Introduction and document purpose

Pagero Group builds the world's largest, open business network – so you can reach any business, anywhere in the world. No matter how many borders your operations may cross or how many systems you are connected to, we take care of the technical and regulatory requirements across your entire order-to-cash, purchase-to-pay and freight processes. We give you data accuracy and security, transparency and real-time visibility – through a single connection.

At Pagero Group, we believe that technology supports sustainability. That's why we are committed to helping businesses become 100% paperless, supporting resource efficiency, transparency and business continuity.

The main purpose of this country compliance report is to provide the reader with an in-depth analysis of the focus country's laws, regulations, and process with regards to e-invoicing and other trade documents. The analysis considers topics such as business requirements before switching to electronic invoices, e-document creation, e-document distribution, integrity and authenticity, and, finally, e-archiving.

This document guides how Pagero solutions support customers in the focus country to meet local regulations and serves as a supplement to Pagero General E-invoicing Process Description.

The information provided by Deloitte which is part of this material was solely prepared as general information. It was prepared to meet with specific requirements and was not prepared for any other purposes or objectives. Changes in conditions over time may affect the contents of the material and its content. We do not express any opinion or conclusion in this material.

1. Terminology

This section outlines general and country-specific terminology for Sweden, which will be used throughout the whole document.

Term	Explanation
Advanced e-signature (AES)	An e-signature that has met the requirements set forth in the e-IDAS regulation on electronic identification and trust services for electronic transactions in the EU internal market.
eIDAS	Stands for EU Regulation (EU) N°910/2014 on electronic identification and trust services for electronic transactions in the European internal market.
Peppol	The Peppol Network is a logical network enabling secure and reliable exchange of Peppol Dataset Types between End Users via Peppol Service Providers.
Post Audit	The post-audit tax regime allows trading partners to exchange e-documents as well as other transactional documents directly with each other, without any real-time or immediate controls performed by the tax office. Even though e-documents are allowed, there are no provisions as to what format, infrastructure, or how they should be created, issued, or distributed. The main requirements on the taxpayers are to ensure document content, integrity, and authenticity, as well as appropriate archiving. The term post-audit stems from the fact that Tax audits can be performed months or years after the transactions originally took place.
Rectification document	A rectifying invoice is a document that details some corrections in the ordinary invoice or the return of the merchandise. This invoice must be issued in case the original invoice does not comply with the requirements established by the current law
Validation of eSignature	means the process of verifying and confirming that an electronic signature or a seal is valid.

2. General overview

This section provides an initial introduction into the local e-invoicing environment within Sweden, including the types of local e-invoice regulations, go-to governmental and industry bodies, and whether multiple invoicing regimes, that is, varying regulatory requirements, exist for example by industry, business size, or other defining factors.

Item	Commentary
Authorities and other agencies relevant for e-invoicing	• Ministry of Finance (Finansdepartementet) • The Swedish Tax Authority (Skatteverket) • The Swedish Accounting Standards Board (Bokföringsnämnden) • Nätverk för Elektroniska Affärer (NEA) [NGO] • Swedish Association of Local Authorities and Regions (SKR) • Agency for Digital Government - Myndigheten för digital förvaltning (DIGG) • Single Face to Industry (SFTI) • The Swedish National Financial Management Authority (ESV)
Main applicable legislation in respect of e-invoice issuance, exchange, reception and retention	• The VAT Act (1994:200) • Law on Municipal Accounting (1997:614) • The Accounting Act (1999:1078) • Ordinance for accounting (2000:606) • Ordinance for electronic information exchange (2003:770) • Law on Public Procurement (2016: 1145) • Law on Electronic Invoices (2018: 1277)

3. E-Invoice status

When considering sending or receiving e-invoices two basic questions should be considered: is invoice equal to paper invoice from the legal perspective; and if there are any situations where e-Invoicing is mandatory for reception or transmission.

Item	Commentary
E-invoice status	• Allowed
Varying invoicing regimes¹	• B2B: Optional (Post-Audit) • B2G: Mandatory (preferred Peppol)
e-Invoicing model	• Post-Audit
e-Invoice definition²	• An e-invoice is an invoice that is issued, sent, and received in a structured electronic format that makes it possible to process it automatically and electronically.
Scope of taxpayers the e-document mandate applies to	Mandatory for issuance: • E-Invoicing between public authorities • E-orders: all state authorities with more than 50 employees must handle their outgoing orders for goods and services electronically • Supplier e-invoicing applies to all invoices that are the result of purchases in accordance with one of these procurement laws: ◦ LOU (2016: 1145) ◦ LUF (2016: 1146) ◦ LUFS (2011: 1029) ◦ LUK (2016: 1147) Mandatory for receiving and processing: • E-invoices: All public authorities, including municipalities and regions. • E-orders: Suppliers to state authorities with 50 employees or more.

¹ It is possible that a business is required to send e-invoice in some scenarios, and send voluntarily in others

² Differing definitions may exist between different levels of government, or differing legislation, i.e. accounting law and IT law

Mandatory AoR (document response) process	• N.a.
Implementation / roll-out plan	• E-Invoicing with central government agencies has been mandatory since 2008 • Obligatory for all government agencies and their suppliers to send and receive e-invoices starting 1 April 2019.
Exceptions	• When the procurement has begun before 1 April 2019. In those cases, the supplier can continue to send invoices in the format agreed • When payment is made in cash or by debit card. There is no requirement to conduct any additional invoicing obligation for financial services in addition to the provisions of the VAT Act • Invoices containing information that is considered confidential, it is the contracting entity that decides whether there is such a risk for specific invoice flows

4. Before switching to e-invoices

4.1. IT³ registration

The following thresholds apply to the requirement to be registered for a IT number in Sweden:

- Exemption for small businesses (as of 1 July 2022) – 80.000 SEK (ca 8.000 EUR) per fiscal year, and the annual taxable turnover has not exceeded this limit during the two preceding years.
- Application of the special scheme for acquisitions by taxable persons not entitled to deduct input tax and by non-taxable legal persons – 90.000 SEK (ca 9.000 EUR)
- Application of the special scheme for distance selling – 99.680 SEK (ca 10.000 EUR) per annum.

Please note that the thresholds stated above are not an exhaustive list of circumstances requiring local IT registration.

By taxable turnover is meant the turnover excluding VAT, thus the total allowed turnover will vary depending on the VAT rate applied to the specific business. There are exceptions where the stated above does not apply, i.e., a business should register for VAT even though they do not meet the stated criteria.

Any business is, however, allowed register themselves for VAT even though the annual turnover has been below the stated limit, or the business is newly established. In practice, most Swedish business would have a VAT number irrespective of their business entity type.

Sweden IT number format: SE123456789012 [Country Code SE + 12 Characters]

³ For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

4.2. Process to switch to e-Invoicing

Even though many countries encourage or even mandate e-Invoicing, there may be specific requirements on the Trading parties – typically the Supplier – before starting an e-Invoicing program. This section provides a brief overview of such requirements.

Item	Commentary
Actions towards authorities, required in order to enable electronic processing instead of conventional processing	No explicit requirements
Actions between the trading partners, e.g. customer acceptance, agreement, etc.	- No explicit requirements - E-invoices can be only used if the buyer has approved the use of such invoices.
Transition period from the moment of starting e-invoicing during which, e.g. parallel invoicing may be allowed	No explicit requirements

4.3. Outsourcing invoice issuance function

Many companies decide to outsource the issuance process of e-invoicing to third parties who have the necessary infrastructure and knowledge of implementing and executing e-Invoicing. This may be driven by a technical limitation or local regulatory requirements. However, before doing so, it is highly recommended that a supplier investigates whether such outsourcing is permissible and whether any requirements must be fulfilled.

Item	Commentary
Whether outsourcing of invoice issuance (creation) is allowed or not	Allowed
Whether statement of outsourced issuance is required on the invoice	Not required
Whether outsourcing agreement is required between the taxpayer and the third-party is performing actions on its behalf	- Explicit agreement strongly recommended - The supplier and the third person themselves may agree on the conditions for outsourcing the invoicing in accordance with the parties' commercial practices or special circumstances. However, it should be in the interest of the parties that the conditions for outsourcing invoicing are clarified in the outsourcing agreement.
Content and formality requirements to the Outsourcing agreement between the taxpayer and the third-party	- See above - The outsourced third-party must send a copy of each invoice to the seller

Whether any notifications to or derogations from authorities are required in the specific jurisdiction for outsourced issuance	• Not explicitly required
Whether, and which, requirements exist to the outsourced party to be able to act on behalf of the taxpayer	• Not explicitly required

4.4. Outsourcing invoice receipt function

Due to the unique nature of the AP process, it may be required for the buyer (invoice receiver) to have an explicit agreement, or other permissions to be put in place for Service Providers to conduct invoice receiving functions on behalf of them.

Sweden has no explicit requirements on the outsourcing of the function of receiving invoices (similar to the function to issue invoices as outlined above).

5. Document processing

5.1. Format and other technical requirements

Globally, a multitude of e-Invoicing formats and infrastructures exist. Local regulators often offer or mandate the use of certain formats, standards, or platforms for the transmission or delivery of invoices or other tax-related documents. Pagero has the technical depth and experience to support country-specific technical requirements globally.

Item	B2G	B2B
Mandated document format(s) for exchange with mandated Gov platform(s) and/or between the trading parties	• Peppol BIS Billing 3 recommended by SFTI • Other EN compatible formats may be used upon agreement • Peppol BIS Catalog Without Response 3 • Peppol BIS Punch Out 3 • Peppol BIS Ordering 3 • Peppol BIS Order Agreement 3 • Peppol BIS Order Agreement 3	• N.a.
Other document format(s) commonly used for exchange between trading parties	• CII format version of PEPPOL BIS 3	• Peppol BIS Billing 3.0 • Svefaktura3 • SFTI Fulltextfaktura • PDF • FINVOICE
Mandated platform(s) required to have connection with for e-document processing	• No mandatory infrastructure	• N.a. • The use of Peppol and service providers is very common
Other platform(s) relevant for e-document processing	• N.a.	• N.a.

Schematron(s), XSD schema or other official mechanisms ensuring document content	• N.a. •	• N.a. •
Routing ID's / codes or other identifiers used in the jurisdiction for counter-party identification and document exchange	• Peppol ID	• N.a.
Other technical aspects	• N.a.	• N.a.

5.2. Communication with Mandatory Infrastructure

Regulations in Sweden foresee the following options on how e-documents can be communicated with the mandatory infrastructure(s):

Communication options	Commentary
Automated	• Allowed
Manual	• There is no mandatory infrastructure in Sweden. However, all authorities must provide a supplier portal for e-invoices
Other options	• There is no mandatory infrastructure in Sweden. However, authorities with more than 50 employees must also offer a supplier portal for product catalogues and orders

5.3. Issuance and clearance process

This section describes the document issuance and clearance process from the supplier perspective.

5.3.1. Domestic documents

This section describes the process for documents created to be transmitted within the given country

B2B: Post-Audit

- (1) Documents can be exchanged with your customers in various formats and via various exchange mechanisms, according to business-related preferences
- (2) The key requirements are to ensure the Sweden-specific document content, document integrity and authenticity, as well as archiving requirements are fulfilled

B2G: Interoperability via Peppol

- (1) Supplier provides invoice data to the sending service provider (SSP)

- (2) SSP/supplier sends the final e-document to the receiving service provider (RSP) / buyer in Peppol format
- (3) RSP/buyer sends the received e-document to the contracting authority in Peppol BIS format
- (4) Return communication from the buyer to the supplier, i.a. receipt acknowledgement, document approval or rejection, is legally speaking optional.

5.3.2. Cross-Border

This section describes the requirements for cross-border outbound documents such as sales invoices

Sweden has no explicit regulations for cross border outbound documents

5.4. Reception and validation process

This section describes the document reception, validation and acceptance processes from the buyer perspective.

5.4.1. Domestic documents

This section describes the process for documents received for purchases or transactions within the given country

Sweden has no explicit requirement that the Buyer must provide to the Supplier confirmation / notification that an e-invoice has been received.

5.4.2. Cross-Border

This section describes the requirements for cross-border inbound documents such as purchase invoices

Sweden has no explicit regulations for EU cross-border inbound documents.

However, importing goods from countries outside the EU, an invoice written in a foreign language shall have a translation, and the contents must include the information below:

- Name and address of the seller
- Name and address of the buyer
- Date of issue
- Invoice number
- Number and type of packages, gross weight and how the packages are marked
- Trade description
- Quantity of the goods
- Price per article
- Discounts and what kind of discounts, if applicable
- Terms of delivery
- Terms of payment

A pro forma invoice may be used for deliveries free of charge, e.g.

- Substitute (replacements) and guarantee goods
- Samples, and advertising items
- Gifts
- Returned goods
- Printed advertising material

As previously mentioned, supplier (including Foreign) e-invoicing applies to all invoices that are the result of purchases in accordance with one of these procurement laws:

- LOU (2016: 1145)
- LUF (2016: 1146)
- LUFs (2011: 1029)
- LUK (2016: 1147)

5.5. AoR (response) process

In Sweden, there are no explicit requirements.

5.6. Mandatory Infrastructure validations

Some tax regimes require businesses to send tax documents to a predetermined hub either before, shortly after issuing invoices. Generally, a hub that requires this will send a reply to the issuer. This reply can be expressed as a clearance/ approval response, rejection, semi approved, etc.

In Sweden, there is no mandatory infrastructure conducting validations. However, the most common way to submit a document is through Peppol network. Every Peppol document is validated by the sending service provider before entering the Peppol network.

5.7. Invoice presentation / copy

Some regimes require a visual presentation of the invoice file to be transmitted along with the structured invoice file. This section describes if there is any regulation concerning visual or image-based presentations of invoices as a copy for the original or vice versa.

There are no explicit requirements on marking duplicate or copies of invoices.

Issuing a PDF Presentation (a human-readable duplicate) when Tax invoices are issued in machine-readable format files can be confusing. To ensure the correct management of original documents, in addition to technical controls, Pagero Online adds "Copy Tax Invoice" on PDF Presentations where Tax invoices have been issued as machine-readable format files.

5.8. Distribution between taxpayers

This section explains how and if trading parties can send invoices between each other. In some cases, hubs also distribute the tax document to the buyer.

There are no specific guidelines in Sweden. The trading parties are free to agree on the exchange mechanism for e-invoices. It is the customer who informs the supplier how you can send the invoice to them.

Item	Commentary
Push communication	No explicit requirements
Pull communication	No explicit requirements
E-mail distribution	- B2B: Allowed - B2G: Not allowed
Webportal⁴	- B2B: Allowed via any third-party portal - B2G: Some local authorities have set up their own web portals
Scanning inbound invoices	No explicit requirements
Scanning outbound invoicing	No explicit requirements

5.9. Rectification process

This section will express the process that needs to be taken when there is an error in an invoice, how it is to be handled, and corrected by both buyer, seller, and if a notification needs to be delivered to the tax authority.

Rectification process	
What are the options to correct an invoice if an incorrect IT rate, exemption or reverse charge is applied on the invoice	- Credit note - From 1 July 2021, credit note issuance can be waived for some instances: - The buyer is unknown to the seller, e.g., for payments of goods and services in vending machines - The buyer has died - The company (the buyer) has been dissolved due to insolvency or liquidation
What are the options to correct an invoice if the customer returns the goods	Credit note
What are the options to correct an invoice if the customer paid too much	Credit note

⁴ Note, however, that prior to using an external portal, like Pagero's Webportal, Suppliers are required to already have an invoice / invoice data in their internal accounting software. Portals are not designed for the purpose of replacing internal accounting but are a mechanism to make invoices available for the Buyer. Recommended only for businesses issuing fewer than 100 invoices annually.

What are the options to correct an invoice if the supplier agrees to a discount after the invoice was issued to the customer	• Credit note • The supplier and the buyer can thus agree that the discount will not change (reduce) the amount of VAT and in that case, there is no requirement for a credit note.
What are the options to correct an invoice if the invoice misses data such as name, address, IT number, invoice reference, etc.	• Supplementary document including the missing or incorrect information
Other scenarios with different correction option	• If it is an incorrect material assessment which means that the invoice lacks information on the VAT amount. The supplier must issue a new and correct invoice.
Party entitled to issue a credit note if the invoice was issued by the supplier (i.e. no self-billing)	• The supplier • In the name of the supplier and on his behalf by a third party (outsourcing).
Allowed to draft a 'waiting' document/interim document' in the absence of a purchase invoice and report IT as due and deductible on the basis of this document	• No

5.10. Coexistence of paper and electronic invoices

Item	Commentary
Whether parallel invoicing (issuance and exchange of the same document in several formats, e.g. electronically and on paper) is allowed and/or whether there are any regulations surrounding it	• There are no specific requirements, however, is recommended to be avoided
Whether the jurisdiction allows for document (e.g. invoice) dematerialization, i.e. destruction of the original paper invoice, for processing and/or archiving	• Allowed
Whether any conditions apply, and which, to the dematerialisation	• After transferring to another format, the invoice may be destroyed from the fourth year after the end of the calendar year, i.e., paper invoice may not be destroyed immediately after the scanning • Archiving of the digitalized document shall follow the regular archiving period rules • No explicit eSignature requirements
Whether the jurisdiction allows for document (e.g. invoice) materialization, i.e. destruction of the original electronic document, for processing and/or archiving	• Allowed
Whether any conditions apply, and which, to the materialisation	• The choice whether the Supplier archives the invoice in electronic or paper Form

	depends on the way the company presents its books, i.e., if internal accounting is done digitally, then the electronic form should be archived, while if the accounting is done physically, then the Paper form should be printed and archived • If the Buyer presents accounting in paper form, but received e-invoice, such should be printed, and the printed version archived. The e-invoice may, be destroyed four years after the end of the accounting year that was issued
--	---

5.11. Contingency invoicing

This refers to the process for e-invoicing if any mandatory infrastructure is inaccessible. If temporary measures are available, or allowed, to facilitate invoicing during the downtime.

There are no regulations in Sweden regarding contingency scenarios

6. Document content requirements

6.1. Document types

Item	Commentary
Documents mandatory for issuance by supplier	• Complete invoice • Credit note • B2G: Peppol BIS Catalogue, Peppol BIS Punch Out 3
Documents mandatory for issuance by buyer	• G2B: e-Orders • B2B: No mandated documents

Item	Commentary
Self-billing allowed	• Yes, only if the following two conditions are met: ◦ There is a pre-agreed agreement⁵ between the seller and the buyer ◦ There is a procedure for the seller's approval⁶ of each invoice • An invoice issued by the buyer must contain the information "självfakturerings" (self-invoicing)
Simplified invoice allowed	• Yes • Total amount of the invoice < SEK 4,000 (ca. 376 EUR) including VAT • The commercial use in the relevant business sector, administrative practice, or the technical conditions for the issuance of the invoice make it difficult to comply with all the requirements.

⁵ There is no requirement that the agreement between the buyer and the seller be in writing. It should be possible to leave it to the parties to decide this issue in accordance with the parties' commercial practices or special circumstances

⁶ There is also no requirement that the procedure for the seller's approval of each invoice is in writing. It can therefore take place according to so-called conclusive action in that the seller does not act in connection with the invoice issued by the buyer. It is therefore sufficient for the seller to include the invoice in his accounting

- The invoice is a credit note (in certain case)

6.2. Document numbering

This section outlines the requirements to the sequential numbering of invoices and, where applicable, other documents.

6.2.1. Document numbering by the taxpayer

Item	Commentary
A sequential number, based on one or more series, which uniquely identifies the invoice	• Yes
Different series of sequential numbers allowed (e.g. a separate sequential numbering for intercompany billings, credit notes, etc.)	• Yes
Allowed to start a new sequential numbering every year	• Yes
Worldwide numbering on legal entity level allowed provided that gaps can be explained	• Yes
Required that the numbers follow the date of issuance (i.e. is it true that an invoice with number 2 cannot have an invoice date older than the invoice with number 1)	• Yes

6.2.2. Additional document numbering

This section should outline any additional numbering, e.g. provided in addition by the tax authority or that must be generated by the taxpayer based on specific specifications.

There is no additional document numbering in Sweden.

6.3. Indirect tax (IT)⁷ rates

This section illustrates the applied IT⁸ rates and provides a non-exhaustive list with examples of goods and/or services that fall within specific IT rates. IT rates that differ between different administrative units are clearly outlined.

Indirect tax rates		
25%	Standard	All other taxable goods and services

⁷ For the purpose of this document, IT refers to Indirect Tax, including, but not limited to Value-Added Tax (VAT), Goods and Sales Tax (GST), Sales tax, etc.

⁸ Local name "Mervardeskatt" or MOMS

12%	Reduced	Hotels, camping, certain works of art, food, restaurant services and repairs of certain goods
6%	Reduced	Printed products (books, newspaper etc), entrance fees to certain performances and sports events, demonstration of zoos and nature areas, library and museum activities, transfer and assignment of certain economic rights, use of sports facilities, passenger transport
0%	Zero	Medicines supplied on prescription or sold to hospitals; printing and other services related to the production of magazines for non-profit making organisations; intra-community and international passenger transport
	Exempt	13 kap. ML (Swedish VAT Act) contains provisions that specifically state which sales of goods and services are exempt from tax. It is updated over time

6.4. Mandatory IT invoice content

The section below illustrates the minimum legal requirements related to the content of invoices issued according primarily to the indirect tax regulations of Sweden. Please note that other additional content requirements might apply in addition, i.a. of technical character.

General	
Required to mention the word "invoice"	• No, but recommended
Required that the invoice is issued in the language of the country who is entitled to impose the invoice requirements:	• No
Sequential numbering	• Yes, see section 6.2 above
Required to mention copy or duplicate in case a copy is issued	• No
Reference in case of outsourced issuance	• No

Supplier data	
Full legal name of the supplier	• Yes
Allowed to abbreviate or shorten the legal name of the supplier	• No • Abbreviations are not accepted in general unless it is known in business world, such as "LKAB" and "SAS".
Full address of the supplier in country of establishment	• Yes
Allowed to mention the PO box address instead of the legal address of the supplier	• Yes
IT identification number/sales tax number from the supplier in the country where the supply takes place for IT purposes	• Yes, if a registration is available in the country of supply
IT identification number of the supplier in the country of establishment	• No

Information (i.e. name, address, IT number) of the fiscal representative of the supplier (if appointed)	• No
Legal form of the supplier	• Yes
Trade register number of the supplier	• Yes (Organization Number)
Company Registry data of the supplier (e.g. court registration, address of chamber of commerce)	• No
Place of legal seat of the supplier (Headquarters)	• Yes
Other supplier data	• No

Customer data	
Full legal name of the customer	• Yes
Allowed to abbreviate or shorten the legal name of the customer	• No • Abbreviations are not accepted in general unless it is known in business world, such as "LKAB" and "SAS".
Address of the customer in country of establishment	• Yes
Bill-to address when it is different from the registered address of the customer	• No
Allowed to address the invoice to a Post Office Box address instead of the legal address of the customer	• Yes
IT identification number in the country where the supply takes place for IT purposes in case of domestic supplies (if available)	• Yes
IT identification number of the customer in the country of dispatch for invoices issued for exempt export supplies	• No
IT identification number of the customer in another Member than the Member State of dispatch for intra-Community supplies	• Yes
Information (i.e. name, address, IT identification number) of the fiscal representative (if customer has appointed a fiscal representative)	• No
Other customer data	• No

Transaction data	
Date of issue	• Yes

Date of supply (chargeable event)	Only if it differs from the invoice date.
Date of prepayment	Yes
Description of the goods/services	Yes
Quantity of the goods supplied or the extent of the services supplied	Yes
Purchase order number	No
Shipped from location (for the supply of goods)	- No, but recommended - Especially in case of Cross-Border transactions
Shipped to location (for the supply of goods)	- No, but recommended - Especially in case of Cross-Border transactions
Status of the goods (e.g. in bond, in free circulation)	- No, but recommended - Especially in case of Cross-border transactions
Incoterms	- No, but recommended - Especially in case of Cross-border transactions
Other information on the supplied goods/services required (except in case of intra-Community supply of new means of transport)	No

Financial data	
Taxable base per item (unit price excl. IT)	Yes
Total taxable base per IT rate or exemption	Yes
IT rate applied	Yes
Total IT amount calculated per rate	No, but recommended
Total IT amount payable	Yes
Discounts/rebates if not included in the unit price	Yes
Total gross amount (including IT)	No, but recommended
Mandatory to mention the total IT amount due in the national currency	- Yes - VAT amount should be stated in EUR if EUR is accounting currency (Sweden allows both SEK and EUR as accounting currency)
Which other amounts (i.e. none, only the total IT amount) must be mentioned in the national currency of your country	None
Exchange rate (if the invoice is not issued in the local currency)	No
Which exchange rate must be applied in order of priority	The most recent average exchange rate determined on the most representative

	foreign exchange market in Sweden at the point of taxation. • The most recent exchange rate published by the European Central Bank at the point of taxation. • Since no average exchange rate is recorded on the most representative foreign exchange market in Sweden, the Swedish Tax Agency considers that the central rate determined by Nasdaq OMX Stockholm AB, which is published on the Swedish national banks webpage should be used instead.
Terms of payment	• No, but recommended
IBAN and BIC number of supplier	• No

Specific references for invoices	
Invoice reference in case of IT exemption or reverse charge	• Yes
List the required references in case of exemption or reverse charge	• No fixed requirement on a specific reference text format it is rather towards guiding principles of what such text should include. e.g. reference to the actual applied exemption or to relevant paragraph in local VAT act or EU directive etc. • In the case of an exemption, reference to the applicable provision of the Swedish VAT Act, the corresponding article in the EU VAT Directive, or any other reference indicating that the supply of goods or services is exempt; • The Tax Agency actually accepts that you only state "VAT exempt" or "Undantag från skatteplikt" in Swedish • Where the customer is liable for the payment of the VAT, the mention "Omvänd betalningsskyldighet" or "Reverse charge";
Allowed to refer to the appropriate provision in Directive 2006/112/EC for: - "reverse charge" for supplies subject to a reverse charge mechanism; - "supply is taxable in the country of the recipient" for B2B supplies of services; - "exempt intra-Community supply - article 138 VAT	• Yes

Directive"; - "Exempt export - article 146 VAT Directive"; - "simplification for triangular sales - article 141 VAT Directive - " Transfer of own goods- article 17 VAT Directive"?	
Required to specifically mention 'margin scheme - travel agencies', 'margin scheme - second hands goods', if applicable	• Yes • Required statements in invoices: ◦ Profit margin taxation for second-hand goods (Vinstmarginalbeskattning för begagnade varor) ◦ Profit margin taxation for works of art (Vinstmarginalbeskattning för konstverk) ◦ Profit margin taxation for collectibles and antiques (Vinstmarginalbeskattning för samlarföremål och antikviteter) ◦ Profit margin taxation for travel agencies (Vinstmarginalbeskattning för resebyråer)
Reference required if the transaction takes place outside the EU as a result of the Use and enjoyment provisions	• No
Specific other reference required, e.g. in case of barter transaction, prepayments, etc. (not self-billing or special margin schemes)	• No
Specific references required in case invoicing is outsourced	• No
Reference to 'cash accounting scheme' in B2B sales in case the IT is due by the supplier upon receipt of the payment/IT is deductible by the customer upon payment	• No
Other specific requirements/references to be mentioned on an invoice	• In addition to the requirements in the Swedish VAT Acct, an invoice from a Swedish limited liability company should under the Companies Act contain the following information:

	• Full legal name • Place of legal seat • Registration number It is also recommended, although not a legal requirement, that the invoice states the following information: • Terms of payment and information on late payment interest • The seller's plus of bank giro number • Information whether the seller has approval for F-tax • The type of invoice in question such as "invoice", "credit invoice", "interest invoice", etc. • Sender and receiver references • Reference to any orders or quotes • Delivery terms
--	---

6.5. Simplified invoice

The Supplier is not always obliged to issue a complete invoice. In certain scenarios, they may be able to issue a so-called simplified invoice.

Simplified invoicing	
Possible to issue simplified invoices for certain supplies	• Yes
Maximum amount for simplified invoices	• SEK 4,000 (ca. 376 EUR) including VAT
Other supplies for which a simplified invoice can be issued	• Relevant depending on administrative and technical practice such as for goods and services are settled via payment terminal such as fuel charges, road tolls parking fee etc. where it is not possible to identify the purchaser
Simplified invoices limited to certain type of supplies	• Yes
Simplified invoices not allowed for certain transactions	• Yes • It is not permitted to use simplified invoices for intra- Community turnover.

Minimum content requirements on a simplified invoice	• Date of issue • Identification of the supplier • Description of supplied goods or services • VAT payable amount or enough information to calculate such amount • If the simplified invoice is a credit note; clear reference of indication of the original invoice that is being credited, and information of what is being credited.
Invoices subject to the national invoice requirements (not self-bills)	• Invoices issued by a non-established supplier on which IT is due by the supplier (mini one stop shop) • Invoices issued by an established supplier that are taxable in another country but where IT is due by the customer • Invoices issued by an established supplier that are taxable in our country
(other) Invoices subject to the national invoice requirements (not self-bills)	• N.a.

Pagero Online does not support the creation of simplified invoices as they typically do not correspond to the business requirements of Buyers.

6.6. Rectification document

In Sweden, credit notes must be issued as rectification documents. A credit note should include at least the following information:

Specific references for rectification documents	
Must the word "credit note" be mentioned	• No, but recommended
Reference to original invoice required on a credit note	• Invoice number • Exceptional cases, ◦ Impossible to refer to a special original invoice ◦ Question of a very large number of origin invoices.
Clear indication required that the amount mentioned on the credit note is crediting earlier amount (e.g. minus sign '-')	• Yes
Reason for credit required	• No, but recommended

Sequential numbering	
Separate sequential credit note numbering required	• No
Allowed to issue one credit note to correct different invoices	• Yes

Pagero Online creates corrective invoices according to the content requirements of the Complete invoice.

6.7. Optional content

This section outlines briefly whether and how the trading parties can provide additional content in the technical e-document format mandated or otherwise prescribed in the specific jurisdiction.

No explicit requirements in Sweden

7. Integrity and Authenticity

Ensuring the integrity of the content, as well as the authenticity of the origin (I&A) of an invoice, is an obligation for both the Supplier and the Recipient.

The purpose of this section is to further clarify the local I&A requirements on B2B invoices, as well as outline whether different requirements apply to B2G invoices. The review is done both from the Supplier's and the Recipient's perspective, as varying rules may apply.

Item	Supplier	Recipient
Whether it is mandatory to ensure I&A in the jurisdiction	• Yes	• Yes
Which methods for ensuing I&A are provisioned for	• Any means Business Controls, EDI, e-signature	• Any means Business Controls, EDI, e-signature validation •
Which requirements apply for I&A methods if ensured by a third-party (outsourcing)	• No explicit requirements	• No explicit requirements

7.1. e-Signature

Even where e-signature is not an explicit requirement, Pagero recommends that our customers apply it as, globally, it is the most widely accepted legal means of ensuring I&A for business transactions.

In practical terms, this results in the same evidential position for eDocuments as for paper documents. This unique feature of e-signature provides an exceptional level of legal certainty.

Item	Commentary
e-Signature technical requirements	• Minimum AES is common
Automated e-signing	• Not explicit requirements

Time-stamping of e-signature

- Not explicit requirements

7.2. e-Signature validation

The Recipient of an invoice is often required by law or practice to validate the e-signature on the received invoice. Even for countries where the validation-upon-receipt is not expressly regulated, this is recommended by Pagero for both trading partners to be able to guarantee I&A.

Item	Commentary
Validation upon receipt	• No explicit requirements • However, meeting eIDAS regulation is common.
Time-stamping of validation data	• No explicit requirements

8. Document retention

This section describes archiving requirements regarding the invoicing process and documents handled by Pagero. Please note, additional archiving requirements may apply to your specific documents.

Item	Commentary
Components to be stored (e.g. tax invoice, source documents, audit trail, I&A proof)	• Original tax invoice with signature including certificate or other evidence of integrity and authenticity as appropriate • Source file should be stored for four years if different than tax invoice
Requirements to present stored documents in a specific audit format	• The archive should be easily accessible • The company should consider creating an archiving plan
Legibility, i.e. the ability to read stored e-documents by an untrained eye	• Required
Legibility requirements	• If the original invoice is in a machine-readable format, the taxable person must offer means to provide human readability
Retention period for invoices not related to immovable property⁹	• 7 years for entities obliged to follow the Bookkeeping law (BFL), and for VAT-liable entities, but not obliged to follow the BLF¹⁰
Start point of retention period calculation for invoices not related to immovable property	• From 1 January following the end of financial year for entities following the BLF • From the end of the year the asset was acquired for VAT-liable entities not obliged to follow the BLF
Retention period for e- invoices related to immovable property	• 7 years (as standard) for immovables, unless the adjustment scheme¹¹ applies

⁹ Pagero stores all documents for 90 days due to data privacy and security regulations, after which the data is automatically deleted, unless Archive has been selected. Pagero provides long term archiving (for the legally required term, plus one year)

¹⁰ Example of such entities include, but is not limited to, the state, municipalities, bankruptcy estates, trusts.

¹¹ In simple terms, such scheme is applied in the event already acquired asset changes its primary application purpose or transfer of a capital good or immovable property may lead to the right or the obligation to offset tax, in which case the lifespan of such an asset may be extended. More info <https://www4.skatteverket.se/rattsligvagledning/edition/2022.7/321549.html>

	If the adjustment scheme applies, the adjustment period for immovable property is 10 years, in which case the total retention period will be <u>17 years</u> (7 years as standard + 10 years for adjustment)
Start point of retention period calculation for invoices related to immovable property	From the end of the calendar year the asset was acquired
Retention period for other than regular invoices or invoices related to immovable property (if existing):	7 years (as standard) for capital goods, such as equipment, inventories, etc., unless the adjustment scheme applies - If the adjustment scheme applies, the adjustment period for capital goods is 5 years, in which case the total retention period will be <u>12 years</u> (7 years as standard + 5 years for adjustment)
Start point of retention period calculation for other than regular invoices or invoices related to immovable property:	From the end of the calendar year the asset was acquired
Outsourced archiving	Allowed
Archiving abroad¹² and conditions, if any (e.g. notification, derogation, online access, mutual tax assistance treaty)	Storage outside EU requires an application if there is no agreement on mutual assistance with the non-EU country. Storage inside the EU must only be notified.
Other requirements in relation to electronic document retention	No requirements

¹² In certain situations or jurisdictions deviating requirements – typically regarding archiving abroad – may apply to invoices and related documents, e.g. concerning matters of defence and national security. Therefore, Pagero encourages customers to inquire for and receive an explicit written statement from the local tax authority stating that the archiving of such documents outside of the taxpayer's country is permitted. Pagero in a capacity of a third-party may not apply for derogations or clarifications of this nature on behalf of a taxpayer.

9. Other transactional documents

Along with invoices, countries may have regulations relating to other trading documents. The purpose of this section is to provide a selective (not exhaustive) overview of the regulation of other transaction-related documents of importance.

Document	Commentary
Purchase order	• Yes, see section 10.1
Rectification document	• Yes, see section 6.6 above
Payment instruction	• No explicit requirements
SAF-T (or alike) reporting	• No explicit requirements
Transportation documents	• No explicit requirements
Other	• N.a.

10. Other requirements

This section highlights certain aspects of the local regulations and infrastructure that differ from Pagero's General invoice processing and our standard country compliance investigation.

10.1. Public procurement

According to the [Ordinance on electronic information exchange \(2003:770\)](#), except for national defence related unites or are unsuitable for confidentiality or security reasons, all authorities with more than 50 employees shall, in its handling of the ordering process, have the capacity to use the following standards:

- Peppol BIS Catalog Without Response 3
- Peppol BIS Punch Out 3
- Peppol BIS Ordering 3
- Peppol BIS Order Agreement 3
- Peppol BIS Despatch Advice 3

Handling of orders is limited to purchases subject to [VAT](#) in accordance with Chapter 11. Of the VAT Act. Further, purchases made through personal expenses or alternatively paid for with a card where the authority is responsible for payment are not covered by the requirement to process orders for goods and services electronically.

10.2. eProcurement Directive implementation

In 2018, the Parliament (Riksdag) decided to adopt the Act regarding e-invoicing in public procurement. All invoices for services and supplies to the public sector must be sent electronically. According to statutory requirements, buyers in the public sector have been able to receive invoices in the Peppol BIS Billing 3.0 format as of 1 April 2018.

If the public sector is a supplier, the public sector is also obliged to invoice their purchases electronically in the Peppol BIS 3.0 format or another agreed-upon format.

10.3. Adoption of e-commerce

Efforts are being made to increase the use of Peppol and Sweden plays an active role in OpenPeppol where support for the European Standard on e-Invoicing is being prepared. The ambition is to use the Peppol specifications as is, without national blends.

10.4. Indirect tax reports

VAT Return

- Entities report VAT in a VAT return, the easiest way to do so being [online submission](#).

If the accounting period should be an entire tax year, taxpayers may request to be allowed to report VAT once per calendar month or once per calendar quarter. Normally, such a decision will apply for at least twenty-four consecutive calendar months. If there are special reasons, the Swedish Tax Agency shall decide that taxpayers must report VAT every calendar month or calendar quarter without having to request this. If the accounting period is changed at the taxpayer's request from one to three months or vice versa, the new accounting period will normally apply from the next calendar quarter. Should a change be made from or to an entire tax year, this will normally begin to apply from either the start or the end of the current tax year. This means that previous accounting periods that have already expired shall not be changed.

- Which accounting period must taxpayers have?

Which accounting period taxpayers must have is governed by a calculated taxable basis but taxpayers have certain scope for choosing their own accounting period.

Taxable basis	Accounting period	Alternative Max.
SEK 1 million	Tax year	Calendar month or calendar quarter
Max. SEK 40 million	Calendar quarter	Calendar month
More than SEK 40 million	Calendar month	None

11. Country-specific processing

This section outlines how the Pagero General eInvoicing process has been adapted to the local requirements to ensure compliant local processing.

11.1. Document issuance (AR) with Pagero

B2B

- (1) PAGERO ensures that documents can be exchanged with your company and your suppliers and customers, from your company perspective in a single format to ensure 100% digital AR and AP processing, while on the other hand in the preferred format and exchange mechanism with your trading partners
- (2) PAGERO ensures the country-specific document content, document integrity and authenticity, as well as archiving requirements
- (3) PAGERO supports unlimited number of document formats and multiple exchange mechanisms
- (4) PAGERO supports such exchange channels as: Interoperability, Peppol, EDI, portal, e-mail, capturing / scanning, etc.

B2G Document Issuance: e-Invoices

- 1) Supplier provides data in supplier preferred format to PAGERO
- 2) PAGERO performs i.a.
 - a. content validation,
 - b. content enrichment and conversion,
 - c. document format conversion, etc.
- 3) PAGERO returns the finalized e-invoice to the supplier
- 4) PAGERO sends the final e-document to the receiving service provider (RSP) / buyer in Peppol BIS 3.0 format
- 5) RSP sends the received e-document to the contracting authority
- 6) PAGERO archives all relevant document on behalf of the supplier

11.2. Document reception (AP) with Pagero

B2B

- (1) PAGERO ensures that documents can be exchanged with your company and your suppliers and customers, from your company perspective in a single format to

ensure 100% digital AR and AP processing, while on the other hand in the preferred format and exchange mechanism with your trading partners

- (2) PAGERO ensures the country-specific document content, document integrity and authenticity, as well as archiving requirements
- (3) PAGERO supports unlimited number of document formats and multiple exchange mechanisms
- (4) PAGERO supports such exchange channels as: Interoperability, Peppol, EDI, portal, e-mail, capturing / scanning, etc.

B2G Document Reception: e-Orders

- (1) Contracting Authority provides data in preferred format to Sending service provider (SSP)
- (2) SSP sends the e-Order to PAGERO in Peppol BIS format
- (3) PAGERO performs i.a.
 - a. content validation,
 - b. content enrichment and conversion,
 - c. format conversion, etc.
- (4) PAGERO sends the received e-Order to the Supplier
- (5) - (7) Return communication from the supplier to the Contracting Authority
- (8) PAGERO archives all relevant document on behalf of the supplier

12. Closing statements

12.1. Confidentiality

This General invoice processing description of Pagero Online, our Country Compliance Reports, and other documents provided by Pagero are of confidential nature and are only intended for and may only be used by Pagero's Customers, their employees or other authorized recipients for the purpose or purposes specified and agreed to between the parties. Descriptions, reports, and documentation may not – neither in full nor in parts – be copied or otherwise distributed to third parties without Pagero's prior written consent.

12.2. Disclaimer

In order to establish a relationship based on trust and transparency with our Customers, Pagero provides its General e-Invoice and eArchiving processing descriptions of Pagero Online as well as Pagero's Country Compliance Reports. These documents are intended to enable our Customers and their tax advisors to assess how Pagero has interpreted the relevant legislation and implemented it in our processes in order to support our Customers to fulfil their legal obligations.

We would like to remind our Customers that, according to tax and accounting regulations, the outsourcing of any process to third parties (such as issuance, compiling, processing, receipt, or archiving of e-Invoices), will not lead to a shift of liability, the liability will remain with the Customer. Accordingly, the taxable person always remains responsible towards the local authorities for ensuring their e-Invoice compliance, and for fulfilling accounting and reporting requirements. We want to emphasise this, in the light of that there can be potentially conflicting regulations on regional, national, or international levels.

Pagero endeavours to only include and provide accurate and up to date information. However, Pagero makes no guarantees as to the accuracy of any statement, information or advice provided by Pagero, whether in writing or verbally. The Customer must make an informed decision about whether to adhere to and follow such recommendations or not. The final decision and responsibility regarding tax, accounting, and reporting issues rest with the Customer.

Revision history

Date	What has changed
16 May 2017	Document created
08 January 2019	Updates and changes Section 9: Law on Electronic Invoices (2018: 1277) Updates on the e-Ordering mandate and eProcurement directive implementation
27 November 2020	Updated dates, Added Section 11 process flows
14 April 2021	Updated Section 5 cross-border orders. Section 10 regulations for public procurement
20 July 2022	General CCR Review and Update
