

An aerial photograph of Athens, Greece, at dusk. The Acropolis is visible on a hill in the background, illuminated by warm lights. The city below is a mix of traditional and modern architecture, with many buildings lit up. In the foreground, a large, paved plaza with a patterned design is filled with people walking. To the right, a modern building with a glass facade and a green roof is visible. The sky is a mix of orange and blue, indicating sunset.

Introduction and document purpose

Pagero Group builds the world's largest, open business network – so you can reach any business, anywhere in the world. No matter how many borders your operations may cross or how many systems you are connected to, we take care of the technical and regulatory requirements across your entire order-to-cash, purchase-to-pay and freight processes. We give you data accuracy and security, transparency and real-time visibility – through a single connection.

At Pagero Group, we believe that technology supports sustainability. That's why we are committed to helping businesses become 100% paperless, supporting resource efficiency, transparency and business continuity.

The main purpose of this country compliance report is to provide the reader with an in-depth analysis of the focus country's laws, regulations, and process with regards to e-invoicing and other trade documents. The analysis considers topics such as business requirements before switching to electronic invoices, e-document creation, e-document distribution, integrity and authenticity, and, finally, e-archiving.

This document guides how Pagero solutions support customers in the focus country to meet local regulations and serves as a supplement to Pagero General E-invoicing Process Description.

The information provided by Deloitte which is part of this material was solely prepared as general information. It was prepared to meet with specific requirements and was not prepared for any other purposes or objectives. Changes in conditions over time may affect the contents of the material and its content. We do not express any opinion or conclusion in this material.

1. Terminology

This section outlines general and country-specific terminology for Greece, which will be used throughout the whole document.

Term	Explanation
Accredited Service Provider (ASP)	Accredited Greek service provider that can act as taxpayer's ERP when submitting data for clearance with the myDATA platform
Clearance	Is the generic name for the process performed by the supplier or its service provider when issuing invoices and having them approved / validated by the country-specific mandatory infrastructure in order to ensure that the supplier has issued a legally valid fiscal document
Clearance proof	In Greece consists of the following artefacts: MARK, Authentication String and Unique Document ID
e-Book	is the digital control model in Greece for the transmission of accounting data to the myDATA platform
Economic operator	is any natural or legal person or public entity or association of such persons and / or entities, including temporary business partnerships, which offers to the market the execution of works and / or projects, the supply of products or the provision of services.
EN	European Norm is the standard that must be used within the EU public procurement and is quite an extensive format, that can as well satisfy business-to-business requirements
IAPR	Independent Authority for Public Revenue of Greece, could as well be referred to as AADE
MARK	Unique Invoice Registration Number
myDATA	My Digital Accounting and Tax Application: new electronic platform introduced by IAPR, which will be receiving all the accounting data to hold Invoice and Balance sheet statement
Service Provider (SP)	Any service provider that operates in Greece without requiring separate accreditation and that does not perform clearance operations with the myDATA platform

Synopsis	Aggregated invoice data
----------	-------------------------

2. General overview

This section provides an initial introduction into the local eInvoicing environment within Greece, including the types of local e-invoice regulations, go-to governmental and industry bodies, and whether multiple invoicing regimes, that is, varying regulatory requirements, exist for example by industry, business size, or other defining factors.

Item	Commentary
Authorities and other agencies relevant for e-invoicing	• Ministry of Digital Policy, Telecommunications and Information • Independent Authority of Public Revenues
Main applicable legislation in respect of e-invoice issuance, exchange, reception and retention	• Hellenic Accounting Standards (Law 4308/2014) • Code for the Tax Recording of Transactions (Law 4093/2012) • Circular Pol. 1004/2013 • Circular Pol. 1003/2014 • Decision A.1017 / 2020 (B 457) of the Deputy Minister of Finance on issuance of e-invoices in EN-compliant format • Government Decision No. A. 1035 of 2020.02.20 on Accreditation of ASPs

3. E-Invoice status

When considering sending or receiving e-invoices two basic questions should be considered: is invoice equal to paper invoice from the legal perspective; and if there are any situations where e-Invoicing is mandatory for reception or transmission.

Item	Commentary
E-invoice status	• Allowed
Varying invoicing regimes¹	• Different regimes apply to B2B and B2G invoicing
e-Invoicing model	• Clearance or post-audit for B2B transactions • Peppol or post-audit for B2G transactions
e-Invoice definition²	• e-Invoice is an invoice that contains the information required (i.e. the general content of the invoice) in the Hellenic Accounting Standards Law (Law 4308/2014) and has been issued and received in an electronic format • From B2G perspective, the e-invoice must be issued in an EN compliant format
Scope of taxpayers the e-document mandate applies to	• Mandatory for issuing: B2G: ○ Contracting suppliers use the Services of an Electronic Data Issuance Provider and have submitted the "Declaration of Exclusive Issuance of Data through a Provider" to the Tax Administration (A.1258/23.11.20 and A.1138/12.6. 2020). ○ Foreign suppliers (regardless of the obligation to appoint a Tax Representative). • Mandatory for receiving: B2G: All contracting authorities B2B: Buyer's consent required

¹ It is possible that a business is required to send e-invoice in some scenarios, and send voluntarily in others

² Differing definitions may exist between different levels of government, or differing legislation, i.e. accounting law and IT law

Mandatory AoR (document response) process	• No explicit requirements
Implementation / roll-out plan	• B2G mandate will cover major public authorities by the mid of 2024, starting from 12 September 2023. ○ 12 September 2023: Economic operators must submit e-invoices that are in accordance with the European standard from ○ 1 January 2024 - Obligation for all contracts with all central government agencies. ○ 1 June 2024 - Obligation for contracts with other government authorities. ○ 1 January 2025 - The mandate will cover all other expenses incurred by the government.

4. Before switching to e-invoices

4.1. IT³ registration

The following thresholds apply to the requirement to be registered for an IT number in Greece:

- Exemption for small businesses – EUR 10.000
- Application of the special scheme for acquisitions by taxable persons not entitled to deduct input tax and by non-taxable legal persons – EUR 10.000
- Application of the special scheme for distance selling – EUR 35.000

Please note that the thresholds stated above are not an exhaustive list of circumstances requiring local IT registration.

Greece IT number format: EL + 9 digits, i.e., EL 1 2 3 4 5 6 7 8 9.

4.2. Process to switch to e-Invoicing

Even though many countries encourage or even mandate e-Invoicing, there may be specific requirements on the Trading parties – typically the Supplier – before starting an e-Invoicing program. This section provides a brief overview of such requirements.

Item	Commentary
Actions towards authorities, required in order to enable electronic processing instead of conventional processing	• If clearance via ERP and distribution and SP: no explicit requirements • If clearance and distribution via ASP: Declare for the IAPR, which ASP will be used for e-invoice clearance process
Actions between the trading partners, e.g. customer acceptance, agreement, etc.	• If clearance via ERP and distribution SP: buyer's acceptance for e-invoice is required. Can be tacit • If clearance and distribution via ASP: If the supplier follows the e-invoicing

³ For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

	regulations and issues e-invoices via a service provider, it is required to deliver at least the e-invoice in EN-compliant format. The buyer or receiver is responsible to determine the method to receive e-invoices and/or whether a human-readable presentation should as well be provided
Transition period from the moment of starting e-invoicing during which, e.g. parallel invoicing may be allowed	• No explicit requirements

4.3. Outsourcing invoice issuance function

Many companies decide to outsource the issuance process of e-invoicing to third parties who have the necessary infrastructure and knowledge of implementing and executing e-Invoicing. This may be driven by a technical limitation or local regulatory requirements. However, before doing so, it is highly recommended that a supplier investigates whether such outsourcing is permissible and whether any requirements must be fulfilled.

Item	Commentary
Whether outsourcing of invoice issuance (creation) is allowed or not	• Allowed
Whether statement of outsourced issuance is required on the invoice	• SP: not required • ASP: required – name and the website
Whether outsourcing agreement is required between the taxpayer and the third-party is performing actions on its behalf	• SP: not explicitly regulated, but recommended • ASP: required
Content and formality requirements to the Outsourcing agreement between the taxpayer and the third-party	• SP: no explicit regulations • ASP: according to IAPR guidelines
Whether any notifications to or derogations from authorities are required in the specific jurisdiction for outsourced issuance	• The taxpayer must declare for the AIPR, which ASP will be used for e-invoice clearance process • ASP must confirm this declaration.
Whether, and which, requirements exist to the outsourced party to be able to act on behalf of the taxpayer	• SP: no explicit requirements • ASP: accreditation by the Accreditation Commission, fulfilling i.a. the following: ◦ Established or active through a permanent establishment in Greece ◦ Have the appropriate technical staff available with an adequate service network ◦ Have a recorded and documented security policy data maintenance. The security policy is ISO 27001 certified • Fulfill the financial stability requirements: Proof of tax information, Certificate of

	non-debt of insurance contributions, Certificate for non-lodging of an application of the supply, Certificate of non-bankruptcy, Certificate of non-liquidation.
--	--

4.4. Outsourcing invoice receipt function

Due to the unique nature of the AP process, it may be required for the buyer (invoice receiver) to have an explicit agreement, or other permissions to be put in place for Service Providers to conduct invoice receiving functions on behalf of them.

Greece has no explicit requirements on the outsourcing of the function of receiving invoices (similar to the function to issue invoices as outlined above).

5. Document processing

5.1. Format and other technical requirements

Globally, a multitude of e-Invoicing formats and infrastructures exist. Local regulators often offer or mandate the use of certain formats, standards, or platforms for the transmission or delivery of invoices or other tax-related documents. Pagero has the technical depth and experience to support country-specific technical requirements globally.

Item	B2G	B2B
Mandated document format(s) for exchange with mandated Gov platform(s) and/or between the trading parties	• For B2G exchange: EN compliant format, Peppol Bis 3.0 GR CIUS	• For clearance with myDATA: UBL 2.1 GR • For B2B exchange: ○ If via ASP: UBL 2.1 ○ If other: not regulated
Other document format(s) commonly used for exchange between trading parties	• XML, UBL, Peppol Bis, PDF, paper	
Mandated platform(s) required to have connection with for e-document processing	• For B2G exchange: Peppol	• For clearance: myDATA • For B2B exchange: not regulated
Other platform(s) relevant for e-document processing	• N.a.	
Schematron(s), XSD schema or other official mechanisms ensuring document content	• For B2G exchange: Peppol schematron	• For clearance: myDATA XSD • For B2B exchange: not applicable
Routing ID's / codes or other identifiers used in the jurisdiction for counter-party	• For B2G exchange: Peppol ID	• For clearance: not • For B2B exchange: not applicable

identification and document exchange	
Other technical aspects	• N.a.

5.2. Communication and distribution between taxpayers

Regulations in Greece foresee the following options on how e-documents can be communicated with the mandatory infrastructure(s):

Communication options	Commentary
Automated	• No explicit requirements
Manual	• E-mail, web portal
Other options	• N.a.

5.3. Issuance and clearance process⁴

This section describes the document issuance and clearance process from the supplier perspective.

5.3.1. Domestic documents

This section describes the process for documents created to be transmitted within the given country.

It is voluntary to exchange e-invoices in Greece. Post-audit model applies in this respect.

5.3.2. Cross-Border

This section describes the requirements for cross-border outbound documents such as sales invoices.

There are no explicit requirements in this respect.

5.4. Reception and validation process

This section describes the document reception, validation and acceptance processes from the buyer perspective.

5.4.1. Domestic documents

This section describes the process for documents received for purchases or transactions within the given country.

⁴ This section is described from e-invoice distribution perspective, as in Greece, the clearance aspect resides with the accounting data being reported to myDATA either via ERP or ASP.

Based on the currently published regulations, there is no obligation for the buyer or recipient to validate the received invoice per se.

5.4.2. Cross-Border

This section describes the requirements for cross-border inbound documents such as purchase invoices.

There are no explicit requirements in this respect.

5.5. AoR (response) process

There are no explicit requirements in this respect.

5.6. HUB validations

Some tax regimes require businesses to send tax documents to a predetermined hub either before, shortly after issuing invoices. Generally, a hub that requires this will send a reply to the issuer. This reply can be expressed as a clearance/ approval response, rejection, semi approved, etc.

There are no explicit requirements in this respect.

5.7. Invoice presentation / copy

Some regimes require a visual presentation of the invoice file to be transmitted along with the structured invoice file. This section describes if there is any regulation concerning visual or image-based presentations of invoices as a copy for the original or vice versa.

In Greece, an invoice presentation, e.g. PDF, should include a QR code, if the invoice has been cleared via ASP. Otherwise, this requirement does not apply. Further, it is recommended to mark such presentation as a copy if the EN-compatible e-invoice is as well exchanged between the trading parties.

To distinguish duplicate invoices from originals, the following wording must be used:

Issuing a PDF Presentation (a human-readable duplicate) when Tax invoices are issued in machine-readable format files can be confusing. To ensure the correct management of original documents, in addition to technical controls, Pagero Online adds "Copy Tax Invoice" on PDF Presentations where Tax invoices have been issued as machine-readable format files.

5.8. Distribution between taxpayers

This section explains how and if trading parties can send invoices between each other. In some cases, hubs also distribute the tax document to the buyer.

The requirements to the exchanged invoice differ, depending on how the invoice and related accounting data has been reported to the myDATA platform. These requirements can be summarised in two different groups.

Additional invoice content requirements, depending on clearance channel:

1. If the invoice was submitted for clearance via ERP:
 - 1.1. Document ID
 - 1.2. Authentication Code
 - 1.3. MARK
2. If the invoice was submitted for clearance via ASP:
 - 2.1. Document ID
 - 2.2. Authentication Code
 - 2.3. MARK
 - 2.4. QR code (directing to SP website upon scanning, to check authenticity of the invoice)
 - 2.5. Service Provider Name
 - 2.6. Service Provider Website URL

Requirements on the format of the distributed invoice, depending on clearance channel:

1. If the invoice was submitted for clearance via ERP:
 - 1.1. No explicit requirements to the format of the exchanged invoice
2. If the invoice was submitted for clearance via ASP:
 - 2.1. Invoice must be exchanged in UBL 2.1 GR, and
 - 2.2. Human-readable rendition must be ensured, e.g. PDF or XML reader

5.9. Rectification process

This section will express the process that needs to be taken when there is an error in an invoice, how it is to be handled, and corrected by both buyer, seller, and if a notification needs to be delivered to the tax authority.

In Greece, credit or debit note must be issued in order to amend the originally issued document.

A credit / debit note shall include the change which has been done in comparison with the original invoice, typically it should be the total amount according to the Tax invoice, the change of the amount.

A credit / debit note shall as well include a clear reference to the initial invoice, which typically shall be its unique identification number. Further information can be found in the [section 6.6](#).

5.10. Coexistence of paper and electronic invoices

Item	Commentary
Whether parallel invoicing (issuance and exchange of the same document in several formats, e.g. electronically and on paper) is allowed and/or whether there are any regulations surrounding it	No explicit requirements
Whether the jurisdiction allows for document (e.g. invoice) dematerialization, i.e. destruction of the original paper invoice, for processing and/or archiving	- Allowed - Loosely regulated, it is therefore strongly advised to maintain the original document
Whether any conditions apply, and which, to the dematerialisation	No explicit requirements
Whether the jurisdiction allows for document (e.g. invoice) materialization, i.e. destruction of the original electronic document, for processing and/or archiving	- Allowed - Loosely regulated, it is therefore strongly advised to maintain the original document
Whether any conditions apply, and which, to the materialisation	No explicit requirements

5.11. Contingency invoicing

This refers to the process for e-invoicing if any mandatory infrastructure is inaccessible. If temporary measures are available, or allowed, to facilitate invoicing during the downtime.

Interconnectivity issues to the myDATA platform

The Independent Authority for Public Revenue (IAPR) has announced in its latest [Decision A.1090/2022](#) amendments for re-submitting the required data to myDATA platform in case of interconnection failure, including a special deadline.

If a connection loss happens, the liable entity will have to document the outage and transmit the data with the indication "Loss of Connection".

Sending the data must be done as soon as the connectivity issue has been resolved or latest within two days from transmission deadline for each transaction.

At the same time, the liable entity must take all possible actions to avoid further interconnection problems.

As a solution, taxpayers are given an option to send the required data either from the transmission channel of the previous unachieved transmission, via ERP, or the special data entry form if the connectivity issues persist (the latter option is only available for the companies issuing less than 50 invoices).

6. Document content requirements

6.1. Document types

Item	Commentary
Documents mandatory for issuance by supplier	• Invoice, incl.: ○ Invoice / Intra EU deliveries of goods ○ Invoice / Deliveries of goods to third countries ○ Invoice / Sale of goods on behalf of Third parties ○ Invoice of rendered services ○ Invoice of Intra EU rendered services ○ Invoice of rendered services to third countries • Credit Invoice • Self-billed invoice • Simplified invoice
Documents mandatory for issuance by buyer	• N.a.

Item	Commentary
Self-billing allowed	• Yes
Simplified invoice allowed	• Yes • Value of the invoice does not exceed 100 EUR (excl. VAT)

6.2. Document numbering

This section outlines the requirements to the sequential numbering of invoices and, where applicable, other documents.

6.2.1. Document numbering by the taxpayer

Item	Commentary
A sequential number, based on one or more series, which uniquely identifies the invoice	• Yes
Different series of sequential numbers allowed (e.g. a separate sequential numbering for intercompany billings, credit notes, etc.)	• Yes
Allowed to start a new sequential numbering every year	• Yes
Worldwide numbering on legal entity level allowed provided that gaps can be explained	• Yes, but not recommended
Required that the numbers follow the date of issuance (i.e. is it true that an invoice with number 2 cannot have an invoice date older than the invoice with number 1)	• Yes

6.2.2. Additional document numbering

There are no specific requirements in this regard.

6.3. Indirect tax (IT)⁵ rates

This section illustrates the applied IT⁶ rates and provides a non-exhaustive list with examples of goods and/or services that fall within specific IT rates. IT rates that differ between different administrative units are clearly outlined.

VAT rates applied in Greece mainland		
24%	Standard	All other taxable goods and services
13%	Reduced	Hotel accommodation services, infant and children food packaged for retail sale, diapers, child car seats, bicycle helmets
6%	Reduced	Books, newspapers, magazines, and theatre tickets
0%	Zero-rate	Exports of goods outside the EU and related services, intra-Community supplies of goods, services supplied to a taxable person established in and outside the EU under the B2B default rule in the provision of services
	Exempt	Postal services, finance, insurance, certain sales and rental of immovable property under conditions, medical services supplied by public law and other not-for-profit organizations, and health care

⁵ For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

⁶ Local name: Value Added Tax

VAT rates applied in Greece islands (Lesbos, Chios, Samos, Kos, Leros)*		
17%	Standard	All other taxable goods and services
9%	Reduced	Hotel accommodation services
4%	Reduced	Books, newspapers, magazines, and theatre tickets

*As of 1 July 2021, special VAT reduction for these 5 islands is permanent.

6.4. Mandatory IT invoice content

The section below illustrates the minimum legal requirements related to the content of invoices issued according primarily to the indirect tax regulations of Greece. Please note that other additional content requirements might apply in addition, i.a. of technical character.

General	
Required to mention the word "invoice"	No, but recommended
Required that the invoice is issued in the language of the country who is entitled to impose the invoice requirements:	No
Sequential numbering	Yes, see section 6.2. above
Required to mention copy or duplicate in case a copy is issued	Yes
Reference in case of outsourced issuance	No

Supplier data	
Full legal name of the supplier	Yes
Allowed to abbreviate or shorten the legal name of the supplier	Yes, if listed in the trade register
Full address of the supplier in country of establishment	Yes
Allowed to mention the PO box address instead of the legal address of the supplier	No
IT identification number/sales tax number from the supplier in the country where the supply takes place for IT purposes	Yes, if a registration is available in the country of supply
IT identification number of the supplier in the country of establishment	- Yes - The invoice must indicate the TAX/VAT number through which the supplier performed the supply. Greek Tax Identification Number applies for CIT & VAT purposes.
Information (i.e. name, address, IT number) of the fiscal representative of the supplier (if appointed)	Yes

Legal form of the supplier	• Yes
Trade register number of the supplier	• No
Company Registry data of the supplier (e.g. court registration, address of chamber of commerce)	• No • In case of an SA (Societe Anonyme) company, the invoice must make reference to the SA's registration number (Ap.M.AE). This is a company law requirement
Place of legal seat of the supplier (Headquarters)	• Yes • In Greece, usually, the place of legal seat and the full address of the establishment, which is included in the mandatory content of the invoice (article 9 par. 1 (e) of Law 4308/2014), are the same
Other supplier data	• General tax number • In case of a Greek established company or the Greek branch of an overseas company, the tax registration number is unique and is used for income tax and VAT purposes. In case of an overseas entity which is merely VAT registered in Greece, the VAT number of the entity should be mentioned on the invoice, in case this is different from the tax number used for income tax purposes

Customer data	
Full legal name of the customer	• Yes
Allowed to abbreviate or shorten the legal name of the customer	• Yes, if listed in the trade register
Address of the customer in country of establishment	• Yes
Bill-to address when it is different from the registered address of the customer	• Yes
Allowed to address the invoice to a Post Office Box address instead of the legal address of the customer	• Yes, provided that the legal address is also mentioned and clearly indicated
IT identification number in the country where the supply takes place for IT purposes in case of domestic supplies (if available)	• Yes
IT identification number of the customer in the country of dispatch for invoices issued for exempt export supplies	• Yes, if available
IT identification number of the customer in another Member than the Member State of dispatch for intra-Community supplies	• Yes

Information (i.e. name, address, IT identification number) of the fiscal representative (if customer has appointed a fiscal representative)	• Yes
Other customer data	• No

Transaction data	
Date of issue	• Yes
Date of supply (chargeable event)	• Only if it differs from the invoice date
Date of prepayment	• No
Description of the goods/services	• Yes
Quantity of the goods supplied or the extent of the services supplied	• Yes, this is necessary for each description
Purchase order number	• No
Shipped from location (for the supply of goods)	• No, but recommended
Shipped to location (for the supply of goods)	• No, but recommended
Status of the goods (e.g. in bond, in free circulation)	• No, but recommended
Incoterms	• No, but recommended
Other information on the supplied goods/services required (except in case of intra-Community supply of new means of transport)	• No

Financial data	
Taxable base per item (unit price excl. IT)	• Yes
Total taxable base per IT rate or exemption	• Yes
IT rate applied	• Yes
Total IT amount calculated per rate	• Yes
Total IT amount payable	• Yes
Discounts/rebates if not included in the unit price	• Yes
Total gross amount (including IT)	• No, but recommended
Mandatory to mention the total IT amount due in the national currency	• Yes • The VAT amount should always be in local currency. Foreign currencies may be used for the net taxable amounts in cases of transactions with other countries (Reference is made in article 9 par. 1 cases (η), (θ) & (ι) & par.2 of Law 4308/2014 &

	Article 9 par. 9.2.1 of Interpretative Circular Pol. 1003/2014)
Which other amounts (i.e. none, only the total IT amount) must be mentioned in the national currency of your country	• None
Exchange rate (if the invoice is not issued in the local currency)	• No
Which exchange rate must be applied in order of priority	• The official selling price included in the ECB Euro Foreign Exchange Reference Rates published by the Bank of Greece on the second-last Wednesday of the previous month or • In case the exchange rates cannot be defined, the price depicting more accurately the current value of the foreign currency is used
Terms of payment	• No, this is optional
IBAN and BIC number of supplier	• No, this is optional

Specific references for invoices	
Invoice reference in case of IT exemption or reverse charge	• Yes
List the required references in case of exemption or reverse charge	• In case of reverse charge in B2B intra-community supply: VAT payable at the country of the recipient, Reverse Charge - Article 14 par. 2 (a) of the Greek VAT Code, Law 2859/2000 • In case of a VAT exemption, this depends on the type of the VAT exemption that applies in each case. For instance, this could indicatively be as following: ○ For intra-community supplies: Exempt from VAT - Article 28 of the Greek VAT Code, Law 2859/2000". ○ For exports: VAT exempt pursuant to Article 24 of the Greek VAT Code Law 2859/2000". • Each case should be further checked ad hoc
Allowed to refer to the appropriate provision in Directive 2006/112/EC for: - "reverse charge" for supplies subject to a reverse charge mechanism; - "supply is taxable in the country of the recipient" for B2B supplies of services; - "exempt intra-Community supply - article 138 VAT Directive"; - "Exempt export - article 146 VAT Directive"; - "simplification for	• Yes

triangular sales - article 141 VAT Directive - " Transfer of own goods- article 17 VAT Directive"?	
Required to specifically mention 'margin scheme - travel agencies', 'margin scheme - second hands goods', if applicable	• Yes
Reference required if the transaction takes place outside the EU as a result of the Use and enjoyment provisions	• Yes
Specific other reference required, e.g. in case of barter transaction, prepayments, etc. (not self-billing or special margin schemes)	• No; prepayments should be viewed on an ad hoc basis depending on the case
Specific references required in case invoicing is outsourced	• Yes. • In case of assignment of invoicing, both the details of the supplier and the issuer should be mentioned in the invoice. • In case of self-billing, the term "Self-billing" should be mentioned in the invoice
Reference to 'cash accounting scheme' in B2B sales in case the IT is due by the supplier upon receipt of the payment/IT is deductible by the customer upon payment	• Yes, the following reference should be included in the invoice: "Special regime for VAT remittance upon collection of consideration, article 226.7 a of the EU VAT Directive 2006/112/EC- art.39B of VAT Code"
Other specific requirements/references to be mentioned on an invoice	• Yes, depending on the case • For instance, for sales to private individuals, retail sales receipts are issued, not invoices • A retail tax record must include the following indications: ○ date of issuance ○ the serial number for one or more series of retail tax records that characterize the said record in a unique manner ○ the TAX/VAT number of the supplier of goods or services, d) the full name & address of the supplier of goods or services ○ the VAT rate applicable and the gross sale's value to which it refers (article 12 par. 1 & 2 of Law 4308/2014)

6.5. Simplified invoice

The Supplier is not always obliged to issue a complete invoice. In certain scenarios, they may be able to issue a so-called simplified invoice.

Simplified invoicing	
Possible to issue simplified invoices for certain supplies	Yes
Maximum amount for simplified invoices	EUR 100,00
Other supplies for which a simplified invoice can be issued	When the tax record issued is a corrective or amending invoice that refers specifically and undoubtedly to an initial invoice (article 8 par. 3 of Law 4308/2014)
Simplified invoices limited to certain type of supplies	No
Simplified invoices not allowed for certain transactions	No
Minimum content requirements on a simplified invoice	- The date of issuance of the invoice - Identification of the supplier of goods or services - Identification of the type of goods or services supplied - The VAT amount due and the necessary information for its calculation - In case of issuance of an amending invoice, reference to the initial invoice and the specific indication (data) that are being amended (article 10 par. 2 of Law 4308/2014)
Invoices subject to the national invoice requirements (not self-bills)	- Invoices issued by an established supplier that are taxable in another country but where VAT is due by the customer - Invoices issued by an established supplier that are taxable in another country but where VAT is due by the supplier - Invoices issued by an established supplier that are taxable in our country
(other) Invoices subject to the national invoice requirements (not self-bills)	No

Pagero Online **does not** support the creation of simplified invoices as they typically do not correspond to the business requirements of Buyers.

6.6. Rectification document

In Greece, a credit note must be issued as rectification documents. The credit note should include at least the following information:

Specific references for rectification documents	
Must the word "credit note" be mentioned	No, but recommended
Reference to original invoice required on a credit note	Invoice number and date
Clear indication required that the amount mentioned on the credit note is crediting earlier amount (e.g. minus sign '-')	No
Reason for credit required	No, but recommended

Sequential numbering	
Separate sequential credit note numbering required	Yes
Allowed to issue one credit note to correct different invoices	- Yes - No specific restriction exists in the law; in case the reference is made to the initial invoices so that they can be matched with the credit invoice, the reason for correction is described and the necessary details are included

Pagero Online creates corrective invoices according to the content requirements of the Complete invoice.

6.7. Optional content

Provision of any additional content in the mandatory e-invoice format is not regulated.

7. Integrity and Authenticity

Ensuring the integrity of the content, as well as the authenticity of the origin (I&A) of an invoice, is an obligation for both the Supplier and the Recipient.

The purpose of this section is to further clarify the local I&A requirements on B2B invoices, as well as outline whether different requirements apply to B2G invoices. The review is done both from the Supplier’s and the Recipient’s perspective, as varying rules may apply.

Item	Supplier	Recipient
Whether it is mandatory to ensure I&A in the jurisdiction	• Yes	• Yes
Which methods for ensuing I&A are provisioned for	• Any means: Business Controls, AES validation or EDI	• Any means: Business Controls, AES validation or EDI
Which requirements apply for I&A methods if ensured by a third-party (outsourcing)	• No explicit requirements	• No explicit requirements

7.1.e-Signature

Even where e-signature is not an explicit requirement, Pagero recommends that our customers apply it as, globally, it is the most widely accepted legal means of ensuring I&A for business transactions.

In practical terms, this results in the same evidential position for eDocuments as for paper documents. This unique feature of e-signature provides an exceptional level of legal certainty.

Item	Commentary
e-Signature technical requirements	• QES • AES • Advanced electronic seal

Automated e-signing	• No explicit requirements
Time-stamping of e-signature	• No explicit requirements

7.2. e-Signature validation

The Recipient of an invoice is often required by law or practice to validate the e-signature on the received invoice. Even for countries where the validation-upon-receipt is not expressly regulated, this is recommended by Pagero for both trading partners to be able to guarantee I&A.

Item	Commentary
Validation upon receipt	• No explicit requirements
Time-stamping of validation data	• No explicit requirements

8. Document retention

This section describes archiving requirements regarding the invoicing process and documents handled by Pagero. Please note, additional archiving requirements may apply to your specific documents.

Item	Commentary
Components to be stored (e.g. tax invoice, source documents, audit trail, I&A proof)	• Tax invoice including Clearance Proof from myDATA and other relevant I&A proof
Requirements to present stored documents in a specific audit format	• No explicit requirements, however maintaining the EN-compliant format is strongly advisable
Legibility, i.e. the ability to read stored e-documents by an untrained eye	• Required
Legibility requirements	• If the original invoice is in machine-readable format, the taxable person must offer means to provide human-readability
Retention period for invoices not related to immovable property⁷	• 5 years • The period above may be materially extended in certain circumstances, which indicatively have as follows: ◦ If a tax return (initial or amending) is filed within the above 5th year of the statute barring period +1 year, ◦ If information has been requested from foreign authorities, for the period until their reply +1 year, ◦ If a non-judicial appeal, judicial instrument or other instrument is filed, until the final decision +1 year ◦ The statute bar limitation in case of “tax evasion” cases is 20-years period from the year-end of the year in which the

⁷ Pagero stores all documents for 90 days due to data privacy and security regulations, after which the data is automatically deleted, unless Archive has been selected. Pagero provides long term archiving (for the legally required term, plus one year)

	respective tax return should had been filed.
Start point of retention period calculation for invoices not related to immovable property	From the end of the respective accounting year within which the tax return filing obligation arose
Retention period for e- invoices related to immovable property	5-10 years (see above)
Start point of retention period calculation for invoices related to immovable property	The storage period for tax records applies the same, regardless of whether we refer to immovable property or not; as regards other legal rights on immovable property, different statute of limitation rules may apply; this is a civil law and property law issue. Each case should be checked ad hoc.
Retention period for other than regular invoices or invoices related to immovable property (if existing):	Same as above
Start point of retention period calculation for other than regular invoices or invoices related to immovable property:	Same as for other invoices (see above)
Outsourced archiving	Not explicitly regulated
Archiving abroad⁸ and conditions, if any (e.g. notification, derogation, online access, mutual tax assistance treaty)	- Within the EU, permitted, provided that a searching, displaying, printing or reproducing system exists, so that they can be furnished within a reasonable time limit to the tax auditors, upon a relevant request - Outside of the EU, permitted, provided an on-line access or a legal instrument relating to mutual assistance exists.
Other requirements in relation to electronic document retention	N.a.

⁸ In certain situations or jurisdictions deviating requirements – typically regarding archiving abroad – may apply to invoices and related documents, e.g. concerning matters of defence and national security. Therefore, Pagero encourages customers to inquire for and receive an explicit written statement from the local tax authority stating that the archiving of such documents outside of the taxpayer's country is permitted. Pagero in a capacity of a third-party may not apply for derogations or clarifications of this nature on behalf of a taxpayer.

9. Other transactional documents

Along with invoices, countries may have regulations relating to other trading documents. The purpose of this section is to provide a selective (not exhaustive) overview of the regulation of other transaction-related documents of importance.

Document	Commentary
Purchase order	• No explicit requirements
Rectification document	• Yes, see section 6.6 above
Payment instruction	• No explicit requirements
SAF-T (or alike) reporting	• Not applicable in Greece
Transportation documents	• No explicit requirements
Other	• No explicit requirements

10. Other requirements

This section highlights certain aspects of the local regulations and infrastructure that differ from Pagero's General invoice processing and our standard country compliance investigation.

10.1. Penalties

No penalties have been enacted so far except for a minor administrative penalty of 100€ for a certain type of infringement. The penalties regime is expected to come into force within the following months.

10.2. E-reporting

By virtue of Decision 1138-2020, as repeatedly amended and currently in force, as from October 2021 onwards, all entities in Greece (with very few exemptions) are liable to the new e-reporting obligations according to which the entities maintain, apart from the statutory books, electronic books (e-books) as well. Said e-books are hosted in a tax authorities platform, the so called "myDATA" platform where invoice and tax receipts data as well as certain other accounting and tax data have to be transmitted.

Scope

Established entities

Registration threshold

No threshold applies

Summary of the types of data to be reported

The data to be transmitted can be classified in three categories mainly as follows:
a) Transmission of a summary of a company's revenue and expense documents including information on counterparties to a transaction, the value of each transaction, applicable taxes, stamp duties, miscellaneous duties and deductions; b) Characterization of recorded transactions, such as classification of expense/revenue transactions related to the purchase/sale of goods, services, fixed assets, etc.; c) Recording of all necessary entries

that do not correlate to any tax document's issuance, e.g. payroll, depreciation, year-end accrued revenues/expenses, provisions, tax adjustments etc. but are necessary so as the annual accounting and tax result to be determined.

Submission process

In order for the data to be transmitted, there are the following five methods provided for transmitting: a)Through e-invoicing, where data of all electronically issued invoices will be transmitted to myDATA platform by a licensed supplier on behalf of each entity b)Through a company's accounting-enterprise resource planning (ERP) software c)Through a special platform on www.aade.gr/myDATA allowing manual uploads (applying mainly to small entities and under certain conditions) d)Through tax machines for retail transactions e)Through an application for the issuance and transmission of tax documents that is accessible through the tax authorities website

E-Reporting file format

Additional information please see above

Submission frequency

There are several deadlines as regards the submission frequency which depend on the type of transmission (e.g. revenues, expenses etc.), the transmission method (e.g. through ERP etc.) and other factors. In brief, some key deadlines are near real time for revenues (i.e. by the end of the following day for invoices issued), by the end of the following month for expenses, on a monthly basis for payroll, on an annual basis for adjusting entries.

Implementation date

From October 2021 onwards.

10.3. Public procurement

Since April 2019, the central public entities in Greece have become obliged to receive invoices in an EN compliant format based on the Directive 2014/55/EU. Since April 2020 the same applies to other contracting entities.

The Greek authorities have completed the development and testing of their own PEPPOL Access Point, meaning that PEPPOL BIS 3.0 will be the mandatory as EN compliant format.

Further developments in this area are expected.

10.3.1. Gradual mandatory e-invoicing implementation for public contracts

Public authorities and entities are required to receive and process e-invoices, and economic operators must submit electronic invoices that are in accordance with the [European standard](#).

This obligation applies to the conclusion and/or execution of contracts by following public authorities and public entities from the specified period:

1. **From 12 September 2023** by the Ministry of Infrastructure and Transport; the Ministry of Digital Governance; the Ministry of Immigration and Asylum; the Municipality of Athens; the National Central Authority for Health Procurement; the Ministry's National Central Procurement Authority of Development and Investments; the Information Society S.A.; the Athens University of Economics; Attiko Metro S.A.; EYDAP S.A.; Egnatia Odos SA.
2. **From 1 January 2024** by bodies of the rest of the Central Administration.
3. **From 1 June 2024** by other contracting authorities/bodies
4. **From 1 January 2025:** other expenses of the General Government.

The obligation to submit e-invoices **does not apply to:**

- Contracts concluded in the fields of defence and security;
- Public contracts and contracts for projects, preparation of studies and provision of technical and other related scientific services, supplies and general services;
- Concession contracts for works and services, as well as rules for the electronic invoices issued for each category of expenditure of the contracting authorities or contracting bodies;
- Low-value public contracts specified [by the law](#);
- Certain public contracts between public sector entities;
- Certain contracts between contracting authorities;
- Certain contracts concession between public sector entities;
- Other expenses, the amount of which is up to EUR 2500,00.

10.4. e-Book scheme

In August 2019, the Greek Independent Authority for Public Revenue (IAPR) announced the launch of the new e-book scheme for the transmission of accounting data to the [myDATA platform](#). IAPR launched a public consultation on myDATA and have continued conducting unofficial discussions with various organisations and associations regarding the exact details of the reporting obligation.

The goal of the IAPR is to use the myDATA platform to create online income and balance sheet statements for all businesses operating in the country, by requesting various types of accounting entries, i.e.:

- Accounting entries to determine annual accounting and tax results
- Summary of revenue and expense documents for tax purposes
- Classification of expense and revenue transactions

Businesses' revenue and expenses will be automatically updated in their e-books on the myDATA platform. All data included in filed tax returns will be cross-checked against the e-book with myDATA.

Liable entities

All entities that are obliged to apply the provisions of the Greek Accounting Standards, are required to report data to IAPR under the e-book scheme, regardless of the type of company.

Reporting methods

IAPR foresees the following methods to report the data to myDATA:

- business management software, such as accounting software or ERP;
- accredited Greek e-invoicing service providers, ASP (Υ.ΠΑ.Η.Ε.Σ);
- myDATA web portal for manual entry by small businesses;
- accredited online cash registers for retail sales transactions.

Taxpayers must select and use only one of the reporting options, meaning that one cannot use one method for reporting of certain types of accounting entries and another method for reporting of other types of entries.

Data to be reported

For the uniform application, in the Annex to the decision A.1138/2020, the IAPR has defined the document types and the data of such documents and accounting entries that must be reported to myDATA platform.

Data to be reported by all liable parties:

- invoices (initial, supplementary and credit) and retail receipts;
- data from documents issued due to special tax provisions, as well as data on collection/payment of rent;
- data of the accounting records that form the accounting and tax base for the determination of their accounting and tax result of each tax year. Accounting records on payroll and depreciation must be distinctively transmitted, while other revenue/expense settlement entries carried out at the end of the period can be transmitted in aggregate.

Data to be reported exclusively by the buyers:

- transactions with a foreign non-liable entity, such as intra-community acquisitions, imports from third countries and receipt of services;
- domestic and foreign retail sales receipts;

- transactions related to the sale of electricity and water;
- transactions with credit institutions;
- documents for the payment of contributions to social security funds;
- transactions that should have been reported by the issuer.

In each revenue and expense transaction report (synopsis), the taxpayer must provide a classification of revenues respecting expenses. Such classification data must be provided for each line entry or at least per VAT type.

Timing for reporting

If the taxpayer has selected reporting option via e-invoicing service provider or ERP, the data must be submitted in real-time prior to data issuance and exchange between the trading parties.

Exceptionally, until the end of 2020, if the reporting method via ERP has been selected, the data can be transmitted within five days of their issuance and in any case not later than the 20th day of the following month in which they were issued.

If the taxpayer transmits the data via myDATA web portal, as well as for the data transmitted in accordance with the self-billing or assignment of billing procedure, the reporting operations shall be carried out by the 20th day of the following month in which they were issued.

Greece is introducing a unique digital tax control model, which does not exist anywhere at the present moment, which we refer to as the e-Book model.

IAPR of Greece have created a central platform called myDATA, the purpose of which is to create and maintain online Income and Balance Sheet statements for all businesses operating in the country, by requesting various types of accounting entries, i.a.:

- Accounting entries to determine annual accounting and tax results
- Summary of revenue and expense documents for tax purposes
- Classification of expense and revenue transactions

Businesses' revenues will be updated in their e-Books on the myDATA platform, as they transmit a summary of all relevant tax documents and entries that they had issued (ex. Invoices and receipts), all while simultaneously updating the receiver's expenses in their e-books on the myDATA platform. All data included in filed tax returns will be cross-checked against the created e-Book with myDATA.

Reporting obligations are not e-invoicing

Simply put, e-invoices are the same as paper invoices except for being issued and exchanged in an electronic format. E-invoices must include data elements according to a jurisdiction's indirect tax regulations. Other regulations, such as commercial, may require provisions of additional data elements in an e-invoice. Finally, e-invoices include relevant

business data that the trading parties may have agreed upon as part of their business processes.

Under the e-book reporting scheme in Greece, both sellers and buyers are required to submit revenue and expense classification for each item on the invoice based on their VAT treatment to the myDATA platform. In other words, they must assign individual revenue and expense classification to each item on an invoice belonging to exempt, 6%, 13%, 24%, etc. VAT treatment. Typically, neither paper nor e-invoices include such information as they are accounting fields.

Provision of such classification entries along with an invoice summary (synopsis) can hardly be considered the same as e-invoicing. This is a reporting obligation, which can be done in multiple ways. Although Greek regulators refer to one reporting mechanism as “e-invoicing,” it actually has nothing to do with e-invoicing.

Exclusivity of the reporting mechanism

As outlined earlier, taxpayers have several mechanisms to select from in order to fulfil reporting obligations. In this respect, it is worth stressing the fact that a taxpayer’s choice has to be exclusive. This means that taxpayers cannot report certain data via ERP or accounting software (e.g. revenues and expenses classification or payroll) while reporting other data via a ASP (e.g. invoice synopsis). Taxpayers must perform all reporting via the same electronic mechanism.

Is there an obligation to issue e-invoices?

In short, no. The e-book reporting regulations only cover the reporting of accounting entries to the myDATA platform. Even if a ASP has been selected to report such entries, the seller is not required to actually exchange the e-invoice with the buyer. The seller also does not have to use the selected ASP to send the e-invoice to the buyer.

Can I issue e-invoices in Greece?

Yes. The new regulations do not change the taxpayers’ ability or obligations to issue or exchange invoices electronically. Further, our understanding is that a Greek taxpayer has two options for issuing and exchanging e-invoices:

- Use services of a locally accredited ASP who may or may not be supporting the taxpayer with myDATA reporting obligations; or
- Use services of any e-invoicing SP preferred by the taxpayer, irrespective of whether the Greek taxpayer uses services of ERP/accounting software or ASP to fulfil the myDATA reporting obligations.

11. Country-specific processing

This section outlines how the Pagero General eInvoicing process has been adapted to the local requirements to ensure compliant local processing.

11.1. E-invoicing with Pagero

B2B issuance (AR) and reception (AP) with Pagero

- 1) PAGERO ensures that documents can be exchanged with your company and your suppliers and customers, from your company perspective in a single format to ensure 100% digital AR processing, while on the other hand in the preferred format and exchange mechanism with your trading partners
- 2) PAGERO ensures the country-specific document content, document integrity and authenticity, as well as archiving requirements
- 3) PAGERO supports unlimited number of document formats and multiple exchange mechanisms
- 4) PAGERO supports such exchange channels as: Interoperability, Peppol, EDI, portal, e-mail, capturing / scanning, etc.

B2G issuance (AR) with Pagero

- 1) Supplier provides data in supplier preferred format to the sending service provider (SSP)
- 2) SSP/supplier sends the final e-document to PAGERO in a legally predefined format and according to a legally predefined exchange protocol
- 3) PAGERO performs i.a. content validation, content enrichment and conversion, format conversion, applies e-signature validations, etc.
- 4) PAGERO sends the received e-document to the buyer in buyer format
- 5) -7) Return communication from the buyer to the supplier, i.a. receipt acknowledgement, document approval or rejection, which could be optional or mandatory
- 8) PAGERO archives all relevant document on behalf of the buyer

12. Closing statements

12.1. Confidentiality

This General invoice processing description of Pagero Online, our Country Compliance Reports, and other documents provided by Pagero are of confidential nature and are only intended for and may only be used by Pagero's Customers, their employees or other authorized recipients for the purpose or purposes specified and agreed to between the parties. Descriptions, reports, and documentation may not – neither in full nor in parts – be copied or otherwise distributed to third parties without Pagero's prior written consent.

12.2. Disclaimer

In order to establish a relationship based on trust and transparency with our Customers, Pagero provides its General e-Invoice and eArchiving processing descriptions of Pagero Online as well as Pagero's Country Compliance Reports. These documents are intended to enable our Customers and their tax advisors to assess how Pagero has interpreted the relevant legislation and implemented it in our processes in order to support our Customers to fulfil their legal obligations.

We would like to remind our Customers that, according to tax and accounting regulations, the outsourcing of any process to third parties (such as issuance, compiling, processing, receipt, or archiving of e-Invoices), will not lead to a shift of liability, the liability will remain with the Customer. Accordingly, the taxable person always remains responsible towards the local authorities for ensuring their e-Invoice compliance, and for fulfilling accounting and reporting requirements. We want to emphasise this, in the light of that there can be potentially conflicting regulations on regional, national, or international levels.

Pagero endeavours to only include and provide accurate and up to date information. However, Pagero makes no guarantees as to the accuracy of any statement, information or advice provided by Pagero, whether in writing or verbally. The Customer must make an informed decision about whether to adhere to and follow such recommendations or not. The final decision and responsibility regarding tax, accounting, and reporting issues rest with the Customer.

Revision history

Date	What has changed
7 July 2020	Changes to myData reporting requirements
26 November 2020	Multiple changes and updates to: • Terminology • Clear distinction of invoicing and reporting models • Significantly updated description of the e-Book model • Differences between ASP and SP • Clearance artefact requirements on invoice Invoice exchange requirements
14 July 2021	Section 6.3: Updated VAT Reduction for 5 Greek Islands to permanent
1 July 2022	Updated section 3 and section 11
2 September 2022	Updated section 5.11
18 April 2023	Added section 10.1.1 Added a new term to the terminology list
24 July 2023	Section 3: Added B2G e-invoice timeline
10 August 2023	Section 10.1: Added penalties Section 10.2: Added e-reporting
