and other goods purchased domestically by the people who do not reside in Türkiye free of tax.

Tax-free invoices have mainly the same issuance and distribution process as export e-invoices:

- 1) **The supplier** must generate an electronic invoice in UBL-TR following GIB requirements containing the relevant tax information of the commercial transaction, which must be digitally signed/sealed to ensure integrity and authenticity:
 - a. The receiver details must be set to:
 - VKN (Tax identification number): 1460415308
urn:mail:yolcuberaberp@gtb.gov.tr
Gümrük ve Ticaret Bakanlığı Gümrükler Genel Müdürlüğü - Bilgi İşlem Dairesi Başkanlığı
- 2) **The supplier** must send the e-Fatura invoice to GIB for clearance
- 3) **GIB**, after receiving the invoice, will forward it to GTB, who will return an application response with a reference number if the invoice is accepted as a valid document for tax-free sales:
 - a. If accepted by GTB, the invoice will be visible on the customs systems, where the invoice will be used as a clearance report for the goods.
 - b. If rejected by GTB, the e-invoice will be invalid and a correct new one must be issued by the supplier, matching the goods
- 4) When the goods are taken to the **customs** desk as carry-on item by the tourist and not given to luggage, it will be reviewed in accordance with the tax-free invoice.
 - a. The customs will send out an application response with an acceptance or rejection of the arriving goods.
 - b. In case of an acceptance from GTB, the eInvoice will be visible on the customs systems, where the invoice will be used as a clearance report for the goods.
 - c. If GTB or customs reject due to a discrepancy, the e-invoice will be invalid and the process will end as the tourist would not be able to go back to correct the issue. (error handling process)

5.4. Reception and validation process

This section describes the document reception, validation and acceptance processes from the buyer perspective.

5.4.1. Domestic documents

This section describes the process for documents received for purchases or transactions within the given country

In Türkiye, the buyer is required to ensure to have a valid invoice.

Controlling if an e-Fatura invoice has been transmitted through GIB is possible only via the e-Fatura Viewer (*Fatura Görüntüleyici*). e-Fatura Viewer program includes a verification

feature, which enables users to verify the validity of the e-signature applied to the e-Fatura invoice. By clicking on “verify” (“doğrula”), one of the following notifications appears:

- **“e-Seal is verified”**, which means that no changes were made to the e-Fatura after it was signed by the supplier. The “Certification information” section includes information on e-signature and e-seal.
- **“e-Seal is invalid”**, which means that changes were made after the e-Fatura was signed by the supplier. As a consequence, the invoice is invalid.

The second step is clicking on “examine” (“sorgula”) to check if the invoice has been successfully passed through GIB. This will lead to one of the three notifications:

- **“The invoice has been successfully passed through GIB and sent to the recipient”**. Note that if the invoice has been issued within the basic invoicing process, and the recipient objected to the invoice using external legal methods, this cannot be seen in the e-Fatura Viewer. The Viewer, in this case, will still provide this notification, stating that the invoice has been successfully passed through GIB.
- **“The invoice has not been successfully passed through GIB”**.
- **“The invoice has been successfully passed through GIB, however, the recipient rejected the invoice”**: This is possible only for the invoices issued within the commercial invoicing process. This means that the invoice was rejected by the recipient and the invoice is invalid.

5.4.2. Cross-Border

This section describes the requirements for cross-border inbound documents such as purchase invoices

In Türkiye, there are no explicit e-invoicing regulations on cross-border purchase invoices.

5.5. AoR (response) process

An e-Fatura can be issued either within the Basic Invoicing Process or the Commercial Invoicing Process.

- e-Fatura invoices that has been issued within basic invoicing process and e-Arşiv invoices can be rejected by the buyer within eight days from receipt, in an analogue way, by communicating this to the supplier through registered e-mail, notary or other alternative means.
- Only for the commercial invoicing process, an AoR is expected in the form of an application response sent to GIB.
 - Lack of a buyer's response is considered tacit acceptance of the invoice after eight days.
 - Such buyer’s response is made available to the supplier by GIB or, if used by the supplier, by the accredited private integrator.

There are three different AoR types: Accept, Reject or Return. Explained below the AoR processes for rejection and return:

Rejection

- The buyer must include the rejection reason in the “general explanations” section of the AoR (free format text). The reason could be related to the agreement between the supplier and buyer or it could be that the invoice is incomplete, inaccurate.
- The supplier must archive the rejected invoice and the AoR for the legal storage period.
- It is not possible to answer the AoR. The supplier can object to the “rejection” using external legal methods.
- If the supplier does not object to the rejection, a new invoice will be issued ensuring that the necessary changes made.

Return

- If the goods are partially or fully returned after the issuance of the invoice, the buyer can send an AoR (“return”) to the supplier including the reason for the return and the return invoice.
- The return invoice must include the date and number of the sales invoice, a unique sequential number and the reason for the return.

Return invoice is a completely new invoice and there is no AoR process for return invoices. If the supplier wants to object to the return invoice, this must be done using external legal methods.

5.6. GIB validations

Some tax regimes require businesses to send tax documents to a predetermined hub either before, shortly after issuing invoices. Generally, a hub that requires this will send a reply to the issuer. This reply can be expressed as a clearance/ approval response, rejection, semi approved, etc.

The GIB is authorized to control the document content as well as taxpayer’s activity sector, capacity, type and quality of goods and services subject to purchase or sale using any information that exist in GIB’s system.

Moreover, if GIB determines that a document is risky (in case it is not certain if the document is counterfeit or its content misleading,) GIB can reject the document.

5.7. Invoice presentation / copy

Some regimes require a visual presentation of the invoice file to be transmitted along with the structured invoice file. This section describes if there is any regulation concerning visual or image-based presentations of invoices as a copy for the original or vice versa.

- For e-Fatura, there is no requirement for the supplier to provide the graphic representation of the UBL-TR to the buyer.
- For e-Arşiv, there is no mandatory format for the distribution to the buyer:
 - If the e-Arşiv invoice is distributed in an electronic format, the supplier must, together with the e-Arşiv invoice issued in UBL-TR format well provide a graphical representation of the invoice. The graphical representation must include the stamp and wet signature (the stamp and the signature may as well be added as an image) of the authorized officer.
 - If the e-Arşiv invoice is distributed in the paper format, the invoice must be printed out and include a stamp and wet signature.
- It is mandatory to include the GIB logo in all types of invoices. If GIB Portal is used, the logo is inserted into the invoice by the GIB. If a private integrator is used, the integrator must ensure to include the logo.
- It is mandatory to include a QR code in the Despatch Advice to enable its traceability, however, the content of the QR code has yet to be determined by the GIB. Therefore, this requirement will only apply once the GIB publishes the necessary content information for the QR code.

5.8. Distribution between taxpayers

This section explains how and if trading parties can send invoices between each other. In some cases, hubs also distribute the tax document to the buyer.

Item	e-Fatura, SGK, Export	e-Arşiv
Push communication	No explicit requirements	No explicit requirements
Pull communication	No explicit requirements	No explicit requirements
E-mail distribution	Not prohibited, but e-invoice exchanged in this way will not have fiscal validity	Allowed. Along with SMS or other electronic methods, if systematic and can be shown to GIB in case of an audit.
Webportal¹¹	Allowed Either directly in e-Fatura portal or via Private Integrator's portal (For export invoices, GTB Portal)	Allowed Either directly in e-Arşiv portal or via Private Integrator's portal
Scanning inbound invoices	Not prohibited, however, such document will not have fiscal validity	Not prohibited, however, such document will not have fiscal validity
Scanning outbound invoicing	Not prohibited, however, such document will not have fiscal validity	Optional for the recipient of an e-Arşiv eInvoice

¹¹ Note, however, that prior to using an external portal, like Pagero's Webportal, Suppliers are required to already have an invoice / invoice data in their internal accounting software. Portals are not designed for the purpose of replacing internal accounting but are a mechanism to make invoices available for the Buyer. Recommended only for businesses issuing fewer than 100 invoices annually.

5.9. Rectification process

This section will express the process that needs to be taken when there is an error in an invoice, how it is to be handled, and corrected by both buyer, seller, and if a notification needs to be delivered to the tax authority.

The only rectification process in Türkiye is the cancellation and issuance of a new invoice.

e-Fatura Invoices issued within the Basic Invoicing Process

- e-Fatura invoices, incl. SGK invoices, that are issued within the basic invoicing process can be canceled via the e-Fatura Cancellation Portal¹², which is placed in GIB Portal. (<https://portal.e-Fatura.gov.tr/Faturalptal/>)
- The supplier must request a cancellation through this Portal including the invoice number and the invoice amount.
- The supplier must sign the cancellation request with eSignature or eSeal.
- The buyer has 8 days to respond to the cancellation request starting from the moment when the buyer has received the invoice. If the buyer does not want to approve the cancellation request, the buyer is not required to respond.
- Until the recipient of the invoice does not confirm the cancellation request through the Portal, the e-Fatura will be commercially valid. Once the recipient confirms the cancellation, the e-Fatura will no longer be commercially valid. However, canceled invoices will still be fiscally valid and must be stored as evidence.
- The supplier gets a notification when the buyers accepts or rejects the cancellation.

e-Fatura Invoices issued within the Commercial Invoicing Process

- e-Fatura invoices that are issued within the commercial invoicing process cannot be canceled by the supplier.
- Rectification of errors in issued e-Fatura invoices may be triggered by the buyer's rejection (AoR). This process is explained in detail [above](#).
 - The supplier must check if a response from the buyer has been received within seven days. If the buyer sends a rejection response within the prescribed time, a refund invoice isn't needed.
 - If the buyer rejects the invoice, the supplier must archive the rejected invoice together with the AoR and issue a completely new invoice making the necessary changes.
 - If the prescribed time passes, the buyer would not be able to send a response, and the buyer would have to issue a refund invoice.

¹² The financial seal or electronic signature is used [to log in](#) to the e-Fatura cancellation objection portal. By logging into this portal with a financial seal or electronic signature, supplier can create a "Cancellation Request" for e-Fatura issued under the supplier's name.

e-Arşiv Invoices

As it is for the e-Fatura invoices, cancellation is the only rectification process for e-Arşiv invoices as well. Cancellation of e-Arşiv invoices can be done by the supplier upon buyer's request or acceptance. E-arsiv invoices (both domestic and cross-border) can be cancelled through the following means:

- the e-arsiv portal.
- electronically via Webservice
- Private Integrator (if they support it)
- through a notary, registered letter, or registered email system.

Any objections (by buyer) or cancellations (by supplier) must be made within eight days. If the sender cancels an e-arsiv invoice, all details should be appearing in the daily report sent to TRA.

- 1) A second invoice can be generated with the necessary changes. The newly generated invoice must include a note stating that "the first invoice was mistaken and canceled" in the explanation section. Hence, the rectification of errors in issued and delivered e-Arşiv invoices requires canceling the issued e-Arşiv invoice and issuing a new one.

Even though it is not a legal requirement, it is highly beneficial for the supplier to request from the buyer a written statement describing the buyer's request or acceptance to cancel the invoice. This statement, which can be used as legal evidence if need be, can be approved by the notary, or e-signed and sent via a secure electronic mail system.

- 2) In case of rectification of already issued but not yet delivered e-Arşiv invoices, the supplier may re-use the same e-Arşiv number and amend the errors unless it has already been e-signed or reported to GIB. After canceling the invoice, the supplier must indicate the details of the canceled e-Arşiv invoice in the daily report to GIB.

Export Invoices

- In the [GTB Fatura Portal](#), it is possible to search and find an invoice using UUID or VKN. The VKN or UUID information can be requested from the GIB.
- Once the invoice is selected, "cancel the invoice" should be clicked.
- If an invoice has been used in the customs declaration, the system will not allow cancellation. However, the cancellation can be made following the procedure below:
 - First, a petition ("request to change the customs declaration") must be filled in and sent to Customs.
 - If the request is approved, the status of the customs declaration will be converted to "draft".
 - Once these are done, it will be possible to cancel the export invoice in the GTB Portal.

Tax-Free Invoices

- In cases where sales returns or cancellation are required, the product will be withdrawn with the expense voucher, so both the revenue and expense will be recorded in the accounting records.
- However, since the instant e-Fatura issued against the transaction has already been sent to the GTB systems, in order to prevent unjustified returns; the invoice issuer must notify the GTB of the "Sale Cancellation / Return" status of invoices for the products the sales of which are "Cancelled / Returned", and may also notify the brokerage house, in order for them to be approved in GTB systems and to prevent the unjustified VAT return by brokerage houses or tax administration.
- The notification to GTB will be made from the "Accompanied Goods (Tax-Free) Invoice Sales Cancellation/Return Notification Portal¹³, which is accessible to the taxpayers by the Administration. It will also be able to be made through a web service which will be established after the necessary technical improvements have been made by the Administration.

Despatch Advice

- Rejection of the Despatch Advice must be done before the actual shipment of the goods. Refusal after the actual shipment are null and void.

If the vehicle has not yet departed, the incorrect or incomplete Despatch Advice might be canceled and re-prepared upon the recipient’s refusal, but the service provider cannot cancel the Despatch Advice by itself.

5.10. Coexistence of paper and electronic invoices

- Issuing electronic invoices of any kind in paper is prohibited in Türkiye.
- e-Arşiv invoices can be delivered in paper, however, it still must be issued in UBL-TR. Thus, while for the buyer, the paper version will constitute the original invoice, for the supplier it will be the e-invoice issued in UBL-TR.
- For the supplier side e-Fatura and e-Arşiv invoices must always be stored in electronic form, irrespective of the distribution form.

Item	Commentary
Whether parallel invoicing (issuance and exchange of the same document in several formats, e.g. electronically and on paper) is allowed and/or whether there are any regulations surrounding it	Not allowed
Whether the jurisdiction allows for document (e.g. invoice) dematerialization, i.e. destruction of the original paper invoice, for processing and/or archiving	Digitization is allowed but official copy remains to be the paper form

¹³ <https://portal.e-Fatura.gov.tr/e-Faturabasvuru/wsctgirisSSL.jsp>

Whether any conditions apply, and which, to the dematerialisation	Not explicitly regulated
Whether the jurisdiction allows for document (e.g. invoice) materialization, i.e. destruction of the original electronic document, for processing and/or archiving	Not explicitly regulated
Whether any conditions apply, and which, to the materialisation	No

5.11. Contingency invoicing

This refers to the process for e-invoicing if any mandatory infrastructure is inaccessible. If temporary measures are available or allowed, to facilitate invoicing during the downtime.

In Türkiye, under some circumstances, the documents that are required to be generated in structured electronic format can be created as paper, and no penalty will be imposed. Contingency mode includes the following scenarios:

- Force majeure: If there is an interruption or maintenance down-time in the information processing systems of GIB or any other relevant public institution;
- If there is an interruption or maintenance down-time in the information processing systems of the taxpayer or private integrator, provided that this can be proven by the taxpayer/private integrator;
- If the e-Seal or e-Signature is not functioning due to technical issues, or if they have been stolen, provided that this can be proven;

If there is any other reason that is explicitly listed as a justification to issue invoices in a paper by legal documents published by GIB, including general communiqués, circulars and technical guides.

6. Document content requirements

6.1. Document types

Item	Commentary	Status
Documents mandatory for issuance by the supplier	1) e-Fatura invoice (<i>e-Fatura</i>)	1) Mandatory
	2) SGK invoice (<i>SGK Fatura</i>)	2) Mandatory
	3) e-Arşiv invoice (<i>e-Arşiv</i>)	3) Mandatory
	4) Export invoice (<i>e-İhracat</i>)	4) Mandatory
	5) Tax-free invoice	5) Mandatory
	6) e-Ledger (<i>e-Defter</i>)	6) Mandatory
	7) Despatch Advice (<i>e-İrsaliye</i>)	7) Mandatory
	8) e-Tradesmen's receipt (<i>e-Serbest Meslek Makbuzu</i>)	8) Optional
	9) e-Farmers' Receipt (<i>e-Müstahsil Makbuzu</i>)	9) Optional
	10) e-Expense slip (<i>e-Gider Pusulası</i>)	10) Optional
	11) e-Ticket (<i>e-Bilet</i>)	11) Optional
	12) e-Insurance commission expense note (<i>e-Sigorta Komisyon Gider Belgesi</i>)	12) Optional
	13) e-Insurance Policy (<i>e-Sigorta Poliçesi</i>)	13) Optional
	14) e-FX Purchase - Sales Slip (<i>e-Döviz Alım-Satım Belgesi</i>)	14) Optional
	15) e-Bank Receipt (<i>e-Dekont</i>)	15) Optional
Documents mandatory for issuance by buyer	Acknowledgement of reception / AoR	Mandatory for e-Fatura Commercial invoicing process

Item	Commentary
Self-billing allowed	No
Simplified invoice allowed	No

6.2. Document numbering

This section outlines the requirements to the sequential numbering of invoices and, where applicable, other documents.

6.2.1. Document numbering by the taxpayer

In Türkiye, an invoice number series sequence needs to be created by the taxpayer and used for the eInvoice file. There is no need to inform GIB about which invoice number series that will be used (only historically for pre-printed paper invoices).

The rules behind the number series: SERIES ID (3 chars) + YEAR OF INVOICE DATE (4 chars) + SEQUENCE NUMBER (9 chars): AAA2015000000001 [AAA + 2015 + 000000001].

The same rule as for paper invoices applies, the sequence is not allowed to be broken. If broken, the sender can create a new invoice sequence and it must be uppercased. e-Arşiv and e-Fatura must have separate series IDs.

6.2.2. Additional document numbering

This section should outline any additional numbering, e.g. provided in addition by the tax authority or that must be generated by the taxpayer based on specific specifications.

No explicit requirements.

6.3. Indirect tax (IT)¹⁴ rates

This section illustrates the applied IT¹⁵ rates and provides a non-exhaustive list with examples of goods and/or services that fall within specific IT rates. IT rates that differ between different administrative units are clearly outlined.

Indirect tax rates		
20%	Standard	- E-books, all other taxable goods and services - The standard VAT rate of 20% will be applied to the cleaning products (soap, shampoo, detergent, disinfectants, wet wipes, toilet paper, paper towels, tissue paper and napkins).
10%	Reduced	Certain basic foodstuffs; pharmaceutical products; books (excluding e-books); medical products, some construction equipment, admission charges for cinemas, theatres, operas; toothbrushes, pastes and dental floss.
1%	Reduced	Newspapers and magazines; some basic foodstuffs, used passenger cars

¹⁴ For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

¹⁵ Local name Virðisaukaskattur

Exempt	Exempt¹⁶	Partially exempt: Leasing immovable property by an individual; financial transactions; supplies to certain cultural bodies; supplies by and to certain governmental bodies; water for agriculture; the supply of unprocessed gold, foreign exchange money, stocks and bonds, duty stamps, scrap metal, plastic and certain other items; storage services performed at bonded warehouses or temporary storage places; delivery of goods or performance of services in free-trade zones
---------------	----------------------------	--

6.4. Special Consumption Tax (ÖTV)

ÖTV stands for Special Consumption Tax (*Özel Tüketim Vergisi* in Turkish). Contrary to VAT, which is applied on each delivery, ÖTV is charged only once. There are four main product groups that are subject to ÖTV at different tax rates:

- Luxury products;
- Tobacco and tobacco products, alcoholic beverages; (40% - 80% for tobacco products, may reach 63% for alcoholic beverages)
- Petroleum products, natural gas, lubricating oil, solvents and derivatives of solvents;
- Automobiles and other vehicles, motorcycles, planes, helicopters, yachts.

ÖTV rates vary widely, for instance, for passenger cars equipped with a conventional combustion engine the range is from 45% to 160%, while for battery-electric passenger cars it is 3% to 15%. Moreover, as VAT is applied after ÖTV, ÖTV rates can indirectly reach 190% of the cars' net price.

6.5. Mandatory IT invoice content

The section below illustrates the minimum legal requirements related to the content of invoices issued according to primarily to the indirect tax regulations of Türkiye. Please note that other additional content requirements might apply in addition, i.a. of technical character.

6.5.1. e-Fatura Invoice

Invoice content element for issuance		Status	Comment
Invoice informati	Document name, e.g. Commercial invoice or Basic Invoice	Mandatory	The type of document (invoice form and invoice type) should be clearly stated in the document
	Date of issue	Mandatory	

¹⁶ The term "exempt supplies" refers to supplies of goods and services that are not subject to VAT. "Partially exempt" supplies do not give rise to a right of input tax deduction. Some supplies are classified as "fully exempt," which means that no VAT is due, but the supplier may recover related input tax.

	Unique identification number	Mandatory	Invoice Number , a combination of three-digit alphanumeric unit code and the 13-digit sequential number. ETTN - The Universal Unique Identification Number (UUID) on the issued eInvoice
	Reference to relevant orders or offers	Not required	
Party information	Supplier's VAT number	Mandatory	
	Supplier's name	Mandatory	
	Supplier's address	Mandatory	
	Supplier's reference	Not required	
	Supplier's payment details	Not required	
	Supplier's tax representative	Mandatory	
	Customer's VAT number	Mandatory	
	Customer's name	Mandatory	
	Customer's address	Mandatory	Address of the customer, or the address of a permanent establishment in case the customer holds different permanent establishment that is related to the transaction. If the recipient of the transaction has several business locations, the invoice must state the business location or establishment referred to, in case that such mention would be relevant to indicate the tax treatment applicable to the transaction
	Customer's reference	Not required	
	Customer tax representative	Mandatory	
Goods / services information	Description / nature	Mandatory	
	Quantity / Extent of period of service	Mandatory	Mandatory for each line of goods or services. Unit measurement is mandatory accordingly to code list a GIB for usage.
	Date of supply	Where relevant	Could be mentioned if it differs from the date of issue of the invoice. It is also the tax point date
	Payment date	Where relevant	

	Payment terms	Not required	
VAT/GST related information	Total taxable amount (VAT/GST excluded)	Mandatory	
	Total amount (VAT/GST included)	Not required	
	VAT/GST rates applied	Mandatory	
	Break-down of the taxable amount (excl. VAT) per VAT/GST rate or exemption	Mandatory	
	Break-down of the VAT amount per VAT/GST rate or exemption	Mandatory	
	Total VAT/GST amount payable (total VAT/GST amount)	Mandatory	
	Unit price (VAT/GST excluded)	Mandatory	Yes, for each line of goods and services
	Discounts / rebates if not included in unit price	Where relevant	
	Tax point date	Where relevant	The date of supply has to be mentioned if it differs from the date of issue of the invoice. It is also the tax point date
Other content requirements	Currency	Mandatory	An invoice issued for a domestic sale must be issued in Turkish Lira. The invoice may also show the invoiced amount in a foreign currency if the TRY equivalents are stated. An invoice issued for an export sale may be issued in a foreign currency. The amount of the invoice must be recorded in the supplier's books together with the exchange rate on the date of the transaction.
	Language requirements	All different languages are allowed to be used on the invoice, as long as Turkish is present.	
	Invoicing requirements due to particular activities or transactions, e.g., new means of transport, margin scheme, etc.	No explicit requirements	
	Supplier related content requirements, e.g. legal	No explicit requirements	

	status, amount of share capital, registration number, etc.	
	ElInvoice content requirements, e.g. digitalized invoice, data regarding the e-signature, time-stamping, etc.	A digital signature is mandatory
	The requirement to mark invoices issued by an outsourced party	No explicit requirements

6.5.2. e-Arşiv Invoice

Invoice content element for issuance		Status	Comment
Invoice information	Document name	Mandatory	
	Date of issue	Mandatory	
	Time of issue	Mandatory	
	Unique identification number	Mandatory	Invoice Number , a combination of three-digit alphanumeric unit code and the 13-digit sequential number. ETTN - The Universal Unique Identification Number (UUID) of the issued eInvoice.
	Invoice sending form	Mandatory	Must be specified as KAGIT (paper) or ELEKTRONİK (electronic).
	Invoice sending method	Optional	Recipient e-mail or mobile phone number is optional
	Reference to relevant orders or offers	Not required	
	Mandatory information to be included in the e-Arşiv invoice		1. Issue date and document number of the e-Archive Invoice. 2. e-Arşiv Name/surname of the invoice issuer, trade name, if any, business address, tax office and tax identification number. 3. Customer's name/surname, trade name, tax office and tax identification number, if any. 4. The type, quantity, price, and amount of the good or work, tax type, rate and amount. 5. Delivery date and waybill number of the goods sold. 6. QR code or barcode, the information content of which is determined by the Presidency to enable it to be interrogated, verified and displayed electronically from the Presidency systems.

		"If any" in these sections considers the importance of including the relevant data in case of the existence of that data. If the recipient (business entity) does not have a tax number in Turkey, the invoice is made by writing ten times 2 ("2222222222") instead of the recipient tax identification number. This can be done on the e-Arsiv invoices issued through the GiB e-Arsiv Portal.	
Party information	Supplier's VAT number	Where relevant	
	Supplier's name	Where relevant	
	Supplier's address	Where relevant	
	Supplier's reference	Not required	
	Supplier's payment details	Not required	
	Supplier's tax representative	Not required	
	Customer's VAT number	Where relevant	
	Customer's name	Where relevant	
	Customer's address	Where relevant	Address of the customer, or the address of a permanent establishment in case the customer holds different permanent establishment that is related to the transaction. If the recipient of the transaction has several business locations, the invoice must state the business location or establishment referred to, in case that such mention would be relevant to indicate the tax treatment applicable to the transaction
	Customer's reference	Not required	
	Customer tax representative	Not required	
Goods / services information	Description / nature	Mandatory	
	Quantity / Extent of period of service	Not required	
	Date of supply	Where relevant	

	Payment date	Where relevant	
	Payment method	Mandatory	Must be mentioned by using code: • KREDIKARTI/BANKAKARTI • EFT/HAVALE • KAPIDAODEME • ODEMEARACISI • DİGER – (needs to be clarified)
	Payment terms	Not required	
VAT/GST related information	Total taxable amount (VAT/GST excluded)	Mandatory	
	Total amount (VAT/GST included)	Mandatory	
	VAT/GST rates applied	Mandatory	
	Break-down of the taxable amount (excl. VAT) per VAT/GST rate or exemption	Mandatory	Specified by the code list at GIB
	Break-down of the VAT amount per VAT/GST rate or exemption	Not required	
	Total VAT/GST amount payable (total VAT/GST amount)	Mandatory	
	Unit price (VAT/GST excluded)	Not required	Yes, for each line of goods and services
	Discounts / rebates if not included in unit price	Not required	
	Tax point date	Not required	
Other content requirements	Currency	An invoice issued for a domestic sale must be issued in Turkish Lira. The invoice may also show the invoiced amount in a foreign currency if the TRY equivalents are stated. An invoice issued for an export sale may be issued in a foreign currency. The amount of the invoice	

		must be recorded in the supplier's books together with the exchange rate on the date of the transaction.
	Language requirements	All different languages are allowed to be used on the invoice, as long as Turkish is present.
	Invoicing requirements due to particular activities or transactions, e.g., new means of transport, margin scheme, etc.	No explicit requirements
	Supplier related content requirements, e.g. legal status, amount of share capital, registration number, etc.	No explicit requirements
	ElInvoice content requirements, e.g. digitalized invoice, data regarding the e-signature, time-stamping, etc.	eSeal (Mali Mühür) is required.
	Requirement to mark invoices issued by an outsourced party	No explicit requirements
	Other	If the total amount of the invoices to be issued as of 1/1/2020, including taxes, by taxpayers who are not involved in the e-Archive Invoice application exceeds 5 thousand TL, the said invoices will be sent via the e-Document issuance portal presented by the Presidency as "e-Archive Invoice" or through the systems of private integrator organizations that obtained permission from the Presidency by providing the necessary integrations to the e-Document issuing portal of the Presidency. VKN or TCKN on the e-Arsiv Invoice must be reflected on the issued invoices within this scope. Since there is no obligation to include the tax office and TIN or TCKN information in the invoices to be issued to final consumers who are not taxpayers, it is possible to issue an e-Arsiv Invoice by entering the information "11111111111" consisting of 11 times the number 1 in

		the recipient TCKN field of the e-Arsiv Invoice to be issued on behalf of the "Other Customers" specified in the application, and all kinds of explanations can be added to the "Note" field in the e-Archive Invoice.
--	--	--

6.5.3. Export invoice

Invoice content element for issuance		Status	Comment
Invoice information	Document name, e.g. Commercial invoice or Basic Invoice	Mandatory	Will be issued as eInvoice profile "IHRACAT" and Invoice type: "ISTISNA"
	Date of issue	Mandatory	
	Unique identification number	Mandatory	
	Reference to relevant orders or offers	No information is currently available	
Party information	Supplier's VAT number	Mandatory	
	Supplier's name	Mandatory	
	Supplier's address	Mandatory	
	Supplier's reference	No information is currently available	
	Supplier's payment details	Optional	
	Supplier's tax representative	No information is currently available	
	Customer tax representative	Mandatory	Mandatory value: Ulus
	Customer Party type	Mandatory	Mandatory value: Export
	Customers VAT number	Mandatory	
	Customer's name	Mandatory	
	Customer's address	Mandatory	

	Customer's reference	Optional	
	Description / nature	Mandatory	
	Quantity / Extent of period of service	Mandatory	
	Date of supply	No information is currently available	
	Packaging type	Mandatory	
Goods / services information	Package ID	Mandatory	
	Package Quantity	Mandatory	
	Packaging Note	No information is currently available	
	Transportation type	Mandatory	
	Payment date		
	Payment terms	Mandatory	Payment details needs to be specified, e.g. (in advance, credit etc).
	Total taxable amount (VAT/GST excluded)	Mandatory	
	Total amount (VAT/GST included)	Mandatory	
	Total VAT amount	Mandatory	Mandatory value: 0
	VAT/GST rates applied	Mandatory	Mandatory value: 0
VAT/GST related information	Tax exemption Code	Mandatory	Mandatory value: 301
	Tax exemption reason	Mandatory	Mandatory value: 11/1-a Mal ihracatı
	Break-down of the taxable amount (excl. VAT) per VAT/GST rate or exemption	Not required	
	Break-down of the VAT amount per VAT/GST rate or exemption	Not required	
	Total VAT/GST amount payable (total VAT/GST amount)	Not required	

	Unit price (VAT/GST excluded)	Mandatory	
	Tax name	Mandatory	Mandatory value: KDV
	Tax type code	Mandatory	Mandatory value: 0015
	Discounts / rebates if not included in unit price	Not required	
	Tax point date	Not required	
	Currency	Mandatory	An invoice issued for a domestic sale must be issued in Turkish Lira. The invoice may also show the invoiced amount in a foreign currency if the TRY equivalents are stated. An invoice issued for an export sale may be issued in a foreign currency. The amount of the invoice must be recorded in the supplier's books together with the exchange rate on the date of the transaction.
	Language requirements	No information is currently available	
	Invoicing requirements due to particular activities or transactions, e.g., new means of transport, margin scheme, etc.	Mandatory	The invoice must be addressed to: GÜMRÜK VE TİCARET BAKANLIĞI Recipient information: GÜMRÜK VE TİCARET BAKANLIĞI BİLGİ İŞLEM DAİRESİ BAŞKANLIĞI Mandatory VAT number: 1460415308
Other content requirements	Supplier related content requirements, e.g. legal status, amount of share capital, registration number, etc.	Not required	
	EInvoice content requirements, e.g. digitalized invoice, data regarding the e-signature, time-stamping, etc.	Mandatory	

	Requirement to mark invoices issued by an outsourced party	Not required
--	--	--------------

6.6. Simplified invoice

The Supplier is not always obliged to issue a complete invoice. In certain scenarios, they may be able to issue a so-called simplified invoice.

Simplified invoicing	
Possible to issue simplified invoices for certain supplies	No
Maximum amount for simplified invoices	N.a
Other supplies for which a simplified invoice can be issued	N.a
Simplified invoices limited to certain type of supplies	N.a
Simplified invoices not allowed for certain transactions	N.a
Minimum content requirements on a simplified invoice	N.a
Invoices subject to the national invoice requirements (not self-bills)	N.a
(other) Invoices subject to the national invoice requirements (not self-bills)	N.a

Pagero Online does not support the creation of simplified invoices as they typically do not correspond to the business requirements of Buyers.

6.7. Rectification document

In Türkiye a credit/ debit note must be issued as rectification documents. A credit/ debit note should include at least the following information:

In Türkiye, the only rectification process is cancellation and issuance of a new invoice

6.8. Optional content

This section outlines briefly whether and how the trading parties can provide additional content in the technical e-document format mandated or otherwise prescribed in the specific jurisdiction. No additional requirements in Türkiye.

7. Integrity and Authenticity

Ensuring the integrity of the content, as well as the authenticity of the origin (I&A) of an invoice, is an obligation for both the Supplier and the Recipient.

The purpose of this section is to further clarify the local I&A requirements on B2B invoices, as well as outline whether different requirements apply to B2G invoices. The review is done both from the Supplier’s and the Recipient’s perspective, as varying rules may apply.

Item	Supplier	Recipient
Whether it is mandatory to ensure I&A in the jurisdiction	Required	Required
Which methods for ensuing I&A are provisioned for	E-signature and eSeal only	E-signature validation
Which requirements apply for I&A methods if ensured by a third-party (outsourcing)	The supplier may authorize the private integrator to use its own eSignature by a signed agreement	No explicit requirements

7.1. e-Signature

Even where e-signature is not an explicit requirement, Pagero recommends that our customers apply it as, globally, it is the most widely accepted legal means of ensuring I&A for business transactions.

In practical terms, this results in the same evidential position for eDocuments as for paper documents. This unique feature of e-signature provides an exceptional level of legal certainty.

Item	Commentary
e-Signature technical requirements	• Mandatory

	• An accredited private integrator can use its own eSignature/eSeal in the name and on behalf of the taxpayer. • An accredited private integrator can use its own certificate to e-sign on behalf of the taxpayer • Digital certificate for eSignature and eSeal is mandatory to be issued by: • National Electronic and Cryptology Research Institute (Ulusal Elektronik ve Kriptoloji Araştırma Enstitüsü = UEKAE). • Public Certification Center (Kamu Sertifikasyon Merkezi = Kamu SM).
Automated e-signing	• Allowed
Time-stamping of e-signature	• For e-Fatura invoices, there are no explicit requirements for having an additional time-stamp • For e-Arşiv invoices and e-Arşiv reports, it is mandatory to have an additional time-stamp

The Financial Seal (“Mali Mühür”)

The financial seal (“Mali Mühür”) is used to ensure the integrity, source and content of invoices and other legal documents to be created as electronic documents by legal persons, institutions, organizations and businesses, to ensure their security and confidentiality during their electronic transmission and storage in electronic environment.

The [Public Certification Centre](#) (Kamu SM) is the only institution authorized to carry out activities related to the operation, backup, warranty and maintenance of the Financial Seal Electronic Certificate Service Provider (MM ECSP).

- The Financial Seal Certificate is contained in a smart card. The card is delivered to the owner with a mini smart card reader.
- If the certificate owner prefers to use HSM (Hardware Security Module), certificates must be uploaded to the HSM device. The HSM product to which the certificates will be installed should be selected from the devices that comply with the recommended standards. In addition, HSM users should install their own backup systems or have a backup HSM.

7.2. e-Signature validation

The Recipient of an invoice is often required by law or practice to validate the e-signature on the received invoice. Even for countries where the validation-upon-receipt is not

expressly regulated, this is recommended by Pagero for both trading partners to be able to guarantee I&A.

Item	Commentary
Validation upon receipt	• Mandatory
Time-stamping of validation data	• Mandatory

8. Document retention

This section describes archiving requirements regarding the invoicing process and documents handled by Pagero. Please note, additional archiving requirements may apply to your specific documents.

Item	Commentary
Components to be stored (e.g. tax invoice, source documents, audit trail, I&A proof)	• The issued or received e-invoice, any type (including e-signature and certificate) ◦ The supplier: In XML, irrespective of the delivery format ◦ The buyer: The received format, which for e-Arşiv might be paper • The buyer's AoR within the commercial invoicing process • Return invoice, in case the buyer AoR is "return" • Cancellation request
Requirements to present stored documents in a specific audit format	• In case of an audit, it is required to showcase the XML version of the e-invoices
Legibility, i.e. the ability to read stored e-documents by an untrained eye	• Required
Legibility requirements	• No explicit requirements
Retention period for invoices not related to immovable property¹⁷	• 5 years according to the tax law and 10 years according to the commercial law
Start point of retention period calculation for invoices not related to immovable property	• Starting from the end of the calendar year in which the document is created
Retention period for e- invoices related to immovable property	• 5 years according to the tax law and 10 years according to the commercial law

¹⁷ Pagero stores all documents for 90 days due to data privacy and security regulations, after which the data is automatically deleted, unless Archive has been selected. Pagero provides long term archiving (for the legally required term, plus one year)

Start point of retention period calculation for invoices related to immovable property	Starting from the end of the calendar year in which the document is created
Retention period for other than regular invoices or invoices related to immovable property (if existing):	5 years according to the tax law and 10 years according to the commercial law
Start point of retention period calculation for other than regular invoices or invoices related to immovable property:	Starting from the end of the calendar year in which the document is created
Outsourced archiving	Outsourced archiving is allowed but only to Private Integrator
Archiving abroad¹⁸ and conditions, if any (e.g. notification, derogation, online access, mutual tax assistance treaty)	- Not allowed for original invoices, which must be archived on Turkish soil - Secondary copies may be stored abroad
Other requirements in relation to electronic document retention	- The private integrators need to obtain a separate accreditation from the GIB for archiving¹⁹. Separate accreditations are required for supporting storage of e-Fatura and e-Arşiv invoices and other types - The application form for archiving accreditation can be found in this link.

¹⁸ In certain situations or jurisdictions deviating requirements – typically regarding archiving abroad – may apply to invoices and related documents, e.g. concerning matters of defence and national security. Therefore, Pagero encourages customers to inquire for and receive an explicit written statement from the local tax authority stating that the archiving of such documents outside of the taxpayer's country is permitted. Pagero in a capacity of a third-party may not apply for derogations or clarifications of this nature on behalf of a taxpayer.

¹⁹ The list of accredited private integrators that obtained accreditation for archiving e-Fatura can be seen here: <https://ebelge.gib.gov.tr/e-Faturasaklamaiznialanlarinlistesi.html>

9. Other transactional documents

Along with invoices, countries may have regulations relating to other trading documents. The purpose of this section is to provide a selective (not exhaustive) overview of the regulation of other transaction-related documents of importance.

Document	Commentary
Purchase order	• No explicit requirements
Rectification document	• Yes, see section 6.7 above
Payment instruction	• No explicit requirements
SAF-T (or alike) reporting	• Yes
Transportation documents	• Yes, see e-Way bill
Other	• No

10. Other requirements

This section highlights certain aspects of the local regulations and infrastructure that differ from Pagero's General invoice processing and our standard country compliance investigation.

10.1. E-reporting

E- Ledger is the system that enables the Ledger to be prepared in the electronic format and to be sent to the Turkish Revenue Administration. Companies that were required to use e-invoice will also be subject to the e-ledger application. The taxpayers listed below must be included in the e-Ledger application: -Taxpayers who are obliged to switch to the e-Invoice application. -Companies subject to independent external audit. However this is not an e-reporting system such as SAF-T. TR does not have such reporting requirements. Only monthly purchase and sales (which are not e-documents) are declared via BA and BS forms.

Scope Established in Turkey

Registration threshold

- Taxpayers who are obliged to switch to the e-Invoice application, within the transition period to the e-Invoice application (from the beginning of the following year in terms of taxpayers who switched to the e Invoice application during the year)
- - Companies subject to independent audit, as of 1/1/2020, taxpayers who meet the conditions for being subject to independent auditing in 2020 and subsequent years have to switch to the e-ledger application as of the beginning of the year following the year the conditions are met.

Obligatory statutory books for companies are prepared in electronic format based on an XML based standard, an internationally available XBRL (extensible Business Reporting Language). Completeness, unchangeably, source accuracy of e-Ledgers has been guaranteed by e-Signature for individuals and digital seals for companies. In this respect, statutory books prepared in electronic format, which have been approved both by Turkish Revenue Administration and companies, have substantiating nature.

E-Reporting file format XML - XBRL-GL for e-ledger. Journal and General ledger to be created within the scope of electronic ledger application should be created according to XBRL GL taxonomy. The details of this taxonomy are explained in the technical guides available at www.edeafter.gov.tr.

Additional information

Report must be sent to TRA's system on a monthly/or quarterly basis. It is now possible to upload the e-ledger summary report (berat) on a monthly basis/or in temporary tax periods. Taxpayers will be able to submit ledgers on a monthly or quarterly basis. Implementation date N/A

Penalties

The penalty amount related to non-compliance with e-ledger legislation is TRY 700 regarding Tax Procedure Law, TRY 31.097 regarding the Turkish Commercial Law. However, the main risk of non compliance with e-ledger legislation is that the tax authority may reject deduction of input VATs on purchase invoices in case of a tax audit. This may give rise to huge risk for companies. Please note that if the tax authority rejects deduction of input VATs, input VAT amount displayed to VAT returns are charged together with tax penalty and interest charge. The penalty amount is equal to tax principle amounts (150% of tax principle amount for repeated cases) and the interest charge is 1.6% of tax principle amount per month. Also, noncompliance with e-ledger may cause legal issues in commercial court cases. Such as, your ledgers non-compliant with e-ledger legislation cannot be used as evidence in favour of you in conflicts with your suppliers/customers/employees.

10.2. Public procurement

Not applicable for Türkiye

10.3. QR code

As of 1 September 2023 it will be mandatory to include QR-codes when issuing the following document types:

- E-Fatura Invoice (B2B and B2G)
- E-Arşiv Invoice (B2B and B2C)
- E-Waybill
- E-Self-Employment Receipt (E-SMM)
- E-Producer Receipt (E-MM)
- E-Insurance Commission Expense Document
- E-Currency and Precious Metal Trading Document
- E-Stake Document

Information regarding the contents of the QR can be found in the [guide](#) published by GIB.

10.4. Indirect tax reports

10.4.1. Daily Reports

Since 01.01.2019, it is mandatory to submit daily reports of issued and canceled e-Arşiv invoices to GIB at the latest at 23:59 the day after the invoice was issued.

10.4.2. e-Ledger

Known as e-Book in some countries, e-Ledger (*e-Defter* in Turkish) is the system that allows accounting ledger accounts to be prepared and transmitted to the GIB electronically.

Obligation to keep electronic ledger has been imposed on taxpayers who have obtained license from Energy Market Regulatory Authority (EMRA) due to the production, importation, delivery, etc. activities of the goods in the list numbered I attached to the Private Consumption Tax Law and who manufacture, construct and import the goods in the list numbered III attached to the Private Consumption Tax Law. These include companies producing cola-like beverages, tobacco products, alcoholic beverages and mineral oil licenses, irrespective of their turnover.

Those required to adopt e-invoices and companies with year-end gross sales of more than TRY 5M must switch to the use of an e-ledger as soon as e-invoice usage has been initiated. Furthermore, companies that are subject to independent audit will have to use an e-ledger starting from January 2020.

With the amendment made in the General Communiqué on Electronic Ledgers No. 1, the obligation of being an e-Invoice user as a precondition for e-Ledger usage has been removed. This means that e-Ledger can be used voluntarily without being a registered user of e-Invoice.

It is not possible to keep the accounts both as hard copy and electronically. According to the General Communiqué on Electronic Ledgers No. 1, those who start to keep their accounts in the form of electronic ledgers cannot keep their accounts in paper environment.

Within the scope of e-Ledger, the software that will be used by taxpayers to create electronic ledgers and warrants is called "compatible software". A list of compatible software is published in GIB's microsit

<http://www.edefter.gov.tr/edefteruyumluyazilimlar.html>

10.5. Penalties for invoice non-compliance

Legal penalties/fines apply to instances such as not issuing or receiving invoices, expense slips, producer receipts and self-employment receipts, including those that need to be issued as electronic documents; if amounts on invoices are erroneous or differ from what was archived versus what was issued, documents that should be issued as electronic documents, but are issued on paper, etc.

These scenarios are subject to:

- A fine imposed on each subject who must issue and receive these documents, at the rate of 10% of the amount required to be stated on these documents or the difference of the amount, not less than 240 TRY (12 EUR) for each document. The total fine to be imposed for the above-mentioned irregularities determined for each type of document within a calendar year cannot exceed 120,000 TRY (6,000 EUR).

An example of this would be if a supplier issues an e-Arsiv invoice instead of an e-Fatura in a situation where a e-Fatura invoice should have been used. This transaction would be an infraction on the supplier's side and is subject to penalty.

Reception of e-Arsiv, which was supposed to be issued as an e-Fatura yields no penalty for the buyer, as all necessary content fields in the e-Arsiv are met and the supply of goods/services have been made.

10.6. Switching your private integrator

Before you start using a private integrator you need to inform the Government of this by sending in an application to the Presidency (the Ministry of Treasury and Finance).

In the case that you are switching from one private integrator to another, you need to re-do the application with the new Private Integrator. You send an application through the interactive tax office to the new private integrator who will then add a new registered user and inform/apply for approval with the Presidency.

11. Country-specific processing

This section outlines how the Pagero General eInvoicing process has been adapted to the local requirements to ensure compliant local processing.

11.1. e-Fatura Basic Invoicing Process (Temel) with Pagero - AR

(1) Supplier provides data to PAGERO

(2) PAGERO performs data content validation and enrichment, file conversion to UBL-TR

(3) PAGERO sends the e-document to our partner eFinans in the mandatory format

(4) eFinans sign the UBL-TR and send it to GIB

(5-6) If accepted by GIB, GIB delivers the invoice to the buyer/the receiving service provider (RSP)

(7) The status (Accept/Reject) is sent back from GIB to eFinans

(8) eFinans sends a response back to PAGERO, document status is updated according to response in Pagero Online

(9) eFinans archives the signed UBL-TR invoice on behalf of the supplier

11.2. e-Fatura Commercial Invoicing Process (Ticari) with Pagero - AR

(1) Supplier provides data to PAGERO

(2) PAGERO performs data content validation and enrichment, file conversion to UBL-TR

(3) PAGERO sends the e-document to our partner eFinans in the mandatory format

(4) eFinans sign the UBL-TR and send it to GIB

(5-6) If accepted by GIB, GIB delivers the invoice to the buyer/the receiving service provider (RSP)

(7) The status (Accept/Reject) is sent back from GIB to eFinans

(8) eFinans sends a response back to PAGERO, document status is updated according to response in Pagero Online

(9-10) Application response is sent from the buyer to GIB.

(11) GIB sends application response to eFinans

(12) eFinans sends application response to Pagero

(13) Pagero can send the application response to the supplier

(14) eFinans archives the signed UBL-TR invoice on behalf of the supplier

11.3. e-Fatura Basic Invoicing Process (Temel) with Pagero - AP

(1-2) Supplier/SP sign the UBL-TR invoice and send it to GIB

(3) If accepted by GIB, GIB delivers the invoice to eFinans

(4) eFinans archives the signed UBL-TR invoice on behalf of the buyer

(5) eFinans send the UBL-TR invoice to Pagero

(6) PAGERO performs data content validation and enrichment, file conversion to customer format

(7) Pagero delivers the invoice to the buyer

11.4. e-Fatura Commercial Invoicing Process (Ticari) with Pagero - AP

(1-2) Supplier/SSP signs the UBL-TR invoice and sends it to GIB

(3) If accepted by GIB, GIB delivers the invoice to eFinans

(4) eFinans archives the signed UBL-TR invoice on behalf of the buyer

(5) eFinans send the UBL-TR invoice to Pagero

(6) PAGERO performs data content validation and enrichment, file conversion to customer format

(7) Pagero delivers the invoice to the buyer

(8) The buyer sends an accept or reject application response to Pagero

(9) Pagero sends the application response to eFinans

(10) eFinans sends the application response to GIB

(11-12) GIB sends the application response to the supplier

11.5. e-Arşiv Invoice Process with Pagero - AR

- (1) Supplier provides data to PAGERO
- (2) PAGERO performs data content validation and enrichment, file conversion to UBL-TR. No recipient behind GIB was identified so the delivery configuration is then chosen as e-Arşiv
- (3) PAGERO sends the e-document to our partner eFinans in the mandatory format
- (4) eFinans validates the UBL-TR and sends it to the buyer if validated (e-mail)
- (5) eFinans sends a response back to PAGERO, document status is updated according to response in Pagero Online
- (6) Once per day eFinans reports all issued e-Arşiv invoices to GIB
- (7) eFinans archives the e-Arşiv invoice on behalf of the supplier

12. Closing statements

12.1. Confidentiality

This General invoice processing description of Pagero Online, our Country Compliance Reports, and other documents provided by Pagero are of confidential nature and are only intended for and may only be used by Pagero's Customers, their employees or other authorized recipients for the purpose or purposes specified and agreed to between the parties. Descriptions, reports, and documentation may not – neither in full nor in parts – be copied or otherwise distributed to third parties without Pagero's prior written consent.

12.2. Disclaimer

In order to establish a relationship based on trust and transparency with our Customers, Pagero provides its General e-Invoice and eArchiving processing descriptions of Pagero Online as well as Pagero's Country Compliance Reports. These documents are intended to enable our Customers and their tax advisors to assess how Pagero has interpreted the relevant legislation and implemented it in our processes in order to support our Customers to fulfil their legal obligations.

We would like to remind our Customers that, according to tax and accounting regulations, the outsourcing of any process to third parties (such as issuance, compiling, processing, receipt, or archiving of e-Invoices), will not lead to a shift of liability, the liability will remain with the Customer. Accordingly, the taxable person always remains responsible towards the local authorities for ensuring their e-Invoice compliance, and for fulfilling accounting and reporting requirements. We want to emphasise this, in the light of that there can be potentially conflicting regulations on regional, national, or international levels.

Pagero endeavours to only include and provide accurate and up to date information. However, Pagero makes no guarantees as to the accuracy of any statement, information or advice provided by Pagero, whether in writing or verbally. The Customer must make an informed decision about whether to adhere to and follow such recommendations or not. The final decision and responsibility regarding tax, accounting, and reporting issues rest with the Customer.

Revision history
