Introduction and document purpose

Pagero Group builds the world's largest, open business network – so you can reach any business, anywhere in the world. No matter how many borders your operations may cross or how many systems you are connected to, we take care of the technical and regulatory requirements across your entire order-to-cash, purchase-to-pay and freight processes. We give you data accuracy and security, transparency and real-time visibility – through a single connection.

At Pagero Group, we believe that technology supports sustainability. That's why we are committed to helping businesses become 100% paperless, supporting resource efficiency, transparency and business continuity.

The main purpose of this country compliance report is to provide the reader with an in-depth analysis of the focus country's laws, regulations, and process with regards to e-invoicing and other trade documents. The analysis considers topics such as business requirements before switching to electronic invoices, e-document creation, e-document distribution, integrity and authenticity, and, finally, e-archiving.

This document guides how Pagero solutions support customers in the focus country to meet local regulations and serves as a supplement to Pagero General E-invoicing Process Description.

The information provided by Deloitte which is part of this material was solely prepared as general information. It was prepared to meet with specific requirements and was not prepared for any other purposes or objectives. Changes in conditions over time may affect the contents of the material and its content. We do not express any opinion or conclusion in this material.

© 2018

1. Terminology

This section outlines general and country-specific terminology for Denmark, which will be used throughout the whole document.

Term	Explanation
AoR	Business response from the buyer to the supplier regarding the received document, which can be positive (acceptance) or negative (rejection), and must be issued after the validation of the received document with MI
CVR	Central Virksomhed (company) Registration number. CVR is the Danish state's master register of information about businesses
EAN / GLN Number	GLN is the barcode standard Global Location Number, which identifies addresses, organizations, digital endpoints, or products. EAN is an older name for GLN. (EAN is an abbreviation for European Article Number.)
NemHandel	NemHandel maintains public, digital infrastructures for e-commerce, and is an authority in relation to the common standard for e-commerce. All public authorities and institutions are obliged to be connected to the NemHandel infrastructure
NHR	NemHandelsRegisteret, in which all users of NemHandel must register which NemHandel business documents they are capable of receiving and sending – e.g. orders and invoices.
OIOUBL	Online Universal Business Language; OIOUBL is a customization of the international Universal Business Language (UBL) 2.0 standard from the Organization for the Advancement of Structured Information Standards (OASIS) for Danish business requirements.
OIORASP	(OIO Reliable Asynchronous Secure Profile) is a transport protocol for asynchronous exchange of business documents over the Internet. OIORASP is a Danish adaptation (so-called profiling) of an international family of standards called WS- *. Together, these standards ensure the underlying business requirements for secure, reliable and irrefutable exchange of Business Documents.

Peppol	The Peppol Network is a logical network enabling secure and reliable exchange of Peppol Dataset Types between End Users via Peppol Service Providers.
Peppol Authority	The Danish Business Authority (ERST) has the role of Peppol Authority, which means that ERST is responsible for the registration of companies that wish to become an Access Point (AP) or a Service Metadata Publisher (SMP).
Post Audit	The post-audit tax regime allows trading partners to exchange edocuments as well as other transactional documents directly with each other, without any real-time or immediate controls performed by the tax office. Even though e-documents are allowed, there are no provisions as to what format, infrastructure, or how they should be created, issued, or distributed. The main requirements on the taxpayers are to ensure document content, integrity, and authenticity, as well as appropriate archiving. The term post-audit stems from the fact that Tax audits can be performed months or years after the transactions originally took place.
VIRK	A web application that the Danish Business Authority makes available free of charge to private companies that must send invoices to public recipients.

2. General overview

This section provides an initial introduction into the local e-invoicing environment within Denmark, including the types of local e-invoice regulations, go-to governmental and industry bodies, and whether multiple invoicing regimes, that is, varying regulatory requirements, exist for example by industry, business size, or other defining factors.

Item	Commentary
Authorities and other agencies relevant for e-invoicing	• Skatteministeriet (Danish Ministry of Taxation) • SKAT (Danish Tax Authority) • Erhvervsstyrelsen (Danish Business Authority) • Digitaliseringsstyrelsen (Danish Agency for Digitisation)
Main applicable legislation in respect of e-invoice issuance, exchange, reception and retention	• Danish VAT Code (Bekendtgørelse om merværdiafgiftsloven) • <i>Danish Bookkeeping Act</i> (Bekendtgørelse af bogføringslov) In effect until 1 July 2022 • The New Bookkeeping Act (Lov om bogføring) from 1 July 2022 • Executive Order on the Act on Public Payments No. 1203 of 27/12/2003 • Act on electronic invoicing for public procurement No. 1593 of 18/12/2018 • Executive Order on electronic invoicing in the pan-European service-oriented infrastructure No. 346 of 15/03/2019

3. E-Invoice status

When considering sending or receiving e-invoices two basic questions should be considered: is invoice equal to paper invoice from the legal perspective; and if there are any situations where e-Invoicing is mandatory for reception or transmission.

Item	Commentary
E-invoice status	• Allowed
Varying invoicing regimes	• B2G: Mandatory • B2B: e-invoicing and e-archiving remains optional
e-Invoicing model	• B2G: Centralized B2G • B2B: Post-Audit
e-Invoice definition²	• An invoice issued, sent and received in a structured electronic format that allows it to be processed automatically and electronically. Electronic invoice covers the document types invoice and credit note
Scope of taxpayers the e-document mandate applies to	Mandatory for submitting: • All Danish suppliers to Governmental authorities • Foreign suppliers to Governmental authorities. However, invoices can be received in other formats than those required for domestic suppliers Mandatory for receiving and processing: • From April 18, 2019 central, regional and local contracting authorities are required to be able to receive e-invoices that comply with the European Norm • Further, From April 18, 2019 central and from April 18, 2020 regional and local contracting authorities must join and use the Peppol infrastructure and must be registered as a recipient in the NHR

² Differing definitions may exist between different levels of government, or differing legislation, i.e. accounting law and IT law

	- The Public Procurement E-invoicing requirement does not apply to the Faroe Islands or Greenland B2B e-invoicing and archiving Obligation to use Digital Bookkeeping System (which must be e-invoice enabled) - January 2024: companies obliged to submit annual reports to ERST (class B, C, D) - July 2024 if such companies are using inhouse built bookkeeping software, it must be upgraded and compliant - January 2026: companies not obliged to submit annual reports to ERST, however, having a turnover DKK >300.000 during two consecutive years (class A) - July 2026 if those companies are using inhouse built bookkeeping software, it must be upgraded and compliant New bookkeeping law does not apply to the Faroe Islands or Greenland E-orders and e-catalogues It is mandatory for some government institutions to use e-orders and e-catalogues as a part of a number of agreements in the Government's Procurement Programme.
Mandatory AoR (document response) process	No explicit requirements
Implementation / roll-out plan	- B2G: E-invoicing mandate implemented - B2B: The New Bookkeeping Act goes into effect on 1 July 2022. Gradual implementation of digital obligations based on company turnover

4. Before switching to e-invoices

4.1. IT³ registration

The following thresholds apply to the requirement to be registered for an IT number in Denmark:

Following thresholds apply to the obligation to be registered for a VAT:

- Businesses established in Denmark: DKK 50,000 (EUR 6.700) a year
- Businesses established elsewhere: None
- Distance selling: DKK 75,000 (EUR 10.000)
- Intra-Community acquisitions: DKK 80,000 (EUR 10.700) a year (for businesses exempted from VAT)

A non-established business must register for Danish VAT if it makes any of the following supplies:

- Goods that are located in Denmark at the time of supply,
- Intra-Community acquisitions in Denmark,
- Distance sales in excess of the annual threshold,
- B2C e-services, broadcasting and telecommunications to individuals with Danish residence
- Services that are not subject to the tax under the “reverse charge” mechanism. Most services supplied to taxable persons in Denmark are covered by the Danish reverse charge regime.

Tax representatives. Businesses established in the following countries are not required to appoint a tax representative: EU Member States, Åland Islands, Faroe Islands, Iceland, Greenland, Norway.

³ For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

Businesses established in other countries must appoint a Danish resident as tax representative to register for VAT. The representative and the non-resident business are jointly and severally liable for VAT liabilities.

CVR registration

The Danish Central Business Register (aka CVR — Det Centrale Virksomhedsregister) is the central government register containing primary data on all businesses in Denmark, regardless of economic and organizational structure, except personally owned companies with an annual turnover of less than 50,000 (EUR 6,700) Danish kroner

Businesses will automatically receive their CVR number (Central Virksomhed Registration number) after registering to the CVR. Taxpayers established in Denmark can use the CVR number as their VAT number.

Entities which are not registered in the CVR register (i.e. non-Danish companies without a Danish address) are assigned an SE number, which would be their VAT number.

VAT number format: DK 12 34 56 78 / SE 12 34 56 78

CVR number format: [8 digits] Sample: 88146328

4.2. Process to switch to e-Invoicing

Even though many countries encourage or even mandate e-Invoicing, there may be specific requirements on the Trading parties – typically the Supplier – before starting an e-Invoicing program. This section provides a brief overview of such requirements.

Item	Commentary
Actions towards authorities, required in order to enable electronic processing instead of conventional processing	No explicit requirements
Actions between the trading partners, e.g. customer acceptance, agreement, etc.	Buyer's consent is required, however, it may take any form; tacit, written, by action or similar
Transition period from the moment of starting e-invoicing during which, e.g. parallel invoicing may be allowed	No explicit requirement

4.3. Outsourcing invoice issuance function

Many companies decide to outsource the issuance process of e-invoicing to third parties who have the necessary infrastructure and knowledge of implementing and executing e-Invoicing. This may be driven by a technical limitation or local regulatory requirements. However, before doing so, it is highly recommended that a supplier investigates whether such outsourcing is permissible and whether any requirements must be fulfilled.

Item	Commentary
Whether outsourcing of invoice issuance (creation) is allowed or not	• Allowed
Whether statement of outsourced issuance is required on the invoice	• Not required
Whether outsourcing agreement is required between the taxpayer and the third-party is performing actions on its behalf	• An explicit agreement required
Content and formality requirements to the Outsourcing agreement between the taxpayer and the third-party	• No explicit requirements to the content
Whether any notifications to or derogations from authorities are required in the specific jurisdiction for outsourced issuance	• No explicit requirements
Whether, and which, requirements exist to the outsourced party to be able to act on behalf of the taxpayer	• No explicit requirements

4.4. Outsourcing invoice receipt function

Due to the unique nature of the AP process, it may be required for the buyer (invoice receiver) to have an explicit agreement, or other permissions to be put in place for Service Providers to conduct invoice receiving functions on behalf of them.

Denmark has no explicit requirements on the outsourcing of the function of receiving invoices (similar to the function to issue invoices as outlined above).

5. Document processing

5.1. Format and other technical requirements

Globally, a multitude of e-Invoicing formats and infrastructures exist. Local regulators often offer or mandate the use of certain formats, standards, or platforms for the transmission or delivery of invoices or other tax-related documents. Pagero has the technical depth and experience to support country-specific technical requirements globally.

Item	B2G	B2B
Mandated document format(s) for exchange with mandated Gov platform(s) and/or between the trading parties	• PEPPOL BIS BILLING 3.0	• No explicit requirements
Other document format(s) commonly used for exchange between trading parties	• OIOUBL (national UBL 2.1 standard)	• PDF, OIOUBL, PEPPOL BIS
Mandated platform(s) required to have connection with for e-document processing	• Peppol • NemHandel Registrations in NHR require login via NemLog-in	• N.a.
Other platform(s) relevant for e-document processing	• Virk.dk a web application that the Danish Business Authority makes available free of charge to private companies that must send invoices to public recipients.	• NemHandel
Schematron(s), XSD schema or other	• OIOUBL Schematron 1.12	• N.a.

official mechanisms ensuring document content	
Routing ID's / codes or other identifiers used in the jurisdiction for counter-party identification and document exchange	- Public recipients must be registered in NHR, and are assigned (EAN / GLN number) - Peppol Prefix for GLN number 0088 - Private businesses in the NHR can be registered with EAN, CVR or other identifiers
Other technical aspects	- No - No

5.2. Communication with HUB

Regulations in Denmark foresee the following options on how e-documents can be communicated with the mandatory infrastructure(s):

NemHandel is based on the international standard Peppol and the associated transport protocol for electronic document transfer, AS4, as well as the older Danish standard OIOUBL, based on the transport protocol OIORASP.

Communication options	NemHandel	Peppol
Automated	Automated transmission via, e.g. service provider or ERP is allowed given that they are connected to NemHandel	Yes, all Public authorities are connected to the Peppol Network for invoice reception.
Manual	- NemHandel does not have their own web portal for submitting manual invoices but the Danish Business Authority makes available a web portal that is integrated with verk.dk for private companies to send invoices to public recipients. - Email distribution: Not allowed	The public authorities do not provide Manual option for suppliers to submit Peppol invoices. Suppliers can however, use services of Peppol service providers to manually or electronically generate an e-invoice to be transmitted via Peppol
Other options	N.a	N.a

5.3. Issuance and clearance process

This section describes the document issuance and clearance process from the supplier perspective.

5.3.1. Domestic documents

This section describes the process for documents created to be transmitted within the given country

Issuing process B2G e-invoicing

Suppliers can send e-invoices via two options; NemHandel and Peppol, this section explains these two different scenarios. Note that registration in NemHandel and Peppol are separate processes, and nothing mechanically links the two. However, public sector entities must be registered for both. (Private sector entities can choose to be registered for either or both.) Also, NHR lists everyone who participates in NemHandel, and lookups in NHR return both the NemHandel and Peppol profiles for which the recipient is registered. The Peppol SML lists all Peppol recipients, but the Peppol network is not really set up to make it easy to scrape a complete endpoint list. The design use case for Peppol is that you query the SML when you wish to know whether a specific endpoint identifier is registered in the network. You should contact the OpenPeppol operating office for details on what you can and cannot do in terms of getting an overview.

In NemHandel, both Peppol and OIOUBL formats are used for e-invoices, but only Peppol is used for e-orders and e-catalogues. According to NemHandel, it is advantageous if the whole process is based on Peppol.

All the Public authorities are all assigned their own EAN/GLN location number. To be sure that the e-invoices get to the right place in the fastest possible way, the supplier must make sure that the location number is provided in connection with the order. There is also a [list provided by NemHandel](#)

Suppliers can choose to use the Peppol Network when sending e-invoices. The NHR has an overview of all NemHandel and Peppol recipients and their endpoints (EAN / GLN / CVR), as well as which documents they can receive. The NHR is also a Peppol register (Peppol SMP). With Peppol, issuers will receive an electronic receipt when their submitted invoice has reached the recipient.

For a better understanding of the overall process the process description below summarises the issuance process in Denmark from the supplier perspective.

The OIOUBL invoicing process:

(Source: NemHandel.dk)

In the OIORASP infrastructure outlined in Figure above, the document exchange takes place by Company A (Sender's service provider) sending a business document to Company B (Receiver's service provider)

When the business documents are sent via the OIOUBL network, they are referred to as "OIOUBL documents".

Company A (Sender's service provider) search in the (NHR) to find information about where the document is to be sent and how it is to be sent.

The document is sent to a Company B (Receiver's service provider) via a transport protocol that complies with the OIORASP standard.

Process Description:

- (1) Supplier provides invoice data to the sending service provider (SSP)
- (2) SSP sends the final e-document to NemHandel/Peppol in a legally predefined format either (OIOUBL or PEPPOL BIS), via the exchange communication possible (AS4 or OIORASP)
 - (2.1) The NemHandel platform will send a technical submission receipt to the sender by email or other means depending on the document distribution method chosen by the sender
- (3) The buyer receives the e-document from the mandatory infrastructure NemHandel/Peppol in a structured format

Issuing process B2B e-invoicing

B2B e-invoicing is not currently explicitly regulated. Trading parties can choose numerous methods for exchange and the format for which the invoice file will be.

The supplier can use the NemHandel look-up to see if, and in what formats, their customers behind NemHandel can receive eDocuments

The wide use of the Peppol Network in the public sector has had an overflow effect on the private sector, with many businesses now able to receive e-invoices via Peppol.

5.3.2. Cross-Border

This section describes the requirements for cross-border outbound documents such as sales invoices

Foreign suppliers are in scope for the B2G e-invoicing mandate. However, it does occur that invoices are received in other ways Cross-Border. The Danish authorities can't set requirements for foreign suppliers in addition to the rules described in the European standard. However, there is an expectation that suppliers will make use of the implementation of the standard made by Peppol.

5.4. Reception and validation process

This section describes the document reception, validation and acceptance processes from the buyer perspective.

Denmark has no explicit requirement or provision of an electronic AoR by the buyer to the supplier. Further NemHandel, does not support this functionality.

In Peppol, the Message Level Response (MLR) is almost not frequently used. However, this may change as more document types come online. The main use case for the MLR is informing the sender of errors that are not caught by the transport layer validation, and as long as people are only sending invoices and credit notes, most of the errors get caught in the transport layer validation (because invoices are tightly regulated documents; catalogues involve many more bilaterally agreed conventions that can create errors).

5.4.1. Domestic documents

This section describes the process for documents received for purchases or transactions within the given country

Receiving B2G e-Invoices

Public and private entities, must be registered in the (NHR), and, therefore, have an e-invoice recipient number (EAN number), to be able to receive e-invoices. All public entities must have at least one e-invoice recipient number that is publicly available on the organization's website.

From April 18 2020, all contracting authorities must use the Peppol network and must be registered as a recipient in the joint public (NHR).

Receiving B2B e-Invoices

For a private company to receive e-invoices via NemHandel, the company must register an ID in the (NHR). The ID can be the CVR number or an SE number. It is also an option to purchase an EAN number. It's an advantage to get an EAN number if the company has several departments, which must be able to receive and send electronic invoices separately. Otherwise, businesses are free to choose e-invoice reception methods, including outsourcing this function to a service provider, that suits their needs.

5.4.2. Cross-Border

This section describes the requirements for cross-border inbound documents such as purchase invoices

As mentioned earlier, there are no explicit requirements on Cross Border e-documents processes in Denmark. The Danish authorities can't set requirements for foreign suppliers in addition to the rules described in the European standard. However, there is an expectation that suppliers will make use of the implementation of the standard made by Peppol.

5.5. AoR (response) process

Denmark has no explicit requirement or provision of an electronic AoR by the buyer to the supplier. Further NemHandel, does not support this functionality.

5.6. HUB validations

Some tax regimes require businesses to send tax documents to a predetermined hub either before, or shortly after issuing invoices. Generally, a hub that requires this will send a reply to the issuer. This reply can be expressed as a clearance/ approval response, rejection, semi approved, etc.

In Denmark, there is no systemic monitoring system in place. The NemHandel does not send any reply to the issuer. This means no validation takes place.

When Peppol communications are made, the senders Peppol service provider is required to conduct standard Peppol validation before sending the document to the receivers Peppol service provider, which includes those behind NemHandel.

5.7. Invoice presentation / copy

Some regimes require a visual presentation of the invoice file to be transmitted along with the structured invoice file. This section describes if there is any regulation concerning visual or image-based presentations of invoices as a copy for the original or vice versa.

In Denmark, there are no requirements for invoice copies to have any wording to differentiate them from the original, but it is recommended.

Having a PDF Presentation (a human-readable duplicate) when the Tax e-invoice was issued in a machine-readable Format file may be confusing. To ensure correct originals management, Pagero Online in addition to our standard technical controls adds a special wording "Copy Tax Invoice" on PDF Presentations where the Tax e-invoice has been issued as a machine-readable format file.

5.8. Distribution between taxpayers

This section explains how and if trading parties can send invoices between each other. In some cases, hubs also distribute the tax document to the buyer.

Item	Commentary
Push communication	No explicit requirements
Pull communication	No explicit requirements
E-mail distribution	See section 5.2
Webportal⁴	See section 5.2
Scanning inbound invoices	No explicit requirements
Scanning outbound invoicing	No explicit requirements

5.9. Rectification process

This section will express the process that needs to be taken when there is an error in an invoice, how it is to be handled, and corrected by both buyer, seller, and if a notification needs to be delivered to the tax authority.

Rectification process	
What are the options to correct an invoice if an incorrect IT rate, exemption or reverse charge is applied on the invoice	- Credit note - The supplier has the right to correct an invoice by issuing a credit note in connection with the wrong invoice and issuing the new (correct) invoice afterward. Furthermore, there is a possibility for the supplier to correct the invoice with a corrective invoice. The supplier has to issue the corrective invoice with a notification to the respective invoice
What are the options to correct an invoice if the customer returns the goods	Credit note

⁴ Note, however, that prior to using an external portal, like Pagero's Webportal, Suppliers are required to already have an invoice / invoice data in their internal accounting software. Portals are not designed for the purpose of replacing internal accounting but are a mechanism to make invoices available for the Buyer. Recommended only for businesses issuing fewer than 100 invoices annually.

What are the options to correct an invoice if the customer paid too much	In case that the customer paid too much erroneously the overpayment has to be paid back to the customer and no invoice correction is necessary. Otherwise, the supplier has to correct the invoice with a credit note and a new invoice or with a corrective document.
What are the options to correct an invoice if the supplier agrees to a discount after the invoice was issued to the customer	- Credit note - Please note that there is no need to issue a credit note when the discount is granted because the payment has been made within a certain agreed deadline, we refer to the so-called "cash discounts"
What are the options to correct an invoice if the invoice misses data such as name, address, IT number, invoice reference, etc.	- Credit note - Corrective document (with a reference to the respective invoice)
Other scenarios with different correction option	No
Party entitled to issue a credit note if the invoice was issued by the supplier (i.e. no self-billing)	Supplier
Allowed to draft a 'waiting' document/interim document' in the absence of a purchase invoice and report IT as due and deductible on the basis of this document	No

5.10. Coexistence of paper and electronic invoices

Item	Commentary
Whether parallel invoicing (issuance and exchange of the same document in several formats, e.g. electronically and on paper) is allowed and/or whether there are any regulations surrounding it	- B2B: Allowed - B2G: Prohibited
Whether the jurisdiction allows for document (e.g. invoice) dematerialization, i.e. destruction of the original paper invoice, for processing and/or archiving	Allowed
Whether any conditions apply, and which, to the dematerialisation	Allowed provided the authenticity of the provider and the integrity of the content is guaranteed
Whether the jurisdiction allows for document (e.g. invoice) materialization, i.e. destruction of the original electronic document, for processing and/or archiving	Allowed provided the authenticity of the provider and the integrity of the content is guaranteed

Whether any conditions apply, and which, to the materialisation

- There are no specific requirements to converting invoices in electronic format to paper invoices

5.11. Contingency invoicing

This refers to the process for e-invoicing if any mandatory infrastructure is inaccessible. If temporary measures are available, or allowed, to facilitate invoicing during the downtime.

If the recipient's address could not be found based on the lookup parameters:

Contact the recipient and find out if you are sending to the correct EAN number. If the customer is a public authority, they are obliged to be registered in the NemHandelsRegisteret, and to be able to receive via NemHandel. If the recipient is a private company, you can encourage the company to support NemHandel.

Otherwise, attempt to send again. If the problem persists, contact NemHandel Support.

6. Document content requirements

6.1. Document types

Item	Commentary
Documents mandatory for issuance by supplier	• Complete invoice • Simplified invoice
Documents mandatory for issuance by buyer	• No

Item	Commentary
Self-billing allowed	• Yes
Simplified invoice allowed	• Yes

6.2. Document numbering

This section outlines the requirements to the sequential numbering of invoices and, where applicable, other documents.

6.2.1. Document numbering by the taxpayer

Item	Commentary
A sequential number, based on one or more series, which uniquely identifies the invoice	• Yes
Different series of sequential numbers allowed (e.g. a separate sequential numbering for intercompany billings, credit notes, etc.)	• Yes
Allowed to start a new sequential numbering every year	• Yes
Worldwide numbering on legal entity level allowed provided that gaps can be explained	• Yes

Required that the numbers follow the date of issuance (i.e. is it true that an invoice with number 2 cannot have an invoice date older than the invoice with number 1)	• No
---	--

6.2.2. Additional document numbering

This section should outline any additional numbering, e.g. provided in addition by the tax authority or that must be generated by the taxpayer based on specific specifications.

In Denmark, there are no requirements around additional country specific document numbering.

6.3. Indirect tax (IT)⁵ rates

This section illustrates the applied IT⁶ rates and provides a non-exhaustive list with examples of goods and/or services that fall within specific IT rates. IT rates that differ between different administrative units are clearly outlined.

Indirect tax rates		
25%	Standard	All other taxable goods and services.
0%	Zero	Newspapers, Supplies to ships, Supplies of gold to the Danish National Bank
Exempt	Exempt	Medical services, Education, Financial services, Insurance and re-insurance, Supplies made by writers, composers and performing artists, Cultural services, Transport of passengers, Investment gold, Leasing of real estate

6.4. Mandatory IT invoice content

The section below illustrates the minimum legal requirements related to the content of invoices issued according primarily to the indirect tax regulations of Denmark. Please note that other additional content requirements might apply in addition, i.a. of technical character.

General	
Required to mention the word "invoice"	• No, but recommended
Required that the invoice is issued in the language of the country who is entitled to impose the invoice requirements:	• There are no official requirements for the invoice language. Invoices in English or Scandinavian languages are generally accepted by the Danish tax authorities; however, in case of invoices in other

⁵ For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

⁶ Local name Merværdiafgiftsloven (Momsloven)

	languages, the tax authorities have a right to request a translation
Sequential numbering	• Yes, see section 6.2 above
Required to mention copy or duplicate in case a copy is issued	• Recommended
Reference in case of outsourced issuance	• No

Supplier data	
Full legal name of the supplier	• Yes
Allowed to abbreviate or shorten the legal name of the supplier	• Yes, if listed in the trade register
Full address of the supplier in country of establishment	• Yes
Allowed to mention the PO box address instead of the legal address of the supplier	• No
IT identification number/sales tax number from the supplier in the country where the supply takes place for IT purposes	• Yes, if transactions are performed in, or from Denmark, the Danish VAT ID number of the supplier must be mentioned on the invoice
IT identification number of the supplier in the country of establishment	• No
Information (i.e. name, address, IT number) of the fiscal representative of the supplier (if appointed)	• Yes
Legal form of the supplier	• No
Trade register number of the supplier	• Yes, the trade register number is often the same as the VAT registration number. Otherwise both are required
Company Registry data of the supplier (e.g. court registration, address of chamber of commerce)	• No
Place of legal seat of the supplier (Headquarters)	• No
Other supplier data	• No

Customer data	
Full legal name of the customer	• Yes
Allowed to abbreviate or shorten the legal name of the customer	• Yes, if listed in the trade register
Address of the customer in country of establishment	• Yes

Bill-to address when it is different from the registered address of the customer	No
Allowed to address the invoice to a Post Office Box address instead of the legal address of the customer	Yes
IT identification number in the country where the supply takes place for IT purposes in case of domestic supplies (if available)	Yes
IT identification number of the customer in the country of dispatch for invoices issued for exempt export supplies	No. The VAT registration number of the customer must only be stated in case of zero-rated supplies of goods or where the customer is obliged to account for VAT in accordance with the reverse charge mechanism. The requirement does not apply to domestic supplies under the reverse charge mechanism
IT identification number of the customer in another Member than the Member State of dispatch for intra-Community supplies	Yes
Information (i.e. name, address, IT identification number) of the fiscal representative (if customer has appointed a fiscal representative)	Yes
Other customer data	No

Transaction data	
Date of issue	Yes
Date of supply (chargeable event)	Yes, only if it differs from the invoice date
Date of prepayment	No, but recommended
Description of the goods/services	Yes
Quantity of the goods supplied, or the extent of the services supplied	Yes
Purchase order number	No
Shipped from location (for the supply of goods)	- No, but recommended - Especially in case of cross-border transactions
Shipped to location (for the supply of goods)	- No, but recommended - Especially in case of cross-border transactions
Status of the goods (e.g. in bond, in free circulation)	- No, but recommended - Especially in case of cross-border transactions
Incoterms	No, but recommended

	Especially in case of cross-border transactions
Other information on the supplied goods/services required (except in case of intra-Community supply of new means of transport)	No

Financial data	
Taxable base per item (unit price excl. IT)	Yes
Total taxable base per IT rate or exemption	Yes
IT rate applied	Yes
Total IT amount calculated per rate	Yes
Total IT amount payable	Yes
Discounts/rebates if not included in the unit price	Yes
Total gross amount (including IT)	No
Mandatory to mention the total IT amount due in the national currency	Yes
Which other amounts (i.e. none, only the total IT amount) must be mentioned in the national currency of your country	None
Exchange rate (if the invoice is not issued in the local currency)	Yes
Which exchange rate must be applied in order of priority	A Danish VAT invoice may be issued in Danish kroner (DKK) or euros. If another currency is used, the amount of VAT must be converted into Danish kroner, either by using the current exchange rate or the official monthly customs exchange rate published by the Danish tax authorities
Terms of payment	No, but recommended
IBAN and BIC number of supplier	No

Specific references for invoices	
Invoice reference in case of IT exemption or reverse charge	Yes

List the required references in case of exemption or reverse charge	• Reference to relevant provision in the EU-directive or DK VAT Act or other clear indication is required on the invoice • For VAT exemption: "momsfritaget", "0-sats", "zero-rated", "free of VAT". • For reverse charge: "omvendt betalingspligt", "reverse charge". • In addition, the customer's VAT no. must be included on the invoice in case of Danish supplies to EU customers.
Allowed to refer to the appropriate provision in Directive 2006/112/EC for: - "reverse charge" for supplies subject to a reverse charge mechanism; - "supply is taxable in the country of the recipient" for B2B supplies of services; - "exempt intra-Community supply - article 138 VAT Directive"; - "Exempt export - article 146 VAT Directive"; - "simplification for triangular sales - article 141 VAT Directive - " Transfer of own goods- article 17 VAT Directive"?	• Yes
Required to specifically mention 'margin scheme - travel agencies', 'margin scheme - second hands goods', if applicable	• Yes
Reference required if the transaction takes place outside the EU as a result of the Use and enjoyment provisions	• No
Specific other reference required, e.g. in case of barter transaction, prepayments, etc. (not self-billing or special margin schemes)	• No
Specific references required in case invoicing is outsourced	• No
Reference to 'cash accounting scheme' in B2B sales in case the IT is due by the supplier upon receipt of the payment/IT is deductible by the customer upon payment	• No
Other specific requirements/references to be mentioned on an invoice	• Other requirements might be imposed, though this is case, industry, type of tax specific

6.5. Simplified invoice

The Supplier is not always obliged to issue a complete invoice. In certain scenarios, they may be able to issue a so-called simplified invoice.

Simplified invoicing	
Possible to issue simplified invoices for certain supplies	• Yes
Maximum amount for simplified invoices	• DKK 3.000
Other supplies for which a simplified invoice can be issued	• In cases where the company mainly supplies to private customers a simplified invoice may be issued regardless of the amount.
Simplified invoices limited to certain type of supplies	• No
Simplified invoices not allowed for certain transactions	• No
Minimum content requirements on a simplified invoice	• Name and address of your business • CVR no. (business reg. no.) • Sequential number (invoice number) • Date of issue (invoice date) • Quantity and type of goods delivered/extent or type of services performed • Total amount • Amount of VAT (either specified in DDK or EUR or by mentioning that 20% of the total amount is VAT, which corresponds to 25% of the total exclusive of VAT).
Invoices subject to the national invoice requirements (not self-bills)	• Invoices issued by a non-established supplier on which IT is due by the supplier • Invoices issued by an established supplier that are taxable in another country but where IT is due by the customer • Invoices issued by an established supplier that are taxable in our country
(other) Invoices subject to the national invoice requirements (not self-bills)	• No

Pagero Online does not support the creation of simplified invoices as they typically do not correspond to the business requirements of Buyers.

6.6. Rectification document

In Denmark, credit note must be issued as rectification documents. A credit note should include at least the following information:

Specific references for rectification documents	
Must the word "credit note" be mentioned	• No, but recommended
Reference to original invoice required on a credit note	• Yes
Clear indication required that the amount mentioned on the credit note is crediting earlier amount (e.g. minus sign '-')	• No
Reason for credit required	• No, but recommended

Sequential numbering	
Separate sequential credit note numbering required	• No, it is required but not separate from invoice numbering
Allowed to issue one credit note to correct different invoices	• Yes

Pagero Online creates corrective invoices according to the content requirements of the Complete invoice.

6.7. Optional content

This section outlines briefly whether and how the trading parties can provide additional content in the technical e-document format mandated or otherwise prescribed in the specific jurisdiction.

No further requirements.

7. Integrity and Authenticity

Ensuring the integrity of the content, as well as the authenticity of the origin (I&A) of an invoice, is an obligation for both the Supplier and the Recipient.

The purpose of this section is to further clarify the local I&A requirements on B2B invoices, as well as outline whether different requirements apply to B2G invoices. The review is done both from the Supplier's and the Recipient's perspective, as varying rules may apply.

Item	Supplier	Recipient
Whether it is mandatory to ensure I&A in the jurisdiction	• Yes	• Yes
Which methods for ensuing I&A are provisioned for	• Any means Business Controls, EDI, e-signature	• Any means Business Controls, EDI or e-signature Validation accepted
Which requirements apply for I&A methods if ensured by a third-party (outsourcing)	• Explicit agreement required. No content requirements	• An explicit agreement is strongly recommended

7.1. e-Signature

Even where e-signature is not an explicit requirement, Pagero recommends that our customers apply it as, globally, it is the most widely accepted legal means of ensuring I&A for business transactions.

In practical terms, this results in the same evidential position for eDocuments as for paper documents. This unique feature of e-signature provides an exceptional level of legal certainty.

Item	Commentary
e-Signature technical requirements	• QES • AES • Advanced electronic seal
Automated e-signing	• No explicit requirements
Time-stamping of e-signature	• No explicit requirements

7.2. e-Signature validation

The Recipient of an invoice is often required by law or practice to validate the e-signature on the received invoice. Even for countries where the validation-upon-receipt is not expressly regulated, this is recommended by Pagero for both trading partners to be able to guarantee I&A.

Item	Commentary
Validation upon receipt	No explicit requirements
Time-stamping of validation data	No explicit requirements

8. Document retention

This section describes archiving requirements regarding the invoicing process and documents handled by Pagero. Please note, additional archiving requirements may apply to your specific documents.

Item	Commentary
Components to be stored (e.g. tax invoice, source documents, audit trail, I&A proof)	• Tax invoices with eSignatures including certificate or other I&A evidence as appropriate
Requirements to present stored documents in a specific audit format	• The public authority may require that stored documents are delivered free of charge in a recognized file format, registrations in foreign currency, including euros, are converted to Danish kroner and that the accounting material, apart from external appendices, is translated into Danish or English free of charge (LAW No. 700 of 24/05/2022, § 22)
Legibility, i.e. the ability to read stored e-documents by an untrained eye	• Required
Legibility requirements	• If the original invoice is in a machine-readable format, the taxable person must offer means to provide human-readability
Retention period for invoices not related to immovable property⁷	• 5 years
Start point of retention period calculation for invoices not related to immovable property	• The start point is beginning of the VAT period (and not the financial year)
Retention period for e- invoices related to immovable property	• 10 years
Start point of retention period calculation for invoices related to immovable property	• At the time of occupancy/commissioning

⁷ Pagero stores all documents for 90 days due to data privacy and security regulations, after which the data is automatically deleted, unless Archive has been selected. Pagero provides long term archiving (for the legally required term, plus one year)

Retention period for other than regular invoices or invoices related to immovable property (if existing)	• N.a.
Start point of retention period calculation for other than regular invoices or invoices related to immovable property	• N.a.
Outsourced archiving	• Allowed
Archiving abroad⁸ and conditions, if any (e.g. notification, derogation, online access, mutual tax assistance treaty)	• Storage abroad is permitted everywhere provided online access and the invoice can be printed without adjustment from the ERP system in Denmark
Other requirements in relation to electronic document retention	• Storage abroad is subject to prior notification to the Danish tax authorities, who must be granted access upon request

⁸ In certain situations or jurisdictions deviating requirements – typically regarding archiving abroad – may apply to invoices and related documents, e.g. concerning matters of defence and national security. Therefore, Pagero encourages customers to inquire for and receive an explicit written statement from the local tax authority stating that the archiving of such documents outside of the taxpayer's country is permitted. Pagero in a capacity of a third-party may not apply for derogations or clarifications of this nature on behalf of a taxpayer.

9. Other transactional documents

Along with invoices, countries may have regulations relating to other trading documents. The purpose of this section is to provide a selective (not exhaustive) overview of the regulation of other transaction-related documents of importance.

Document	Commentary
Purchase order	No explicit requirements
Rectification document	Yes, see section 6.6 above
Payment instruction	No explicit requirements
SAF-T (or alike) reporting	Not required
Transportation documents	No explicit requirements
Other	No explicit requirements

10. Other requirements

This section highlights certain aspects of the local regulations and infrastructure that differ from Pagero's General invoice processing and our standard country compliance investigation.

10.1. E-reporting

The Danish Tax Authorities has determined to use the SAF-T as the standard format for reporting sales registration data to the authorities. This mandate does not apply in general and only to businesses that have been indirectly imposed with the obligation due to reinforced action against undeclared work. From 1 July 2021 the Danish Tax Authorities may order a business to use a digital sales registration system. From 1 July 2024 (extended from 1 January 2024), businesses in certain sectors must also use a digital sales registration system.

The following outlines the general timeline for the new digital accounting requirements:

1 November 2023: Requirements for purpose-built accounting systems will be introduced in new legislation.

1 January 2024: A list of approved standard digital accounting systems will be published.

1 July 2024: Accountable companies (accounting classes B-D) must keep digital accounts.

2026: Personally-owned companies and certain associations must keep digital accounts. For businesses, the exact dates for when they must use digital accounting are not yet known, however, the expected timeline is as follows:

1 July 2024: Accountable companies (accounting classes B –D) that choose to use registered digital standard bookkeeping systems.

1 July 2025: Accountable companies (accounting classes B –D) that choose to use an unregistered accounting system.

1 January 2026: Companies in accounting class A and other companies, associations, etc. covered by the Bookkeeping Act, with a net turnover exceeding DKK 300,000 in two consecutive years, who choose to use registered digital standard bookkeeping systems.

01 July 2026: Companies in accounting class A and other companies, associations, etc. covered by the Bookkeeping Act, with a net turnover exceeding DKK 300,000 for two consecutive years, that choose to use an unregistered bookkeeping system.

* These requirements are expected to apply to the financial year immediately following the dates mentioned. Entry into force 01.07.2024 means, for example, that the requirement for companies with calendar financial statements applies from and including the financial year 2025.

Scope

Effects all businesses possessing a Danish VAT ID and is supplying goods or services comprised by the VAT Act.

Registration threshold

Effects all businesses possessing a Danish VAT ID and is supplying goods or services comprised by the VAT Act.

Summary of the types of data to be reported

If the authorities decides to do an IT based audit, the authorities can ask for all relevant electronic information from the company. This could include sales, purchases, general ledger or other accounting books, inventory data etc.

Submission process

Electronic upload of data to the Tax Authorities - but no specific form is requested as long as GDPR requirements are met.

E-Reporting file format XML

Submission frequency

Upon request - usually 30 to 45 days notice is given.

Implementation date

The exact dates for the obligation for businesses to use digital accounting are not yet known, however, the expected timeline is as follows:

1 July 2024: Accountable companies (accounting classes B –D) that choose to use registered digital standard bookkeeping systems.

1 July 2025: Accountable companies (accounting classes B –D) that choose to use an unregistered accounting system.

1 January 2026: Companies in accounting class A and other companies, associations, etc. covered by the Bookkeeping Act, with a net turnover exceeding DKK 300,000 in two consecutive years, who choose to use registered digital standard bookkeeping systems.
01 July 2026: Companies in accounting class A and other companies, associations, etc.

covered by the Bookkeeping Act, with a net turnover exceeding DKK 300,000 for two consecutive years, that choose to use an unregistered bookkeeping system.

* These requirements are expected to apply to the financial year immediately following the dates mentioned. Entry into force 01.07.2024 means, for example, that the requirement for companies with calendar financial statements applies from and including the financial year 2025.

The penalties for not complying with the Bookkeeping Act can vary depending on the scale of the infringement:

- For businesses with a net turnover < DKK 10 million:
 - Minor infringement: DKK 10,000 - DKK 25,000
 - More extensive infringement: DKK 25,000 - DKK 100,000
 - Increased penalty: DKK 100,000 - DKK 250,000
- For businesses with a net turnover between DKK 10 million - DKK 100 million:
 - Minor infringement: DKK 25,000 - DKK 100,000
 - More extensive infringement: DKK 100,000 - DKK 250,000
 - Increased penalty: DKK 250,000 - DKK 1,000,000
- For businesses with a net turnover >DKK 100 million:
 - Minor infringement: DKK 100,000 - DKK 250,000
 - More extensive infringement: DKK 250,000 - DKK 1,000,000
 - Increased penalty: DKK 1,000,000 - DKK 1,500,000

10.2. Public procurement

In Denmark, public authorities must meet the following requirements

- Be affiliated with the Peppol network
- Be able to receive and handle a Peppol e-invoice
- Be registered in the NHR as recipients of Peppol e-invoice
- Comply with the current Danish CIUS, which is released on the Danish Business Authority's website for NemHandel
- Comply with OIORASP when sending and receiving OIOUBL documents
- Be registered in the NHR as recipients of selected OIOUBL documents (e-invoice, credit note, and reminders, and be able to send a business receipt
- Public sector entities must be registered in NHR SMP, but private sector entities may be registered in whichever SMP they prefer

A short introduction to NemHandel

Overall, NemHandel consists of:

- A legal framework in the form of some executive orders and technical standards
- A common infrastructure in the form of Internet-based services operated and paid for by the state. This infrastructure is complemented by commercial services

- Some software components in the form of libraries and applications help accelerate the spread of NemHandel. These components are all released under open source licenses

In the NemHandel infrastructure, business documents are sent directly to the business recipient or a party acting on behalf of the business recipient. The prerequisite for this to be possible is that the sender can look up in a register where one can find the OIORASP based NemHandel endpoint to which the document must be sent. This is done through the NHR and the NHR Website.

All public authorities must be able to receive e-invoices and must be registered in the NHR and hence accede to accept the General Terms of use of NemHandel.

The NemHandel infrastructure can be used for the exchange of Business Documents

- I. between public authorities (G2G),
- II. between companies and public authorities (B2G),
- III. and between companies B2B

10.3. Indirect Tax

VAT Return

Entities report VAT in a VAT return.

Periodic returns

A Danish taxable person whose turnover exceeds DKK 50 million must submit VAT returns on a monthly basis. A taxable person with a turnover of between DKK 5 million and DKK 50 million generally submits returns on a quarterly basis (monthly returns are optional). A taxable person with turnover of less than DKK 5 million must submit returns on a half-yearly basis.

Monthly VAT returns are due by the 25th day of the month following the return period. Quarterly VAT returns are due by the first day of the third month following the end of the return period. Half-yearly VAT returns are due by the first day of the third month following the end of the return period., if any.

A summer VAT relief scheme allows filing for the June period to be made by 17 August.

Periodic payments

Returns must be completed, and liabilities must be paid in Danish kroner (DKK). Payment is made by transferring the payable amount to the bank account of the tax authorities with reference to the VAT registration number of the company. Please note that payment should not be made earlier than five days prior to the deadline, as the tax authorities may

refund the amount in this case. Payment may be made by a direct bank transfer, by direct debit or by credit card payment. Payment by cash or cheque is not allowed in Denmark.

Electronic filing

Electronic filing is mandatory in Denmark. It is compulsory for all taxable persons to submit VAT returns online, using the Danish tax authorities' website, www.skat.dk.

10.4. NemHandelsRegisteret (NHR)

Suppliers

If suppliers want to receive invoices, orders, electronic catalogues or business receipts, they must be registered in NemHandel's registry, so that their trading partners can see the information required to set the supplier up as a recipient.

The NHR contains information about recipients CVR number, EAN number, and which electronic trading documents they can send and receive.

If the supplier only wants to send invoices and credit notes in the OIOUBL format to public authorities, they do not need to register.

Public administrations

A NHR, in which all users of NemHandel must register which NemHandel business documents they are capable of receiving and sending – e.g. orders and invoices. All public authorities must be registered in this register by May 1st, 2011.

The Danish Business Authority is working on extending the implementation and support for PEPPOL in Denmark. The NHR is now extended with PEPPOL eDelivery support (Service Metadata Service SMP) integrated with the European Service Metadata Locator (SML) register. This initiative will make it easier for the growing number of PEPPOL enabled eInvoicing service providers and end-users to adopt PEPPOL services in Denmark.

10.5. PEPPOL in Denmark

PEPPOL CIUS - the European standard

- From April 18, 2019, state authorities must be able to receive e-invoices in accordance with the European standard.
- From 18 April 2020, all public authorities must be able to receive e-invoices in accordance with the European standard.

The European standard for e-Invoicing has been implemented in Denmark as PEPPOL e-invoices. PEPPOL is integrated into NemHandel and consists of both document specifications that comply with the European standard and of a European network for the transmission of the electronic transaction documents.

Public Authorities must be connected to PEPPOL eDelivery Network via a certified OpenPEPPOL access point. Through OpenPEPPOL's infrastructure, public authorities and institutions must be able to receive electronic invoices and reminders and be able to send receipt messages (Message Level Response).

The Danish Business Authority (ERST) has the role of PEPPOL, which means that ERST is responsible for the registration of companies that wish to become an Access Point (AP) or a Service Metadata Publisher (SMP). ERST is also responsible for reporting, securing Denmark's national interests, aligning overarching interests in the e-business space with other agencies, quality assurance of the operators' services and ensuring the long-term adoption of e-procurement using the PEPPOL network as the platform.

PEPPOL e-invoices and the PEPPOL network can also be used when businesses trade with each other (B2B) and not only with the public sector (B2G).

10.6. Danish CIUS

The Danish CIUS "builds on top of" PEPPOL CIUS and can therefore not be considered in isolation but will describe further restrictions or guidance for those parties who wish to send electronic invoices in accordance with the European standard to Danish authorities or companies that are registered as recipients. Thereof. Please note that only Danish companies will be covered by the requirements of a Danish CIUS.

The aim of the Danish CIUS is to support the processing and handling of electronic invoices as it is in Denmark today, but with so few additional restrictions on the PEPPOL BIS Billing documents as possible.

10.7. OIOUBL 2.1

On 15 May 2022, Denmark implemented OIOUBL version 2.1 and Schematron version 1.12. The functionality to use digital sustainability labels and other product certificates is now in effect. This provides an additional opportunity for companies to showcase the sale of sustainability-labeled products.

From the perspective of both public and private purchasers, this also provides useful data used to measure whether they meet internal and/or external targets regarding the purchase of sustainable products.

The update also addressed several minor and major bugs with the previous version of the OIOUBL Schematrons, as well as ensuring support for UBL 2.1. This makes certain that the new OIOUBL standard converges with current Peppol document standards.

11. Country-specific processing

This section outlines how the Pagero General eInvoicing process has been adapted to the local requirements to ensure compliant local processing.

11.1. Document issuance (AR) with Pagero

B2B document issuance

- (1) PAGERO ensures that documents can be exchanged with your company and your suppliers and customers, from your company perspective in a single format to ensure 100% digital AR and AP processing, while on the other hand in the preferred format and exchange mechanism with your trading partners
- (2) PAGERO ensures the country-specific document content, document integrity and authenticity, as well as archiving requirements
- (3) PAGERO supports unlimited number of document formats and multiple exchange mechanisms
- (4) PAGERO supports such exchange channels as: Interoperability, Peppol, EDI, portal, e-mail, capturing / scanning, etc.

B2G document issuance

- 1) Supplier provides data in supplier preferred format to PAGERO
- 2) PAGERO performs i.a.
 - I. content validation,
 - II. content enrichment and conversion,
 - III. document format conversion,
 - IV. applies e-signatures, etc.
- 3) PAGERO returns the finalized e-invoice to the supplier
- 4) PAGERO sends the final e-document to the buying public entity via Peppol or NemHandel.
- 5) RSP/buyer sends the received e-document to the buyer in buyer format
- 6) -8) Return communication from the buyer to the supplier, i.a. receipt acknowledgement, document approval or rejection, which is optional in Denmark
- 7) 9) PAGERO archives all relevant document on behalf of the supplier

11.2. Document reception (AP) with Pagero

- 1) Supplier provides data in supplier preferred format to the sending service provider (SSP)

- 2) SSP/supplier sends the final e-document to PAGERO in a legally predefined format and according to a legally predefined exchange protocol
- 3) PAGERO performs i.a.
 - I. content validation,
 - II. content enrichment and conversion,
 - III. format conversion,
 - IV. applies e-signature validations, etc.
- 4) PAGERO sends the received e-document to the buyer in buyer format
- 5) -7) Return communication from the buyer to the supplier, i.a. receipt acknowledgement, document approval or rejection, which could be optional or mandatory
- 8) PAGERO archives all relevant document on behalf of the buyer

12. Closing statements

12.1. Confidentiality

This General invoice processing description of Pagero Online, our Country Compliance Reports, and other documents provided by Pagero are of confidential nature and are only intended for and may only be used by Pagero's Customers, their employees or other authorized recipients for the purpose or purposes specified and agreed to between the parties. Descriptions, reports, and documentation may not – neither in full nor in parts – be copied or otherwise distributed to third parties without Pagero's prior written consent.

12.2. Disclaimer

In order to establish a relationship based on trust and transparency with our Customers, Pagero provides its General e-Invoice and eArchiving processing descriptions of Pagero Online as well as Pagero's Country Compliance Reports. These documents are intended to enable our Customers and their tax advisors to assess how Pagero has interpreted the relevant legislation and implemented it in our processes in order to support our Customers to fulfil their legal obligations.

We would like to remind our Customers that, according to tax and accounting regulations, the outsourcing of any process to third parties (such as issuance, compiling, processing, receipt, or archiving of e-Invoices), will not lead to a shift of liability, the liability will remain with the Customer. Accordingly, the taxable person always remains responsible towards the local authorities for ensuring their e-Invoice compliance, and for fulfilling accounting and reporting requirements. We want to emphasise this, in the light of that there can be potentially conflicting regulations on regional, national, or international levels.

Pagero endeavours to only include and provide accurate and up to date information. However, Pagero makes no guarantees as to the accuracy of any statement, information or advice provided by Pagero, whether in writing or verbally. The Customer must make an informed decision about whether to adhere to and follow such recommendations or not. The final decision and responsibility regarding tax, accounting, and reporting issues rest with the Customer.

Revision history

Date	What has changed
1 April 2021	Document created
14 December 2021	E-order mandate is cancelled, amendments throughout the document have been made
14 June 2022	New Bookkeeping law, amendments throughout the document have been made
10 August 2022	Document updated
5 September 2022	Amendments in document due to release of OIOUBL version 2.1 and Schematrons version 1.12
9 August 2023	10.1 added E-reporting
